QUEENSLAND MINERAL INDEX
AND GUIDE.

With Numerous Diagrams and Tables, and an
Atlas of 36 Maps,

BY

B. DUNSTAN,

GOVERNMENT GEOLOGIST.

Issued under the Direction of

The Hon. J. G. APPEL. Minister for Mines.

BRISBANE:
By Authority: Anthony James Cumming, Government Printer.

1913.

INTRODUCTION.

The State of Queensland, including the islands on the eastern coast and in the Gulf of Carpentaria, contains within its boundaries an area of 673,040 square miles, of which 78,000 square miles are officially reserved as gold and mineral fields, 73,000 square miles are made up of coal measures, 40,000 square miles are opal-bearing, while 250,000 square miles have been proved to contain enormous supplies of artesian water.

Throughout the whole of the eastern portion of the State gigantic belts of country carrying a variety of minerals are known to exist, and extend northerly from the border of New South Wales to the extreme point of Cape York Peninsula, a distance of over 1,500 miles, while another large area, principally containing copper, occurs on the extreme western side.

The prospecting operations undertaken in the past have been within confined areas, but sufficient has been done to indicate that many portions, specially in the northern districts, are extremely rich in minerals of commercial value, and offer great financial attractions to those interested in the development of mineral deposits.

For the purpose of systematising the information collected about known mineral occurrences, the compilation of a card index of minerals was undertaken by myself, unofficially, in 1901, and was continued in connection with the Queensland Geological Survey two years after. Since then the accumulation of data has been carried on laboriously and persistently year after year, until the number of references to minerals and localities has reached many thousands. In 1906 the necessity of having the index put into a form for general use became apparent, and the work was modified with that object in view, although it was only after a personal inquiry into the merits of the work by the Hon. J. G. Appel, Minister for Mines, that in 1910 sanction was given to have it prepared for publication. Thereafter, very close attention was given to the modelling of the card index matter to adapt it to book form, and arrangements were made to have a series of maps and diagrams prepared as accompanying illustrations.

Notwithstanding the care taken in collecting and cataloguing the information, and also in eliminating errors, many minor irregularities will be found both in the text and plates, but the Index is the first of its kind ever produced, and the methods adopted in arranging the matter have been on quite original lines. Some of these defects were only noticed after portions of the text had been printed, and then too late to be remedied.

The Index is principally a guide or ready reference to all that is known concerning the mineral wealth of the State, and to make it as complete as possible, 10,000 mineral references and cross-references have been included, which, with other locality references and cross-references, make up a total of about 18,000 entries. In addition to this, 3,000 duplicate entries were written as the result of taking the mineral references in several unofficial publications as original sources of information, which afterwards were found to be only a repetition of previously published information in our own geological reports, and had to be discarded.

The mineral entries are given in alphabetical order, and are also numbered from 1 to 8,236, but many entries have been inserted since this long task was completed, and alphabetical subdivisions of some of the numbers have been necessary.

Most of the mineral entries have been taken from the published reports and record cards of the Survey, and the references to authorities at the end of each entry will be a guide to the source of the information and to the value which may be given to the data, while those which have no references may be considered to be of doubtful accuracy.

During the checking and revising of the proofs a number of unimportant mineral entries were discovered which could very well have been deleted, but the intricacies of cross-references have not permitted this being done. More particularly is this noticeable in the references made to the occurrences of silver with the gold at Charters Towers, Gympie, and other fields, which is practically useless information, although showing the localities where there is an association of minerals, and therefore having some interest from a mineralogical point of view. The index cannot be considered to be exclusively a guide to valuable mineral deposits, as many references are given to occurences which are not, or ever will be, of any commercial value, but it will be a guide to all the minerals and their occurrences, and to all reports containing details about them.

The association of metallic and non-metallic minerals with gangues and country rocks has been closely studied, and thousands of entries have been made giving the minerals which occur with one another. This work will have some practical value, and will also be of great advantage to those who might undertake scientific investigations concerning mineral associations and affinities.

Mineral and geological notes are given under most of the locality and mineral headings, references being made to metallic and non-metallic minerals, also to the gangues or lode matter in which the minerals occur, and to the geological formations and horizons in which the deposits have been formed. The geological notes are condensed descriptions which have been obtained, in most cases, from the publications issued by the Geological Survey, some of which, however, have had to be amended as the result of investigations made for the purpose of bringing up to date the geological data required for this work. A summary of the Queensland Geological Record is given on Plate No. 0, but further alterations are contemplated as a result of geological explorations now in progress.

Mineral discoveries have been made a subject of special inquiry, and old records and reports have been searched for information about the discovery and development of gold and other mineral fields. No records can be found concerning the history of many of the fields, and the year of discovery of others is only approximately correct, but in most instances the notes are fairly reliable and have been checked by a number of authorities.

Under the heading "Prospecting for Minerals" short notes are given for the benefit of those interested in mineral exploration, the appliances and equipment suitable to Queensland conditions, the necessary legal conditions to fulfil in acquiring land for mining purposes, the minerals which may be expected to be found, the geological formations in which minerals occur, and the areas of country in which to search, being some of the subjects dealt with.

The economic value of most of the minerals occurring in the State has been investigated, and a note is given on the uses to which each mineral can be applied. Some of the minerals which are obtainable in great abundance, it will be seen, are of very little value, while others have been found to have a variety of applications.

Locality references have been made as accurately as circumstances would allow, and notes are given regarding latitude and longitude, the counties and districts in which towns and mining centres are situated, and distances from railway stations or seaports. The rapid development of railway systems through mineral-bearing country has resulted in many of our distant mining centres being brought into direct railway communication with coastal towns, and as extensions now in progress approach other mineral centres, the distance from railways of a number of the fields herein given will require amending. All important alterations in the position of towns with regard to railways, however, have been made in each section of the text just prior to going to press, so that the situation of localities from railway bases will be correct for some time to come.

Some difficulty might be experienced in finding the positions of a few of the mineral occurrences in districts whose names in official publications have been recently changed. More particularly does this apply to the large area of country in Northern Queensland once called the Walsh and Tinaroo Mining District, and which is now divided into two portions—the Herberton Gold and Mineral Fields, and the Chillagoe Gold and Mineral Fields. Old geological reports, of which there are several relating to these fields, refer localities to the old district name of "Walsh and Tinaroo," while later reports in describing the same localities refer them to either the Herberton or the Chillagoe Fields.

Under all important towns, railway stations, and seaports, have been placed the names of the mining centres and fields with which they are in communication, and of which they form the bases. This will be found useful in facilitating inquiries concerning routes for the transit of minerals, machinery, supplies, &c., and will also show the importance of the localities from a commercial point of view.

The State is divided into fifteen districts, all of which are described under separate headings. Situation, latitude, longitude, boundaries, areas, and complete lists of counties are given under each district name, together with the principal towns, fields, and mining centres; references also being made to the maps in the Index which show their geographical and geological features.

The latest proclamations of all gold and mineral fields have been collected from *Government Gazettes*, and placed under their respective headings, while references are also made to the year in which each field was first proclaimed. Irregularities occur in the descriptions of a few of the fields, but the proclamations have been reproduced as they were officially gazetted.

Some attention has been devoted to the compilation of the list of 400 coal analyses from the published reports of the Geological Survey and from old departmental records. In this table perhaps no great value can be placed on the results given of analyses of coal made many years ago, but the samples tested by the Survey within the last few years have been prepared according to stipulated conditions and have been analysed with all possible care.

The table of artesian and sub-artesian bores included in the text is made up of 1,663 bore records, and contains all that is available concerning names, localities, positions, depths, temperatures, pressures, analyses, and geological and mineral notes. Each bore, or locality group of bores, whether sunk by the Water Supply Department, Railway Department, Public Estates Improvement Branch, or by private owners, has its own index number, and this number is retained in all cross-references throughout the text. Occurrences of salt, coal, gas, and limestone in bores are also recorded, references to which are made under both mineral and locality headings.

The statistics of mineral production have been very carefully recorded, the figures being as accurate as a thorough examination of the old official records of the Department of Mines could possibly make them. Nearly all the statistical tables represent, in the ordinary way, the annual values and quantities of minerals produced in districts and fields, but a new feature has been introduced in the District Mineral Summary Table to show at a glance (1) the total quantity and value of each mineral in each district or field, (2) the total value of the whole mineral production in each district or field, and (3) the total value of the whole production of each mineral in the State. The table also gives (4) the quantities of each mineral in each district in percentages of the whole State's production of that same mineral, together with (5) a value summary of each district's total production in percentages of the State's total production. In this table annual summaries in values and quantities are omitted.

A number of statistical diagrams are also included to illustrate, graphically, the yearly fluctuations in all mineral productions, while under all important minerals general reviews are given of their production and values. Under the names of the districts and principal fields statistical notes are also given concerning the production and value of their most important mineral products.

Bibliographical references to all goldfields, districts, towns, and other localities have been collected and placed under their respective headings. Lists of the principal reports bearing on mineral occurrences are given under mineral names, and under the names of authors are the titles of reports contributed by the officers of the staff. A general list of the publications of the Geological Survey since it was established in 1879 is also included, together with a list of geological and mining reports and maps published in the "Queensland Government Mining Journal" from its first issue in the year 1900, also a list of Supplementary Reports written by geologists and others, which have appeared in the Annual Reports of the Department of Mines since 1883.

While this bibliographical portion of the index was being compiled a large number of references and notes were accumulated which, it is hoped, will be published later on as a Bibliographical Contribution to the Mineralogy, Mining, Geology, Geography, and Explorations of Queensland.

In the Geological Survey Publications many references are made to the minerals of Papua (New Guinea), more particularly in the "Report on Geological Observations in British New Guinea," published in 1891. Several mineral occurrences have been recorded since that year, but for all practical purposes our indexing of Papuan minerals may be considered to have ceased when the mineral notes were extracted from the above-mentioned publication.

References to Queensland minerals appearing in the Geological Survey Reports have all been recorded up to No. 237 Publications (1912), beyond which the cataloguing has not been continued, although odd references to minerals and localities have been inserted whenever possible before the proofs were marked for press, the last portions of which were made ready in November, 1913.

Black type numbers and words in the text require some explanation. In the marginal column black type numbers indicate the mineral references following to be of more than ordinary importance, while in the text lines they show out the prominent minerals associated with others of minor importance. Names in black type at the beginning of entries are those of minerals, prominent localities, and important subjects, while in the body of the text black type names indicate the first entry of each mineral occurrence under each district or field. Numbers on top of pages on the inside margin are a guide to where the mineral entries are to be found, numbers in the centre referring to pages. Black type words on the top of left hand pages indicate the first words on those pages, while the words on top of the opposite pages show the last words, so that the first and last words are seen immediately on the pages where the book is opened.

All our geological publications have been examined for mineral synonyms, which with cross-references and variety names have been listed under the heading "Minerals of Queensland." No trouble, therefore, should be experienced in finding the adopted name of each mineral, even if recorded under several other names. In this synonym list, the black type names will be those used in future by the Geological Survey staff, and the confusion resulting from the use of several names for the one mineral will disappear.

The plates accompanying the text include one series of ten maps showing, on a small scale, the latest revisions in the boundaries of the geological formations, a second series, also of ten maps, defining the boundaries of the fifteen districts of the State and their county subdivisions. A third series illustrates the geological features of the most important gold, mineral, and coal fields, while a small-scale map shows the general geographical features of the whole of the State. Another small map indicates the positions of the important areas of mineral production in the State, the actual and potential values of each area being given in percentages of the whole value of the State's mineral production. The frontispiece consists of two circular diagrams, respectively illustrating actual and potential mineral values, each circle being divided into sectors of various sizes, representing districts or mining centres, the circumference of the circle being equivalent to their combined mineral production—that is, to the total production of the whole State. The actual values are absolute, the potential values being a diagrammatic expression of opinion regarding future mineral production. All these maps, thirty-six in number, have been produced from sets of coloured drawings specially prepared for the purpose, and will be found indispensable as a guide to the position of a large number of localities, and to the mineral occurrences and geological features referred to in the text.

ACKNOWLEDGMENTS.

In drawing attention to the assistance rendered by the officers of the Geological Survey Staff in connection with the Index, I must first acknowledge the services of Mr. Russell Dixon, an officer who has been closely associated with me in the work almost from its inception. His duties included, amongst other things, the card indexing of the mineral occurrences, the working out of a system of cross-references, compiling a number of mineral statistical tables, and checking the index cards with the printer's proofs. It is with a feeling of deep indebtedness that I bear testimony to the energy, persistence, suggestiveness, and thoroughness he has displayed during all the years the work has been in hand.

Mr. J. Smith, with his practical knowledge of minerals, has also been of great assistance in many ways, more particularly in checking mineral and locality entries and in collecting notes on the uses of minerals.

Mr. D. Fox, under the supervision of Mr. W. H. Greenfield, executed the drawings for most of the illustrations, this portion of the work entailing very close attention for over a year. Some of the maps were rather finely drawn for the necessary reduction to their present scale, and the results, as given herein, hardly do justice to Mr. Fox's fine draftsmanship.

Messrs. Pearce, Graff, and Cadell ably assisted in the drawing of the maps, and Mr. J. Byrne tabulated several hundred coal analyses and worked out their theoretical calorific values.

Messrs. Cameron and Ball each contributed original mineral notes and entries, but nearly all the work of these and other Assistant Government Geologists has been published in the Geological Survey Publications, to which numerous references are made in the text.

Of those outside the Geological Staff who contributed to the work, mention must be made of the clerical staff of the Mines Department, who facilitated the buildng up of the statistical tables, and supplied a considerable amount of data on a number of subjects.

Finally, I have to express my appreciation of the manner in which the work has been executed by the Government Printing Office.

B. DUNSTAN.

December, 1913.

Advice to Prospectors. *See under* Prospecting for Minerals.

Afton Downs Run Bores. *See under* Artesian Bores. Nos. 2, 134.

Agate, *var. of* Chalcedony, *which see. Mineral Note:* Large quantities of Agate are to be found about Percyville, to the south of Georgetown, on the Etheridge Goldfield, at the Percy River, at Agate Creek, and at Little River, near Croydon. The Agate deposits at these localities contain stones having a great variety in colour and banded structure. Much of the material is to be found in watercourses, but large areas are to be seen covered in places with loose agate pebbles of all sizes and shapes, derived from decomposed vesicular basalt in the vicinity. Most, if not all, the Agateware on the Queensland market is imported, the low cost of which prohibits the utilisation of the local material by dealers and jewellers.

Agate Cr., br. of Robertson R., Etheridge Goldfield. *Min.Ref.* Agate, *see* 1373; Bismutite, 399; Garnet, 3115; Gold, 3240; Limonite, 5848; Magnetite, 5996; Manganese-dioxide, 6414; Rock Crystal, 7188; Ruby, 2361.

Agate Downs Goldfield—

SITUATION: *See maps,* Pls. 20, 21. 51 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke; also *Co.* Merlin; *Dist.* Gregory North. Centre—about *Lat.* 21° 10′ S.; *Long.* 140° 20′ E. *Discovery:* In 1891.

POPULATION: *See* Cloncurry Mineral Field. AREA: 16,000 acres (25 sq miles).

PROCLAMATION OF FIELD: First and only one, 2nd December, 1891. Now included, by proclamation of 9th January, 1913, in the Cloncurry Gold and Mineral Field, *which see.*

MINERAL STATISTICS: *All included in* Other Goldfields; *see tables and diagram,* Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: **Gold,** *see* 3463-3467; Copper (Chrysocolla), 1492; Iron (Lievrite), 5734.

GEOLOGICAL NOTE: The country consists chiefly of clay and talcose slates, with bands of flaggy sandstone. Gold in wire form is found in quartz veins, and also in the bedding planes of the slates. Large quartz outcrops also occur in the locality. *See* G.S Q. Pub. No. 104 for details.

GEOLOGICAL PUBLICATION: Report—No. 104 (1895), *see under* Geol. Sur. Pub. List for titles.

WARDEN: Stationed at Cloncurry. INSPECTOR OF MINES: Stationed at Cloncurry.

Alice River (Philp) Goldfield—

Situation: *See maps*, Pls. 8 and 9. 80 miles W.byN. of Laura Rail. Stn. (Cooktown line). 147 miles (by rail and road) due W. of Cooktown. *Co.* Warner; *Dist.* **Cook.** Centre about *Lat.*, 15° and 16° S.; *Long.*, 143° and 144° E.

Discovery: 1904, by John Dickie. Population: 3 (1910).

Proclamation of Field: First and only one, Dec. 4th, 1906, as follows:—Commencing at a point bearing south and distant 2 miles from the south corner of Gold Mining Lease No. 18, Peninsular King, being a point bearing about 348 degrees and distant twenty-seven and three-quarter miles from the confluence of Eliza Creek with the Palmer River, and bounded thence on the south by a line bearing east five miles; on the east by a line bearing north ten miles; on the north by a line bearing west ten miles; on the west by a line bearing south ten miles and again on the south by a line bearing east five miles to the point of commencement.

Area: 64,000 acres (100 sq. miles).

Leases: Gold mining leases in force, 2; area, 11 acres (1910).

Mineral Statistics: *All included in* Other Goldfields; *see tables and diagram*, Pls. 36, 46, 46a, 47.

Mineral References: Gold, *see* 3825-3826.

Geological Note: The country rock of the Alice Goldfield is granite. Quartzites and other altered sedimentary rocks occur away to the west, and Desert Sandstones to the east. There are two main reefs, the Alice Queen and Peninsular King, but others exist in the neighbourhood. *See* G.S.Q. Pub. No. 209 for details.

Geological Publications: *Report*—No. 209. *See under* Geol. Surv. List for title. *See also under* Gov. Min. Jour., Report No. 25.

Warden: Stationed at Cooktown. Inspector of Mines: Stationed at Croydon.

Alum (native). *Syn.* Kalinite, *which see.* Occurrences of this mineral are unimportant.

3B. ——. Said to occur on Pinnacle Mountain, near Boonmoo, Chillagoe Railway Line. *Co* Lynd; *Dist.* Kennedy North.

Alumina. *See* Corundum.

Aluminate of Magnesia. *See* Spinel.

Aluminates. *See* Hercynite, Spinel, Pleonaste, Picotite.

Aluminite. *Syn.* Websterite, *which see.*

Aluminium (Al)—

Atom.wt. 27·1; *Sp.gr.* 2·58 (about one-third that of iron). *Colour*, silver-white.

MINERALS: *See* Alum, Corundum, Beauxite, Kalinite, Lazulite, Turquoise, Websterite. *See also under* Silicates, of which there are many containing aluminum.

MINERAL NOTE: Beauxite, the important ore of aluminium, occurs in association with basalt at Crow's Nest and at Cania. Up to the present time only casual attention has been paid to its occurrence.

USES: For many purposes aluminium can be used instead of steel, where lightness is a first consideration and expense a secondary one. It is also used as an alloy with iron in steel manufacture, as a substitute for lithographic stones, as one of the metals in bronze alloy, as a reducing agent in ore reduction, etc., etc.

VALUES: *See* Table under Metal Values in London for maximum and minimum prices since the year 1892.

Aluminium hydrate. *See* Beauxite.

—— phosphates. *See* Lazulite, Turquoise.

—— sulphates. *See* Alunogen, Websterite, Kalinite (Potash Alum).

Alunogen—

Compo., Hyd. sulphate of alumina. *Colour*, white. $H=1\cdot5$—2. *Sp.gr.*= 1·1—1·8. *Taste*, like common alum. *Contents* (*max.*), Alumina 15 per cent.

Anakie Mineral (Sapphire) Field—

Situation: *See maps*, Pls. 10, 11, 31. 193 miles W. of Rockhampton. *Cos.* Clermont and Plantagenet; *Dist.* Leichhardt. Centre—about *Lat.* 23° 20′, *Long.* 147° 40′.

Discovery: Retreat Creek on this field was worked during 1870 for red stones which were thought to be rubies. Afterwards these stones were proved to be only zircons and garnets, and in consequence the mines were abandoned. Rubies, however, are known to occur here. Sapphires were also found, but not recognised as such until 1878, when A. J. Richardson made the discovery. Green, yellow, and blue sapphires, together with zircons, garnets, topazes, and a few rubies were found at Newsome's Claim, Retreat Ck. in 1885, and mining on the field has been carried on ever since that time. Diamonds were first found at Policeman's Creek by B. Dunstan in 1901.

Population: 446 (1910).

Proclamation of Field: First (and only one), Sep. 3rd, 1902, as follows:—Commencing at the north-west corner of portion 40v, and bounded thence on the west by a line bearing north 480 chains; on the north by a line bearing east 210 chains; on the east by a line bearing south 120 chains; again on the north by a line bearing east 285 chains, and again on the east by a line bearing south 230 chains to May Creek; on the south-east by that creek upwards to a point east from the starting point; and on the south by a line bearing west to the point of commencement.

Area: 18,385 acres (28 sq. miles).

Anakie Mineral (Sapphire) Field—*continued.*

Principal Mining Centres: Retreat Cr. (Sapphiretown), Sheep Station Cr., Policeman Cr. (Rubyvale), Tomahawk Cr., Central Cr., *which see.*

Mineral Statistics: Sapphires, &c., *see tables and diagram,* Pls. 44, 46, 46A, 56.

Mineral References: Gold, *see* 3361 (alluvial); Coal, 1696A; Copper (Azurite), 238; (Malachite), 6341; Iron (Ilmenite), 4902, 4902A; (Ironstone), 5600; (Magnetite), 6029; Rutile, 7335; Amethyst, 7170; Cairngorm, 7181; Chalcedony, 1350A; Corundum, 2373; Diamond, 2580; Garnet, 3134; Hornblende, 4838; Hyacinth, 8236, 8237; Jasper, 5643; Magnesite, 5951; Pleonaste, 7589; **Sapphire,** 2355; Rubellite, 7875; Ruby, 2363; Spinel, 7581; Topaz, 7806; Tourmaline, 7864; Zircon, *var.* Hyacinth, 8236, 8237.

Geological Note: Granite with gneiss, schist, slates, and intrusive rocks occur throughout the district, with remnants of basalt flows forming isolated peaks. Sapphire deposits occur in old watercourses, the gemstones having been washed out of the old weathered flows of basalt. *See* G.S.Q. Pub. No. 172 for details.

Geological Publications: Reports—Nos. 81, **172.** *See* Geol. Sur. Pub. List; *also* Gov. Min. Journal, Reports Nos. 17, 41, 55; *also* Supplementary Report List, Nos. 102, 105.

Warden: Stationed at Clermont.

Inspector of Mines: Stationed at Rockhampton.

Reports: Inspector's and Warden's monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Statistical Note: In 1892 and 1893 Sapphires to the value of about £9,000 were produced at Anakie, but prices paid did not justify work being continued, and many of the mines were closed down. In 1900 stones of the value of £900 were mined, but in 1901 £6,000 was realised from the sale of stones, and from that time onwards sapphire mining became very active. The largest production was in 1907, when stones to the value of £40,500 were produced, and last year, 1912, followed this very closely with a production valued at £40,006. The total value of sapphires produced at Anakie is officially stated to be £226,302 up to 1912, but estimating quantities and values is very difficult, and stones are taken away from the field of which no record is made. Probably the value of the output is much larger than the amount given above.

Analcime, *syn.,* Analcite. *Compo.* Hyd. silicate of alumina and soda (a zeolite). *Colour,* usually white. *H* = 5·55. *Sp.gr.* = 2·2.

Anna Parnell Tin Mine, Watsonville. *Min.Ref.* Cassiterite, *see* 880.

Annan R. Tinfield—

Situation: *See maps,* Pls. 8, 9. Between Annan and Bloomfield Rivers, 20 to 28 miles S. of Cooktown. *Co.* Banks; *Dist.* Cook. Centre about *Lat.* 15° 45′ S.; *Long.* 145° 15′ E. Portion of Cooktown Mineral Field, *which see.*

Discovery: About 1885.

Population: Included in Cooktown Mineral Field.

PRINCIPAL MINING CENTRES: Mt. Amos, Mt. Browning, Lion's Den (Tableland), Mt. Leswell, Mt. Hartley, Rossville, Mt. Romeo, *which see.*

MINERAL STATISTICS: Tin, *see tables,* Pls. 38, 46, 46A.

MINERAL REFERENCES: **Tin** (Cassiterite), *see* 776-827; Wolfram, 7928-7934; Cobalt, 1834A; Iron (Iron Pyrites), 5023-5025; (Mispickel), 6666-6672; Chalcedony, 1340; Chlorite, 1429; Corundum, 2366; Felspar, 2629-2631; Hornblende, 4826A; Mica, 6553; Orthoclase, 7035-7037; Rock Crystal, 7184; Sapphire, 2340; Sphene, 7572; Talc, 7671-7672; Tourmaline, 7827-7850.

GEOLOGICAL NOTE: In this locality there are altered sedimentary rocks belonging to the Gympie Formation (Permo-carboniferous), closely associated with granite. Tin lodes occur in both the granite and the Gympie rocks, but most of the tin produced on the Annan Tinfield has been derived from alluvial deposits.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 35 (1887), 66 (1891), **210** (1907). *See under* Geol. Sur. Pub. for titles. *See also* List of Plans *under* Department of Mines Publications.

WARDEN: Stationed at Cooktown.

INSPECTOR OF MINES: Stationed at Croydon.

REPORTS: Inspectors' and Wardens' monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Antimonial Copper Ore. *See* Tetrahedrite.

Antimonial Lead Ore. *Syn.* Bournonite, *which see.*

Antimonial Silver Ore. *See* Pyrargyrite, Stephanite.

Antimonite, *syn.* Stibnite, *which see.*

Antimony (Sb). *Atom.Wt.,* 20·2. *Sp.gr.,* 6·61-6·8. *Colour,* bright bluish-white. Brittle.

USES: Combined with lead and tin, it makes useful alloys, of which type metal, Britannia metal, and pewter are the most important. Used also in medicine, and in the manufacture of fireworks, matches, india-rubber, linoleum, etc. Stibnite, the sulphide of antimony, is the common source of the metal.

MINERALS: *See* Antimony (native), Bournonite, Cervantite, Chalcostibite, Pyrargyrite, Stephanite, **Stibnite,** Tetrahedrite, Valentinite.

ASSOCIATED MET. MINERALS: Argentite, Native Copper, Copper Pyrites, Galena, **Gold,** Hematite, Iron Pyrites, Mispickel, Pyrrhotite, Redruthite, Silver, Tetradymite, Wolfram, Zinc-Blende.

Gangues, &c. : Calcite, Quartz, Quartzite, Siliceous and Talcose Slates.

Mineral Note : Commonly assoc. with gold in calcite or quartz gangues, in defined lodes. The country rocks, so far recognised, are slates, shales, sandstones, &c., of Gympie Formation (Permo-carboniferous).

Fields :

Cocoa Cr. (trib. of McIvor River), *see maps*, Pls. 8, 9.
Hungry Hill (St. John's Cr., Eidsvold), *see maps*, Pls. 4, 5, 35.
Mitchell Riv. (nr. Hodgkinson G.F.), *see maps*, Pls. 8, 9, 22.
Neerdie (nr. Gympie), *see maps*, Pls. 4, 5.
Northcote (nr. Hodgkinson G.F.), *see maps*, Pls. 8, 9, 22.
Woodville, *see maps*, Pls. 8, 9, 22.
See under Names of Fields for details.
Note : Large deposits remain unworked at Hungry Hill.

Discoveries : *See under* Discoveries for notes.

Statistical Tables : *See* Pls. 40, 45, 46, 46a, and Diagram : Pl. 52.

Statistical Note : The largest production of antimony comes from the Northcote and Woodville Mines, nr. Hodgkinson, the total yield from these places, to the end of 1912, being 2,697 tons, valued at £33,294. The next highest yield is from the Neerdie Mines, near Gympie, which produced 1,036½ tons, having a value of £12,033. Smaller outputs have been derived from Cocoa Creek and from Ravenswood. When compared to the total estimated value of the whole antimony production of the State up to the end of 1912 the yield of the metal at the Hodgkinson represents 64.50 % ; Gympie, Kilkivan, and Neerdie, 24.78 % ; Cooktown (Cocoa Cr.), 4.91 % ; Eidsvold (McKonkey Cr. or Hungry Hill), 1.15 % ; Herberton and Chillagoe, 2.73 % ; Ravenswood, 1.36 %. The largest quantity of antimony produced in one year (1884) was 748 tons, valued at £6,469, but the year 1907 yielded 511½ tons, valued at £7,863. The total yield of antimony from all sources to the end of 1912 is calculated to be 4,181 tons, valued at £50,953, which is equivalent to 0.05 % of the value of the whole mineral production of the State.

Apatite. *Compo.*, phosphate of lime. *Colour*, usually greenish and yellowish. *Lustre*, vitreous. *H* = 5. *Sp.gr.* = 3—3·2. *Contents* (*max.*), Phosphoric Acid 42 per cent.

USES: *See note under* Calcium.

GEOLOGICAL NOTE: The only extensive area containing Apatite so far discovered is that about Keppel Bay, where the mineral is in association with Turquoise. It occurs as minute veins and irregular patches in pre-Permo-Carboniferous slates and quartzites, but the percentage of phosphoric acid is very small when these veins and patches are sampled in bulk.

Arsenates; cobalt, *see* Erythrine; copper, *see* Olivenite; iron, *see* Scorodite; lead, *see* Mimetite.

Arsenic (As.). *Atom.Wt.* = 75·0. *Sp.gr.* = 5·72. *Colour*, steel-grey. Brittle.

USES: Extensively used in hardening lead in the manufacture of shot. Its compounds are used variously in poisons, sheep and cattle dip, fruit spray, pigments, dyes, etc., etc. Mispickel is the common source of the metal, the oxide (white arsenic) being extracted as a furnace by-product in the roasting of Mispickel containing gold, silver, or cobalt.

MINERALS: *See* Arsenic (native), Arsenolite, Erythrine, Lollingite, Mimetite, Mispickel, Olivenite, Proustite, Scorodite.

MINERAL NOTE: Native Arsenic commonly occurs associated with gold at Gympie, and Mispickel is frequently found with gold and silver ores and wolfram in many parts of the State. Associated rocks include slates, shales (Palæozoic), diorite, granite, &c., &c.

Arsenic (native). *Compo.*, arsenic, nearly pure. *Colour*, tin-white. *H.* = 3·5. *Sp.gr.* = 5·6-6.

103. —— not gold-bearing, in quartz reef. *Loc.* Two-mile Gold Mines, 424-feet level, Gympie Goldfield (*ante*). *Ref.* G.S.Q.P. 175, p. 4 (1902).

Arsenical Pyrites, *syn.* Mispickel, *which see.*

Arsenides. Iron, *see* Lollingite; *see also* Mispickel.

Arsenolite, *syn.* White Arsenic. *Compo.*, oxide of arsenic As_2O_3. *Colour*, white. *Taste*, astringent, sweetish. *H.* = 1·5. *Sp.gr.* = 3·7. *Contents* (*max.*), Arsenic 75 per cent.

104. ——. Watsonville, head of James Cr., br. of Walsh R., 7 miles E.S.E. of Stannary Hills Rail. Stn., 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 57 (1900).

Arsenopyrite, *syn.* Mispickel, *which see.*

ARTESIAN BORES (For Table of WATER ANALYSES *see* page 70).

Include bores sunk by Water Supply Department, Railway Department, Public Estates Improvement Branch, Local Authorities, and Private Persons.

(Based on Table in Annual Report of Water Supply Department for 1911 and from data in Queensland Geological Survey Office, Brisbane.)

NOTE.—Annual Reports of Water Supply Department, from 1897 to 1911, contain diagrammatic sections of the bores.

References—

C Flow is controlled.
D Shallow bore deepened.
V Bore has valve attached.
R Unreliable measurement.
P Pump.
SP Steam pump.
W Windmill.
Wh Whip or Whim.
L Altitude measured by Spirit Level (other Altitudes by Barometer).
Black Type—*See* Analyses in Table following.
* Notes at end of Table of Water Analyses.
a 1st water bed; *b* 2nd; *c* 3rd; *d* 4th; *e* 5th; &c., &c.

WATER ANALYSES (ARTESIAN, &c.).

NOTES.—Except where otherwise mentioned, analyses were made in the Government Analyst's Laboratory (J. B. Henderson, Government Analyst).

Analyses made prior to 1893 are considered to be quite unreliable, and are not quoted.

ABBREVIATIONS.—Sub., Sub-artesian bore; Art., Artesian bore; Spr., Spring; W.H., Waterhole.

For further details, *see* Table of Artesian Bores (page 21) and Notes on Artesian Bores (page 78). *See also under* Name of Bore in Index.

NOTES ON ARTESIAN BORES.

(Referred to in table of Artesian Bores, page 21.)

See also Bore Notes in "Geology of Queensland," pp. 418, &c.

Note.—Pressure values are given in pounds per square inch; g. p. d. refers to gallons per day.

4. Bando. (*See* Rep., 1898.) Measured flow after completion, Jan., 1898, 2,900,000 g. p. d. Inspected March, 1898, flow then 2,061,900 g. p. d. from an outlet 12 feet above surface, with a leakage outside of casing amounting to 14,250 g. p. d.; pressure, 91.5 to 99 lb.; temp. 119° F. Last inspected Jan., 1911; outlet then 7 feet above surface; leakage outside of casing 21,900 g. p. d., which did not increase during static test of 4½ hours; borehead badly corroded and leaking at the rate of 5,100 g. p. d. during static test; no gas.

5. Barcaldine Rail. Stn.—Yield in Dec., 1887, 175,000 g. p. d.; temp., 102° F.; static head, 40 feet; measured, Oct., 1899.

6. Bedourie (1)—Met with drift sand.

8. Middle Park.—A flow of 1,397,580 g. p. d. was measured 2 hours after a static test of 46 hours; March, 1911.

9. Racecourse—Former flow, 8,228 g. p. d.; contains small quantites of carb. hydrogen; unfit for domestic purposes; collapsed. *Coal* about 5 feet thick at 791 feet. *See* G.S.Q.P. Nos. 108, p. 5 (1896), and 225, pp. 32-3 (1910).

10. Brixton—Formerly called Saltern Bore; still known as the "Twenty-Mile." Flow in 1898, 17,200 g. p. d.; static head, 87 feet; inspected 30th Sep., 1899.

14. Charleville—Town reticulated, June, 1896; inspected, Nov., 1898; part of flow from a 3-inch outlet about 2,000,000 g. p. d.; former static head, 230 feet; temp., 106° F.

18. Cunnamulla—Town reticulated in April, 1896. Deepened in 1901; former depth, 1,300 feet; temp., 106° F.; flow, 540,000 g. p. d., pressure 185 lb. Measured flow after deepening, 2,023,000 g.p.d.; temp., 111° F.; outlet at 11.5 above ground. Inspected April, 1911; static test of 1 hour 50 minutes; about 50,000 g. p. d. are passing through a valve to waste; static pressure generally ranges between 60 and 80 lb.

20. Maida Hill—(1) A well to 85 feet, water rose 31 feet in well. (5, 6) A well to 53 feet at each bore.

24. Eromanga—(1) *Inflammable gas*, blue flame; water saline and gaseous. (2) Water good but has a gaseous taste. *See* section No. 224.

27. Hungerford—(1) Salt water at 22 feet; granite at 285. (2) Granite at 489 feet.

28. Jericho—Supplied 3,600 g. p. d. for local use.

29. Jondowaie—4. A well to 102 feet.

31. Laidley—Water unfit for domestic purposes 5 ft. coal seam at 1,700 ft. *See also note under* Coal Bores.

32. Logie Plains—Water suits stock; bores silted up, Sep., 1910.

35. McKinlay—Water struck, Sep., 1890; outlet lowered 10 feet in Aug., 1896, with increased flow of about 30,000 g. p. d.

36. Middleton—Ten distinct water beds; flow increased considerably after completion of bore.

37. Mitchell—Four sub-artesian supplies; eleven distinct flows observed at various depths; first flow at 560 feet; bands of *coal* at 930 feet.

38. Muckadilla—Completed to 3,262 feet in Nov., 1890; deepened to 3,762 feet in 1898, but no increase of flow; bottomed on primary rocks.

43. Normanton—Contains the *largest proportion of solids* when compared with bores having good flows; distinctly saline; largely used for domestic and stock purposes. Flow said to have diminished.

45. North Rockhampton—Strata unpromising.

46. Roma—Town water supply direct from Nos. 1 and 2 bores (1902). (1) Great loss of water outside casing; flow, when first tapped, 185,200 g. p. d. (2) Small flow of brackish water at 757 feet; supplies tapped, 64,400 g. p. d.; at 928 feet, 25,050 g.; at 1,046 feet, 29,700 g.; at 1,290 feet, 67,300 g.; at 1,358 feet, and a very slight supply at 2,965 feet. Good *illuminating gas* between 3,683 and 3,709 feet, yielding about 44,625 cubic feet per diem in Feb., 1901, increasing to 72,264 cubic feet per diem up to Feb., 1904; works for lighting town completed at the beginning of June, 1906; gas supply from bore ceased flowing 15th June, 1906. Eight seams of *coal* from 3 inches up to about 2 feet thick were passed between 1,992 and 2,409 feet. *See* Gov. Min. Jour., Jan., 1905, p. 17; Nov., 1908, p. 591; A.R.D.M., 1908, p. 173.

48. St. George—Before the 5-inch perforated casing was inserted, the flow measured 613,000 g. p. d. Town reticulated in 1907.

50. Tambo—Originally sunk to 1,002 feet; est. flow, 200,000 g. p. d. Inspected June, 1898; flow then 54,700 g. p. d.; static pressure 17 lb., temp. 94° F.; two-thirds of water flowing between the 10 and 6 inch casings. Flow in June, 1901, 45,000 g. p.d.; deepened in 1902; flow then (Sep., 1902), 1,055,400 g. p.d.; pressure 34 lb., temp. 120° F. Measured in July, 1911, *see* table for data.

51. Tinderry—Static test of 72 hours, Nov., 1910.

52. Thargomindah—Town reticulated in July, 1895. *See* Ann. Rep. Hyd. Eng., 1898.

55. Westbrook—A well to 60 feet; no further supply.

56. Thomson Watershed—Former flow, 20,000 g. p. d.; temp. 161° F. While flushing a considerable quantity of gas escaped, and some solid light-brown drops of petroleum wax were seen floating on the water (Aug., 1899). Outlet, 11 feet above surface.

59. Windorah—Very small quantity of brackish water at 105 feet, unfit for domestic use; no other supply.

60. Winton—Town reticulated in 1899.

62. Water brackish or salt.

63. Warreah—Sunk by diamond drill for *coal*. *See* G.S.Q.P. Nos. 44, p. 1 (1888); 49, p. 1 (1889); 108, p. 56 (1889); 121, p. 6 (1896).

64. Flows into a well below surface.

65. Stanwell—Sunk for coal; some of the water escaping through sands of creek bed. *See* G.S.Q.P. No. 143, pp. 10-12 (1899).

66. Maria Cr.—Sunk by Calyx drill for coal; has an intermittent flow which is probably produced by *pneumo-dynamic or gas pressure*, not by hydrostatic pressure. *See* G.S.Q.P. Nos. 155, pp. 17, 18 (1901); 159, p. 19 (1901).

70. Back Cr.—(1) Stopped flowing in about 1895; flow in 1887, 72,000 g. p. d.; static head, 11 feet; bore 2 in. diam.

73. Dalby Cattle Yard—Diamond drill bore for coal. *See* G.S.Q.P. No. 143, p. 20 (1899).

74. Mitchell—Flows into a well at 20 feet below surface.

83. Barmoya—(2) Orig. supply, 5,000 g. p. d.; became dry.

84. Bell (deep bore)—Salt water at 236 feet; brackish water at 735 feet; hard rock at 878 feet; finished in granite.

87. Brigalow—A well to 100 feet, bored 210 feet.

88. Burncluith—(1) Water contains 500 g. p. d. of saline matter. (2) Too saline for stock. (3) Abandoned in soft pipe clay; a small soak at 343 feet.

92. Mac's Gully—A well to 100 feet, bored 50 feet.

108. Wondalli Estate—(1) A well to 100 feet. (5) Granite at 356 feet. (6) Bottomed in hard rock. (8) Bottomed in sand drift.

110. Nine-Mile—Flow and pressure falling off; depth reported, 943 feet; flow, 56,000 g. p. d. in 1907.

111. Aramac—Town reticulated in Dec., 1897.

112. Ilfracombe—Great leakage between 6 in. and 8 in. casing; pressure taken, Sep., 1899.

113. Longreach—Former flow, 230,000 g. p. d. Again measured in Nov., 1900. Reticulation of town, 1903. Static pressure reported in 1907, 92½ lb.

114. Muttaburra—1st supply at 1,740 feet. 2nd supply at 2,480 feet. About 250,000 g. p. d. cased off. 3rd supply at 2,700 feet. Flow before bore being cased to bottom, 1,100,000 g. p. d. Reticulation of town, Oct., 1905.

115. Barcaldine Town—Town reticulated, 1895; pressure greatly fallen off. Flow could not conveniently be measured (Nov., 1899). Ash Street bore deepened from 1,320 feet.

117 to 120. Dalby District—Sub-artesian wells, sunk before 1898. *See* G.S.Q. Pub., No. 143, p. 20 (1899).

Mount Halley—(1) Formation, mostly blue rock. (2) Formation, sandstone.

121. Wowra—Torren's Cr. road; 20-ft. well.

122. Hughenden—(1) Bore water occasionally pumped to Sep., 1904; not utilised after that date. (2) Reticulation of the town, Sep., 1904.

123. Richmond—Town reticulated in 1904.

125. Yalleroi—Orig. flow, 65,000 g. p. d.; bore is said to have ceased after the completion of Castleroi No. 2 bore. Inspected July, 1911. W.L. then 8 feet below surface. Bore now used to supply water to locomotives.

126. Thornleigh—Inspected Oct., 1902.

128. Morven—Bottomed on primary rocks; *bore water one of the best analysed.*

130. Blackall—2nd supply at 2,084 feet; reticulation of town, Feb., 1905; water passes through a cooling coil.

132. Aberfoyle Run—(A) Eight sub-artesian supplies struck above the artesian bed; fills a lagoon; flowing at the rate of 5,000 g. p. d. below surface level. (B) Well sunk to 81½ feet. (C) First supply at 80 feet was artesian; casing corroded. (D) Five separate supplies. (E) Fills troughing below surface level; flows at 4,320 g. p. d.

133. Adavale—*See* G.S.Q.P. No. 103, p. 15 (1894).

134. Afton Downs—(1) Orig. depth, 1,497 feet, June, 1892; first supply at 1,215 feet. Deepened to increase flow, July, 1892; second supply at 1,560 feet; flow in April, 1897, 184,400 g. p. d.; head, 20 feet. (2) Orig. depth, 844 feet, July, 1892; first supply at 672 feet. Deepened; second supply at 1,013 feet; flow in April, 1897, 999,640 g. p. d.; head, 32 feet; H.P., 2.05. (3) Three supplies. No signs of deterioration after six years. (4) Flow in April, 1897, 529,660 g. p. d.; head, 30 feet. (5) Flow diminished from 66,000 to 20,000 g. p. d., April, 1897; ceased flowing, June, 1900. (6, 7) Flow gradually diminishing, 27-5-02.

135. Albilbah—(1 and 2) Water brackish. (3) Very small supply.

137. Alice Downs—(1) Probable flow at surface, 430,000 g. p. d.; present outlet, 12 feet above surface. (2) Seven distinct flows. These were indicated by outbursts of cloudy gas; bottom in hard rock.

139. Angellala—Two small sub-artesian supplies between 600 and 700 feet; soft sandstone below 30 feet.

140. Arabella—Quality of water similar to that of Charleville Meat Works Bore. Ceased flowing before Aug., 1909; former flow, Nov., 1898, 111,300 g. p. d.; static head, 17 feet.

141. Aramac—*See* Pressure Notes in Ann. Rep. Hyd. Eng., 1898.

2. and 6. cleaned and recased, 1897.

143. On Stainburn Resump.—Both bores cleaned and recased, March, 1896.

144. Ardoch—(1) Flow at 1,030 feet, 3,000 g. p. d.; at 1,970 feet, 15,000 g. p. d.; at 2,284 feet, 500,000 g. p. d.; at 2,323 feet, 1,000,000 g. p. d.; at 2,604 feet, 2,000,000 g. p. d.

145. Arrabury—Great rush of water when supply tapped.

146. Authoringa—(2) Former W.L. 60 feet below surface. (3) Bottomed in 60 feet of very hard rock (granite?) Colombo—Small flows at 1,100 feet and 1,500 feet; leakage outside of casing, when valve is closed, amounts to 124,000 g.p.d.; outlet, 4 feet above surface; inspected Nov., 1910.

148. Avondale—(2) Water said to be running through paddocks in delver-made drains for 60 miles.

149. Ayrshire Downs—(1) Former est. flow, 500,000 g. p. d.; flow given in table measured approx., 6th Feb., 1911; large amount of mineral deposited in bore drain. (2) Flow in table est. Feb., 1911. (3) Flow in table est. Feb., 1911. The casings of bores 1, 2, and 3 are coated inside with a hard, bright, shining metallic deposit.

151. Bando—

(1) Said to have 35 miles of bore drains. First inspected April, 1897; flow then 2,100,400 g. p. d.; bore is said to be cased with 10, 8, and 6-inch casing; water flowing 4.75 feet over 6-inch casing; temp., 130° F. Second inspection Dec., 1910, *see* table for data; outlet, 8 feet above surface; 6-inch casing only visible, which is in excellent condition; about 200,000 g. p. d. are escaping outside of 6-inch casing; no gas.

(2) Said to have 24 miles of bore drains; former est. flow, 2,000,000 g. p. d. Inspected Dec., 1910, *see* table for data; outlet, 4 feet above surface; flowing 10.75 inches over 6-inch casing; no gas nor leakage perceptible outside casing during static test of 1½ hours; free flow is fluctuating.

(3) Inspected Dec., 1910, *see* table for data; bore partially closed; outlet, 9 feet above surface; a flow of 53,400 g. p. d., with a temp. 119.5° F., is issuing outside the 6-inch casing, and is stated to come from 800-feet; this flow did not alter during the static test; bore was closed several times for some hours; practically no gas.

152. Boolburra—Orig. est. flow, 2,000,000 g. p. d. Inspected Jan., 1911, *see* table for data; outlet, 4.5 feet above surface; static test of 75 minutes; 6-inch casing, rusted in patches.

Wallen—Orig. est. flow, 2,000,000 g. p. d. Inspected Jan., 1911, *see* table for data; outlet, 5.75 feet above surface; cased with 6-inch casing to 1,400 feet (level of first water struck); no water tapped for several hundred feet from bottom; the bore was once closed down for a few hours, and when reopened the free flow had diminished from 26 to 16 inches; 24 miles of bore drains.

Glendilla—Est. flow after completion, 1,040,000 g. p. d. Inspected May, 1911, *see* table for data; no flow struck until a few hundred feet from bottom; static test of 63 minutes.

153. Barcaldine Downs—(1) Orig. depth, June, 1894, 2,500 feet.

154. Brackhill—First supply cased off unsuitable for irrigation; former static head, 69 feet; flow measured under a head of about 8 feet (Oct., 1899); reported depth in 1907, 1,400 feet; pressure, 10 lb.

Halfmoon—Formerly flowing 2 inches over 6-inch casing. Simultaneously with Saltern Cr. No. 7 Bore, this bore ceased to flow when second flow of Saltern Cr. No. 10 had been tapped (Oct., 1899). W.L. at that date, 5 feet below surface.

Fairview (2)—Flow at 2,024 feet, about 100,000 g. p. d.; at 2,510 feet, 400,000 g. p. d.

Lochingar—No further supply was met with after 750 feet, bore bottomed in red marl.

155. McLachlan's—Flow diminishing former head, 72 feet; temp., 115° F.; reported depth in 1907, 2,500 feet; pressure, 10 lb.

Co-operative—Former flow, 600,000 g. p. d.

Jacondool—(1) Flow and pressure diminished. Bore deepened some years after 1900; depth in 1895, 1,016 feet; reputed flow at that date, 500,000 g. p. d.; temp., 106° F.

Dunraven—Temp. unchanged; flow diminished from 246,000 to 223,600 g. p. d. in 15 months, nearly 8 per cent.; head fell about 9 feet; about 15 miles of drains are now continuously watered from this bore (Nov., 1899).

Westbourne—In March, 1893, flow stated to have been 800,000 g. p. d.; pressure, 40 lb.; temp., 120° F. (Nov., 1899). Reported static pressure in 1907, 10 lb.

156. Patrick—Former est. flow, 300,000 g. p. d.; sudden decrease attributed to bridging in bore. Reported static pressure in 1907, 31 lb.

Clover Hills—Flow measured 5 feet 6 inches above surface (Oct., 1899).

157. Barclay Downs—(6) Supplies at 259 and 269 feet; W.L. at 274 feet. (7) Supplies at 360 and 395 feet; W.L. at 400 feet. (8) Supplies at 191 and 235 feet; W.L. at 196 feet. (9) Supplies at 150 and 205 feet; W.L. at 173 feet.

Strata pierced is chiefly limestone and flint (?); all the bores are sunk to bed rock, and yield abundant supplies; the quantities given in 4 and 9 are only those delivered by pump.

159. Barenya—(2) In 1894 the depth was 2,290 feet, and the est. flow, 200,000 g. p. d.; static head, about 22 feet; supply gradually decreased until it stopped in 1903; bore deepened to 2,800 feet in 1906, giving a flow of 2,500 g. p. d.

(3) Former flow, 800,000 g. p. d.; decrease of 200,000 g. p. d. within ten years.

161. Beaudesert, &c.—(A) Very salt water at 99 and 187 feet.

(C) Very hard rock; 4-inch casing left in.

(E) In river bed, near No. 8; dry.

(G) In granite.

(H) No water from bore; flow exudes from outcrop of artesian strata against primary rock.

(1) Pressure appears to be greatest at midday.

(3) Plugged below 200 feet; sub-art. bore converted to artesian by outlet to creek.

(5) Flow in 1896, 3,935 g. p. d.; static head of 25 feet; ceased flowing in 1902.

(8) The large supply rises initially to about 70 feet below surface.

(15) Granite at 135 feet.

162. Beechal (1 and 2)—Stopped in very compact sandstone.

167. Bimerah—

(1) The site is elevated; water between 4,130 and 4,220 feet; small flow.

(2) Small quantity of petroleum at 3.640 feet, and bands of *coal* at 3,700 feet; bottom in soft, white sandstone; no increase in flow.

(3) 3,900 feet of 6-inch casing; water highly mineralised.

168. Bindebango—First supply at 1,220 feet, second at 1,600 feet, third at 2,300 feet.

Binda—Granite at 1,550 feet.

169. Bingera—Water struck in blue-coloured shaly sand in all these bores; (3) met with very hard strata above the water-bed; (4) met loose boulders. Flows of these bores were not affected by the drought (1901).

Tarko—Granite bottom.

173. Boatman and Elmina—(1) 43 miles of bore drains; (2) 45 miles; (3) 58 miles; and (4) 27 miles.

174. Bogunda—(1) Water a little brackish; pumped from 140 feet. (2) Water pumped from 80 feet.

175. Bon Accord—(1, 2, and 3) Wells, good supplies. (4) Well, 150 feet deep; bored 30 feet; water rose 74 feet in 20 minutes. (6) Well; unlimited supply; an underground stream. (7, 8) Well; unlimited supply. (9) 8-inch bore. (10) Well; unlimited supply. (11) Well; 130 feet deep; bored 10 feet; water rose 18 feet in 1 hour. (12) Well; unlimited supply. (13) Well, 110 feet; bored 6 feet; water rose 73 feet in 30 minutes. *See* G.S.Q.P. No. 155 (1898).

176. Bonus Downs—Bore in slate.

177. Boorara—(1) Ceased flowing; former flow, 9,000 g. p. d. (11-6-01). (2) Former flow, 90,000 g. p. d. (11-6-01), flow reported 96,000 g. p. d. in 1907. (3) Flow has not diminished (11-6-01); flow reported 10,000 g. p. d., and depth 180 feet in 1907. (5 and 6) In Granite.

178. Bowen Downs—(3) Flow est. at 130,000 g. p. d. in 1907. (4) Orig. depth, May, 1892, 2,251 feet; flow suddenly stopped in 1893; no further supply when bore deepened; W.L. 5 feet below surface in 1907. (6) Flow est. at 80,000 g. p. d. in 1907. (7) Flow reported in 1907, 180,000 g. p. d. (8) Bore deepened; orig. depth, 2,425 feet (July, 1897). Flow est. at 200,000 g. p. d. in 1907.

180. Brenda—Dribble at 743 feet; just flowing at 1,340 feet; at 1,656 feet, flow 20,000 g. p. d.; at 1,885 feet, about 100,000 g. p. d.; and at full depth, about 2,500,000 g. p. d.

182. Lindum—Sunk for *coal* by Calyx drill. *See* G.S.Q.P. No. 143, p. 8, (1899).

185. Bunda Bunda—(7) First flow at 890 feet. The bore casing in Nos. 3, 6, and 7 bores is badly corroded.

186. Burenda—Highest potentials noted in Queensland.

(2) Bore cleaned and recased with 5-inch casing; flow recovered; originally the bore had a flow of 500,000 g. p. d., with a static head of 90 feet; bore now pumped from 36 feet below surface (1907). Bore water corrodes casing. (3) Doubtful if any more water below 2,600 feet was met with. Flow reported to be 36,000 g. p. d. in 1907. Bore twice recased on account of corrosion by bore water. (4) Flow reported to be 299,300 g. p. d. in 1907. (5) First flow of 2,000 g. p. d. at 1,280 feet.

187. Burleigh—(1) Orig. flow., 70,000 g. p. d. from 416 feet. (2) Orig. flow, 640,000 g. p. d. from 619 feet. (4) Former flow, 250,000 g. p. d. (6) Former flow, 500,000 g. p. d.

189. Burranbilla—

(1) Inspected April, 1911, *see* table for data; flow calculated from jet; duration of static pressure, 80 minutes; potential H.P. interpolated; bore surrounded by a lake about a mile long and up to 5 feet deep; outlet about 2.5 feet above W.L.; water is 3 feet deep at bore; slight leakage outside casing, which increased with pressure; casing used 102 feet of 10-inch, 271 feet of 8-inch, and 1,554 feet of 6-inch.

(2) Reputed flow after completion, 3,000,000 g. p. d.; temp., 124° F. Inspected May, 1911, *see* table for data; static test of 70 minutes.

(3) Est. flow after completion, 3,300,000 g. p. d. Inspected April, 1911, *see* table for data; outlet, 6 feet above ground; static test of 12 hours 8 minutes.

(4) Est. flow after completion, 2,500,000 g. p. d. Inspected May, 1911, *see* table for data; outlet, 2.5 feet above ground; valve casing worn away by action of sand in the water; static test of 11 hours 16 minutes.

194. Caledonia—(1) Flow reported to be 5,500 g. p. d. in 1907. (2B) Bores A and B are 10 feet apart.

195. Cambridge Downs—During 1899 old bores were deepened to the extent of 1,600 feet. Bore water corrodes casing in two bores, numbers not known.

196. Glenisla—Has 13 miles of drains and 7 miles of channels.
Runnymede (1)—Orig. flow, 800,000 g. p. d.; flow considerably less in 1907.

200. Canobie—(1 and 2) Reported in 1907 that flows were diminishing. (3) Struck water at 1,492 feet; finished boring in granite. (4) First supply at 1,570 feet just flowing. (5) Bore flows while pumping. (6) Supply at 1,550 feet rose to 25 feet from surface; flow at 1,650 feet, 170,000 g. p. d.; at 1,830 feet, 300,000 g. p. d.

201. Carandotta—Head station—Salt water on top cased off.

203. Cassilis—

(1) Cased to sandrock with 6-inch casing; orig. flow about 850,000 g. p. d.; in Dec., 1901, about 425,000 g. p. d.

(2) Cased at first to sand rock only with 6-inch casing; flow about 1,200,000 g. p. d.; after a time flow diminished to about 630,000 g. p. d.; after removing a bridging of 30 feet, and inserting 5-inch slotted casing below the 6-inch casing, the flow (Dec., 1901) was about 876,800 g. p. d.

(3) Cased with 5-inch casing; bore site on very elevated country; flow originally about 230,000 g. p. d.; W.L. (Dec., 1901) 6 feet below the surface.

Glenlyon—Cased with 6-inch casing to first sand rock at 2,076 feet, then with 5-inch slotted casing to bottom; flow before inserting 5-inch casing, about 920,000 g. p. d.

204. Champion Blocks—(1) Former est. flow, 25,000 g. p. d.; flow measured July, 1911. (2) Former est. flow, 200,000 g. p. d.; flow measured July, 1911. (3) W.L. stood originally 9 feet below surface; inspected July, 1911. In one of these bores *limestone* is said to occur at 313 feet.

205. Meat Works—Water better than that of Charleville town bore, and does not evolve gas when freshly drawn; inspected Nov., 1898; flow reported to be 950,000 g. p. d. in 1907.

Wallal—Orig. est. flow, 1,500,000 g. p. d.; first flow at 1,500 feet, second near bottom; minute bubbles of gas issuing; about 30 miles of bore drains; outlet 4 feet above ground; inspected Nov., 1910, *see* table for data.

Myendetta—Fine flows met with; about 30 miles of bore drains. Outlet 3.5 feet above surface; flow throttled by borehead to an extent of 3.5 feet. Inspected Nov., 1910, *see* table for data.

206. Charlotte Plains (Cunnamulla)—

(1) Bore deepened from 1,550 feet; est. flow then 2,300,000 g. p. d., temp. 118° F. Inspected April, 1911, *see* table for data; borehead leaking; static head and potential H.P. estimated; outlet 14.3 feet above surface.

(2) Est. flow after completion, 3,300,000 g. p. d. First inspection Feb., 1896, measured flow then 2,378,380 g. p. d., temp. 117.5° F. Second inspection April, 1911, *see* table for data; outlet 5 feet above original surface; 6-inch casing seriously corroded; static head estimated.

207. Charlotte Plains (Richmond)—(1) Orig. W.L. 18 feet below surface. (2) First flow at 210 feet, 100,000 g. p. d., ceased flowing, bore then deepened. (3) Orig. W. L. 30 feet below surface. (4) Two flows like No. 2 bore. (5) Water level orig. 20 feet below surface; in May, 1891, 29 feet; in 1907, 45 feet. (6) Water level, after passing 276 feet, fell from 110 to 145 feet, and rose again to 132 feet, when bore was filled up to 270 feet; W.L. in 1907, 140 feet below surface. (8) At 550 feet a seam of *coal* 15 feet thick; water not used.

210. Kalkie—A shaft to 76 feet, then a 10-inch bore; pumped 15,200 g. p. d. into shaft from bottom of bore.

211. Claverton—

(1) First inspected April, 1897; flow, 1,760,300 g. p. d.; outlet 12 feet above surface; static pressure 148 lb., temp. 117° F. Second inspection Nov., 1910, *see* table for data; water comes up gradually outside and will flood country around if valve is closed; bore only cased with 6-inch casing. Bore supposed to be under tidal influence.

(2) First inspection April, 1897; est. flow, 1,500,000 g. p. d.; temp. 124° F. Second inspection Dec., 1910, *see* table for data; outlet 6 feet above surface. Bore was never closed down; 6-inch casing only used; gas bubbles outside casing.

(3) First inspection April, 1897; est. flow, 1,500,000 g. p. d.; temp. 124° F. Second inspection Dec., 1910, *see* table for data; outlet 6 feet above ground level; valve very much corroded.

(4) Former flow, 3,000,000 g. p. d.; free flow 7.3 feet over 6-inch casing. Inspected Dec., 1910, *see* data in table; outlet 6 feet above surface; leakage outside of casing, 2,000 g. p. d., which increased to 5,000 g. p. d. during a short static test; gas bubbles in pool, which increased when flow under pressure.

Barbara—Inspected Dec., 1910, *see* table for data; outlet, 3.5 feet above surface; cased to bottom with 7-inch casing; three flowing supplies met with; quicksand near bottom of bore; no leakage outside casing during static test of 1½ hours; water has a slight odour when fresh, but no gas.

Airlie—Inspected Dec., 1910, *see* table for data; outlet, 3.25 feet above surface; no leakage of water or gas during static test of 40 min. Large quantity of driftsand thrown up when main flow was struck, but caused no trouble.

Yarramanbar—Former flow, 1,500,000 g. p. d. Inspected Dec., 1910, *see* table for data; outlet 4 feet above surface; no leakage during static test of 13 minutes. When flushing the bore, the supply fluctuated to about half its normal flow for about 10 seconds, after which the water became turbid for a short interval. The bore was turned off for a few hours after completion, when water came up a few yards away from the bore, and about three months after the bore was again turned off for three days, and was then found to be quite tight.

Rosevale—Former est. flow, 1,700,000 g. p. d. Inspected Nov., 1910, *see* table for data; outlet, 7.5 feet above surface; full pressure not taken.

214. Clonagh—Supply from 800 to 850 feet; rose to within 4 feet of surface; at finish the bore had a flow of about 100,000 g. p. d.; primary rocks below 850 feet.

217. Nonda Downs—Deepest 8-inch bore in Queensland.

221. Compton Downs—(1) Ceased to flow; former reputed flow, 100,000 g. p. d.

224. Coongoola Lease—

(1) First inspection, April, 1896, flow, 377,450 g. p. d.; static pressure, 71 lb. Second inspection, March, 1911, *see* table for data; outlet 6 feet above ground, cased with 8 and 6-inch casing; no leakage outside casing; bore under static test behaved very erratically and apparently in spasmodic cycles, which can only be due to *pneumo-dynamic or gas pressure.*

(2) First inspection, April, 1896; flow, 479,000 g. p. d.; static pressure 123 lb., and temperature 108° F. Second inspection, March, 1911, *see* table for data; outlet 1.75 feet above surface; no leakage at surface during static test of 17 hours 20 minutes; flush after static test, 392,000 g. p. d.; borehead in fair condition after nearly 20 years; water has a decided smell of sulph. hydrogen.

(3) First inspection, April, 1896; flow then, 1,760,300 g. p. d.; temp. 124° F. Second inspection, March, 1911, *see* table for data; outlet 3.5 feet above surface; static test of 16 hours 45 minutes; temp. orig. 132° F.; considerable quantity of incrustation was present at the bore which has now disappeared.

(4) Free flow orig. 8 ft. 5 in. over casing. Inspected March, 1911, *see* table for data; outlet, 5.7 feet above surface; slight leakage outside casing, increased to 48,000 g. p. d. under static test of 2 hours, but diminished again after pressure was taken off; borehead thickly covered with incrustation; water tasteless, no gas; 40 miles of bore drains. *Limestone* bands occur in some of the Coongoola Bores.

Glenyarra—Orig. est. flow, 2,000,000 g. p. d. Inspected April, 1911, *see* table for data; bore was completely turned off for a day or two, showing no ill effects; valve leaking to the extent of 50,000 g. p. d. during static test of 75 minutes; outlet 6.9 feet above ground; a few bubbles of odourless gas and small flow of water noticed outside casing, but did not increase during static test; supposed to come from 800-feet.

225. Boorte—Inspected March, 1911, *see* table for data; a well to 75 feet.

Offham (1)—Orig. the free flow was 3 ft. over 6-in. casing (reputed 2,000,000 g. p. d.), diminished to present volume after three weeks. Inspected Feb., 1911, *see* table for data; outlet 6.25 feet above surface; cased with 6 and 7-inch casing.

Offham (2)—Inspected Feb., 1912, *see* table for data; outlet 9 feet above surface; bore lined with 6-inch casing and a few hundred feet of 7 and 8-inch casing; a flow from an upper water bed of 110,000 g. p. d. issues between the 6 and 7-inch casing, but did not increase during static pressure test; bore throws up a few pebbles of blue shale; valve casing worn through in places by sand brought up by the water; bore partly under pressure (28 lb.).

Victo—First inspection, April, 1896; flow then 1,760,300 g. p. d. Second inspection, Feb., 1911, *see* table for data; outlet 6.3 feet above surface; borehead throttles flow and causes a back pressure of 27 feet head; a flow of 11,000 g. p. d. is issuing between the 8-inch and 6-inch casing, increasing to 18,000 g.p.d. under full pressure, and bringing up sand. Static pressure taken a few years ago was a little over 100 lb.

Longlands—Orig. free flow, 9.25 feet over 7-in. casing. Inspected Feb., 1911, *see* table for data; loss of static head above surface caused by friction in borehead and 40 feet of piping is 11.5 feet; valve casing worn through by sand; flow partly controlled.

226. Coorabulka—(1) Flow at 654 feet, 360,000 g. p. d.; at 660 feet, 730,000 g.; at 744 feet, 1,000,000 g. (2) Flow at 941 feet, 1,050,000 g. p. d.; at finish flow fluctuating from 36 to 43 inches over casing. (3) Flow at 1,098 feet, 150,000 g. p. d.; at 1,250 feet, 930,000 g. (4) Flow at 1,242 feet, 150,000 g. p. d.; 1,325 feet, 750,000 g.; at 1,340 feet, 800,000 g. (5) At 198 feet, soakage (salt); at 650 feet, 2nd soakage; at 1,022 feet water rose to 50 feet; at 1,331 feet, small flow; at 1,548 feet, 1,930,000 g. p. d. (6) At 40 feet, soakage; at 245 feet, small flow; at 600 feet, flow 150,000 g. p. d.; at 768 feet, 700,000 g.; at 818 feet, 1,400,000 g.

227. Coreena—(1) Orig. flow, 100,000 g. p. d. (2) Former flow, 1,500,000 g. p. d. (3) Orig. flow, 350,000 g. p. d.; flow in 1904, 20,000 g. p. d. (4) W.L. orig. 70 feet; in April, 1901, 102 feet below surface. (5) Former flow, 750,000 g. p. d. (6) Orig. W.L. 5 feet below surface. (7) Bore recased in Jan., 1901; orig. flow, 100,000 g. p. d.; flow gradually stopped flowing in 1901. (9) Orig. W.L. at 200 feet. (10) Surface water at 130 feet; 2nd water at 205 feet, rose to 50 feet below surface; orig. flow, 541,000 g. p. d. (11) Flow from 1,085 feet, 193,000 g. p. d.; pressure 4½ lb.; temp. 104° F. (12) Salt water at about 120 feet; at 480 feet water rose to 2 feet; at 850, small dribble; flow at 1,007 feet. (13) Supply from 165 feet rose to 40 feet; flow of 100,000 g. p. d. at 215 feet; site 33 feet lower than No. 3b ore. (14) First water at 430 feet; a flow of 20,000 g. p. d.; at 490 feet slight increase; at 850 feet 370,000 g. p. d.; increasing gradually to full depth; site 15 feet lower than No. 2 Bore. Water evidently escaping into the upper waterbeds in No. 2 and No. 9 bores.

229. Corinda—(1) Supplies at 102, 207, and 307 ft. (2) Supplies at 119, and 318 ft. (3) Supplies at 108 and 216 ft. (4) Supplies at 63 ft. (5) Supplies at 141, 161, and 231 ft. (6) Supplies at 80 ft. (7) Supplies at 66 and 156 ft. (8) Supplies at 417 ft. (9) Supplies at 298 and 436 ft. (10) Supplies at 141 and 413 ft., and flow diminishing. (11) Supplies at 394 and 511 ft. Porous bed at 603 feet plugged with concrete, &c. (12) Capacity 400,000 g. p. d. (pumped). (13) 3 supplies at 256, 274, and 372 feet. (16) Former depth, 1891, 194 feet; flow, 17,100 g. p. d., head of 4 feet, temp. 84° F. (22) Former depth, Nov., 1891, 360 feet, W.L. 14 feet below surface. (23) Supplies at 96 and 229 feet. (27) Supplies at 134 and 345 feet. (29) 5 separate very small supplies; very little water; well to 75 feet; former W.L. about 54 feet. (30) Supplies at 229 and 509 feet; sunk to 541 feet in 1896; W.L. then 16 feet below surface. (32) Bottomed on red rock; bore reported in 1907 as sub-artesian, with a W.L. of 45 below surface. Bore few yards from No. 10.

232. Cressbrook—Bands of *limestone* said to occur in some of these bores.

234. Burslem—Flow at completion, 180,000 g. p. d.; gradually stopped flowing in Dec., 1906; bore then cleaned out without recovering flow; W.L. June, 1907, 6 feet below surface.

235. Hariman Park—Est. flow after completion, 3,600,000 g. p. d. Inspected, March, 1896; measured flow then 1,720,000 g. p. d.; second inspection, April, 1911, *see* table for data; static test of 27 minutes.

Horton Vale—Est. flow after completion, 2,600,000 g. p. d.; static pressure, 116 lb.; first flow at 1,500 feet; 10 distinct beds. Inspected March, 1911, *see* table for data; flow controlled to about 550,000 g. p. d.; loss by friction in pipes above surface 17.8 feet; static test of 28 minutes; bore drains distributed over several grazing farms.

Nine Miles—Flow after completion, 3,000,000 g. p. d.; first flow at about 1,800 feet; outlet 4.75 feet above ground; static test of 2 hours 30 minutes; inspected April, 1911; for data *see* table.

Moorabindah—Orig. est. flow, 2,350,000 g. p. d.; cased with 6, 7, and 8-inch casing; static test of 45 minutes; outlet 1 foot above surface. Inspected April, 1911.

237. Kahmoo—Measured flow after completion, 1,286,200 g. p. d.; pressure, 109 lb.; temp. 106° F.; about June, 1910, pressure registered 80 lb. Departmental inspection, May, 1911, *see* table for data; outlet 13.8 feet above surface; static test of 3 hours; the bore is evidently sunk to the upper water-bed only, which may account for the large loss in flow.

Waihora—Est. flow after completion, 1,250,000 g. p. d.; temp. 112° F. Inspected June, 1911, *see* table for data; outlet 13.5 feet above surface; static test of 70 minutes, leakage outside casing bringing up fine grey sand, but leakage ceased again within 1½ hours after reopening the bore; a similar result observed some years ago; a mud-spring was met with at 100 feet, first flow at 500 feet; after clearing bore-casing the free flow fell from 18 to 14 inches.

Strathlea—Est. flow after completion, 1,300,000 g. p. d.; static pressure 112 lb. after few minutes' closure; temp. 117° F. Inspection, June, 1911, *see* table for data; outlet 3 feet above ground; the first flow after about a week's suspension of work, fell from 6 feet to 2 feet over the outlet, when drilling was resumed and the second flow struck only about 4 feet deeper; static test of 25 minutes; nearly 60 miles of bore drains running in five directions.

Bowra—Est. flow after completion, 3,200,000 g. p. d. Inspected June, 1911, *see* table for data; outlet 4 feet above surface; static test of 90 minuees; incrustation at outlet.

Sedenen—Est. flow after completion, 100,000 g. p. d. Inspected May, 1911, *see* table for data; outlet 2.7 feet above surface; static test of 30 minutes; situated on summit of watershed; flow was struck at about 1,200 feet, and 4-inch casing was then used through bedrock to the bottom of bore; bore runs from 9 to 12 miles of bore drains.

Ginnenbah—Est. flow after completion, 1,640,000 g. p. d. Inspected June, 1911, *see* table for data; outlet 1 foot above surface; static test of 3 hours 12 minutes.

238. Dagworth—(1) Water deposits calcareous and ferruginous stalagmite. Second hottest flow in Queensland. Est. flow after completion, 1,250,000 g. p. d.; free flow then 15 inches above casing. First inspection, Jan., 1896; flow, 775,000 g. p. d., flowing 11.5 inches over casing; static pressure 40 lb.; H.P., 5.2. Est. flow in 1907, 300,000 g. p. d. Second inspection, May, 1911; flow, 94,400 g. p. d., with a free flow of 1 inch over 6-inch casing; a large amount of gas issuing.

(2) Inspected May, 1911. Flow, 4¼ inches over 6-inch casing. First flow was tapped at 2,710 feet; from 2,800 to 3,100 feet an increase was met with at about every 15 or 20 feet, and the last flow was tapped at 3,200 feet, increasing to 3,340 feet.

239. Fairview—Inspected June, 1911; flow about 800,000 g. p. d. Flow is not diminishing.

240, 241. Dalby North and South Districts—" Five-mile Dam," formerly called Jimbour bore. *See* G.S.Q.P. No. 143, p. 20 (1899).

Irvingdale—Water fresh. O'Keefe's—Water brackish.

J. D. Mulholland—Water very salt.

L. Riethmüller—Salt water at 67 feet; fresh water at 80 feet; salt water not shut off.

242. Dalgonally—(1A) Dry; sunk at bottom of 80-foot well. (2) Ceased in 1906; former flow 9,700 g. p. d., with a head of 32 feet; water not used. (3) Bore deepened; former flow from 292 feet, 3,900 g. p. d.; head, 4 feet. (4) Flow reported to be a trickle only in 1907. (6) Met with 5 feet of very fine white driftsand at 700 feet, then soft clay, and stopped in very hard rock.

244. Dalzell—

(1) Ceased flowing; loss of head from year to year averaged about 7 inches per month; head in 1892, 48 feet; a sudden drop of flow was noticed when No. 5 bore began to run. W.L. 18 feet below surface about May, 1907.

(2) Head, 10 feet in July, 1896. Ceased flowing; former flow, 41,000 g. p. d., with static head of 6 feet. W.L., in May, 1907, 15 feet below surface.

(3) Loss of head, 4 feet in two years, or only about 2 inches per month. W.L., in May, 1907, 30 feet below surface.

(4) Flow measured 5 feet above surface (Oct., 1899); est. flow in May, 1907, 150,000 g. p. d.; static pressure, 3 lb.

(5) Ceased flowing; W.L., in May, 1907, 15 feet below surface; former flow, 89,000 g. p. d., with a static head of about 3 feet.

245. Darr River Downs—

(2) First supply at 700 feet, rose to 120 feet; pumping supply of 35,000 g. p. d.; bore deepened in 1901; reputed flow, 500,000 g. p. d.

246. Darr Water Farms—A well to 300 feet, with a supply of 2,000 g. p. d.; bored 70 feet; water slightly brackish, but improving.

248. Delta—Orig. flow about 500,000 g. p. d.; temp., 120° F.

249. Devoncourt—12 sub-artesian bores on station (May, 1910).

250. Dillalah—

(1) Orig. depth, 1,344 feet; flow about 120 g. p. d. Deepened in 1894. Est. flow (May, 1897), 1,700,000 g. p. d. Last inspection, Nov., 1910, *see* table for data; outlet 3 feet above surface.

(3) First inspection, May, 1897; flow, 958,060 g. p. d. Second inspection, Nov., 1910, *see* table for data; outlet 9 feet above surface; flow throttled by plug-valve causing a loss of 7 feet at static head; casing rusted through in places.

251. Doner's Hill—Supply from 1,996 feet rose to within 90 feet of surface; water highly mineralised.

252. Duaringa—Bores sunk in search of coal; No. 2 Bore met with *coal* at 437 feet. *See* G.S.Q.P No. 155, p. 20 (1901); 159, p. 16 (1900).

254. Dynevor Downs—(1 and 5) Met with loose boulders. (2) Flow reported to be 1,200 g. p. d. in 1907. (3) Sand rising. (4) Flow reported to be 1,300 g. p. d. in 1907.

255. Eddington—A and B only 55 feet apart. Strata pierced very similar in all the bores; blue shale at 50 feet, which continued until sandrock was reached, the latter ranging from 40 to 200 feet in thickness; all the bores tapped only one flow immediately after entering into sandrock, the flow gradually increasing until striking very hard rock, possibly of primary formation; No. 3 bore met with about 200 feet of sandrock; in No. 4 the sandrock is very coarse, almost a gravel bed; No. 6, after sinking through the sandrock met with about 200 feet of soft strata, pipe-clay, &c., and then finished in very hard strata without increasing in flow; No. 10, although lower in elevation than No. 2 bore, has a smaller flow; the sandstone met with is very hard, fine-grained, and only about 40 feet thick; drilling discontinued, apparently in granite. The flows of Nos. 1 to 12 bores in Feb., 1908, have evidently fallen off, but no reliable data to hand; No. 1 bore measured in March, 1899; flow, 892,000 g. p. d.; static head of 331 feet; potential horse-power, 22.6. The figures in column 10 is the depth to the sandrock; temp. falling off from 1 to 2 degrees in nearly all of the older bores.

Camarooka—Flow when first tapped, 1,200,000 g. p. d.

256. Elderslie—

(1) About half of the quantity of water is issuing from the outside of the casing, surface; met driftsand; gas issuing when inspected (May, 1911). Orig. flow, 300,000 g. p. d., but diminished radiply. Water inferior.

(2) It is claimed that this is the *largest flow* from such a great depth, and the *bore water the hottest* in Queensland. The bore has a string of 6-inch casing to a depth of 4,000 feet.

(3) Sub-artesian supply at 2,980 feet; water rose to 40 feet below surface. Three shallow test bores were sunk in January, 1907, on Elderslie, one bore yielding a pumping supply of 1,500 g. p. d., another, 700 g. p. d., a third, a mere soakage.

257. Elmina—(2) Large flow when water was tapped, but diminished greatly within a few weeks; former reputed flow, 1,400,000 g. p. d. (3) Upper water-bed cased off; bores 2 and 3 are only 30 feet apart.

261. Eton Vale and Harrow—Silt met at 40 feet, 18 feet thick; subterranean river bed.

262. Eulolo—(2) Granite bottom; cleaned in 1896. (7) Flow at 1,350 feet, 230,000 g. p. d.; at 1,374 feet, 440,000 g.; at 1,404 feet, 780,000 g.; at 1,439 feet, 870,000 g.

266. Tilbury's—Water at 350 feet and 970 feet. Castleroi—(1) Formerly flowing, volume not known. Inspected July, 1911; short pump lift. (2) Inspected July, 1911; flow measured, *see* table; short bore drain to water-hole. Westhill—Inspected July, 1911; no additional flow tapped after 1,100 feet.

268. Fernlee Run—The flow at Queen's Birthday Bore is said to have a daily tide of about 2 inches.

269. Port Constantine—(1) About 40 cubic feet of fire-damp per day. (2) Tools jammed and lost at bottom. (3, 3A, and 3B) About 17 feet apart. (4 and 5) Adjoin No. 3, abandoned and filled in. (8) Fire-damp emitted. (9) Tools jammed since 1896.

271. Glendower Run—The sub-artesian supply tapped at 155 feet suddenly stopped when bore reached 675 feet, but was restored when bore was filled in to 600 feet.

276. Gordon Downs—A great number of successful wells have been sunk on this run, some being pumped.

278. Granada—(1) Granite at 510 feet; drilled 50 feet into it. (2) Surface supply at 80 feet; water rose to 37 feet; met with bands of quartz at 900 feet, quicksand at 1,200 to 1,300 feet, hard, red sandrock at 1,310 feet; tools lost at 1,350 feet; it is believed that a supply exists below the red sandrock, as in Canobie No. 3 bore.

280. Greendale—Originally a sub-artesian bore; water drawn off at 15 feet below surface; flow measured by Water Supply Department, 9th March, 1911.

282. Greenmount—Near Warwick Rail.; 3 bores 90 to 130 feet; pumped; other bores sunk before 1905.

284. Hamilton Downs—(2) Met with separate flows at 2,128, 2,160, 2,430, 2,500, 2,660, and 3,200 feet; no increase of flow observed below 3,200 feet. Belford—Water in drains flows 7 miles in summer and 14 miles in winter; orig. est. flow, 1,500,000 g. p. d.

285. Hamlet Downs—(1) Flow measured 4½ feet above surface (Oct., 1899).

288. Helidon—All these bores supply natural aerated and potable *mineral water* from the coal measures; bore 3A had originally a flow of 10,000 g. p. d.; pumping supplies not tested to full capacities.

289. Herbertvale—(2) A well to 126 feet. (4) Drill met with numerous flint (?) boulders. Caves, and fissures in *limestone* were also passed through.

293. Coolibah—(1) Orig. small dribble, now sub-artesian. (2) Flow at 940 feet about 40,000 g. p. d.; at 1,002 feet, 340,000 g.; at 1,304 feet, 370,000 g. Farnon Downs—Orig. flow, 20,000 g. p. d.

295. Newstead—The bore waters flow along 30 miles of natural and artificial channels.

Irvingdale—Stopped in 167 feet of hard red sandrock; former flow, 309,000 gallons per day; flow, Sep., 1899, 163,000; static head, 35 feet; temp., 131½° F.; former depth, 2,217 feet. Deepened to 2,700 feet; flow ceased, but date not known; W.L., May, 1907, 6 feet below surface; bottom in granite.

297. Inverleigh—Soakage at 130 feet; at 2,290 feet water rose to 60 feet below surface; at 2,300 feet to 30 feet below surface; at 2,310 feet, small flow; at 2,330 feet, flow 300,000 g. p. d.; at 2,375 feet, 850,000 g.

302. Jondaryan—Near S. and W. Railway; five bores 80 to 130 feet deep; cutting made below water-level at one bore to give small flow.

303. Katandra—(1) Orig. flow, 24,000 g. p. d. (2) Former flow, 120,000 g. p. d. (3) Accident stopped bore being continued. (4) Depth in 1900, 1,150 feet; work resumed in 1904.

305. Kilcummin—Small supplies of salt water.

306. Kynuna—

(1) On summit of watershed; quartzite at 1,610 feet, when increase of water stopped; former W.L. in Feb., 1896, 65 feet below surface; W.L. in May, 1911, about 155 feet below surface.

(2) Water deposits iron oxide whilst cooling; ceased flowing in July, 1904; orig. flow, 595,000 g. p. d.; static head, 53 feet; W.L., in April, 1911, about 38 feet below surface.

(3) Ceased flowing in Oct., 1903; orig. est. flow, 550,000 g. p. d.; W.L. in April, 1911, 54 feet below surface.

(4) Ceased flowing, May, 1907; orig. est. flow, 750,000 g. p. d.; W.L. in April, 1911, about 33 feet below surface.

(5) Ceased flowing, July, 1905; orig. est. flow, 500,000 g. p. d.; W. L. in April, 1911, about 54 feet below surface; a 7-foot seam of *coal* at about 2,670 feet.

(6) Orig. est. flow, 1,200,000 g. p. d.

(7) Orig. est. flow, 230,000 g. p. d.; ceased flowing about Feb., 1910; W.L. in April, 1911, 16 feet below surface. While pumping the W.L. stands about 13 feet higher in the bore casing; bottom in hard rock.

The figures given for bores 1 to 5 in column 16 were obtained when pumping was started in each bore; volumes may now be less.

306 Kynuna—*continued.*

Grendon, Kynuna Resumption—

(1) Orig. est. flow, 1,000,000 g. p. d.; pressure, 60 lb. Inspected June, 1911; flow then est. at 500,000 g. p. d.

(2) Orig. est. flow, 370,000 g. p. d. Ceased flowing three years after completion; W.L. fell 8 feet below surface in a few hours. Inspected June, 1911; W.L. then 15 feet below surface. Bottom in very hard red formation.

307. Poimena—Orig. flow, 1,400,000 g. p. d. Glembervie (2)—Mineral like rock salt met with in shale; struck small soakage at 850 feet, and flow at 1,350 feet.

308. Waniola—Former est. flow, 1,500,000 g. p. d. Rosemead—Former est. flow, 1,250,000 g. p. d.

309. Lake Dunne—Flow, 50 g. p. d. through trench 1 foot below the surface.

311. Lammermoor—(1) Bore collapsed; 22 feet N.W. from No. 2. (2) Pumped 180 feet. (3) Abandoned in quicksand; adjoins No. 5. (4) First supply at 420 feet rose to 88 feet below surface; pumped 380 feet. (5) First supply at 400 feet rose to 88 feet below surface; pumped 150 feet; former depth, 820 feet; and W.L., 283 feet.

312. Landsborough Downs—(1) Orig. W.L., 13 feet below surface.

(3) At 1,285 feet, flow 9,600 g. p. d.; at 1,377, 38,400 g. p. d.; at 1,628 feet, 170,000 g.; at 1,688 feet, 280,000 g.; at 1,743 feet, 440,000 g.; at 1,845 feet, 480,000 g.; at 1,885 feet, 490,000 g.; at 1,943 feet, 520,000 g.; at 1,977 feet, 540,000 g.; and at 2,021 feet, 680,000 g. At a depth of 1,377 feet the static head was 28 feet; at 1,791 feet, 36 feet 6 inches; and at 2,045 feet, 38 feet 4 inches.

313. Lansdowne—(1) The Toolmaree Bore was sub-artesian; flowing bore made by cutting trench in the hillside; flow then 32,000 g. p. d.

316. Llanrheidol—

(3) Small soakage at 280 feet; slight increase at 315 feet; at 1,645 feet a flow of about 106,000 g. p. d., and rest of yield at 1,709 feet.

318. Rosedale (2)—A seam of good *coal* at 150 feet.

319. Lucknow—(1) Depth in 1907, 1,411 feet; flow, 280,000 g. p. d. One of the bores is reported to have ceased flowing (Feb., 1910).

320. Mackay Gasworks—Bore overflows into well below surface. Fairleigh—Water obtained in soft granite.

321. Malula—Two seams of *coal* were passed through.

322. Malvern Hills—Water not utilised; about 7,000 g. p. d. from lowest waterbeds; upper supplies cased off.

324. Manfred Downs—(1) Four different supplies. (3) Closed by ball valve; max. flush, 25,000 g. p. d. (4) Closed by ball valve; max. flush, 7,600 g. p. d. (5A) Water not used. (6) Orig. depth, April, 1886, 200 feet; closed by ball valve; max. flush, 14,250 g. p. d. (7) Closed by ball valve; max. flush, 14,250 g. p. d. (10A) Permanently closed; flow very small; pressure good. (13) Deepened to granite; no further supply. (20) No flow below 450 feet; bottomed on granite. (21) No flow below 605 feet; bottomed on granite.

325. Quarrell's—(8B) Bore closed with a cap and small plug; max. flush, 16,200 g. p. d. (9) Salt water.

326. Oxton Downs—(15) Water issues from a crack in granite at 1,060 feet.

328. Manuka—(1) Ceased flowing; orig. flow, 500,000 g. p. d. (2) Had a flow of 200,000 g. p. d. when completed; ceased flowing about Aug. 1901. (3) Salt water at 78 feet. (4) Salt water at 93 feet; small supplies at 163 feet and 200 feet; water brackish, but suit stock. (5) Small supplies at 98 feet and 160 feet; water fresh. (6) Water from 120 feet rose to 40 feet; more water at 162 feet; fairly fresh water.

329. Malboona—Orig. flow, 193,000 g. p. d.; ceased flowing; W.L. in Sep., 1901, 18 feet below surface; about May, 1907, 35 feet below surface.

331. Marathon—(5) Orig. depth, 900 feet; flow, 50,000 g. p. d.; temp. 90° F. Bores 3, 5, and 7 ceased flowing; dates not given. Orig. flows of 3 and 5 bores, 700,000 g. p. d. each; of 7 bore, 400,000 g. p. d.

332. Tweedsmuir—Depth in March, 1897, 1,400 feet; flow, 260,000 g. p. d.

333. Marion Downs—(1A and 1B) Only a foot apart; 1B bored into 1A; 1C is 6 feet from 1A and 1B. (1C) Water contained from 2 to 4 oz. of salt per gallon. (2) Flow at first 5,000 g. p. d.; ceased after withdrawing outer casing.

334. Maxwellton—Orig. flows: (1) 500,000 g. p. d., depth, 1,355 feet; (2) 800,000 g.; (3) 700,000 g.; (4) 700,000 g.; (5) 1,000,000 g.; (6) 1,500,000 g.; (7) 1,200,000 g. Flows in 1902: (1) 1,000,000 g. p. d.; (2) 550,000 g.; (3 and 4) 330,000 g., each; (5) 800,000 g.; (6) 920,000 g.; and (7) 1,150,000 g.

335. Wimmera—Orig. flow, 1,000,000 g. p. d.; 14 miles of bore drains. Bundorin—Flowing 34 inches over casing (1902).

336. Merina—A well to 98 feet, bored 17 feet.

337. Millungera—(1) Very great leakage around casing. (5) Small flow at 750 feet; orig. flow, 1,025,000 g. p. d.; flow, Aug., 1901, 800,000 g.

339. Minnie Downs—(1) First supply at 725 feet; salt; second supply at 2,476 feet, rose to within 180 feet of surface; water struck from 2,300 to 3,250 feet, rising to 120 feet below surface; 6-inch steam pump erected. (2) Flows at 2,900 feet, 2,979, 3,079, 3,200, 3,650, and 3,900 feet.

341. Mona—(1) Measured flow, June, 1896, 490,100 g. p. d.; static head, 196 feet. (2) Orig. flow, 2,000,000 g. p. d. (3) Orig. flow, 2,300,000 g. p. d.

342. Moreston Downs—(1) Soakage at 140 feet; a pumping supply at 309 feet. (and 3) Bottomed in hard *limestone*.

343. Beaudesert (Moreton)—Collapsed (1895).

347. Mt. Cornish—(1) Orig. flow, 576,000 g. p. d. (2) Soakage at 310 feet; small flow at 2,180 feet; at 2,400 feet, flow 165,000 g. p. d.; at 2,270 feet, 335,000 g.; increasing to 420,000 g. down to 2,900 feet.

348. Mt. Enniskillen—(A) In a flowing spring. Inspected 11th July, 1898; flow then, 1,158 g. p. d.; static pressure, 3 to 4 lb.; temp. taken after a frosty night. The bore requires periodical cleaning; water mineral, but suit stock (March, 1911). (I) Desert soak only. Abandoned 1896. (B to I) In Desert Sandstone Formation. (1) Work suspended in April, 1899, at 800 feet; sub-artesian supply at 868 feet, rose to 120 feet; at 1,600 feet water rose to 10 feet; first flow at 2,300 feet, increasing to 2,900 feet; no further supply. (2) Sub-artesian supply at 460 feet; flows at 900, 1,500, and 2,000 feet; from 2,000 feet flow increased with depth. Cased with 1,000 feet of 6-inch casing, and 2,200 feet of 4-inch casing. (3) Free flow 8 inches over 6-inch casing (April, 1911). (5) Free flow 5.75 inches over 6-inch casing. (March, 1911).

349. Macfarlane Downs—Intended to deepen No. 1 bore; water not used (salt). No. 2 bore not used; water brackish. (Feb., 1911.) Doyle's—(1 and 2) Water brackish, but suit stock; W.L. falls to 260 and 240 feet respectively when quantities as given in table are pumped. (Jan., 1911).

354. Mulga Downs—(1) Flow from 1,687 feet in 1896, 763,950 g. p. d.

356. Murweh—

(1) Former measured flow, May, 1897, 1,615,600 g. p. d.; outlet then 11.25 feet above surface and flow probably throttled by a plug valve. Inspected Nov., 1910; flow, 1,215,400 g. p. d. at surface of ground; slight leakage outside 8-inch casing.

(2) Flow, May, 1897, 277,680 g. p. d. Inspected Nov. 1910, *see* table for data; outlet 6 feet above ground; free flow 1.75 inches over 8-inch casing; depth 1,298 feet; bore discharging very small pebbles of sandstone and shale, also a little gas.

(3) Former flow, April, 1897, 784,150 g. p. d.; pressure not taken. Second inspection, Nov., 1910, *see* table for data; outlet 2 feet above surface; 6-inch casing fairly sound, but pitted on the outside.

(4) Flow, April, 1897, 784,150 g. p. d.; outlet 5 feet above ground. Second inspection, Nov., 1910; flow, 501,700 g. p. d. at surface; in 1909 the flow was cut off for three weeks, which caused the borehead to sink out of sight, and scoured a hole 20 feet in diameter and 10 feet deep; two additional lengths were screwed to the sunken borehead, but only about 50,000 g. p. d. are now flowing 5.75 feet above the surface.

(5) Supply at 105 feet rose to 70 feet; flows tapped at 1,345, 1,356, 1,547, 1,600, 1,644, 1,753, and 1,780 feet; first flow in a sandbed, others in sandrock from 5 to 40 feet thick; very troublesome drift sand at 270 feet; clay at bottom of bore. Cased with 16-inch casing to 50 feet, 8-inch to 311 feet, and 6-inch to 1,780 feet. Inspected Nov., 1910.

357. Rutherford's—Former flow much larger; slight leakage outside of casing, which increases under pressure; outlet 5 feet above surface; head at outlet 2 feet; 4-inch casing rusted through in places. Inspected Nov., 1910, *see* table for data.

Kenmore—Three water-bearing beds, the lowest 40 feet thick; depth, 1,898 feet; outlet 3 feet above surface. Inspected Nov., 1910, *see* table for flow, etc.; about 20 miles of bore drains. Bore also known as '' Wheatleigh.''

Springfield—Orig. est. flow, 800,000 g. p. d. Inspected Nov., 1910, *see* table for data; outlet 3 feet above surface; while flushing, a quantity of sandy shale chips were discharged from the bore.

Quilberry—Inspected Nov., 1910, *see* table for data; supply at 240 feet; last flow at 1,877 feet. Bore cased with 157 feet of 10-inch casing, 388 feet of 8-inch, and 1,877 feet of 6-inch casing; water flows over 50 miles of bore drains.

358. Acacia Downs—Former flow, 500,000 g. p. d., decreased to 300,000 g.; deepened from 2,418 feet to 3,030 feet in 1908.

361. Nive Downs—(1) Orig. W.L. 32 feet below surface. (2) W.L. reported 8 feet higher in May, 1907. (?) (3) Orig. depth, Nov., 1898, 1,232 feet, W.L. about 100 feet below surface; deepened about end of 1899, and obtained a flow of 170,000 g. p. d.

Yandarlo (1 to 4)—Strata chiefly black and greasy shale; supplies struck in white sandstone; water brackish, but suit stock; bores 1 to 4 cased with 5-inch casing to a depth of 744, 597, 775, and 171 feet respectively.

West Quarters—(1) Water from 650 feet is of poor quality; no water tapped in white sandstone between 700 feet and 900 feet. (2) Bottomed in sticky, dark-blue shale.

Chatham—First water at 80 feet; main supply at about 900 feet.

363. Noorama—(3) Flow at 1,600 feet; 40 feet of hard rock at 1,480 feet; bottomed on quartz schist at 1,710 feet.

367. Northampton—

(1) Bore deepened in 1904 from 1,332 feet. First inspected July, 1898, *see* table for data. Very saline water at 390 feet, which rose to 145 feet; first flow at 1,332 feet, 250,000 g. p. d.; temp. 106° F.; other flows between 1,700 and 1,813 feet; flow measured after completion barely 1,000,000 g. p. d., temp. being then 112° F.; altitude levelled, May, 1911; bore water corrodes bore casing. Cased with 200 feet of 10-inch casing and 1,216 feet of 8-inch casing.

(2) Flow at 1,048 feet, 260,000 g. p. d.; at 1,645, 301,800; at 2,060, 515,400; at 2,344, 1,390,000; at 2,557 feet, 1,620,000 g.; flow not measured when inspected (May, 1911).

(3) Cased with 54 feet of 8-inch casing and 3,122 feet of 6-inch casing. At 1,400 feet the W.L. stood at 30 feet; at 1,700 feet the temp. of the water increased, but the W.L. remained the same; at 2,050 feet the free flow was 4 inches over the 6-inch casing; at 2,590 feet, 9 inches, and after completion, 13·5 over casing. Altitude levelled, May, 1911.

373. Penola Downs—(1) Orig. flow, about 100,000 g. p. d.; May, 1907, pumped 45 below surface. (2) Orig. flow, 150,000 g. p. d.

374. Portland Downs—Water contains some gas, probably fire-damp.

375. Quambeytook—Water rose 4 feet over 6-inch casing in Aug., 1896.

376. Redcliffe—(1) First supply from 645 feet, rose to 40 feet below surface; pumped 90 feet. (3) First water at 920 feet, second water at 1,150 feet; pumped 25 feet from surface.

379. Richmond Downs—(4) All the water comes up outside of casing. (6) Ceased flowing before Feb., 1907; former reputed flow, 200,000 g. p. d. (7) Former W.L. 50 feet below surface.

381. Rocklands—Supplies of bores 1 to 7 have been tested to 120,000 g. p. d.

382. Rockwood—(1) Bore emits a very large flow of fire-damp gas; flow reported, 10,000 g. p. d. in 1907. (2) Former reputed flow, 700,000 g. p. d. (3) Former reputed flow, 750,000 g. p. d. (4) Former W.L., 80 feet below surface. (6) Former W.L., 38 feet below surface.

385. Mineral Oil Company—At 525 feet, small flow of brackish water, containing about 1.5 oz. of saline substance per gallon; at 1,590 feet flow was 138,000 g. p. d. of fresh water; drills working in hard shale became highly magnetic; at 3,702 feet (Oct., 1908) struck a large volume of *illuminating gas*, estimated at over 1,000,000 cubic feet per diem, and issuing under a pressure from 200 to 300 lb. per square inch; gas ignited, destroyed the iron derrick; flame extinguished (11th December, 1908) by covering bore with iron hood, after burning for two months. *See* "Q'land Gov. Min. Jour'l," Jan., 1909. Gas ceased to issue (27th Jan., 1909) after flowing 78 days.

386. Glenalven (Rosewood)—Bores Nos. 1 and 2. Only 200 years apart; in both bores a small quantity of *inflammable gas* was tapped at about 70 feet.

387. Ruthven—(1) First flow of 400 g. p. d. at 1,319 feet; main flow at 4,070 feet; estimated flow in 1907, 170,000 g. p. d.; water brackish; 4,032 feet of 6-inch casing in bore. (2) Supply at 600 feet rose to 90 feet from surface; at 3,309 feet more water; at 3,546 met with sand, W.L. at 300 feet; at 3,552 feet flow was 800 g. p. d.; at 3,842 flow was 4,300 g. p. d.; at 3,898 feet was 15,000 g. p. d.; at 3,930 feet, flow was 46,080 g. p. d.; water of good quality; *natural gas* issuing. Paraffin was obtained from this bore. *See note under* Paraffin Wax.

388. Saltern Cr.—(1) Ceased to flow in 1895, now pumped. *See* pressure notes, Ann. Rep., Hydr. Engineer, 1898; W.L. in 1898, 4 feet below surface. (2) Former flow, 70,000 g. p. d.; static head 72 feet. (4) Former est. flow, 700,000 g. p. d.; static head 116 feet. (5) Former est. flow, 500,000 g. p. d. (6) Former est. flow, 700,000 g. p. d. (7) When second flow of a new bore, about 5 miles east, was struck in June, 1899, this bore ceased to flow, and the potential fell to 12 feet below surface; estimated mean loss of potential since 1893 about 8 feet annually; W.L. 13 feet below surface (Oct., 1899), and 36 feet (May, 1907); former flow, 50,000 g. p. d. (8) Former est. flow, 600,000 g. p. d. (9) Former est. flow, 500,000 g. p. d. (10) Former est. flow, 1,000,000 g. p. d.

390. Savannah Downs—

(1) Small flow at 220 feet in green sand; second flow in coarse sandstone at 700 feet after sinking in the sandstone about 100 feet; flow gradually increased until granite was met with at 790 feet; original flow, about 1,200,000 g. p. d.; now (Ap., 1901) 1,150,000 g. p. d.

(2) Similar to No. 1 up to about 500 feet, where sandrock was entered and flow increased, continuing to do so until completion of bore; water-bearing strata not "bottomed," force of water prevented sinking. Flow has not decreased recently, it is thought.

394. Sesbania—(1) Orig. est. flow, 700,000 g. p. d. (2) Orig. est. flow, 650,000 g. p. d.; deepened in 1907 from 3,027 feet; water flowing through a trench; borehole filled up to 3,036 feet. (3) Orig. est. flow, 1,400,000 g. p. d. (4) Orig. est. flow, 1,300,000 g. p. d. (5) Good soakage at 200 feet; small flow at 2,450 feet.

400. Talgai West—Supplies at 60 and 90 feet; did not rise in bore.

402. Narada—Water in bores 1 and 3 is brackish. When 7,000 g. p. d. are pumped in No. 4 bore, the W.L. is lowered to 220 feet; this water is slightly brackish, but is fit for domestic use. (Jan., 1911.)

403. Tambo—(1) Inspected July, 1898, *see* table for data; outlet 6.75 feet above surface; cased with 6-inch casing to about 1,600 feet. Altitude levelled (Dec., 1910). (2) Inspected July, 1898, *see* table for data; outlet 3 feet above surface. Altitude levelled (Dec., 1910). (3) Inspected July, 1898, *see* table for data; a well sunk to 60 feet; orig. W.L. 45 feet below surface; cased with 500 or 600 feet of 8-inch casing and 1,950 feet of 6-inch casing. Altitude levelled (Dec., 1910). (4) Inspected Dec., 1910, *see* table for data.

404. Tamworth—Orig. flow, 600,000 g. p. d.

405. Antrim—Former est. flow, 500,000 g. p. d.

406. Tara—(1) Flow in April, 1894, about 250,000 g. p. d.; ceased flowing almost suddenly, 24th July, 1896; W.L. then 1 foot above surface.

406. (1) Flow in April, 1894, about 250,000 g. p. d.; ceased flowing almost suddenly 24th July, 1896; W.L. then 1 foot above surface. (2) Est. flow in Aug., 1893, 450,000 g. p. d.; static head about 41 feet; flow gradually diminished, until 20th March, 1898, when the W.L. suddenly fell to 7 feet below surface. (3) Est. orig. flow, 500,000 g. p. d.; considerable quantity of *inflammable gas* rising; loss of potential, 8 or 9 feet in fifteen months (Oct., 1899). Ceased flowing, date not to hand; depth in 1907, 3,500 feet.

409. Tatala—At 1,607 feet, mica-schist or granite.

410. Telemon—(1) Orig. depth, Dec., 1893, 609 feet; est. flow in 1907, 150,000 g. p. d. (2) Water rapidly corrodes iron casing; est. flow in 1907, 300,000 g. p. d. (3) Orig. depth, May, 1895, 925 feet; est. flow in 1907 (?), 25,000 g. p. d. (4) Est. flow, 600,000 g. p. d. in 1907. (5) On a high ridge; W.L. 4½ feet below surface, April 1897. (6) Est. flow in 1907, 150,000 g. p. d. (7) Est. flow in 1901, 400,000 g. p. d.

Sylvania—A small increase of flow obtained by deepening from 1,042 to 1,297 feet; est. flow in May, 1907, 84,000 g. p. d.

Annadale—Est. flow in 1907, 160,000 g. p. d.

413. Thurulgoona—(3) Water comes up outside casing, and is led from a large well by 3-inch pipes into a drain. (11) Irrigated 600 acres of wheat in 1902.

415. Gidgerah or Moonjaree No. 1—Est. flow after completion, 130,000 g. p. d. Inspected May, 1911, *see* table for data; outlet 3 feet above ground; static test of 4 hours; one water-bed; bore was sunk over 700 feet into bed-rock which was met with immediately after striking the flow; gas in the bore water caused an oscillation in the flow while flushing after the static test.

Eumarrah or Moonjaree No. 2—Est. flow after completion, 124,000 g. p. d. Inspected May, 1911, *see* table for data; 7-inch casing used; static test of 20 hours 57 minutes; no leakage occurred outside of casing until 2 hours after closure, which increased to a steady flow of 4,790 g. p. d. within 6 hours, but ceased 5 minutes after taking off the pressure; a few bubbles of gas, also fine particles of shale noticed in flow; the flush after static test amounted to 194,500 g. p. d.

Goora—Est. flow after completion, 2,500,000 g. p. d. Inspected May, 1911, *see* table for data; outlet 9 feet above surface; static test of 36 minutes; 25 miles of bore drains.

Hazelfield—Est. flow after completion, 2,600,000 g.p.d. Inspected 1911, *see* table for data; first flow at about 1,100 feet; static test of 93 minutes, which caused a leakage of 65,200 g. p. d., but stopped again after reopening the bore; the pressure oscillated for some time with a maximum amplitude of 50 feet head and a period of 1.5 seconds; outlet 6 feet above surface.

416\.

419. Toolebuc—(1) A well sunk for 46 feet. (2) Granite bottom. (3) Granite bottom. (4) Granite bottom. (5) Strata not bottomed. (6) 33-foot well; granite bottom. (7) 46-foot well. (8) 21-foot well flows out at 14 feet below surface into low-level tank.

420. Toorak—(1) Orig. flow, 795,400 g. p. d.; static head, 300 feet; max. H.P., 15.03. (2) Former est. flow, 1,000,000 g. p. d.; static head over 200 feet. (3) Former est. flow, 1,500,000 g. p. d. (4) Former est. flow, 2,000,000 g. p. d. Bores 1 and 2. Cleaned and deepened in 1896.

421. Tower Hill, Yanga—Orig. a good flow; ceased in April, 1906.

422. Tulby—(1) Site flooded.

425. Tullundunna—Last flow at 2,890 feet; very hard sandstone at 2,900 feet; from 2,950 to 3,010 feet sand rock carrying quartz in large quantities; bore "determined" in very hard brown sandstone.

427. Wingera—(1) Orig. W.L. 35 feet below surface. (2) Orig. W.L. about 100 feet below surface.

428. Shirley—(2) Orig. W.L. 60 feet below surface. (3) Orig. W.L. 80 feet below surface. (4) Orig. W.L. at 60 feet below surface.

430. Vindex—(1) Abandoned, 1889. Bores A B C, from G.S.Q. Pub., No. 121 (1898). (5) Supply at 260 feet no good; at 320 feet water rose to 192 feet, at 391 feet to 152 feet, and at finish the W.L. stood at 140 feet.

431. Warbreccan—Water barely drinkable, but suit stock; bubbles of firedamp and drops of brown petroleum perceptible. Inspected Aug., 1899, *see* table.

432. Warenda—(1) Orig. W.L. 79 feet; 7 feet higher in 1907; *limestone* from 187 to 410 feet, and from 1,047 feet to the bottom. (2) Limestone, 184 feet to bottom. (3) Limestone, 186 feet to bottom. (5) Limestone, 565 feet to bottom. (8) Limestone, 315 feet to bottom. (9) Limestone, 177 feet to bottom. (11) Limestone, 60 feet to bottom. (11B) At bottom of water-hole; formed W.L. 3 feet below surface. (12) Flows into bed of waterhole; drowned. (16) Limestone, 172 feet to bottom. (17A) Collapsed; W.L. 1 foot below surface in 1907. (17B) (18) Limestone, 192 feet to bottom. (19), (21A) Quicksands met with.

435. Canning Downs—(3) First water at 50 feet.
Glengallan—Numbers of successful shallow bores.

435. Weelamurra—(1) Flow from 1,540 feet, 173,300 g. p. d.; pressure, over 100 lb.; temp., 114° F. (2) Shaft to 225 feet; bore to 280 feet. In one of the bores 40 feet of hard white *chalk* is said to occur.

436. Wellcamp—A seam of *coal* 11 feet thick, 60 feet below surface.

437. Wellshot—(1, 2, 3) Flow accompanied by much gas, amount apparently less in No. 2 than in No. 1 and 3 bores; temp. of No. 1, 176° F., in Dec., 1893; seven distinct flows of water in No. 3; flow of No. 2 in 1907, 193,800 g. p. d.; of No. 3, 247,400 g. p. d.

439. Westland—

(1) Orig. flow, 69,000 g. p. d.; diminution of flow noticed in 1897. For 18 months from the beginning of 1898 there were great pulsations in the evolution of firedamp, at intervals of a few seconds; now nearly disappeared; temp. stated to have been 6° F. higher. Flow in May, 1897, 19,200 g. p. d. In August, 1899, the bore inspected, *see* table. In 1907 the flow was about 10,000 g. p. d.

(2) Former yield, 90,000 g. p. d.; in May, 1897, the flow diminished to 30,000 g. p. d.; bore yielding about 40 cubic feet of *inflammable gas* per hour (Aug., 1899, when inspected, *see* table); flow diminished est. flow, 20,000 g. p. d. in 1907.

440. Whitula—(1) Soak at 225 feet; drift sand from 316 to 424 feet, sand and water rose to 90 feet; at 1,520 feet W.L. stood at 80 feet below surface. (2) Water a little brackish.

444. Wondoolah—Believed that no further supply was met with below 1,390 feet.

447. Yandilla—A well 6 feet sq.; pump going day and night for three months during great drought did not affect supply; water used to irrigate about 120 acres of land; water did not rise in well when struck; subterranean current perceptible.

448. Henderson—Inspection April, 1896; flow, 2,710,000 g. p. d.. Inspection Feb., 1911, see table for data; flow of 53,000 g. p. d., issuing between 8 and 6-inch casings, not affected by static test of 80 minutes.

. . Cobbrum—Orig. flow, 3,500,000 g. p. d. (flowing 7.25 feet over 6-inch casing). Inspected March, 1911, *see* table for data; bore head badly corroded; small leakage outside the 6-inch casing; visibily increasd to 42,000 g. p. d. during static test of 40 minutes; outlet 3.3 feet above surface.

450. Yarron Vale—Water of inferior potability.

451. Yarromere—Salt water.

452. Yorkshire Downs—Est. flow at 1,190 feet, 260,000 g. p. d.; at 1,249, 720,000; at 1,291, 1,040,000; at 1,379, 1,430,000; and at 1,405 feet, 1,460,000 g. p. d.

Artesian Water. Practically the whole of the western half of the State is an artesian basin, the area estimated to be water-bearing being about 300,000 square miles. The geological formations in which the water occurs are Lower Cretaceous and Trias-Jura. The greatest depth bored (at Eimerah) is 5,045 feet, the shallowest flow being 10 feet deep (Manfred Downs). The aggregate depth bored (August, 1911) is 1,644,440 feet. Total estimated daily flow, 520,299,900 gallons. Total number of bores officially known, 1,388; bores flowing, 758. For Bore Records and Water Analyses, *see tables under* Artesian Bores. For general geological information, *see* G.S.Q. Pub. Nos. 19A, 62, 101, 121, Ann. Rep. Dep. Mines, 1900, and the Ann. Reports of the Hydraulic Engineer (Water Supply Department), *also* (1) The Dead Heart of Australia, by J. W. Gregory, F.R.S., D. Sc.; Lond. John Murray, 1906. Asbestos. A general term for fibrous varieties of Hornblende and Serpentine. *See* Hornblende, *var.* Asbestos; Serpentine, *var.* Chrysotile.

MINERAL NOTE: The Hornblende varieties of Asbestos are fibrous forms of either Tremolite or Actinolite, the Serpentine varieties being (*a*) Picrolite, and (*b*) Chrysotile, the latter including (*c*) Amianthus. Picrolite is coarsely fibrous, Chrysotile is silky-fibrous, the latter being the most valuable of all varieties.

GEOLOGICAL NOTE: Found in serpentine, altered sedimentary rocks, and quartz. It occurs in small veins in serpentine at Kandanga, south of Gympie, and at several localities to the north of Rockhampton in a long serpentine belt extending from near Keppel Bay to Marlborough. Large areas exist in both districts which have not been prospected. *See maps*, Pls. 3-11.

USES: Asbestos is used in the manufacture of asbestos slates, mill-board, paper covering, steam packing, boiler covering, cloth, rope, yarn, fireproof paints, fabrics, fibro-cement, &c.

105. ——. Contra Copper Lode, Cloncurry, about 480 miles (by rail) W.byS. of Townsville. *Co.* Beaconsfield; *Dist.* **Burke.** *Ref.* G.S.M.

Assay fees for testing minerals. *See under* Government Analyst Fees.

Assaying Mineral Samples. The Geological Survey Office undertakes the free examination of minerals for prospectors, but the locality in which the minerals are found must be disclosed, and the samples, if required for fire assays or chemical analyses, must be properly prepared. Particulars and conditions are given in a leaflet, entitled "Testing Samples for Prospectors," obtainable at the Geological Survey Office, the Mines Department, and at the Wardens' offices in mining centres and large towns. *See also under* Gov. Analyst Fees.

Asteria, *syn.* Star Sapphire, *var. of* Corundum, *which see. Note:* This stone is found at Anakie, Central Queensland, and specimens which have been cut make very fine gems.

Atacamite. *Compo.* Hyd. oxy-chloride of copper. *Colour*, shades of green. *Streak*, apple-green. *H* = 3—3·5. *Sp.gr.* = 4—4·3. *Contents* (*max.*), Copper 59 per cent.

192. ——. *Assoc.with* Cuprite, Tile ore, Malachite, and Red Ochre, in greywacke and shales. *Loc.* Shaughran Copper Mine, Watsonville (*ante*). *Contents:* Copper =10 per cent. *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

192A.——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Iron Pyrites, Mispickel, Cassiterite, Stannine, Wolfram, Ironstone, Fluorspar, and Chlorite. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 26 (1883), and 119, p. 15 (1897).

193. ——. *Assoc.with* Copper Pyrites, Tile ore, Malachite, and Chalcanthite, in greywacke. *Loc.* Wyatt's Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

194. ——. *Assoc.with* Cuprite, Tile ore, Tenorite, Malachite, Chrysocolla, Magnetite, and Hematite. *Loc.* Boomerang Copper Mine, 1 mile W. of Calcifer, 133 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Field. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 8 (1891), and 119, p. 36 (1897), and G.S.M.

194A.——. *Assoc.with* Copper (native), Cuprite, Tetrahedrite, Malachite, Hematite, Manganese-dioxide, and Selenite, in lode. *Loc.* Griffith Lease, Julia Cr., 2 miles S.E. of Mungana Rail Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 5 (1891), and 134 p. 11 (1898).

195. —— (crystals). In breccia, Lady Jane Mine, 1 mile S.E. of Mungana Rail Stn. (Chillagoe line) (*ante*).

196. ——. *Assoc.with* Malachite. *Loc.* 5 miles S. of Koorboora Rail. Stn. (Chillagoe line), 108 miles S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook.

197. ——. *Assoc.with* Copper Pyrites, Cuprite, Redruthite, Malachite, Chrysocolla, and Garnet. *Loc.* Dorothy Mine, Opera Cr., 1½ miles S.E. of Mungana, 150 miles (by rail and road) W.S.W. of Cairns (Cairns-Chillagoe Rail.), Walsh and and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 2 (1891), and P.R.S.Q., vol. 15, p. 51 (1900).

198. ——. *Assoc.with* Cerussite and Atacamite. *Loc.* Muldiva Silver-Lead Mines, 7 miles S.W.byS. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 51 (1900).

198A.——. *Assoc.with* Native silver and Malachite, in slate. *Loc.* Muldiva Silver-Lead Mines (*ante*). *Ref.* B.D. Very beautiful crystals have been found in this mine.

199 ——. *Assoc.with* Copper Pyrites and Malachite. *Loc.* Mungana Copper Mines, 149 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

200. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Minium, Galena, Cerussite, Zinz-Blende, Hematite, and Garnet, in gossan, &c. *Loc.* Penzance Mine, nr. Redcap, 3 miles N.E. of Mungana, Chillagoe Rail. line, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, p. 11 (1898).

201. ——. *Assoc.with* Copper Pyrites, Malachite, and Cerussite, in ferruginous lode. *Loc.* Queenslander Mine, nr. Mt. Redcap (*ante*). *Ref.* G.S.Q. Pub. 134, p. 11 (1898).

201A.——. *Assoc.with* Copper Pyrites, Bornite, Redruthite, Malachite, Hematite, Limonite, Cinnabar, and Jasper, in quartz and calcite. *Loc.* St. George Copper and Coal Mines, Little R., 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mosman; *Dist.* Cook. *Ref.* G.S.Q. Pub. 222, pp. 21-32 (1910).

202. ——. *Assoc.with* Malachite. *Loc.* Fossilbrook, 34 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 19 (1898).

202A.——. *Assoc.with* Redruthite, Tile ore, and Malachite, in quartz lode. *Loc.* Ortona Copper Mines, S. bank of Percy R., 13 miles N.W. of Gilberton, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, pp. 17-19 (1909).

202B.——. *Assoc.with* Cuprite, Tetrahedrite, Malachite, Cerussite, and Ironstone, in lodes. *Loc.* Tartana Hill, Bowler Cr., Ashtonville, 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Wrotham; *Dist.* Cook.

——. *See other* Walsh and Tinaroo references, No. 209, &c.

203. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, Zinc-Blende, and Cassiterite. *Loc.* Ballandean Tin Mine, Ballandean, 14 miles (by rail) S. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* B.D.

204. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, and Zinc-Blende, in quartz. *Loc.* Sel. (24), nr. Sundown Cr., Severn R., 25 miles S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

204A.——. *Assoc.with* Gold, Pyrargyrite, Iron Pyrites, Copper Pyrites, Cuprite, Tile ore, Malachite, Galena, Cerussite, Zinc-Blende, Smithsonite, Ironstone, and Calcite. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120 (1898), and 191 (1904).

205. ——. *Assoc.with* Cuprite, Malachite, and Limonite, in quartz. *Loc.* Ivanhoe M.L. 277, Duchess Group, Burke R., between 60 and 70 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 23, 24 (1908).

206. ——. *Assoc.with* Cuprite and Malachite. *Loc.* Monastery M.L. 467, Mt. Bernie Group, 5 miles W. of Mt. Bernie, 18 miles S.W. of Duchess Group, 79 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* A.R., p. 117 (1907).

207. ——. *Assoc.with* Ironstone and Malachite. *Loc.* Trikelana M.L. (522), Trikelana Group, Burke R., between 60 and 70 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Assay: See* Malachite. *Ref.* A.R., p. 116 (1907).

208. ——. *Assoc.with* Cuprite and Malachite, in schist, quartz, and kaolin. *Loc* Horse Cr. M.L. 220, &c., Horse Cr. Group, 5 miles S.S.W. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 15-17 (1908).

For other Cloncurry references *see* Nos. 150-156, 159-171.

209. ——. *Assoc.with* Cassiterite, Iron Pyrites, Malachite, Limonite, Hematite, Wolfram, Mispickel, Göthite, Penninite, Chlorite, Fluorspar, Websterite, and Topaz. *Loc.* Coolgarra Tin Mines, Return Cr., 9 miles N.N.E. of Mt. Garnet Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

210. ——. *Assoc.with* Cuprite, Malachite, and Wolfram, in quartz. *Loc.* Round Mountain, W. of Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 22, p. 4 (1891).

211. ——. *Assoc.with* Tile ore and Malachite, in lode. *Loc.* P.C., Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

212. ——. *Assoc.with* Malachite and Cassiterite. *Loc.* Gt. Northern Tin Mine, Herberton, 9 miles S.S.W. of Atherton, Cairns Rail., Walsh and Tinaroo Mineral Field (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 77 (1887).

212A.——. *Assoc.with* Tetrahedrite, Malachite, Galena, Mimetite, Hematite, and Limonite, in lode. *Loc.* Mt. Garnet Mine, Return Cr., 136 miles S.W. of Cairns, Cairns-Chillagoe Rail., Walsh and Tinaroo Mineral Fields (*ante*). *Ref* G.S.Q. Pub. 72, p. 5 (1891).

213. Azurite. *Assoc.with* Gold, Silver, Copper Pyrites, Bornite, Cuprite, Tenorite, Malachite, Chalcanthite, Iron Pyrites, Mispickel, Hematite, Magnetite, Minium, Cerussite, and Zinc-Blende, in quartz lodes traversing quartzite and porphyry. *Loc.* Mt. Garnet Mines, Return Cr. (*ante*). *Ref.* G.S.Q. Pub. 134, pp 16-19 (1898).

214. ——. Maybelle Mine, Newellton (Silver Valley), 10 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills, Chillagoe Br. Rail., Walsh and Tinaroo Mineral Fields (*ante*)., *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

See further Walsh and Tinaroo references, No. 186, &c.

214A.——. *Assoc.with* Malachite, in quartz. *Loc.* Federal M.L. (60), Soda Water Cr., Ravenswood Goldfield, 78 miles (by rail) S.W. of Townsville. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* O.R. (1909).

215. ——. Elphinstone Cr., trib. of Burdekin R., Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

215A.——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, and Malachite, in quartz. *Loc.* Venture Reef, Marengo Goldfield, 24 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Assay: See* No. 7490. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

215B.——. *Assoc.with* Gold, Copper Pyrites, Malachite, and Chalcanthite, in quartz reef, in granite. *Loc.* Continong Mine, Burdekin R., 70 miles W. of Townsville. *Co.* O'Connell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 35, p. 12 (1887), and G.S.M.

216. ——. *Assoc.with* Tile ore and Malachite, in quartz. *Loc.* Coane's Shaft, Stockyard Cr. Silver Mine, Hillgrove Run, Basalt R., 70 miles N.N.W. of Charters Towers. *Co.* O'Connell (*ante*). *Ref.* G.S.Q. Pub. 94, p. 13 (1893).

216A.——. *Assoc.with* Malachite, Cassiterite, Iron Pyrites, Hematite, and Limonite, in quartz and chlorite. *Loc.* M.L., Douglas Cr., Kangaroo Hills Mineral Field, 40 miles S.W. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

216B.——. *Assoc.with* Malachite, Hematite, and Limonite, in lode. *Loc.* Iron Mt., N. of Donnybrook, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 10 (1891).

217. ——. *Assoc.with* Cuprite, Malachite, and Limonite. *Loc.* Kallanda, Kangaroo Hills Mineral Field (*ante*). *Assay: See* Cuprite. *Ref.* A.R., p. 106 (1907).

218. ——. *Assoc.with* Malachite. *Loc.* True Blue Lease 161, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

219. ——. *Assoc.with* Malachite, in quartz. *Loc.* Victory Extd. Lease 188, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

220. ——. *Assoc.with* Malachite, Galena, Cerussite, and Manganese-dioxide. *Loc.* Bonnybrook Lease (178), Running R., Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 5½ oz. per ton. *Ref.* G.S.Q. Pub. 71, p. 9 (1891), and 82, p. 4 (1892).

221. ——. *Assoc.with* Galena, Kaolin, Steatite, and Lithomarge, in quartz lode. *Loc.* Hidden Treasure East Lease 166, Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 2 oz. per ton; Gold, 2 oz. per ton; Copper, 27·8 per cent.; (2) Silver = 28 oz. per ton; Lead, 7 per cent. *Ref.* G.S.Q. Pub. 82, p. 7 (1892), and G.S.M.

222. ——. *Assoc.with* Atacamite and Galena, in quartz. *Loc.* Rattler Lease 233, Kangaroo Hills Mineral Field (*ante*). *Assays:* Silver = 17 dwt. 23 gr., 9 oz. 16 dwt., and 22 oz. per ton; Copper, 3½ per cent. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

223. ——. *Assoc.with* Malachite. *Loc.* Waverley Leases, Kangaroo Hills Mineral Field (*ante*). *Assay:* Gold = trace; Silver = 3 oz. per ton; Copper = 2·2 per cent.

224. ——. *Assoc.with* Silver, Galena, and Barytes, in quartz. *Loc.* Star R. (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* L.B. 1, p. 479 (1883).

229C.——. *Assoc.with* Silver, Malachite, and Limonite, in lode. *Loc.* nr. Finch Hatton Rail. Stn. (Mackay line), 38 miles W.S.W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* A.R. 1910, p. 280.

230. ——. *Assoc.with* Copper Pyrites, Malachite, Galena, Cerussite, Iron Pyrites, Mispickel, and Zinc-Blende. *Loc.* Mt. Barker Silver Mine, 3 miles N.W. of Eungella Stn., 33 miles W. of Mirani, Mackay Rail. line. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 3 (1889), 181, pp. 12-17 (1903).

230A.——. *Assoc.with* Gold, Copper Pyrites, Tetrahedrite, Tenorite, Malachite, Galena, and Ironstone, in quartz lode. *Loc.* Pine Vale Copper Mine, Pine Vale Cr., Mt. Spencer Gold and Mineral Field, 6 miles S.W. of Eton Rail. Stn., 29 miles (by rail and road) S.W.byS. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Return:* Copper=270 lb. at £56 per ton; Silver=3 oz. 5 dwt. at 4s. per oz.; Gold=1 oz. 4 dwt. at £4 per oz. *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), 181, p. 19 (1903), and 229, p. 12.

231. ——. *Assoc.with* Malachite and Earthy Hematite, in quartz. *Loc.* O'Brien's Mine, 2 miles W. of Pine Vale Cr. Mine, Pine Vale Cr. (*ante*). *Ref.* G.S.Q. Pub. 53, p. 10 (1889), and 229, pp. 18, 19 (1910).

231A.——. *Assoc.with* Gold, Galena, Copper Pyrites, Cuprite, Malachite, Native Bismuth, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Hematite, and Ironstone. *Loc.* Daisy Bismuth Mine, Mt. Wyatt and Bowen roads, 3 miles S. of Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 57 (1889), and G.S.M.

232. ——. *Assoc.with* Malachite and Limonite. *Loc.* Lady Jane Mine, Eukalunda, Sellheim Mineral Field (*ante*). *Ref.* O.R.

233. ——. *Assoc.with* Copper Pyrites and Malachite, in lode 3 ft. wide, in granite country. *Loc.* Lady Mary Mine, Mt. Wyatt Goldfield, 60 miles S.S.E. of Ravenswood. *Co.* Sellheim (*ante*). *Assays: See* No. 2265. *Ref.* A.R., 1906, p. 74.

233A.——. *Assoc.with* Malachite, in gossan. *Loc.* nr. Burdekin Falls, about 83 miles S.W.byW. of Bowen. *Co.* Sellheim (*ante*). *Ref.* O.R. (1909).

234. ——. *Assoc.with* Cuprite and Malachite, in quartz lode. *Loc.* Peak Downs Copper Mine, Copperfield, 5 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* P.R.S.Q., vol. 4, p. 77 (1887).

234A.——. *Assoc.with* Malachite and Ironstone, in pipe vein. *Loc.* Freedom of Contract No. 1 Mine, Ruby Cr., 6½ miles N.E.byN. of Withersfield (Central Rail. line). *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 81, p. 4 (1892).

235. ——. Western Peak Downs Copper Lodes, 7 miles W. of Copperfield, 10 miles W.S.W. of Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.M.

235A.——. *Assoc.with* Native Copper and Malachite, in epidote-rock. *Loc.* on hill W. branch of Murray Cr., Collaroy, 25 miles N.W. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 141, p. 4 (1891).

235B.——. *Assoc.with* Malachite, in slate. *Loc.* Absolon's M.F. (2417), Royal Prince M.C. (54), Sunbeam M.L. (30), and Wallaroo M.F. (634), Mt. Flora Gold and Mineral Field. *Co.* Killarney (*ante*). *Ref.* G.S.Q. Pub. 181, pp. 10-12 (1903), 228, pp. 19, 20, 43, 45 (1910).

235B1——. *Assoc.with* Copper Pyrites, Malachite, and Hematite, in quartz. *Loc.* Ballyhooley Claim, 5 miles from Mt. Flora Freehold, Mt. Flora Gold and Mineral Field (*ante*). *Assay: See* 2269H. *Ref.* A.R., p. 243 (1910).

235c. Azurite. *Assoc.with* Malachite, in granite. *Loc.* Comet P.P.A. (135), and Robertson's Front Sel. M.F. (1828), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 22, 41 (1910).

235d.——. *Assoc.with* Malachite, Limonite, and Jasper, in gossan in granite and slate. *Loc.* Eastern Sel. M.F. (2755), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 3 (1910).

235e.——. *Assoc.with* Malachite, Hematite, and Manganese-dioxide, in granite. *Loc.* Emperor P.P.A. (320), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 25 (1910).

235f.——. *Assoc.with* Malachite, Hematite, and Mispickel (?), in slate. *Loc.* Fitzgerald's M.F. (1408), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 26 (1910).

235g.——. *Assoc.with* Copper Pyrites, Malachite, Iron Pyrites, and Ironstone, in slate. *Loc.* Isen's M.F. (2642), Mt. Flora Gold and Mineral Field (*ante*). *Assay: See* 2269b. *Ref.* G.S.Q. Pub. 228, pp. 27-29 (1910).

235h.——. *Assoc.with* Copper Pyrites, Malachite, Iron Pyrites, and Hematite, in granite. *Loc.* Iron Duke M.C. (42) and Painted Peak M.F. (1807), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 27, 39 (1910).

235i.——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Malachite, in gossan in slate. *Loc.* Keeley's M.F. (2382), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 29, 30 (1910).

235j.——. *Assoc.with* Copper Pyrites, Iron Pyrites, Malachite, and Hematite, in gossan in slate. *Loc.* Laird of the Hills M.L. (32), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 30, 31 (1910).

235k.——. *Assoc.with* Copper Pyrites, Tile ore, Malachite, Iron Pyrites, Chlorite, Calcite, in slate and granite. *Loc.* MacFadzen's M.F. (1749), Douchang, Flora, Essie, Green Outcrops, and Dozzler Lodes, Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 31-35 (1910).

235l.——. *Assoc.with* Malachite and Chrysocolla, in gossan, in granite. *Loc.* Marjorie M.L. (31), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 35, 36 (1910).

235m.——. *Assoc.with* Redruthite, Malachite, Iron Pyrites, Hematite, and Limonite, in granite. *Loc.* Monarch P.P.A. (116, &c.), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 36-38 (1910).

235n.——. *Assoc.with* Copper Pyrites, Malachite, Iron Pyrites, Pyrrhotite, Hematite, Limonite, and Magnetite, in granite and slate. *Loc.* Rodger's Back Sel. M.F. (1430), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

236. ——. *Assoc.with* Tetrahedrite and Malachite, in volcanic tuffs and altered sedimentary rocks. *Loc.* Balcomba Copper Mines, Balcomba Range, Mackenzie R., 90 miles W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* B.D.

237. ——. *Assoc.with* Copper ores, in quartz reefs traversing clay slates. *Loc.* Rannes Hill, Gogango Ranges, 30 miles S. of Gogango Rail. Stn. (Central line), 69 miles (by rail and road) S.W. of Rockhampton. *Co.* Pakington; *Dist.* Leichhardt. *Ref.* B.D.

238. ——. *Assoc.with* Malachite and Ironstone, in pipe of ore. *Loc.* Ruby Cr., 8 miles N.N.W. of Anakie Rail. Stn. (Central line), 201 miles (by rail and road) W. of Rockhampton. *Co.* Plantagenet; *Dist.* Leichhardt. *Ref.* B.D.

239. ——. *Assoc.with* Copper Pyrites, Tenorite, Malachite, and Hematite. *Loc.* Mt. Orange Copper Mines, 75 miles S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* P.R.S.Q., vol. 4, pp. 52 and 77 (1887).

239a.——. *Assoc.with* Malachite, in altered slate. *Loc.* Bonser P.P.A. (133), in gully N. of Boothill Cr., 3¼ miles W. of Tierawoomba Homestead, about 50 miles S.S.W. of Mackay. *Co.* Wodehouse (*ante*). *Ref.* G.S.Q. Pub. 28, p. 50 (1910).

240. ——. *Assoc.with* Malachite, in altered sedimentary rocks. *Loc.* Great Pyramid Copper and Silver Mine, near Biarra, 12 miles N. of Esk, 79 miles (by rail and road) N.W. of Brisbane (Brisbane Valley Rail. line). *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

241. ——. *Assoc.with* Cuprite and Malachite, in quartz lode. *Loc.* Seven-mile Diggings, 7 miles S.E. of Nanango, 40 miles N.N.W. of Kannangur Rail. Stn. (Brisbane Valley line). *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 29, p. 2 (1886).

242. ——. *Assoc.with* Copper Pyrites, Marcasite, Iron Pyrites, and Galena, in quartz. *Loc.* Black Watch Reef, Scrub Paddock Diggings, 23 miles N.E. of Nanango. *Co.* Fitzroy; *Dist.* **Burnett.** *Assay:* Gold=4 oz., and Silver=11 oz. per ton. *Ref.* G.S.Q. Pub. 29, p. 3 (1886).

243. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Malachite. *Loc.* Par. of Dixon (por. 140), 13 miles E. of Esk, 70 miles (by rail and road) N.W.byW. of Brisbane, Brisbane Valley Rail. *Co.* Stanley; *Dist.* **Moreton.** *Assay: See under* Copper Pyrites. *Ref.* A.R., pp. 156, 157 (1908).

243A.——. *Assoc.with* Copper (native), Copper Pyrites, Cuprite, Tile ore, Malachite, Iron Pyrites, Magnetite, Hematite, Limonite, and Calcite. *Loc.* Many Peaks Syndicate's Copper Mines, Deception Cr., 58 miles (by rail) S. of Gladstone (Boyne Valley line). *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 150, p. 8 (1900), and 194, p. 28 (1904).

243B.——. *Assoc.with* Copper Pyrites, Cuprite, Bornite, Tenorite, Malachite, Galena, Zinc-Blende, Hematite, Magnetite, Garnet, Chlorite, and Calcite, in lode. *Loc.* Glassford Cr. Copper Mines, Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne Valley line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), and 194, p. 28 (1904).

244. ——. *Assoc.with* Malachite, in dyke. *Loc.* Maxwelton Goldfield, 35½ miles S.W. of Gladstone. *Co.* Clinton (*ante*). *Assay:* Copper = 8·50 per cent.; Gold = trace. *Ref.* A.R., p. 111 (1907).

244A.——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Bornite, Cuprite, Tenorite, Malachite, and Ironstone, in crystalline limestone, &c. *Loc.* Mt. Hector Copper Mine, E. side of Dawes Range, 12 miles W.N.W. of Many Peaks Rail. Stn. (Boyne Valley line), 70 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* Q.G.M.J., vol. 4, pp. 174-177 (1903).

245. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Redruthite, Malachite, Iron Pyrites, Zinc-Blende, Mispickel, and Scorodite, in quartz. *Loc.* Chandler's Reef, Norton Goldfield, 32½ miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Assay: See* No. 4269. *Ref.* G.S.Q. Pub. 201, p. 18 (1907).

246. ——. *Assoc.with* Gold, Silver, Malachite, and Mispickel, in quartz, ironstone, and clay. *Loc.* P. Area, No. 56, Diglum Cr., Barmundoo Stn., 28 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 162, p. 9 (1901).

247. ——. *Assoc.with* Malachite and Copper Pyrites, in garnet-rock and limestone. *Loc.* P. Area (?), Diglum Cr., nr. Barmundoo Out-Stn., 20½ miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub 162, p. 9 (1901).

247A.——. *Assoc.with* Bornite, Malachite, and Limonite, in quartz lode. *Loc.* 4 miles from Mt. Bennett, about 30 miles W.S.W. of Gladstone, Langmorn Goldfield. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* A.R., p. 218 (1910).

248. ——. *Assoc.with* Malachite, in quartz. *Loc.* Targinnie, 4 miles N.N.W. of Yarwun, 15 miles (by rail and road) N.W.byW. of Gladstone (North Coast line), Langmorn Goldfield (*ante*). *Assay:* Gold = 19 gr. per ton; Silver = 16 dwt. per ton; Copper = 8·1 per cent. *Ref.* A.R., p. 104 (1907).

249. ——. *Assoc.with* Cuprite and Malachite, in quartz lode. *Loc.* 2 miles W. of Old Diggings, 6 miles S. of Raglan, 4 miles (by rail and road) W.S.W. of Gladstone, North Coast line, Langmorn Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

250. ——. *Assoc.with* Cuprite and Malachite. *Loc.* Iveragh Copper Lode, Iveragh Cr., Boyne R., 20 miles S. of Gladstone. *Co.* Flinders; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

250A ——. *Assoc.with* Copper Pyrites and Malachite. *Loc.* Conachan's Sel., W. of Quarry Cr., 19 miles (by rail and road) S.W.byW. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

251. ——. *Assoc.with* other Copper Ores. *Loc.* Great Fitzroy Copper Mine, Mt. Chalmers, 19 miles N.E. of Rockhampton, Yeppoon Rail line. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 216 (1907).

251A.——. *Assoc.with* Copper (native), Cuprite, and Malachite, in epidote-rock. *Loc.* Copper Deposits, Clairview Cr., 12 miles N. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q.P. 141, p. 4 (1898).

252. ——. *Assoc.with* Copper Pyrites, Cuprite, and Iron Pyrites. *Loc.* Steven's Copper Lode, Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 8 (1885).

253. ——. *Assoc.with* Malachite and Magnetite. *Loc.* Kroombit Cr., 5 miles above Kroombit Head Stn., 55 miles S.S.W. of Gladstone. *Co.* Pelham (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

253A. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Iron Pyrites, Hematite, Magnetite, and Limonite, in gossan lodes. *Loc.* M.L. (262), Kroombit Copper Mines, 4¼ miles E.S.E. of Kroombit Hd. Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

254. Azurite. *Assoc.with* Gold, Silver, Native Copper, Redruthite, Cuprite, Malachite, Iron Pyrites, Ironstone, Molybdenite, and Galena, in breccia and granite. *Loc.* Moonmera Copper Deposits, nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 143, p. 47 (1899), 150, p. 2 (1900), and 195, pp. 18-22 (1904).

254A. ——. *Assoc.with* Malachite, in gossan. *Loc.* Mudloo Copper Lease, Marodian Goldfield, 5 miles N.N.W. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Yield: See* No. 6382. *Ref.* G.S.Q. Pub. 179, p. 10 (1902).

255. ——. *Assoc.with* Tetrahedrite, Cuprite, Malachite, and Hematite, in quartz. *Loc.* White Rocks Copper Lease, Marodian Goldfield, 5 miles N. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 11 (1902).

256. ——. *Assoc.with* Malachite. *Loc.* Federal P. Area, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie (North Coast line). *Co.* Lennox (*ante*). *Assay:* Gold = 14 gr. and 1 dwt. 12 gr. per ton; Silver = 9 dwt. and 12 dwt. per ton; and Copper = 19·1 per cent. *Ref.* A.R., p. 100 (1907).

257. ——. *Assoc.with* Gold and Malachite, in quartz leader. *Loc.* New Year's Reef, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 2 (1886).

258. ——. Mt. Coora, Black Snake, 8 miles S.S.E. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.M.

259. ——. *Assoc.with* Malachite and Tile ore, in ferruginous quartz. *Loc.* Mt. Alice, S. of Bullock Cr., nr. Gigoomgan Stn., 35 miles W.S.W. of Maryborough. *Co.* Lennox (*ante*). *Assay:* Gold = 1 dwt., Silver = 4 oz. 13 dwt. per ton; Copper = 12·2 per cent. *Ref.* A.R., p. 112 (1907).

260. ——. *Assoc.with* Copper Pyrites, Cuprite, Redruthite, Tile Ore, and Malachite, in quartz. *Loc.* Teebar Copper Lode, Munna Cr., nr. Clifton Stn., 2 miles S. of Boompa Rail. Stn. (Gayndah line). *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 7 (1890).

261. *Assoc.with* Cuprite and Malachite. *Loc.* Luge-e-nor Copper Lode, Calgoa, Thunder Cr., br. of Calgoa Cr., 15 miles N.byW. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* B.D.

262. ——. *Assoc.with* Copper Pyrites, Malachite, Galena, and Mispickel, in granitic dyke. *Loc.* West Calgoa Lode, Thunder Cr., br. of Calgoa Cr. (*ante*). *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

263. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, Malachite, Galena, Zinc-Blende, Iron Pyrites, and Calcite, in slate, diorite, andesite, syenite, and quartzite. *Loc.* Blue Bell Copper Mine, Amamoor Cr., 19 miles S.S.E. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* Q.G.M.J., vol. 8, pp. 524-526 (1907).

Balcomba Range, 24 miles N. of Duaringa Rail. Stn. (Central line). *See maps*, Pls. 10, 11. *Min.Ref.* Azurite, *see* 236; Calcite, 517; Copper, 1853; Copper Carbonate, 1951; Malachite, 6340; Manganese-dioxide, 6449; Nepheline, 6906; Psilomelane, 7093; Redruthite, 7300; Tenorite, 7736; Tetrahedrite, 7776.

Geological Note: The rocks of the district include slates, tuffs, basalt, sandstones, and shales. The slates and tuffs are of Gympie Formation (Permo-Carboniferous), and contain deposits of copper and manganese. They have been covered by a vesicular basalt, which in its turn has been partly covered by sandstones and shales of Desert Sandstone Formation (Upper Cretaceous). Recent alluvial deposits occur along the course of the Mackenzie R. close by. *See* G.S.Q. Pub. No. 155 for details and maps.

Balcomba Stn. (*ante*). *Min.Ref.* Copper (native), *see* 2007; Hyalite, 7017.

Balcooma Goldfield—

Situation: *See maps*, Pls. 16, 17. 80 miles E.S.E. of Georgetown. *Co* Clarke; *Dist.* **Kennedy North.** Centre about *Lat.* 18° 46′ S., *Long.* 144° 47′ E.

Discovery: In 1895. Population: Included in Charters Towers Goldfield.

Proclamation: First (and only one), 27th January, 1897, as follows:—Commencing at south corner of Ringwood Park No. 2 Block; thence by the south-east boundary of that block to the west corner of Ringwood Park Block; thence by the south-western boundary of that block and part of the north-west and south-west boundaries of Gervoise Downs to the north corner of Lucky Downs; thence by the north-west boundary of Lucky Downs to the western watershed of the Burdekin, and by that watershed north-westerly to the point of commencement.

Area: 19,200 acres (30 sq. miles).

Mineral Statistics: *Included in* Other Goldfields; *see tables and diagram*, Pls. 36, 46, 46A, 47.

Mineral Reference: Gold, *see* 3879.

Geological Note: The country rock is granite. Geological Publications: Nil.

Warden: Stationed at Charters Towers.

Inspector of Mines: Stationed at Charters Towers.

Bald Hills, 6 miles S. of Langmorn. *Min.Ref.* Limestone, *see* 677.

Ball's Sel. (71), 2 miles S.W. of Tambourine. *Min.Ref.* Coal, *see* 1783.

Ballyhooley Claim, Mt. Flora G. and M. Field. *Min.Ref.* Azurite, *see* 235B (1); Copper Pyrites, 2269H; Hematite, 4769A (1); Malachite, 6339A (1).

Balmoral Brick Works, Bulimba Cr., Tingalpa (Murarrie Rail. Stn.). *Min.Ref.* Clay, *see* 1578, 1579; Coal, 1773; Gypsum, 4629.

—— Reef, Castleton, Etheridge Goldfield. *Min.Ref.* Copper Pyrites, *see* 2145; Galena, 2746; Gold, 3718; Iron Pyrites, 5039; Mispickel, 6680.

Balnagowan Stn., 22 miles E. of Rockhampton. *Min.Ref.* Chlorite, *see* 1466; Chromite, 1483; Rhodochrome, 7065.

Balurga Co., Cook Dist. *See map*, Pl. 8.

Bamford Wolfram Mines. *See maps*, Pls. 8, 9, 22. Three miles N.N.W. of Petford (Chillagoe Rail. line). Centre about *Lat.* 17° 21′ S.; *Long.*, 144° 58′ E. *Min.Ref.* Bismuth (native), *see* 336A, 337; Bismuthinite, 368; Bismutite, 390; Copper Pyrites, 2166, 2167; Galena, 2785, 2786; Iron Pyrites, 5069-5071; Mispickel, 6699; **Molybdenite,** 6834, 6835; Molybdite, 6871; Scorodite, 7367; Scheelite, 7347; **Wolfram,** 7958; Zinc-Blende, 8084.

GEOLOGICAL NOTE: The country rock is greisen, with quartz porphyry (or a much altered quartose grit) and granite in the vicinity. The wolfram occurs irregularly in the greisen, usually in a quartz matrix, and nearly always in association with molybdenite and native bismuth.

DISCOVERY: First record is of a lease in 1892, but discovery must have been earlier than that year.

STATISTICS: Included in Herberton Returns.

Ban Ban Station, on Barambah Cr., 12 miles S.E.byE. of Gayndah Rail. Stn. *Min.Ref.* Copper Pyrites, *see* 2139A; Galena, 2730A; Gold, 3627, 3628A; Iron Pyrites, 5012A; Malachite, 6203; Serpentine, 7379; Zinc-Blende, 8071A, 8071B.

Barium (Ba). *Atom. Wt.* = 137·37. *Sp.gr.* = **3·6.** *Colour,* silver-white. Soft. *Minerals:* *See* Barytes, Harmotome, Witherite.

USES: The sulphate (Barytes), when free from iron stains, is used as a white pigment, and is said to improve the quality and colour of white lead and zinc white, when mixed with these oxides in certain proportions. It is also used to increase the weight of leather and paper, in the former case simply being an adulterant. The carbonate (Witherite) is used in sugar refineries and in the manufacture of plate glass.

Baree (about ¼-mile from), 23 miles S.S.W. of Rockhampton, Central Rail. line. *Min.Ref.* Copper Pyrites, *see* 2296; Gold, 4317; Silver, 7528.

Barkly Tableland, about 146 miles W.byN. of Cloncurry. *Min.Ref.* Sardonyx, *see* 1403. Centre—about *Lat.* 19° 30′ S.; *Long.* 138° E.

GEOLOGICAL NOTE: The tableland consists of Tertiary limestone, resting on slates, limestone, &c., belonging to the Devonian System. *See* G.S.Q. Pub. 159 for notes.

Barklyite. *Sub. var.* of Ruby. *See* Corundum.

Barmoya Sub-artesian Bore. *See under* Artesian Bores. No. 83.

Barmundoo (Tableland) Goldfield. *See maps,* Pls. 2, 3, 4, and 34.

SITUATION: 28 to 40 miles S.W.byS. and S.byW. of Gladstone. *Cos.* Clinton and Raglan; *Dist.* Port Curtis. Centre—about *Lat.* 24° 16′ S.; *Long.* 151° 1′ E.

DISCOVERY: 1887. POPULATION: 80 (estimated, 1909).

PROCLAMATION: First gazetted 20th July, 1894; last alteration 26th July, 1900, as follows:—Commencing at the north-west corner of Barmundoo, portion 311, and bounded thence by the west boundary of that portion and the west boundary of a proposed reserve south of Futter's Creek, by that creek upwards about two miles and three-quarters in a straight line; thence by a line east to Iffley Creek, by Iffley Creek downwards to the west side of the road leading through portions 540, 1v, and 25v, parish of Wietala, by that road south-easterly to the north-west boundary of portion 3v, by that boundary south-westerly to the watersheds forming the heads of Portentia, Living, Booreeco, and Diglum Creeks, by that watershed westerly to a point fifty chains west from the boundary of the leased half of Barmundoo Run; thence south four miles; on the south by a line bearing west ten miles; on the west by a line bearing north ten miles; on the north by a line bearing east to the range forming the western watershed of Takilberan Creek, and by that watershed north-easterly to the point of commencement

AREA: 161,900 acres (253 sq. miles).

MINERAL STATISTICS: *Included in* "Other Goldfields," *see tables and diagrams,* Pls. 36, 46-46A, 47.

MINERAL REFERENCES: **Gold** (alluvial), *see* 3373; (reef), 4231A, 4232-4240; Silver, 7514; Lead (galena), 3036-3038; Copper (copper pyrites), 2281; Zinc-Blende, 8179-8181; Iron (iron pyrites), 5352B, 5353-5357; (mispickel), 6783.

GEOLOGICAL NOTE: The country is made up of granite, limestone, and altered sedimentary rocks. Where limestones occur near the granite, garnet-rock has been formed, and in which there are several copper-bearing lodes. *See* G.S.Q. Pub. 162 for details.

GEOLOGICAL PUBLICATIONS: Report—No. 58 (1890), and 162 (1901). *See under* Geol. Sur. Pub. List for title.

WARDEN: Stationed at Gladstone. INSPECTOR OF MINES: Stationed at Rockhampton.

REPORTS: Inspector's and Warden's, monthly (usually), in Q.G.M. Jour.; annually in A.R.D.M.

Barron Falls, 9 miles W.N.W. of Cairns. *Co.* Nares; *Dist.* Cook. *Lat.*, about 17° 10′ S.; *Long.*, about 145° 45′ E.

GEOLOGICAL NOTE: The rocks at the Falls are quartzites and other altered sedimentary rocks. Probably a north and south fault along the coast at Cairns has thrown down the country to the east (now covered by the ocean) and the difference in height between the two faulted portions has produced falls near what is now the mouth of the river. In the course of ages these falls have been weathered backwards to form the present gorge of the Barron River.

Barrow R., 5 miles from Tolga Rail. Stn. (Cairns line). *Min.Ref.* Bismutite, *see* 396; Cassiterite, 959; Gold (alluvial), 3218; Wolfram, 7973.

Barwidgie Sub-artesian Bore. *See under* Artesian Bores. No. 381

Barytes. *Syn.* Heavy spar. *Compo.*, Sulphate of barium. *Colour*, usually white. *H.* = 2·5—3·5. *Sp.gr.* **4·3—4·7.** *Contents* (*max.*), Barytes 65 per cent.

MINERAL NOTE: Barytes occurs commonly associated with ores of copper, lead, gold, and silver, and with quartz and calcite. Very pure Barytes is found in a lode deposit at Running Creek, north of Kilkivan, but of the many other places where it occurs nothing is known of its extent or quality. For uses, *see note under* Barium.

Beatrice R., Jordan Cr. Goldfield. *Min.Ref.* Gold (alluvial), *see* 3220.

Geological Note: The oldest rock is granite, which is partly covered by a sheet of basalt. Between the two formations alluvial gold-bearing deposits occur which have been worked to some extent. *See* G.S.Q. Pub. No. 157 for notes.

Beattie's Mine, Kangaroo Hills Mineral Field. *Min.Ref.* Magnetite, *see* 6015; Smithsonite, 7570.

Beaudesert, 47 miles (by rail) S.byE. of Brisbane, South Coast line. *Lat.*, 28° 1′ S. *Long.*, 153° 2′ E. *See maps*, Pls. 6, 7. *Min.Ref.* Chalcedony, *see* 1360; **Coal,** 1778-1790A; Tripolite, 7033A, 7033B.

Geological Note: The rocks in this district belong to the Walloon Formation (Trias-Jura). They consist of sandstones, shales, and thin seams of coal, with interbedded sheets of basalt. *Coal seams* occur in several localities, principally at Palem Cr., Widgee Cr., and Mt. Lindsay.

The general *quality of the coal* may be gauged from the following mean analysis:—Moisture, 5 per cent., vol. hyd. carbons, 33 per cent.; fixed carbon, 45 per cent.; ash, 17 per cent. (with a range between 11 per cent. and 25 per cent.). Estimated calories = 6802. Coal slightly cokes, ash being pink.

Quantities of Coal.—Probable quantities in seams of 3 ft. or more in thickness amount to 28,000,000 tons, an amount which might be considerably reduced in actual working, but, on the other hand, might be greatly increased when the measures are more thoroughly prospected.

See G.S.Q. Pub. No. 225 for details and map. *See also* Supplementary Report List, No. 151.

Beaudesert Artesian and Sub-artesian Bores. *See under* Artesian Bores. Nos. 161, 343.

Beaufort Co., Kennedy South Dist. *See map*, Pl. 14.

—— Seam (Clyde Colliery), Burrum Coalfield. *Min.Ref.* Coal, *see* 1806.

Beaumont Reef, Ravenswood Goldfield. *Min.Ref.* Gold, *see* 4011A.

Beauxite. *Syn.* Bauxite. *Compo.*, Hydrate of Alumina. *Colour*, usually red, from presence of iron oxide. Earthy or granular. *Sp.gr.* = 2·5. *Contents* (*max.*), Alumina 73·9 (= Aluminium 39 per cent.).

Uses: Beauxite is the important source of metallic aluminium. It is also used in the production of alum, and as a refractory material in furnace linings.

Geological Note: This mineral is found in decomposed basalt at Crow's Nest, N.N.E. of Toowoomba. Although it is known at other places, very little information is available concerning it, no attention having been paid to its occurrence.

288. ——. Cooranga Stn., nr. Dykehead Stn., 20 miles W.S.W. of Gayndah Rail. Stn., 110 miles (by rail and road) W. of Maryborough. *Co.* Newcastle; *Dist.* **Burnett.** *Ref.* L.C.B.

289. —— (ferruginous), in decomposed granite. *Loc.* Plainby, 6 miles W. of Crow's Nest Rail. Stn., 40 miles (by rail and road) W.byN. of Toowoomba. *Co.* Cavendish; *Dist.* **Moreton.**

290. ——. Cania Road, 3½ miles S. of Kroombit Stn., 60 miles S.W. of Gladstone. *Co.* Pelham; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 194, p. 27 (1904).

Beazley's Tunnel, Star R. Mineral Field. *Min.Ref.* Cerussite, *see* 1259.

Bedford's Reef, McDonald's Flat, Clermont Goldfield. *Min.Ref.* Gold, *see* 4164; Ironstone, 5596.

Bedourie Bore. *See under* Artesian Bores. No. 6.

—— Stn., 160 miles S.W. of Rockhampton. *Min.Ref.* Coal, *see* 1698.

Bee Cr., junction of Hail Cr., W.byS. of Mackay. *Lat.*, 21° 50′ S. *Long.*, 148° 35′ E. *Min.Ref.* Coal, *see* 1700-1701.

Geological Note: The rocks of this locality consist of shales, sandstones, &c., belonging to the Upper Bowen (= Dawson-Mackenzie) Formation (Permo-Carboniferous), and are coal-bearing. The seams are well defined and of workable thickness, and the coal is anthracitic. *See table under* Coal Analyses. *See* G.S.Q. Pubs. Nos. 39, 53, 92, and 200 for details. *See also* Supplementary Report List No. 128.

Beenleigh. *See maps*, Pls. 6, 7. 27 miles S.E. of Brisbane (South Coast Rail. line). *Lat.*, 27° 41′ S. *Long.*, 153° 18′ E. *Min.Ref.* Gold, *see* 4223; Hematite, 4778; Iron Pyrites, 5349, 5350; Ironstone, 5614; Manganese-dioxide, 6456; Mispickel, 6779-6782; Psilomelane, 7096. *See also under* Gov. Ming. Jour. Report No. 108.

Geological Note: The rocks in this locality comprise schists (Permo-Carboniferous), coal measures (Ipswich Formation), basalt overlying the coal measures, and recent river alluvium. The schist contains veins of quartz which are occasionally gold-bearing, and in the coal measures there are seams of workable coal. *See* G.S.Q.P. Nos. 36 and 225.

Geological Note: The rocks comprise quartzite, slates, grits, and sandstones of Gympie Formation (Permo-Carboniferous).

Bertha P.C., Bower-bird Goldfield. *Min.Ref.* Gold, *see* 3458; Ironstone, 5485.

Berwick Bore. *See under* Artesian Bores. No. 161.

Beryl. *Compo.,* Silicate of alumina and glucina. *Colour,* green, bluish, yellowish, &c. Vitreous. $H = 7{\cdot}5$—8. *Sp.gr.* = 2·6—2·7. *Vars.,* Aquamarine, bluish-green; Beryl, pale-green.

Associated Minerals: Amethyst, Cairngorm, Cassiterite (Tin), Diamond, Garnet, Gold, Rock Crystal, Sapphire, Spinel, Topaz, Tourmaline, Zircon, etc., etc., all in alluvial deposits.

Mineral Note: Beryl, and the variety called Aquamarine, occurs in the tin drift of the Herberton and Chillagoe Mineral Fields, notably at Brooklands Station, and is occasionally found in other parts of the State. Some of the stones make very beautiful gems, and are in great demand.

291 Beryl (as large crystals). *Assoc.with* Topaz and Cassiterite. *Loc.* O'Brien's Cr., "Nine-mile," Lancewood Tin Mines, 30 miles S. of Fossilbrook, 45 miles E.byN. of Georgetown. *Co.* Tate; *Dist.* **Cook.** *Ref.* B.D.

(Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Assay:* Metallic Bismuth = 62 per cent.; Gold = 252 oz. per ton. *Ref.* G.S.Q. Pub. 25 (1886), and Q.G.M. Journal, vol. 12, pp. 169-173 (1911).

313. ——. *Assoc.with* Gold and Copper Carbonate, in quartz. *Loc.* Maid of Erin Mine, Tunnel Reef, Eidsvold Goldfield, 35 miles N.W. of Gayndah, 35 miles W.S.W. of Mt. Perry. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 125, p. 37 (1897).

314. ——. *Assoc.with* Gold, Galena, Copper Pyrites, Cuprite, Malachite, Azurite, Native Bismuth, Bismuthinite, Bismutite, Manganese-dioxide, Hematite, and Ironstone. *Loc.* Daisy Bismuth Mine, 3 miles E. of Eukalunda, Sellheim Mineral Field, 95 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 57, p. 7 (1889), and G.S.M.

315. ——. *Assoc.with* Copper Pyrites, Hematite, and other Bismuth ores, and Manganese-dioxide, in lode. *Loc.* Eukalunda Bismuth Mine, 3 miles E. of Eukalunda (*ante*). *Ref.* G.S.Q. Pub. 57, p. 8 (1889).

316. ——. *Assoc.with* Iron Pyrites, Galena, Massicot, Mispickel, and Chlorite. *Loc.* Blacbkutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* O.R.

Bismuth (Bi). *Atom.Wt.* = 208·0. *Sp.gr.* = 9·78-9·82. *Colour,* pinkish-white metallic. Somewhat brittle.

USES: Principally alloyed with lead and tin to make easily fusible compounds, such as solders, and fusible plugs for boilers. Also used in stereotype castings, medicine, cosmetics, etc.

MINERALS: *See* Bismuth (native), Bismite, Bismutite, Bismuthinite, Eulytite, Joseite, Tetradymite.

MINERAL NOTE: Associated metallic minerals include Gold, Silver, Wolfram, Molybdenite, Cassiterite (tin), Manganese, Copper ores, Zinc ores, Iron ores, Lead ores, Tetradymite, Joseite, &c., &c. Common gangues include "Ironstone" Magnetite, Calcite, Quartz, Epidote, Chlorite, Mica, Topaz, Fluorspar, Felspar, Hornblende rock, Slate, Sandstone, Limestone, Greisen. Alluvial deposits of Native Bismuth and Bismutite occur in association with Gold, Garnet, Tin, &c.

GEOGRAPHICAL NOTE: The principal occurrence of bismuth is at Mt. Biggenden, in the Burnett district, but it is also found on the Sellheim and Star River Mineral Fields, and on the Herberton and Chillagoe Mineral Fields (Walsh and Tinaroo). Other localities in which it is found include Cloncurry, Etheridge, Mt. Shamrock, Eukalunda, Kilkivan, Stanthorpe, Rosedale, and Kangaroo Hills. *See under* names of fields for details.

STATISTICAL NOTE: The Biggenden Gold and Bismuth Mine to the end of 1912 has produced more than half the total bismuth output of the State, the quantity being 411·80 tons. The Bismuth Mines near Ukalunda, Sellheim Mineral Field, have produced 202 tons, but at the present time are not being worked. Hodgkinson and Herberton have an output of bismuth amounting to 47 and 29·05 tons respectively. The percentages of the above yields to the estimated total production of bismuth in Queensland to the end of 1910 is as follows—viz., **Biggenden,** 59·13 per cent.; Sellheim, 29 per cent.; Hodgkinson, 6·75 per cent.; Herberton, 4·17 per cent. Bismuth also occurs in the Etheridge and Bowen Districts. The year 1892 was the most productive in the history of the State, having yielded 130 tons of bismuth, valued at £16,000, this being equal to 18·64 per cent. of the State's total production, and 14·40 per cent. of the total value of bismuth produced to the end of the year 1910. The total yield of bismuth from 1889 (the first record) to the end of 1912 is estimated at 696·45 tons, valued approximately at £111,089, equal to 0·10 per cent. of the total mineral production of the State. *See tables*, Pls. 40, 45, 46, 46A; *also diagram*, Pls. 52, 57, for details.

317. Bismuth. *Assoc.with* Gold, in quartz leader. *Loc.* Two-mile Cr. Diggings, Cloncurry, 480 miles (by rail) W.byS. of Townsville (Gt. Northern line). *Co.* Beaconsfield; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 104, p. 5, (1895).

318. ——. *Assoc.with* Gold. *Loc.* Don Jon Mine, nr. Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* **Burnett.** *Assay:* Gold = 12 dwt. 19 grs. per ton; Bismuth = 12·4 per cent. *Ref.* A.R., p. 62 (1906).

319. ——. *Assoc.with* Gold. *Loc.* Mt. Havilah Mine, Mt. Havilah (*ante*). *Assay:* Bismuth = 12·3 per cent.; Gold = 8 dwt. 9 gr. per ton. *Ref.* A.R., p. 60 (1906).

320. ——. *Assoc.with* Wolfram, in gneiss and mica schist. *Loc.* nr. Brookland Stn., Junction Cr., Einasleigh River, 45 miles E.byN. of Georgetown. *Co.* Tate; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 134, p. 19 (1898).

321. ——. *Assoc.with* Gold, Iron Pyrites, Massicot, Cerussite, Cassiterite, and Calcite, in kaolinised greisen. *Loc.* Snowdrop P.A., Mt. Langan, nr. Blackbutt, Emu Cr., 14½ miles W.N.W. of Kannungar (Brisbane-Valley Rail. Line). *Co.* Cavendish. *Dist.* **Moreton.** *Ref.* O.R.

322. ——. *Assoc.with* Gold, Silver, and Lead, in clay. *Loc.* Mt. Langan, Emu Cr., nr. Blackbutt (*ante*). *Assay:* *See* No. 7507. *Ref.* A.R., p. 69 (1906).

Bismuth (native). *Compo.*, Pure bismuth. *Colour*, Metallic-white, with pink hue. *H.* = 2-2·5. *Sp.gr.* = 9·7. Sectile, brittle. NOTE: Probably the Native Bismuth of Mt. Shamrock is a bismuth-gold alloy, as the mineral sometimes contains gold not recognizable in a free state and assaying between 300 and 400 oz. of gold to the ton.

323. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Pumpkin Gully, 12 miles E. of Cloncurry. *Co.* Beaconsfield; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

324. ——. *Assoc.with* Gold and Bismutite, in quartz reef. *Loc.* Mary Douglas Hill, Top Camp Diggings, 24 miles S.byW. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10 (1885), and 104 (1895).

325. ——. *Assoc.with* Gold, in steatite. *Loc.* Nanango Goldfield, 96 miles (by rail) S.S.W. of Theebine Rail. Stn., and 135 miles (by rail) S.S.W. of Maryborough. *Co.* Fitzroy; *Dist.* **Burnett.** *Ref.* P.R.S.Q., vol. 4, p. 44 (1887).

326. Bismuth. *Assoc.with* Gold, Bismite, Bismutite, Bismuthinite, Iron Pyrites, Hematite, Magnetite, Mispickel, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, Chalcedony, Epidote, in slate and hornblende rock. *Loc.* Biggenden Gold and Bismuth Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn., 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Analysis:* Bismuth = 44·45 per cent.; Cobalt = 4·75; Nickel = 0·68; Iron = 13·55; Manganese = 9·75; Lime and Magnesia = 19·92; Silica = 6·90. *Ref.* G.S.Q. Pubs. 60, p. 2 (1890), and 173, p. 2 (1902).

326A ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Bismuthinite, Copper Pyrites, Magnetite, and Ironstone, in lode. *Loc.* Don Jon Bismuth Mine, ¼ mile S. of Mt. Havilah, 2¼ miles S.S.W. of Degilbo. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), and 207, pp. 13, 14 (1907).

327. ——. *Assoc.with* Bismuthinite, in quartz. *Loc.* Mt. Steadman, nr. Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn., 58 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* B.D.

328. ——. *Assoc.with* Gold, Telluride of Gold, Copper Pyrites, Malachite, Bismuthinite, Joseite, Zinc-Blende, Mispickel, and Calcite. Note: Sample contained 443·6 oz. of gold per ton. *Loc.* Mt. Shamrock Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah br. line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 60, p. 6 (1890), 125 (1897), 168 (1901), and B.D.

329. ——. *Assoc.with* Wolfram, Cassiterite, Molybdenite, Scheelite, and Bismutite, with traces of Copper Pyrites, in quartz, chlorite, and muscovite. *Loc.* Pinnacle Cr., br. of Lynd R., 16 miles W. of Fossilbrook, 50 miles S.W. of Almaden, Chillagoe Rail. line, Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* B.D.

330. ——. *Loc.* Home Rule Mine, Hodgkinson Goldfield, 19 miles (by coach) from Dimbulah Rail. Stn. (Cairns line), 92 miles (by rail and road) W. of Cairns. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.M.

331. ——. *Assoc.with* Cassiterite, Wolfram, Molybdenite, Bismutite, Mispickel, and Scorodite, with traces of Copper Pyrites, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, Hematite, &c., in irregular masses of quartz and greisen in granite. *Loc.* Boonmoo, 81 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson (*ante*). *Ref.* B.D.

332. ——. *Loc.* Gt. Southern Tin Mine, Irvinebank, 10 miles S.W. of Stannary Hills, 12 miles W.S.W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

333. ——. *Assoc.with* Cassiterite. Vulcan Tin Mine, Irvinebank (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 54 (1900).

333A.——. *Assoc.with* Wolfram, Molybdenite, and Bismutite, with traces of Hematite, Limonite, Mispickel, and Scorodite, in irregular masses of quartz and greisen in granite. *Loc.* Stannary Hills, 93 miles (by rail) S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

334. ——. *Assoc.with* Cassiterite, in chlorite. *Loc.* Herbertina Tin Mine, Watsonville, 7 miles E.S.E. of Stannary Hills Rail. Stn. (Chillagoe line), 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

335. ——. *Assoc.with* Wolfram, Molybdenite, Bismutite, Bismuthinite, Mispickel, Scorodite, Scheelite, Cassiterite, Manganese-dioxide, with traces of Iron Pyrites, Hematite, Limonite, and Magnetite, &c., in irregular masses of quartz in greisen belt. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbulah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

336. ——. *Assoc.with* Wolfram, Molybdenite, and Bismutite, in quartz and fluorspar. *Loc.* Schardon's Mine, 4 miles N. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

336A.——. *Assoc.with* Native Bismuth. *Loc.* Rose of Denmark Mine, Bamford, 3 miles N.N.W. of of Petford (Chillagoe Rail line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* O.R.

337. ——. *Assoc.with* Wolfram, Molybdenite, Bismutite, Scheelite, Molybdite, Mispickel, and Scorodite, with traces of Copper Pyrites, Tenorite, Chrysocolla, Iron Pyrites, &c., in irregular masses of quartz, in greisen. *Loc.* Bamford Wolfram Mines, Bamford (*ante*). *Ref.* B.D.

338. ——. *Assoc.with* Wolfram, Molybdenite, Tungstite, Bismutite, with traces of Cuprite, Malachite, Iron Pyrites, Hematite, and Limonite, in quartz. *Loc.* Eight-mile Mountain, 8 miles N.N.W. of Fossilbrook, 28 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

339. ——. *Assoc.with* Wolfram, Cassiterite, Bismuthinite, and Bismutite, in quartz, muscovite, fluorspar, &c. *Loc.* Emuford, Emu Cr., br. of Walsh R., 11 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

340. ——. Claim, 1½ mile N.W. of Koorboora Rail. Stn. (Chillagoe line), 108 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*).

341. ——. *Assoc.with* Wolfram. *Loc.* Lappa Lappa Wolfram Mine, 2½ miles S.S.W. of Lappa Rail. Stn. (Chillagoe line), 102 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 50 (1900).

342. ——. *Assoc.with* Bismuthinite and Bismutite, in quartz blow, in granite. *Loc.* Mt. Marlay, 2½ miles E. of Stanthorpe, 209½ miles (by rail and road) S.W. of Brisbane. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* B.D.

343. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Stanthorpe, 207 miles S.W. of Brisbane (Main Rail. line). *Co.* Bentinck (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 44 (1887).

344. ——. *Assoc.with* Cassiterite, in quartz reef. *Loc.* Home Rule Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 8 (1883).

345. ——. *Assoc.with* Cassiterite, Copper, and Ironstone, in lode. *Loc.* Lancelot Tin Mines, Newelton, Silver Valley, 10 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills, Chillagoe Br. Rail., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q.P. 119, p. 27 (1897).

347. ——. Return Cr., br. of Herbert R., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.M.

348. ——. *Loc.* Star R. (Argentine) Silver Field, 50 miles (by coach) N.W. of Ravenswood Junction (Gt. Northern Rail. line). *Cos.* Elphinstone and Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.M.

349. ——. *Loc.* Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* B.D.

350. ——. *Assoc.with* Gold, Galena, Copper Pyrites, Cuprite, Malachite, Azurite, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Hematite, and Ironstone. *Loc.* Daisy Bismuth Mine, Ukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* **Kennedy South.** *Assay:* Bismuth = 33·76 per cent. *Ref.* G.S.Q. Pub. 57, pp. 7 and 8 (1889), and G.S.M.

350A. ——. *Assoc.with* Molybdenite and Wolfram. *Loc.* Wandoo and Bolingbroke Stations, about 25 miles E.N.E. of Nebo, and about 40 miles S.W.byS. of Mackay. *Co.* Wodehouse; *Dist.* **Leichhardt.**

351. ——. *Assoc.with* Gold and Silver Ores. *Loc.* Emu Creek, about 10 miles N.W. of Cressbrook. *Co.* Cavendish; *Dist.* **Moreton.**

352. ——. *Assoc.with* Wolfram, Molybdenite, Tungstite, Bismutite, and Wad, with traces of Copper Pyrites, Tenorite, Iron Pyrites, Hematite, &c., in defined quartz lodes in greisen and sandstone. *Loc.* Rosedale Mineral Field, 34 miles N.W. of Bundaberg (North Coast line). *Co.* Flinders; *Dist.* **Port Curtis.** *Ref.* B.D.

353. Bismuth (ore). *Assoc.with* Magnetite and Garnet. *Loc.* Mt. Hastings Mine, 2 miles S.E. of Biggenden Rail. Stn. (Gayndah Br. line). *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 173, p. 4 (1902), and G.S.M.

354. ——. *Assoc.with* Cassiterite, Copper Carbonate, and Ironstone. *Loc.* Achilles Lease (252), Mt. Brown, 40 miles S.W.byS. of Ingham, Kangaroo Hills Mineral Fields. *Co.* Wairuna; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 82, p. 9 (1892), and G.S.M.

355. ——. *Loc.* In Creek, Halifax Bay, 36 miles N.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 71, p. 10 (1891).

356. ——. *Assoc.with* Copper Pyrites, Hematite, and Manganese-dioxide, in lode. *Loc.* Eukalunda Bismuth Mine, 3 miles E. of Eukalunda, 92 miles S.W.byS. of Ingham, Sellheim Mineral Field. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 57, p. 8 (1889).

367. *Assoc.with* Wolfram, Molybdenite, Native Bismuth, Bismutite, Mispickel, Scorodite, Scheelite, Cassiterite, and Manganese-dioxide, with traces of Iron Pyrites, Hematite, Limonite, Magnetite, etc., in irregular masses of quartz in greisen belt. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbulah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

368. ——. *Assoc.with* Native Bismuth. *Loc.* Rose of Denmark Mine, Bamford, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* O.R.

369. ——. *Assoc.with* Wolfram, Cassiterite, Native Bismuth, and Bismutite, in quartz, muscovite, fluorspar, &c. *Loc.* Emuford, 11 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

370. —— in quartz. *Loc.* Gilbert River, about 50 miles S.E. of Charleston, Etheridge Gold Field. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.M.

371. ——. *Assoc.with* Native Bismuth and Bismutite, in large quartz blow in granite. *Loc.* Mt. Marlay, 2½ miles E. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.**

372. ——. *Assoc.with* Galena and Zinc-Blende. *Loc.* Gt. Britain Mine, Coolgarra, 9 miles N.N.E. of Mt. Garnet Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.M.

373. ——. *Assoc.with* Gold and Bismutite. *Loc.* Carrington Bismuth Mine, Sellheim R., Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* G.S.M.

374. ——. *Assoc.with* Gold, Galena, Copper Pyrites, Cuprite, Malachite, Azurite, Native Bismuth, Bismutite, Bismite, Manganese-dioxide, and Hematite. *Loc.* Daisy Bismuth Mine, Ukalunda, Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, pp. 7 and 8 (1889), and G.S.M.

374A. ——. *Assoc.with* Gold, in granite. *Loc.* Dattu Dattu Mine, about 25 miles N.N.E. of Crow's Nest Rail. Stn. *Co.* Cavendish; *Dist.* **Moreton.** *Assay, and Ref.* Q.G.M.J., vol. 4, p. 188 (1903).

375. ——. *Assoc.with* Bismutite, Minium, and Malachite, with traces of Gold, in ferruginous quartz. *Loc.* Mt. Samford, Enoggera Ranges, 6½ miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 159, p. 18 (1901).

376. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Redruthite, Malachite, Magnetite, and Limonite, in quartz. *Loc.* Kabonga Mine, Kilkivan Goldfield, 48 miles W. of Gympie and 65 miles S.W.byS. of Maryborough, Kilkivan Br. Rail. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

Bismuthite. *Syn.* Bismutite, *which see.*

Bismutite. *Syn.* Bismuthite. *Compo.*, Carbonate of bismuth. *Colour*, whitish, greenish. $H = 4$—4·5. *Sp.gr.* = 6·8—6·9. Earthy. Brittle. *Contents* (*max.*), Bismuth 80 per cent.

377. ——. *Assoc.with* Bismuth (native) and Gold, in alluvial deposits. *Loc.* Mary Douglas Hill, and in the flats at Top Camp Diggings, 24 miles S.byW. of Cloncurry Rail. Stn. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pubs. 10, p. 6 (1885) and 104, p. 5 (1895).

378. ——. *Loc.* Woolgar Goldfield, 97 miles N. of Richmond Rail. Stn., 404 miles (by rail and road) W.byS. of Townsville. *Co.* Woolgar; *Dist.* Burke. *Ref.* G.S.M.

379. ——. *Assoc.with* Gold, Native Bismuth, Bismuthinite, Bismite, Iron Pyrites, Hematite, Magnetite, Mispickel, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, Chalcedony, and Epidote. *Loc.* Biggenden Mine, Mt. Biggenden, 4 miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pubs. 60 (1890), 173 (1902), and 194 (1904), and G.S.M.

380. ——. *Assoc.with* Copper Pyrites, Mispickel, and Calcite, in lode. *Loc.* In shaft 1 mile N.N.E. of Biggenden Mine, Mt. Biggenden, 5 miles W. of Biggenden Rail. Stn. (*ante*). *Ref.* G.S.Q.P. 60, p. 3 (1890).

381. ——. *Assoc.with* Gold, Iron Pyrites, Bismuthinite, and Mispickel, in quartz. *Loc.* Kent's Knob Mine, ¼ mile N.W. of Mt. Shamrock, 5½ miles W.N.W. of Degilbo, Gayndah Br. Rail. *Co.* Cook (*ante*). *Ref.* B.D.

382. ——. *Assoc.with* Wolfram and Molybdenite, with traces of Hematite, Limonite, Mispickel, and Scorodite, in quartz, chlorite, muscovite, and felspar. *Loc.* Blackfellow's Cr., br. of Lynd R., 10 miles W. of Fossilbrook, 40 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* B.D.

383. ——. *Assoc.with* Wolfram, Cassiterite, Molybdenite, Scheelite, and Native Bismuth, with traces of Copper Pyrites, in quartz, chlorite, and muscovite. *Loc.* Pinnacle Cr., br. of Lynd R., 16 miles W. of Fossilbrook, 50 miles S.W. of Almaden, Chillagoe Rail. line, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

384. ——. *Assoc.with* Wolfram and Molybdenite, in quartz, fluorspar, &c. *Loc.* Rose's Cr., br. of Lynd R., 6 miles S.W. of Fisherton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

385. Bismutite. *Assoc.with* Wolfram, Molybdenite, Cassiterite, Native Bismuth, Mispickel, and Scorodite, with traces of Copper Pyrites, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, Hematite, &c., in irregular masses of quartz and greisen in granite. *Loc.* Boonmoo, 81 miles (by rail) S.W.byW. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

386. ——. *Assoc.with* Wolfram, Molybdenite, and Native Bismuth, with traces of Hematite, Limonite, Mispickel, and Scorodite, in irregular masses of quartz and greisen in granite. *Loc.* Stannary Hills, 93 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

387. ——. Mahoney's Claim, Wolfram Camp, 12 miles W.N.W. of Dimbulah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* A.R., p. 151 (1908).

388. ——. *Assoc.with* Wolfram, Molybdenite, Native Bismuth, Mispickel, Scorodite, Scheelite, Cassiterite, Bismuthinite, Manganese-dioxide, with traces of Iron Pyrites, Hematite, Limonite, Magnetite, etc., in irregular masses of quartz in greisen belt. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbulah Rail. Stn. (Chillagoe line) (*ante*). *Ref.* B.D.

389. ——. *Assoc.with* Wolfram, Molybdenite, and Native Bismuth, in quartz and fluorspar. *Loc.* Schardon's Claim, Almaden, 121 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

390. ——. *Assoc.with* Wolfram, Molybdenite, Bismuth (native), Scheelite, Molybdite, Mispickel, and Scorodite, with traces of Copper Pyrites, Tenorite, Chrysocolla, Iron Pyrites, &c., in irregular masses of quartz and greisen. *Loc.* Bamford Wolfram Mines, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

391. ——. *Assoc.with* Wolfram, Molybdenite, Scheelite, Tungstite, and Bismuth (native), with traces of Cuprite, Malachite, Iron Pyrites, Hematite, and Limonite, in quartz. *Loc.* Eight-mile Mountain, 8 miles N.N.W. of Fossilbrook, 28 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

392. ——. *Assoc.with* Wolfram, Cassiterite, Native Bismuth, and Bismuthinite, in quartz, muscovite, and fluorspar. *Loc.* Emuford, 11 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

393. ——. *Assoc.with* Wolfram, in quartz. *Loc.* Fisherton, Tate River, 24 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

394. ——. *Assoc.with* Wolfram, Cassiterite, Molybdenite, Uran-Mica, and Topaz, with traces of Hematite and Limonite, in small veins in large topaz lode in granite. *Loc.* Lappa Wolfram Lode, 2½ miles S.S.W. of Lappa Junction (Chillagoe line), 104 miles (by rail and road) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

395. ——. *Assoc.with* Wolfram and Cassiterite, with traces of Cuprite, Malachite, and Azurite, in quartz, fluorspar, &c. *Loc.* McCord's Cr., Tate R., 5 miles N.N.W. of Fisherton, 20 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

396. ——. *Assoc.with* Wolfram. *Loc.* Dead Finish Claim, Barron R., 5 miles from Tolga Rail. Stn. (Cairns line), 69 miles (by rail and road) S. of Cairns. *Co.* Nares; *Dist.* Cook.

397. —— in alluvial deposits. *Loc.* at the head of the Gilbert River, nr. Mt. Hogan, Etheridge Goldfield. *Co.* Percy; *Dist.* Cook. *Ref.* G.S.M.

398. ——. *Assoc.with* Cassiterite, Wolfram, and Molybdenite, with traces of Copper Pyrites, Copper Carbonate, Hematite, Limonite, and Mispickel, in quartz, chlorite, and muscovite. *Loc.* Four-mile Mountain, 4 miles N.W. of Fossilbrook, Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook. *Ref.* B.D.

399. ——. *Assoc.with* Gold, Magnetite, Limonite, Manganese-dioxide, Ruby, and Garnet, in alluvial deposits. *Loc.* Agate Cr., br. of Robertson R., 38 miles S. of Georgetown, 21 miles S.S.W. of Charleston, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* L.B. 1, p. 940 (1887).

400. ——. *Loc.* Percy R., br. of Gilbert R., near Gilberton, 60 miles S. of Georgetown, Etheridge Goldfield (*ante*). *Assay:* Metallic Bismuth = 72 per cent. *Ref.* A.R., D.M. 1881, p. 25.

401. ——in alluvial deposits. *Loc.* Percy R., br. of Gilbert R. (*ante*). *Ref.* G.S.M.

402. ——. *Assoc.with* Bismuthinite and Native Bismuth, in quartz blow in granite. *Loc.* Mt. Marlay, 2½ miles E. of Stanthorpe, 38 miles (by rail and road) S. of Warwick. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* B.D.

402A.——. *Assoc.with* Cassiterite and Wolfram. *Loc.* Burnt Hut, 6 miles W.byS. of Ballandean Rail. Stn., about 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay and Ref.* A.R., p. 173 (1909).

403. —— at head of Severn River, Stanthorpe. *Co.* Bentinck (*ante*).

404. —— in alluvial deposits. *Loc.* Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuma; *Dist.* **Kennedy North.** *Ref.* G.S.Q.P. 71, p. 10 (1891).

405. ——. Halifax Bay, 36 miles N.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* B.D.

406. ——. *Assoc.with* Gold and Bismuthinite. *Loc.* Carrington Bismuth Mine, Sellheim R., Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* G.S.M.

407. ——. *Assoc.with* Gold, Galena, Copper Pyrites, Cuprite, Malachite, Azurite, Native Bismuth, Bismuthinite, Bismite, Manganese-dioxide, Hematite, and Ironstone. *Loc.* Daisy Bismuth Mine, on Mt. Wyatt and Bowen Roads, 3 miles S. of Eukalunda, Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, p. 7 (1889), and G.S.M.

408. ——. Tarrant and Flatau's Bismuth Mine, Sellheim Mineral Field (*ante*). *Ref.* G.S.M.

409. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Mispickel, and Hematite, in quartz veins. *Loc.* Gold Workings, Mine Cr., nr. Black Waterhole Cr., 2 miles N.byE. of Hazledean, 37 miles (by rail and road) S.W. of Mackay, Mt. Spencer Goldfield. *Co.* Wodehouse; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 164, pp. 10-12 (1901).

410. ——. *Assoc.with* Bismuthinite, Minium, and Malachite, with traces of Gold, in ferruginous quartz. *Loc.* Mt. Samford, Enoggera Ranges, 6½ miles W. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 159, p. 18 (1901).

411. ——. *Assoc.with* Wolfram, Molybdenite, Tungstite, Wad, Native Bismuth, with traces of Copper Pyrites, Tenorite, Iron Pyrites, Hematite, &c., in defined quartz lodes in greisen and mudstone. *Loc.* Rosedale Mineral Field, 34 miles (by rail) N.W. of Bundaberg, North Coast line. *Co.* Flinders; *Dist.* Port Curtis. *Ref.* B.D.

Bitter Spar. *Syn.* Dolomite, *which see.*

Bituminous Coal. *See* Coal.

B.K. Cattle Station, 12 miles N.W.byN. of Ipswich. *Min.Ref.* Chromite, *see* 1478.

Black Ball Reef, Hodgkinson Goldfield. *Min.Ref.* Calcite, *see* 483; Copper Carbonate, 1888; Galena, 2763; Gold, 3746.

—— Chief Tin Mine, Herberton. *Min.Ref.* Cassiterite, *see* 1067.

Black Jasper. *Syn.* Touchstone, *var.* of Jasper, *which see.*

Black Johnson's, Clermont Goldfield. *Min.Ref.* Gold (alluvial), *see* 3288.

—— King Tin Claim, Herberton. *Min.Ref.* Cassiterite, *see* 1068.

Black Mica. *Syn.* Biotite, *which see.*

Black Mountain (Mt. Leviathan), Cloncurry. *Min.Ref.* Hematite, *see* 4671; Magnetite, 5966.

Black Opal. A variety of precious opal giving alternating bluish, blackish, and bright-coloured reflections. It is only now found at Hungerford ("Lightning Ridge") on the southern border of Queensland. Common Matrix Opal, a dark-brownish ironstone with veinlets of precious opal, is often improperly called black opal. *See under* Opal.

Black Opal Mine Workings, Jundah Opal Field, 130 miles S.W. of Longreach Rail. Stn. (Central line). *Co.* Warbreccan; *Dist.* **Mitchell.** *Min.Ref.* Opal (precious), *see* 6953.

Black Prince Lode, Mt. Hartley, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 801; Felspar, 2629; Mispickel, 6669; Tourmaline, 7838; Wolfram, 7930.

—— —— Mine, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3753.

Black Ridge, *see maps,* Pls. 10, 11; 12¾ miles N.N.W. of Clermont.

Discovery: Gold discovered on Gowrie Cr. in 1892; and on the northern extremity of Black Ridge by Messrs. Fox and Aplin in March, 1895.

Mineral Statistics: *Included in* Clermont returns.

Min.Ref.: Coal Bands, *see* 1660-1664; Epsomite, 2616; Gold, 3297-3318; Halloysite, 4661; Hematite, 4765; Iron Pyrites, 5321; Marcasite, 6511, 6512.

Geological Note: The country rocks at this locality, and at The Springs, McMaster's, and Miclere, are schists and slates of indefinite age, coal measures (Permo-Carboniferous), and basalt. Extensive gold-bearing leads (Permo-Carboniferous) rest on the schists and slates, and are covered in places by basalt flows and by a surface-formed quartzite called "billy." *See* G.S.Q.P. No. 201 for details and map.

Black Ridge Bore. *See under* Artesian Bores. No. 432.

—— Rock Cr., flows into Port Newry, 35 miles N.W. of Mackay. *Min.Ref.* Coal, *see* 1644. *See also* Supplementary Report List, No. 129.

—— —— Cr. Coal Syndicate's Bores. *See under* Coal Bores.

—— —— Tin Extd. Mine, Eureka Cr., Stannary Hils. *Min.Ref.* Cassiterite, *see* 844; Chlorite, 1430; Turgite, 7891.

—— —— Waterhole, 23 miles S.byW. of Cloncurry. *Min.Ref.* Manganese-dioxide, *see* 6390.

Black Sand—

Note: Deposits of black sand occur in several of the bays and estuaries along the Queensland coast. Some of the deposits contain magnetite, ilmenite, and other iron ores, but many are made up of a hard quartz sand mixed with a large amount of a hydrous black coaly substance. The appearance of this black sand-rock at a distance gives the impression that it is coal, and in consequence many misleading reports have been circulated to the effect that coal seams have been seen on the shores of the mainland and on a number of islands.

412. —— ——. Bribie Passage, Caloundra Hd., 45 miles N. of Brisbane. *Co.* Canning; *Dist.* **Moreton.** *Analysis:* Shows absence of Phosphates, Rare Earths, Platinum, and Tin; traces of gold and silver. *Ref.* B.D.

Black Snake Goldfield—

Situation: *See maps*, Pls. 4, 5. 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. Centre—about *Lat.* 26° 13′ S. *Long.* 152° 19′ E.

Discovery: Gold specimen was found here in 1852.

Population: Included with Gympie. Field: Unproclaimed.

Mineral Statistics: *Included in* "Other Goldfields." *See tables and diagram*, Pls. 36, 46, 46a, 47.

Min.Ref.: **Gold**, 4386-4395; Silver, 7533-7539; Mercury, 6551; Lead (Galena), 3068-3072; Copper—(Azurite) 258, (Copper) 1860-1863, (Copper Carbonate) 1964-1966, (Copper, native) 2014, (Copper Oxide) 2055, (Copper Pyrites) 2318-2320, 2327, (Redruthite) 7305, (Tenorite) 7743; Nickel, 6909-6910; Antimony (Stibnite), 7653; Manganese (Dioxide), 6486-6488; **Cobalt**, 1836-1837, (Asbolane) 120, 122, 123; Zinc-Blende, 8209; Iron—(Hematite), 4802, 4803, (Iron Pyrites) 5440-5444, (Ironstone) 5632, (Magnetite) 6062, (Mispickel) 6807-6809, (Pyrrhotite) 7164. Other Minerals—Chrysotile, 7379; Felspar, 2648; Kyanite, 5716; Mica, 6564; Schorl, 7877; Tourmaline, 7873.

Geological Note: Gold-bearing reefs occur in or near the edge of a porphyrite mass, and between this mass and an altered basic volcanic rock there are some well-defined copper-bearing lodes. In serpentine, close to slate, irregular veinlets occur in a talcose rock carrying cobalt, this metal also being found in masses of an earthy cobalt-manganese wad. *See* G.S.Q.P. Nos. 28 and 38 for details.

Geological Publications: Reports—Nos. 28 (1886), 38 (1887), 79 (1892), 169 (1901). *See under* Geol. Sur. Pub. List for title. *See also* short note G.S.Q.P. No. 207, p. 14 (1907).

Warden: Stationed at Gympie.

Inspector of Mines: Stationed at Gympie.

Board of Examiners for Mining Managers (estab. 1900). *Members:* C. F. V. Jackson, State Mining Engineer (chairman); J. B. Henderson, Gov. Analyst; R. Hunter, Inspector of Mines. *Secretary:* W. W. Alder, Mines Dept., Brisbane.

There are two forms of certificates granted, namely:—Certificates of Competency (1st and 2nd Class), and Certificates of Service.

Annual Examinations for Certificates of Competency are held on the leading mining fields of Queensland, and the date of such examinations are notified by advertisement.

Candidates must give one month's notice in writing of their intention to present themselves for examination, to the Chairman of the Board of Examiners for Mine Managers, Mines Department, Brisbane; and such notice must be accompanied by the Warden's receipt for the fee of two guineas for first-class and one guinea for second-class.

Separate examinations are held for First-class and Second-class Certificates in Metalliferous mining, and for First-class and Second-class Certificates in Coal-mining.

Any candidate for a First-class Certificate, who fails to satisfy the Board that he is entitled to such a Certificate, may, if the Board think it advisable, be granted a Second-class Certificate.

SUBJECTS FOR EXAMINATION.

First Class Certificates.—Knowledge of the Mines Regulation Act of 1910; Arithmetic; Methods of Working Mines; Mining Machinery; Timbering; Ventilation; Blasting and Explosives; Drainage; Geology as applied to Mining; Applied Mechanics, Elements of Statics and Dynamics; Mine Surveying and Plans; Mill Work, including the Reduction and Treatment of Ores.

Candidates for First-class Certificate in Coal-mining, in lieu of mill work, are examined in the Nature and Composition of Dangerous Gases met with in Coal Mines, and in Coke-making.

Candidates before receiving a First-class Certificate must satisfy the Board that they have served either for two years as Manager, Under-Manager, or Shift-boss, or for five years as a Working Miner; but candidates may come up for their examination at any time.

Second Class Certificates.—Knowledge of the Mining Act of 1898 and Regulations to date; Arithmetic as applied to ordinary Calculations of Weights and Measures, and Wages, and to any other Calculations connected with an Under-Manager's duties; Methods of Working Mines; Mining Machinery; Timbering; Ventilation; Blasting and Explosives; Drainage.

Candidates for Second-class Certificate in Coal-mining will also be examined in the Nature and Composition of Dangerous Gases met with in Coal Mines.

Candidates before receiving a Second-class Certificate must satisfy the Board that they have served for one year as a Working Miner.

Syllabus.—The Syllabus of the subjects for examination, together with a list of the text books advisable to study and all other information, may be obtained from the Secretary of the Board, Department of Mines, Brisbane.

Bompa Goldfield—

SITUATION: *See maps,* Pls. 2, 3, 34. 44½ miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. Centre about *Lat.* 25° S.; *Long.* 151° 30′ E.

DISCOVERY: 1888.

PROCLAMATION: First and only one, 10th January, 1890, as follows:—Commencing at the north corner of portion 1v, Bompa Resumption, and bounded thence on the south-east by that portion bearing south-westerly about two and a-half miles; on the south-west by a line bearing north-westerly about four and a-half miles to Blackman Creek at a point about one mile above its junction with the Boyne River; on the north-west by Blackman Creek upwards to the range forming the eastern watershed of the Boyne River; and thence on the north-east by that range southerly about four miles in a direct line to the point of commencement.

AREA: 7,680 acres (12 sq. miles).

MINERAL STATISTICS: Gold, *included in* Other Goldfields, in *stat. tables,* Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: **Gold,** 4246-4251; Lead (Galena), 3039; Copper (Copper Pyrites), 2283, 2284; Zinc-Blende, 8182, 8183; Iron (Iron Pyrites) 5359-5361, (Mispickel) 6786.

GEOLOGICAL NOTE: The country rock is granite, portions of which are hornblendic and pyritous. There are gold-bearing quartz reefs in the granite, and all are confined to an area of 6 or 7 square miles. *See* G.S.Q. Pub. No. 58 for details.

GEOLOGICAL PUBLICATION: Report—No. 58 (1890), *see* Geo. Sur. Pub. List for title. *See also* Supplementary Report List, No. 20.

WARDEN: Stationed at Gladstone. INSPECTOR OF MINES: At Rockhampton.

Bompa Mineral Field. Now Glassford Cr. Mineral Field, *which see.*

PROCLAMATION: First and only one, 15th September, 1898, superseded by Proclamation of 24th October, 1900, under which this field is included in the Glassford Creek Mineral Field.

MINERAL STATISTICS: *See under* Glassford Cr. MINERAL REFERENCE: *Ditto.*

Bompa Syndicate Copper Mines. *See* Glassford Cr. Copper Mines. *See* Supplementary Report List, No. 77.

Bompa Silver-Lead Mine, 53 miles S. of Gladstone. *Min.Ref.* Anglesite, *see* 62; Cerussite, 1297; Galena, 3041; Gold, 4260; Hematite, 4782; Limonite, 5906; Massicot, 6549; Minium, 6643.

GEOLOGICAL NOTE: Rocks include altered sedimentaries, serpentine, and acidic intrusives, with granite 2 or 3 miles distant. Lodes, both large and small, occur in the altered rocks, the large ones carrying pyrites, the small ones, 2 or 3 feet thick, containing silver and lead in irregular patches. *See* Supplementary Report List, No. 89.

Boolboonda Goldfield—

Situation: *See maps,* Pls. 4, 5, 35. The Field is about 12 miles N.E. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. Centre about *Lat.* 25° 3′ S., *Long.* 151° 41′ E. Discovery: In 1880.

Population: 200 (estimated 1910).

Proclamation: First and only one, 1st December, 1880, as follows:—Commencing at a point bearing 315 degrees and distant 2 miles and 70 chains from the north corner of forfeited Mineral Selection 955, and bounded thence on the north-west by a line bearing 45 degrees 2 miles and 65 chains; on the north-east by a line parallel with the north-east boundary of Mineral Selection 955 bearing 135 degrees 6 miles; on the south-east by a line parallel with the south-east boundary of Mineral Selection 955 bearing 225 degrees 6 miles; on the south-west by a line bearing 315 degrees 6 miles; and again on the north-west by a line bearing 45 degrees 3 miles 15 chains to the point of commencement—exclusive of alienated and reserved lands.

Area: 21,000 acres (nearly 33 sq. miles).

Mineral Statistics: Gold, *included in* Other Goldfields, in *stat. tables,* Pls. 36, 46, 46A, 47.

Mineral References: Gold, 3564-3566; Silver, 7428; Copper—(Copper), 1841, (Copper Ore), 2020, (Copper Pyrites), 2121, 2122.

Geological Notes: The country rock is granite of variable composition, in association with belts of schists and gneiss. Lodes carrying copper and gold occur usually in the granite, but occasionally also in the gneiss and schist. *See* G.S.Q.P. No. 21 for details.

Geological Reports: No. 21 (1885), *see* Geo. Sur. Pub. for title.

Warden: Stationed at Mt. Perry. Inspector of Mines: Stationed at Rockhampton.

—— Hill (*ante*). *Min.Ref.* Copper, *see* 1841; Copper Pyrites, 2121, 2122; Gold, 3564, 3566; Silver, 7428.

419A.——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Azurite, Hematite, Limonite, Cinnabar, and Jasper, in quartz and calcite. *Loc.* St. George Copper and Coal Mines, Little R., 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mosman; *Dist.* Cook. *Ref.* G.S.Q. Pub. 222, pp. 21-32 (1910).

420. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, and Malachite. *Loc.* Duchess M.L. (275), Duchess Group, Burke, 65 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.M.

421. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Iron Pyrites, Mispickel, Hematite, Magnetite, Cerussite, Minium, and Zinc-Blende, in quartz lode, in quartzite and porphyry. *Loc.* Mt. Garnet Mines, Return Cr., 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

422. ——. *Assoc.with* Copper Carbonate, Cerussite, and Galena, in lode. *Loc.* Blue Bell Lease (226), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

423. ——. *Assoc.with* Chrysocolla, Copper Carbonate, and Mispickel, in chloritic lode. *Loc.* Ingola Tunnel Lease 177, nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

424. ——. In gossany chloritic lode. *Loc.* Mt. Regner Lease 242, Kangaroo Hills, Mineral Field (*ante*). *Assay:* Silver, 35 oz. 18 dwt. 16 gr. per ton; Copper, 30·5 per cent. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

425. ——. *Assoc.with* Copper Pyrites, Cuprite, Tenorite, Copper Carbonate, Iron Pyrites, Ironstone, Galena, and Zinc-Blende, in lode. *Loc.* Mt. Thekla Copper Mine, 4 miles N. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 86 oz. per ton; Copper = 21·37; Lead = 8·65; Zinc = 4 to 5 per cent.; (2) Silver = 22 oz. per ton; Copper = 18·75; Zinc = 4 per cent.; (3) Silver = 121 oz. per ton; Copper = 2·2 per cent. *Ref.* G.S.Q. Pub. 167, p. 7 (1901).

426. ——. *Assoc.with* Malachite. *Loc.* Newton's Shaft, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.M.

427. ——. *Assoc.with* Native Silver, Copper Pyrites, Cuprite, Copper carbonate, and Galena, in lode. *Loc.* True Blue Lease (161), Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 60 oz. per ton; Copper = 27·5 per cent.; (2) Silver = 56 oz. per ton; Copper = 31·4 per cent. *Ref.* G.S.Q. Pubs. 82, p. 8 (1892) and 167, p. 11 (1901).

428. ——. *Assoc.with* Copper Pyrites, Tile Ore, Hematite, Cerussite, Galena, and Mispickel, in lode. *Loc.* Wallaroo Lease (162), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 3 oz. 13 dwt. 12 gr. per ton; Copper = 1·7 per cent. *Ref.* G.S.Q. Pub. 82, p. 15 (1892).

429. ——. *Loc.* Western Copper and Silver Mine, Macaulay Cr., Kangaroo Hills Mineral Field (*ante*). *Assay:* Copper = 38 per cent.; Silver = 120 oz. per ton. *Ref.* G.S.Q. Pub. 167, p. 9 (1901).

429A.——. *Loc.* Pine Vale Copper Mine, 9 miles S.byE. of Eton Vale Rail. Stn., 32 miles (by rail and road) S.byW. of Mackay, Mt. Spencer Gold and Mineral Field. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.M. and G.S.Q. Pub. 229, pp. 12-17 (1910).

429B.——. *Assoc.with* Copper Pyrites, in quartz. *Loc.* Christie's Copper Lode, por. 83v, Mia Mia, Cattle Cr., 5 miles W. of Finch Hatton Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 229, p. 36 (1910).

430. ——. *Assoc.with* Silver (native) and Tetrahedrite, in quartz. *Loc.* Silver King Copper Mine, between pors. 99v and 83v, Mia Mia, Cattle Cr. (*ante*). *Ref.* O.R.

430A.——. *Assoc.with* Malachite. *Loc.* Silver King Copper Lode, between pors. 99v and 83v, Mia Mia, Cattle Cr. (*ante*). *Ref.* G.S.Q. Pub. 229, pp. 36, 37 (1910).

430B.——. *Assoc.with* Malachite and Limonite. *Loc.* Freedom of Contract No. 2 Mine, between Retreat and Ruby Crs., 6½ miles N.E.byN. of Withersfield Rail. Stn. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 81, p. 4 (1892).

431. ——. *Assoc.with* Gold, Copper Pyrites, Copperas, and Chalcanthite, in diorite. *Loc.* Mt. Clifford Mine, nr. Retreat and Ruby Crs., 9½ miles (by road) N.W. of Anakie Rail. Stn. *Co.* Clermont (*ante*). *Ref.* G.S.Q.P. 127, p. 2 (1898).

432. ——. *Assoc.with* Copper Pyrites, in quartz. *Loc.* Crow's Nest (Ravensbourne), 34 miles (by rail) N. of Toowoomba, 135 miles (by rail) W.byN. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.**

433. ——. *Assoc.with* Iron Pyrites. *Loc.* Frampton Lease, Norton Goldfield, 32½ miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* L.C.B.

434. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Tenorite, Azurite, Malachite, and Ironstone, in crystallised limestone, &c. *Loc.* Mt. Hector Copper Mine, E. side of Dawes Range, 60 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* Q.G.M.J., vol. 4, pp. 174-177 (1903).

435. ——. *Assoc.with* Copper Pyrites, Cuprite, Tenorite, Malachite, Azurite, Galena, Hematite, Magnetite, Zinc-Blende, Garnet, Chlorite, and Calcite. *Loc.* Glassford Cr. Copper Mines, 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne Valley Br. line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 150, p. 5 (1900), and 194, p. 28 (1904).

435A.——. *Assoc.with* Malachite, Azurite, and Limonite, in quartz lode. *Loc.* 4 miles from Mt. Bennett, about 30 miles W.S.W. of Gladstone, Langmorn Goldfield. *Co.* Deas Thompson; *Dist.* Port Curtis. *Assay:* See Ref. *Ref.* A.R., p. 218 (1910).

436. ——. *Assoc.with* Garnet and Wollastonite, as rock mass in altered limestone. *Loc.* Munna Copper Mine, Por. (167), Marodian, Munna Cr., 17 miles N. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 179, p. 12 (1902).

Boron (Bo.). *Atom.Wt* = 11·0. *Sp.gr.* = 2·45 (amorphous); 2·68 (crystalline). *Colour*, grey (amorphous var.), colourless (crystalline var.).

USES: Boracic Acid and Borax are used to prevent fermentation in foods, drinks, etc., the latter also being commonly used as a flux in the fire assay of metals, and in enamelling processes.

Boron Silicate. *See* Tourmaline.

Bothwell Bore. *See under* Artesian Bores. No. 167.

Botryoidal Sandstone (allied to Fontainbleau Sandstone), *which see.*

Bottallic Tin Mine, Stanthorpe. *Min.Ref.* Cassiterite, *see* 1032.

Boundary Bores. *See under* Artesian Bores. Nos. 211, 229, 269.

—— M.L. 582, Bull Cr. Group, Cloncurry. *Min.Ref.* Chrysocolla, *see* 1511; Copper (native), 1984; Copper Pyrites, 2103; Cuprite, 2410; Limonite, 5803; Malachite, 6160.

—— Tin Claim, Watsonville. *Min.Ref.* Cassiterite, *see* 888; Felspar, 2633.

Bournonite. *Syn.* Antimonial Lead Ore. *Compo.* Sulphide of antimony, lead, and copper. *Colour and Streak*, blackish lead-grey, iron-black. Metallic. *H.* = 2·5—3. *Sp.gr.* = 5·7—5·9. Brittle. *Contents* (*max.*), Lead 42 per cent., Antimony 24 per cent., Copper 13 per cent.

437. ——. *Loc.* Albion Mine, Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

Bowden and Co.'s Sel. 147, Argentine Silver Field. *Min.Ref.* Cerussite, *see* 1263; Gold, 4087; Iron Pyrites, 5282; Mispickel, 6756; Silver, 7491.

Bowden Mineral Field—

SITUATION: *See maps*, Pls. 8, 9. Pascoe R., 24 miles W. of Lloyd Bay, 240 miles N.W. of Cooktown. *Co.* Weymouth; *Dist.* **Cook.** Centre about *Lat.* 12° 30′ S.; *Long.* 143° E.

DISCOVERY: Wolfram discovered by William Bowden on Pascoe River about the end of 1892. *Ref.* A.R.D.M., p. 62 (1911).

POPULATION: 8 (estimated 1910).

PROCLAMATION: First and only one, 23rd August, 1907, as follows:—The whole of the catchment area of the left bank of Canoe Creek and the right bank of Pascoe River, from the confluence of same for a distance of ten miles south-easterly.

AREA: 8,320 acres (13 sq. miles).

MINERAL STATISTICS: Wolfram. *Included in* Cooktown returns. *See tables*, Pls. 42, 46, 46A.

MINERAL REFERENCES: Tin (Cassiterite), 972; Wolfram, 7982; Ironstone, 5537; Coal, 1618.

GEOLOGICAL PUBLICATIONS: None. *See under* Govt. Ming. Jour., Reports Nos. 81, 88.

WARDEN: Stationed at Cooktown.

INSPECTOR OF MINES: Stationed at Croydon.

REPORTS: Inspector's and Warden's monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Bowen (Port Denison)—

SITUATION: *See maps*, Pls. 16, 17. 763 miles N.W.byN. of Brisbane. *Co.* Herbert; *Dist.* Kennedy North. *Lat.*, 20° S.; *Long.*, 148° 14′ E.

PORT for the Normanby, Marengo, Mt. Wyatt, and Happy Valley Goldfields, the Sellheim Mineral Field, and the Bowen River Coalfield.

HARBOURAGE: An harbourage is formed by several islands in the vicinity of the port. A jetty provides berths for vessels of large size, having depths varying from 16½ ft. to 21 ft. at low-water springs.

POPULATION: 4,547 (Census 1911).

RAINFALL: *See under* separate heading.

MINERAL STATISTICS: Gold, *see* Marengo and Normanby Goldfields; Silver and Bismuth, *see* Sellheim Mineral Field.

MINERAL REFERENCE: Magnetite, *see* No. 6014.

GEOLOGICAL NOTE: Bowen is built on recent superficial deposits of sand and silt, but there are many outcrops of granite, gneiss, felsite, porphyry, diorite, and andesite in the vicinity. The granitic rocks make up the main mass of these outcrops, gneiss being present only occasionally. The other rocks form dyke masses which have intruded the granite in all directions. Traces of Wolfram, Molybdenite, and Tin have been found about Bowen, and Amethyst, in fine crystals, occurs in a felsitic dyke on the Don River a few miles distant.

GEOLOGICAL PUBLICATIONS: None on Bowen. Bowen District—No. 181, *see under* Geol. Sur. Pub. List for title; *see also under* Marengo, Normanby, Sellheim, and Bowen River for Nos. of other Reports, &c.

CRUSHING MILLS (on Fields about Bowen): Four batteries (30 stamps).

WARDEN: Stationed at Bowen.

INSPECTOR OF MINES: Stationed at Charters Towers.

CHAMBER OF COMMERCE: Secretary, G. Turner.

GENERAL INFORMATION: Consult *Pugh's Almanac, Queensland Post Office Directory, Post and Telegraph Guide.*

LOCAL NEWSPAPERS: *Port Denison Times and Bowen Advocate; Bowen Independent.*

—— Co. (part) Burnett Dist; (part) Wide Bay Dist. *See map*, Pl. 4.

Bowen Downs Run Bores. *See under* Artesian Bores. No. 178.

Bowen R. *See maps*, Pls. 14, 16. *Min.Ref.* Agate, *see* 1375, 1376; Chalcedony, 1349; Analcime, 7-9; Barytes, 276; Calcite, 507, 509, 510; Clay, 1587; Coal, 1650-1655A; Copper Carbonate, 1946-1948; Copper Ore, 2039; Galena, 2957, 2957B, 3009; Garnet, 3160A; Gypsum, 4625, 4626; Hornblende, 4837; Kalinite, 5669; Kaolin, 5691; Limestone, 653A, 659; Laumonite, 5718-5720; Malachite, 6295, 6296, 6321, 6328; Molybdenite, 6853-6853C; Oil-bearing Shale, 6913; Prehnite, 7075-7077; Silver, 7496, 7496A; Silver (native), 7559; Tetrahedrite, 7772; Thomsonite, 7783, 7784; Wolfram, 8031A.

Bowen River Coalfield, Bowen R. Centre—about *Lat.* 20° 43′ S.; *Long.* 147° 52′ E. *Min.Ref.* Agate, *see* 1376; Analcine, 7-9; Calcite, 507, 508; Clay, 1587; Coal, 1650-1655A; Copper carbonate, 1946-1948; Galena, 2957, 2957A; Gypsum, 4625, 4626; Hornblende, 4637; Kalinite, 5669; Kaolin, 5691; Laumonite, 5718-5720; Limestone, 659; Malachite, 6295, 6296; Oil-bearing Shale, 6913; Prehnite, 7075-7077; Thomsonite, 7783, 7784.

GEOLOGICAL NOTE: The Pelican Creek coal area has recently been examined, and a good workable coal seam, 5 feet thick, has been discovered; while another, of much greater thickness, has been reported to occur. The Measures belong to the Lower Bowen Series of the Permo-Carboniferous.

Bower Bird, 7 miles S.S.W. of Pt. Douglas. *Min.Ref.* Wolfram, *see* 7974.

Bower Bird Goldfield (including Leichhardt Prov. Goldfield)—

SITUATION: *See maps*, Pls. 20, 21. 70 miles N.W. of Cloncurry. *Cos.* Argylla, Brahe, and Tewinga; *Dist.* Burke. Centre—about *Lat.* 20° 5′ S.; *Long.* 139° 35′ E.

POPULATION: (Included in Cloncurry Field).

PROCLAMATION: First, 5th September, 1895. Last, 16th September, 1900. Now included, by proclamation of 9th January, 1913, in the Cloncurry Gold and Mineral Field, *which see.*

AREA: 230,400 acres (360 sq. miles).

MINERAL STATISTICS: *Included in* Other Goldfields, *in tables*, Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: Gold, 3458-3462; Copper (Copper carbonate), 1874, (Copper Pyrites) 2065, 2066, (Malachite) 6088; Iron Pyrites, 4920, 4921; Ironstone, 5485, 5486.

GEOLOGICAL NOTE: The country rock is chiefly quartzite, but mica schist, slate, and limestone are also present, all having a north and south strike. The gold-bearing reefs are large, and form prominent outcrops. *See* G.S.Q. Pub. No. 104 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 104 (1895), 108 (1896). *See under* Geol. Surv. Pub. List for title.

WARDEN and INSPECTOR OF MINES: Both stationed at Cloncurry.

Bower Bird Gully, Little R. *Min.Ref.* Coal, *see* 1617.

—— Lease, 1 mile S. of Clermont. *Min.Ref.* Gold (alluvial), *see* 3327.

Bowler Cr., 3 miles S. of Ashtonville. *Min.Ref.* Azurite, *see* 202B; Cerussite, 1216, 1216A; Copper Carbonate, 1901; Ironstone, 5537A; Limonite, 5849; Malachite, 6248; Minium, 6592; Tetrahedrite, 7768.

Boyne Goldfield, 12 miles S.E. of Gladstone. Field unproclaimed. Included in Calliope Goldfield, *which see.* *Lat.*, 24°—24° 10′ S.; *Long.*, 151° 10′—151° 20′ E. *Min.Ref.* Gold (alluvial), *see* 3376-3379; Limestone, 669. *Min. Statistics:* Included in "Other Goldfields."

GEOLOGICAL NOTE: The rocks comprise slates, shales, greywackes, and limestones of Gympie Formation (Permo-Carboniferous), all intruded by dykes of diorite and porphyrite. Serpentine and granite also occur in the district. Several reefs outcrop on the field, and many of the watercourses have been worked for alluvial gold. *See* G.S.Q. Pub. No. 21 for details.

Boyne Range. Extends easterly from the Calliope Range, about 25 miles S.E. of Gladstone. *Min.Ref.* Calcite, *see* 527A, 537, 538; Gold (alluvial), 3376-3379, (reef), 4252, 4253.

Boyne R., rises in Dawes Range, 55 miles S. of Gladstone, and flows N. into Port Curtis. Length, about 60 miles. Trib. Glassford Cr. *See* Pl. 34. *Min.Ref.* Coal, *see* 1791; Hematite, 4780; Limestone, 668; Magnetite, 6041.

—— and Futter's Cr. (between), 20 miles S. of Gladstone. *Min.Ref.* Limestone, *see* 667.

Brewery Hill, Nigger Cr., nr. Herberton. *Min.Ref.* Cairngorm, *see* 7180; Cassiterite, 1106; Opal (common) 6976, (wood) 7006.

Bribie Island, 45 miles N. of Brisbane. *Lat.*, 26° 48′—27° 6′ S. *Long.*, 153° 10′—150° 15′ E. *Min.Ref.* Kaolin, *see* 5695. *See also under* Gov. Mining Journal, Report No. 86.

GEOLOGICAL NOTE: Most of the island is made up of deposits of loose sand, but in places there are outcrops of a soft black carbonaceous sandstone apparently of recent formation. Coal has been reported to occur on the island, but no outcrops of coal measures have been recorded. If coal exist, probably it would be of the Walloon type. Beds, probably belonging to the Walloon series of the Ipswich Coal Measures (Trias-Jura), occur below the sandstone, but up to the present no productive coal seams have been discovered in them.

Bribie View Bore. *See under* Coal Bores. *See* Supplementary Report List, No. 126.

Brisbane (Capital of Queensland).

Situation: *See maps*, Pls. 6, 7. *Lat.*, 27° 33′ S.; *Long.*, 153° 0′ E.

Discovery: Brisbane River was discovered by Oxley on June 2nd, 1823.

Port for Ipswich Coal Fields. Other than coal, no mineral products are exported from Brisbane except those received for transhipment.

Harbourage: The Brisbane River has a minimum depth of 26 feet at high water spring tides between Moreton Bay and the wharves, a distance of 18 miles.

Population: North Brisbane, 18,005; South Brisbane, 18,178. Total, 36,183.

Rainfall: *See under* separate heading.

Geological Note: The rocks in and around Brisbane comprise a Devonian Series of schists, slates, and shales, and a Mesozoic Series of sandstones, tuffs, and shales. The old Series are traversed by diorite and basalt dykes, the latter also penetrating the Mesozoic rocks. Quartz veins occur numerously in certain belts, and although not in payable quantities, gold has been found in a large number of them. The Mesozoic rocks contain coal, and at Nundah in these measures coal has been found which is of workable thickness and good quality. At Queensport several small coal seams are exposed on the bank of the Brisbane River.

Mineral References: Coal, *see* 1771A; Opal (common), 6991, 6992; Rock Crystal, 7196; Selenite, 4646; Turquoise, 7903; Vanadium, 7915.

Chamber of Commerce: Secretary, W. J. Weatherill.

Stock Exchange: Secretary, V. C. Hoge.

Technical College: *See* separate heading.

University of Queensland: *See* separate heading.

Museums: (1) Geological Survey Museum (minerals, rocks, fossils); (2) Queensland Museum (minerals, rocks, fossils, &c., &c.).

General Information: Consult *Pugh's Almanac; Queensland Post Office Directory; Queensland Post and Telegraph Guide.* Official monthly news, *Queensland Government Mining Journal.*

Local Newspapers: (daily) *Courier; Telegraph; Daily Mail; Standard;* (weekly) *Queenslander; Week.*

Brisbane River. Heads at the Cooyar and Jimna Ranges, flows south-easterly for about 150 miles, thence 42 miles north-easterly, passing through Brisbane to Moreton Bay. The distance from the mouth of the river to Brisbane is about 18 miles. *See* other notes under Brisbane. *Min.Ref.* Coal, *see* 1771A; Chromite, 1477; Ilmenite, 4904.

See Geological Note *under* Brisbane.

Burgess & Co. Bore. *See under* Artesian Bores. No. 165.

Burke Co. Burke Dist.; *see map*, Pl. 20.

Burke District includes Wellesley Island. *See maps*, Pls. 20, 21. *Lat.*, 16° to 22°. *Long.*, 138° to 145°.

Situation, etc.: North-west corner of Queensland; bounded on the N. by the Gulf of Carpentaria, on the E. by the districts of Cook, North Kennedy, and Mitchell, on the S. by Gregory North, and on the W. by the Northern Territory of South Australia (*Long.*, 138°). It is drained by the following rivers and their tribs.:—Gregory (tribs. Nicholson and O'Shannassy), Albert, Leichhardt (trib. Alexandra or Landsborough), Flinders (tribs. Cloncurry, Corella, Williams, Fullarton or Marchant, Gilliat, Mackinlay, Woolgar, Stanwell, Dutton, and Saxby), and Norman (tribs. Carron, Yappar, and Clara).

Area: 102,161; with islands included, 102,664.

Principal Mining Centres: Gold and Minerald Fields—Croydon, Stanhills, Burketown, Bower Bird, Cloncurry, Woolgar, Agate Downs, *which see.*

Counties:

Albion Co.

Allison Co.

Cloncurry Mineral Field (in part—Soldier's Cap of Robert's Group Copper Mines. *See also* Argylla, Beaconsfield, Granada, Kamileroi, Selwyn, and Tewinga Counties).

Argylla Co.

Bower Bird Goldfield (in part. *See also* Brahe and Tewinga Counties).

Cloncurry Mineral Field (in part—*see also* Allison County).

Argylla Cr. (Argylla Group) Copper Mines, Cameron River (Euston, Federal, and Mt. Lloyd Groups) Copper Mines. Corella River (Charley's Cr., East Corella, Enquiry, Jubilee, Lady, Lady South, Melba, Mt. Lidster, Pearl, Rosebud, Secret Springs, Sunset, and Wee MacGregor Groups) Copper Mines (*see also* Selwyn Co.). Dugald River (Cabbage-tree, Lady Clayre, Longamundi, and Una Groups) Copper Mines (*see also* Granada Co.). Glenroy (Mt. Remarkable and Hamilton Creek Groups) Copper Mines. Palm-tree Creek (Native Companion Group) Copper Mines. Wills River (Mt. Hope Group) Copper Mines. *See also under* Chatsworth Co., Gregory North District.

Beaconsfield Co.

Cloncurry Mineral Field (in part—*see also* Allison County).

Cloncurry Township (Great Australian Group) Copper Mines, Elder Cr. (Elder Group, Mountain Home Group) Copper Mines (*see also* Duck Cr., Selwyn Co.), Morris Cr. (Rocklands and Serpentine Hill Groups) Copper Mines, Pumpkin Gully (Eagle Hawk, Homeward Bound, Monakoff Groups) Copper Mines.

(Big Ben, Calton Hills, and Eastern Cr. Groups) Copper Mines. Leichhardt R. (Jessie's Dream, Mighty Atom, and Mt. Cuthbert Groups) Copper Mines. Mt. Oxide (Mt. Gordon, Mt. Oxide Groups) Copper Mines. Prospector Cr. (Centipede, Mt. Metallic, and Surprise Groups) Copper Mines.

Toorak Co., Undilla Co., Wellesley Co., Wentworth Co., Wondoola Co., Wongalee Co., Wonoma Co.

Woolgar Co.

Croydon Goldfield (in part—*see also* Esmeralda Co.).

Woolgar Goldfield (in part—*see also* Chudleigh Co.).

Yeppar Co.

Mineral Reference and Statistics: *See under* names of Principal Mining Centres.

Burke River Mining Centre, 60 and 70 miles S.W. of Cloncurry. Includes Duchess, Pilgrim, Trikelana, and Mt. Birnie Groups of Copper Mines. *Min.Ref.* Azurite, *see* 207; Chrysocolla, 1524; Copper Pyrites, 2199-2200, 2203; Epsomite, 2614; Iron Pyrites, 5133; Ironstone, 5545; Limonite, 5860-5861, 5864-5869; Malachite, 6255-6258, 6262-6264, 6270-6271; Redruthite, 7285, 7288, 7292-7295; Tetrahedrite, 7769; Tile Ore, 2552.

—— —— Sub-artesian Bore. *See under* Artesian Bores. No. 249.

Burke's Point Bore. *See under* Artesian Bores. No. 324.

Burketown—

Situation: *See maps,* Pls. 20, 21. On the Albert River, 2,200 miles (by steamer around Cape York) N.W.byW. of Brisbane. *Co.* Porchester; *Dist.* Burke. *Lat.*, 17° 45′ S.; *Long.*, 139° 33′ E.

Port for the Lawn Hills and Lilydale Silver Mines in the Burketown Mineral Field.

Harbourage: The town is about 36 miles up the river from the Gulf of Carpentaria. Depth of water on the Bar varies from 3 ft. to 5 ft. at low water. In the river from Kangaroo Pt. to Truganini landing, depth is 4½ ft. at low water; from thence to Burketown, about 2 ft.

Population: (District), 800.

Geological Note: Recent superficial deposits prevail through this region. They cover artesian water beds belonging to the Cretaceous System.

—— Bore. *See under* Artesian Bores. No. 11.

Burketown Mineral Field—

Situation: *See maps,* Pls. 20, 21. 92 miles S.W. of Burketown. *Co.* Gregory; *Dist.* Burke. *Lat.*, 18° 30′ and 19° S.; *Long.*, 138° 30′ and 139° E.

Proclamation: First and only one, 8th Sept., 1899, as follows:—Commencing at the south-east corner of Bauhinia Vale No. 2 Run, and bounded thence on the north by that run bearing east four miles; on the east by Alice Dale Run bearing south about ninety chains; on the north by that run east and north to the south-west corner of Archie Creek South, by the south-west boundary of same south-easterly to Mahon No. 2; on the east by Mahon No. 2 and Mahon No. 3 south about twelve miles; thence by Lilydale east about one mile; on the south-east by Verdon No. 4 and Verdon No. 1 bearing south-westerly about ten miles; on the south-west by Lilydale bearing north-westerly about two miles; again on the south-east by Lilydale and Verdon bearing south-westerly about seven miles; on the south-west by Verdon West and Bymbell bearing north-westerly about ten miles and a-half; on the east by Murrygon Block and a line bearing north twelve miles and a-half to a point west from the south-west corner of Bauhinia Vale West; on the north by a line and the south boundary of that block bearing east about eleven miles; and again on the east by Bauhinia Vale West bearing north about two miles to the point of commencement.

Area: 202,752 acres (317 square miles).

Leases: Mineral Leases in force and applications, 1910, No. 4; area, 95 acres. Miner's Homestead and applications, 1912, No. 2, area, 50 acres.

Principal Mining Centres: Lawn Hills, Silver-Lead Mines, Mended Hill.

Mineral Statistics: Silver, *see tables,* Pls. 37, 46, 46a. Lead, *see tables,* Pls. 38, 46, 46a. Copper, *see tables,* Pls. 39, 46, 46a.

Mineral References: Lead (Cerussite), 1185a-1186; (Galena), 2692-2697; (Lead Gossan), 5728; Zinc Blende, 8052, 8053; Iron (Hematite), 4676, 4677; Calcite, 451; Halite, 4649.

Geological Note: The rocks of this field are evenly bedded sandstones, shales, and mudstones. They have been broken by enormous faults, along which deposits of quartz and other minerals have been formed. Some of the lodes are large, and contain a very high percentage of lead and silver. *See* G.S.Q. Pubs. Nos. 138 and 232 for details and maps.

Geological Publications: Reports—Nos. 138 (1900) and 232 (1911). *See under* Geo. Sur. Pub. List for title.

Warden: Stationed at Burketown. Inspector of Mines: Stationed at Cloncurry.

Burleigh Run Bores. *See under* Artesian Bores. Nos. 187, 188.

Burncluith Bore No. 1 (near Chinchilla). *Min.Ref.* Coal, *see* 1627. *See also under* Coal Bores.

Burncluith Sub-artesian Bores. *See under* Artesian Bores. No. 88.

Burnett District—

Situation, Etc. : *See maps*, Pls. 4 and 5. *Lat.*, 24° and 27°; *Long.*, 150° and 153°. It is bounded on the N. by Port Curtis, on the E. by Wide Bay, on the S. by Moreton and Darling Downs, and on the W. by Leichhardt Districts, etc. The whole area is drained by the Burnett R. and its tribs., Boyne, Auburn, Rawbelle, Stuart, and Barambah Rs., and Three Moon and Splinter Crs. *See maps*, Pls. 4 and 5.

Area : 12,457 square miles.

Principal Mining Centres : Gold and Mineral Fields—Eidsvold, St. John's Cr., Hungry Hill, Mt. Perry, Nanango, Stanton-Harcourt, Paradise, Mt. Shamrock, Chowey, Mt. Biggenden, Duffer's Rush, Gympie Copper Mines (Gooroomjan Cr.), Tenningering (Mt. Perry), Gaeta, and Reid's Cr., *which see*.

Counties :

Boondooma Co.

Bowen Co., in part. (*See also* Wide Bay District.) Boolboonda Goldfield (Boolboonda, Cambria, and New Moonta Copper and Gold Lodes), Tenningering Gold and Mineral Field (Reid's Cr. Goldfield).

Cook Co., in part (*see also* Wide Bay District). Chowey Goldfield, Dallarnil, Degilbo, Mt. Biggenden (Biggenden Gold and Bismuth Mine), Mt. Hastings (Mt. Hastings Gold Mine), Mt. Havilah (Don Jon and Commonwealth Bismuth, Copper, and Gold Mines), Mt. Shamrock Mineral Field (Mt. Shamrock Gold and Bismuth Mine, and Kent's Knob Gold Mine), Paradise Gold Field, Stanton-Harcourt Gold Field, Woowoonga (Young Australia Gold Mine).

Fitzroy, Co., Kingaroy, Nanango Goldfield, in part—(*See also* Cavendish Co., Moreton District). Scrub Paddock Gold and Copper Diggings (Gympie Copper Mines).

Mackenzie Co., Mt. Hawick (formerly Robina) Copper Mine.

Newcastle Co.

Rawbelle Co. Monal Goldfield, in part—(*See also* Clinton Co., Port Curtis Dist.). Cania and Kroombit Goldfield, in part—(*See also* Pelham Co., Port Curtis Dist.), Rawbelle Mine.

Wicklow Co.

Yarrol Co., partly. Eidsvold Goldfield, Mt. Cannindah Mineral Field, Gaeta Goldfield. (*See also* Port Curtis Dist.).

Mineral References and Statistics : *See under* names of Principal Mining Centres.

—— Range, N.byW. of Mt. Perry. *Min.Ref.* Azurite, *see* 181a; Barytes, 266a; Calcite, 482a; Ironstone, 5515a; Malachite, 6206a; Redruthite, 7276a.

Burnett River, rises in the Burnett Range, 50 miles W. of Bundaberg, flows Sly., then N.E. into Hervey Bay. Length, 230 miles. Tribs. Splinter Cr., Three Moon Cr., Rawbelle R., St. John's Cr., Auburn R., Boyne R., Barambah Cr., etc. *Min.Ref.* Agate, *see* 1368; Galena, 2736; Gold, 3656; Ilmenite, 4889; Limestone, 630; Massicot, 6524; Mispickel, 6665; Molybdenite, 6824; Opal (precious), 6938, (wood) 7002; Sardonyx, 1404; Scheelite, 7356; Silver, 7441-7442.

—— Springs, Burnett District. *Min.Ref.* Coal, *see* 1601.

Burrandowan (par. of), pors. 5v, 11v, Jumma Cr., Jimbour. *Min.Ref.* Coal, *see* 1599; Rutile, 7323B.

—— Stn., 20 miles S.W. of Kingaroy Rail. Stn. *Lat.*, 26° 24′; *Long.*, 151° 18′. *Min.Ref.* Sapphire, *see* 2339.

Burrum Coalfield (*see maps*, Pls. 4, 5, 24), 12 miles (by rail) N.W. of Maryborough (North Coast Line). Centre about *Lat.*, 25° 20′ S.; *Long.*, 152° 40′ E.

Discovery: Coal was found on the Burrum River in 1864 by Messrs. Joss, Miller, and Walsh. Regular output of coal began in 1883 as a result of railway connection with Maryborough.

Collieries: Burrum, Clyde, Dudley, Dundee, Glenesk, Riverbank, Torbanlea, Burgowan (Bellert's).

Mineral Statistics: *Included under* Wide Bay in Pls. 43, 46-46A.

Mineral Reference: Coal, *see* 1805-1815, 1830A; Iron Pyrites, 4995; Opal (common), 6970; Siderite, 7404; Sulphur (native), 7668A.

Geological Note: Coal Measures occur throughout the district, and are made up of sandstones, shales, conglomerates, and seams of coal. The series is known as the Burrum Formation belonging to the Cretaceous System. *See* Coal Analyses (Tables of). *See* G.S.Q. Pub. No. 170 for details. *See also under* Gov. Mining Journal, Reports Nos. 57, 103, 104. *See also* Supplementary Report List No. 143.

—— Bores. *See under* Coal Bores.

Cabbage Tree Cr., br. of Splinter Cr., Dawes Range. *Min.Ref.* Actinolite, *see* 4857; Azurite, 182, 184; Copper (native), 1990; Copper Pyrites, 2141; Cuprite, 2417; Gold (alluvial) 3199, (reef) 3657; Gypsum, 4614; Hematite, 4701; Iron Pyrites, 5021, 5022; Limonite, 5834; Magnetite, 5984; Malachite, 6207-6209; Silver, 7443-7445.

——— ——— ———. Flows E. into Princhester Cr., 45 miles N.W. of Rockhampton. Length about 5 miles. *Min.Ref.* Asbestos, *see* 109; Chrysocolla, 1535; Cuprite, 2476.

——— ——— ——— (1 mile from), trib. of Leichhardt R., Cloncurry. *Min.Ref.* Hematite, *see* 4675.

——— ——— ——— and Banks Cr. (between), Brisbane R. *Min.Ref.* Chromite, *see* 1477.

Cabbage Tree Group of Copper Mines, Cloncurry. *Includes* Cabbage Tree M.F. 3072. *Min.Ref.* Copper Ore, *see* 2016E.

Caboolture, 31 miles (by rail) N. of Brisbane. *Lat.* 27° 3′ S.; *Long.*, 153° 1′ E. *Min.Ref.* Beryl, *see* 296, 297; Coal, 1712; Hematite, 4772; Topaz, 7807.

GEOLOGICAL NOTE: The town is close to the junction of the Burrum Coal Formation (Cretaceous) and the Gympie Formation (Permo-Carboniferous), the former being to the east, the latter to the west. Coal seams are known in the district, but up to the present none have been found of commercial value.

Caboonbah (R.O. and T.O.), 12 miles N.N.E. of Esk. *Min.Ref.* Calcite, *see* 523; Chlorite, 1464; Hematite, 4774.

Cacoxenite. *Compo.*, Phosphate of iron. *Colour*, brownish yellow. *H.*=3·4. *Sp.gr.*=3·3.

439. ———. *Assoc.with* Limonite. *Loc.* on hill in Watt's Sel. (55), nr. Buckley's Shaft, 8 miles S. of Beenleigh, 32 miles (by rail and road) S.E. of Brisbane. *Co.* Ward; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 36, p. 2 (1887).

Cadarga Cr. Rises in Great Dividing Range 50 miles S.W. of Gayndah Rail. Stn., flows W. and N. into Auburn R., 32 miles W.byN. of Gayndah. *Lat.*, 25° 40′—26° 10′ S.; *Long.*, 150° 55′—155° 5′ E. *Min.Ref.* Chlorite, *see* 1428; Coal, 1600; Gold, 3630; Iron Pyrites, 5014; Limonite, 5833; Manganese-dioxide, 6401-6402; Mispickel, 6662; Opal (common), 6971; Turgite, 7889.

——— ——— Gold Mines, 33 miles W.S.W. of Gayndah. *Min.Ref.* Gold, *see* 3630A; Iron Pyrites, 5014A; Limonite, 5833A; Manganese-dioxide, 6402A; Mispickel, 6662A.

Cadell and Sutherland's Reef, Barmundoo Goldfield. *Min.Ref.* Gold, *see* 4233.

Cadmium (Cd). *Atom.Wt.* = 112·4. *Sp.gr.* = 8·65. *Colour*, bluish-white-metallic. Ductile. *See* Cadmium Blende.

USES: Employed with silver in electroplating processes. Some of its compounds are used as pigments and in photography and pyrotechny.

MINERALOGICAL NOTE: Cadmium, as well as occurring in Cadmium Blende at Ravenswood, has also been detected in minute quantities in Zinc Blende in the same locality and at several of the mines on the Burketown Mineral Field. Very little has been done to test the presence of Cadmium in the very numerous zinc deposits of the State.

Cadmium Blende. *Syn.* Greenockite. *Comp.*, Sulphide of Cadmium. *Colour*, usually orange yellow. *Lustre*, adamantine to resinous. Brittle. Nearly transparent. *H.* = 3-3·5. *Sp.gr.* = 4·9. *Contents* (*max.*), Cadmium 77 per cent.

440. ———. *Assoc.with* Zinc-Blende. *Loc.* Ravenswood Goldfield, 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., Vol. 4, p. 50 (1887).

Cadmium Sulphide. *See* Cadmium Blende.

Cahill Bros. Lease (89), Mt. Leswell, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 782; Mispickel, 6671; Tourmaline, 7839.

Cainawarra Bore. *See under* Artesian Bores. No. 254.

Caine's King M.L. (57), Columbiad Group, Cloncurry. *Min.Ref.* Azurite, *see* 161; Chlorite, 1421; Chrysocolla, 1497; Malachite, 6104.

Cairncross's Manganese Workings. *See Min.Ref.* No. 6460A.

Cairngorm. *Var.* of Quartz, *which see.*

Cairns—

SITUATION: *See maps,* Pls. 8, 9, 22. 176 miles N.N.W. of Townsville, 1,072 miles N.W.byN. of Brisbane. *Co.* Nares; *Dist.* Cook. *Lat.*, 16° 55′ S.; *Long.*, 145° 46′ E.

PORT for the Mareeba, Mulgrave, Hodgkinson, Tate, Etheridge, Green Hills, Oaks, and Balcooma Goldfields; the Walsh and Tinaroo (Chillagoe and Herberton) Mineral Fields; the Mts. Spurgeon, Lewis, and Fraser Tin Mines; the Mt. Carbine Wolfram Mines; and the Mt. Molloy Copper Mines.

HARBOURAGE: The Bar is dredged to a depth of 13 ft. at L.W.S. Tides vary from 2 ft. to 10 ft., and the depth of water at wharves varies from 14 ft. to 21 ft. at L.W.S.

POPULATION: 13,556 (Census 1911).

RAINFALL: *See under* separate heading.

GEOLOGICAL NOTE: The town is built on Recent Superficial Deposits derived from the Barron River. The high country immediately to the west is made up principally of altered sedimentaries belonging to the Gympie Formation. By the wearing away of these rocks the famous Barron Falls and Gorge have been formed.

GEOLOGICAL PUBLICATIONS: *See under* Etheridge, Hodgkinson, Mareeba, and Walsh and Tinaroo Mining Centres for Reports, etc., about the district generally. There are none published dealing specially with Cairns.

WARDEN: Stationed at Cairns. INSPECTOR OF MINES: Stationed at Herberton.

CHAMBER OF COMMERCE: Secretary R. T. McManus.

TECHNICAL COLLEGE: Secretary Geo. Thomas. For mining subjects taught, *see under* Technical Colleges.

GENERAL INFORMATION: Consult *Pugh's Almanac, Queensland Post Office Directory, Post and Telegraph Guide, Queensland Government Mining Journal* (Brisbane).

LOCAL NEWSPAPERS: *Argus, Morning Post, Trinity Times.*

Caithness Bores. *See under* Artesian Bores. No. 193.

Caiwarra Run Bores. *See under* Artesian Bores. No. 192.

Calamine. (*Dana*—Smithsonite.) *Compo.*, Carbonate of Zinc. *Colour,* whitish, often greenish. *Lustre,* vitreous. *Streak,* white. *H.* = 5. *Sp.gr.* = 4-4·5. *Contents* (*max.*), Zinc 52 per cent.

441. ——. *Loc.* Silver Spur Mine, in Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* **Darling Downs.** *Ref.* L.C.B.

442. ——. *Loc.* Rainbow Silver Mine, Dry R., trib. of Walsh R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

443. ——. *Assoc.with* Zinc-Blende. *Loc.* Lancelot Tin Mines, Newellton (Silver Valley), 6 miles E.S.E. of Irvinebank, 9 miles S.W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

444. ——. *Assoc.with* Galena, in quartz lode. *Loc.* Mt. Barker Silver Mine, 3 miles N.W. of Eungella Stn., 33 miles W. of Mirani Rail. Stn. (Mackay Line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Assay:* Lead = 75 per cent.; Silver = 57 oz. per ton; Antimony = trace. *Ref.* G.S.Q. Pub. 54, p. 3 (1887).

445. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc-Blende, Tenorite, and Copperas, in quartz lode. *Loc.* Beer and Dawson's Lease, 1 mile E. of Yorkey's Goldfield, 9 miles N. of Kilkivan. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 179, p. 8 (1902).

Calaverite. *Compo.*, Telluride of Gold. *Colour*, pale bronze yellow. *Streak*, yellowish gray. *H.* = 2·5. *Sp.gr.* = 9·0. *Contents* (*approx.*), Gold 40 per cent., Silver 3 per cent.

446. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Mt. Morgan Gold Mine (at the 32-ft. level), 24 miles (by rail) S.S.W. of Rockhampton, Mt. Morgan line. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* E.S.S.

Calcareous Sinter. *Var.* of Calcite, *which see.*

Calcareous Tufa. *Var.* of Calcite, *which see.*

Calcifer—

Situation: *See maps*, Pls. 8, 9, 22. 132 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Field. *Co.* Lynd; *Dist.* Cook. *Lat.*, 17° 22′ S.; *Long.*, 144° 38′ E.

Railway Base for Boomerang, Harper, and Hobson Copper Mines, which are connected by tramline.

Population: Included in Chillagoe Returns.

Mineral Statistics: Copper, *see* Herberton Returns, Pls. 39, 46, 51.

Mineral References: Lead (Galena), 2787, (Minium) 6581, (Pyromorphite) 7142; **Copper** (Atacamite) 130, (Azurite) 194, (Chrysocolla) 1517, (Copper Ore) 2027A, (Copper Pyrites) 2168, (Cuprite) 2434, 2435, (Malachite) 6226-6229, (Redruthite) 7279, (Tenorite) 7722, (Tetrahedrite) 7762, (Tile Ore) 2549; Tin (Cassiterite), 922A; Zinc (Smithsonite) 7567, (Zinc-Blende) 8085; Iron (Hematite) 4711, 4712, (Magnetite) 5987-5989, (Mispickel) 6701. Other Minerals: Actinolite, 4859; Diallage, 145, 146; Garnet, 3105; Hornblende, 4828; Lazurite, 5722; Plagioclase, 7070; Tourmaline, 7854.

Geological Note: Silurian limestones form conspicuous lenticular outcrops in the vicinity, and are associated with mica schist, gneiss, and granite. Garnet and several other secondary minerals have been formed where the limestone comes in contact with the granite. Copper in ironstone occurs to the north of Calcifer at Harper's Hill. *See* G.S.Q. Pub. 119 for details and map.

Geological Publications: Reports Nos. 119 (1897), 134 (1898), Maps 220 (1909). *See under* Geol. Sur. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Chillagoe.

Calcino's Sub-artesian Bore. *See under* Artesian Bores. No. 146.

Calcite. *Compo.*, Carbonate of Lime ($CaCO_3$). *H.* = 2·5-3·5. *Sp.gr.* = 2·5-2·7. *Contents* (*max.*), Lime 56 per cent. *Colour*, usually white. *Cleavage*, rhombohedral. *Varieties*, Argentine, Chalk, Dog-tooth Spar, Iceland Spar, Ferro-calcite, Fontainbleau sandstone, Marble, Nail-head Spar, Satin Spar, Stalactite, Stalagmite, Strontiano-calcite, Massive limestone, Travertine, Tufa (Calcareous sinter).

Uses: *See note under* Calcium.

Mineral Note: Commonly occurs in association with ores of Bismuth, Copper, Zinc, Iron, Manganese, Lead, Gold, and Silver; and with Wolfram, Molybdenite, and many other metallic and non-metallic minerals. *See also note under* Limestone.

447. ——. (Crystals) *Assoc.with* Copper (native), Cuprite, and Tenorite. *Loc.* Dugald Mine, Dugald R., 45 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* **Burke.** *Ref.* P.R.S.Q. vol. 4, p. 73 (1887).

448. ——. *Assoc.with* Redruthite, Azurite, Malachite, Ilmenite, Ironstone, Chlorite, and Biotite, in granite, quartz, felspar, and schist. *Loc.* Mavis M.L. (315), Longamundi Group, Dugald R., between 34 and 39 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 283, 284 (1908).

449. ——. *Assoc.with* Carbonate of Copper. *Loc.* Contra Lode, ¼ mile S.W. of Great Australian Copper Mine. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

450. ——. *Assoc.with* Hematite and Siderite, in quartz. *Loc.* Uncle Tom Reef, between Pumpkin Gully and Fisher's Cr., 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

451. ——. *Assoc.with* Lead-bearing Gossan and Zinc-Blende, in sandstone. *Loc.* Watson's Mine, Lawn Hills, Burketown Mineral Field, 92 miles S.W. of Burketown. *Co.* Gregory; *Dist.* Burke. *Ref.* G.S.Q. Pub. 138, p. 3 (1900).

452. Calcite. *Assoc.with* Copper Pyrites, Malachite, and Limonite, in gossan and quartz. *Loc.* Iron Duke M.L., Alice Group, 4 miles S.E. of Mt. Start, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 165, 166 (1908).

453. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, Limonite, Actinolite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group, 1½ miles N.N.W. of Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

454. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Azurite, Iron Pyrites, and Limonite, in schist, slate, and quartz. *Loc.* Eva M.L. (250), Eva Group, 1¼ miles S.E. of Mt. Start, 22½ miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 152-154 (1908).

455. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, and Chlorite, in chloritic schist, gossan, and quartzite. *Loc.* Eva Extd. M.L. (283), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 155 (1908).

456. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Malachite, Chrysocolla, Iron Pyrites, Limonite, Turgite, and Ferro-Calcite, in quartz, quartzite, and limestone. *Loc.* Florence R. Copper Mines, ½ mile W. of Hampden rd., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

457. ——. *Assoc.with* Limonite and Chlorite, in quartz. *Loc.* Block (25) (M.L. 421), Hampden Group, 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 62 (1908).

457A. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Limonite, and Manganese-dioxide, in limestone, quartz, and schist. *Loc.* Hilda M.L. (242), Hilda Group, Slaty Cr., 20 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 183, 184 (1908).

458. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, in schist and limestone. *Loc.* Mascotte Copper Claim (319), Hilda Group, Slaty Cr. (*ante*). *Ref.* G.S.Q. Pub. vol. 215, pp. 184 and 185 (1908).

459. ——. *Assoc.with* Native Copper, Redruthite, Cuprite, Malachite, Cyanochalcite (?), Limonite, and Ferro-Calcite, in granular limestone. *Loc.* Dandy P.A. (297), McPhail Group, 2 miles S. of Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 76 and 77 (1908).

459A. ——. *Assoc.with* Gold, Copper (native), Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 219, 227 (1908).

459B. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Tourmaline, in crystallized quartz. *Loc.* Shamrock M.C. (184), Mt. Wheeler Group, Soldier's Cap (*ante*). *Ref.* G.S.Q. Pub. 215, p. 224 (1908).

459C. ——. *Assoc.with* Copper Pyrites, Limonite, and Ferro-calcite, in schist. *Loc.* Ida Copper Mine (179), Timberoo Group, between Slaty Cr. and Mt. Sheafe, 18 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 178, 179 (1908).

460. ——. *Assoc.with* Malachite, Limonite, Ferro-Calcite, and Tourmaline, in cellular gossan and chloritic schist. *Loc.* Marguerite M.C. (151), Timberoo Group, between Slaty Cr. and Mt. Sheafe (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 177 and 178 (1908).

461. ——. *Assoc.with* Copper Pyrites, Redruthite, Bornite, Tile Ore, Malachite, Iron Pyrites, Hematite, Limonite, and Muscovite, in schist, slate, and quartz. Timberoo Copper M. Lease (716), Timberoo Group, Slaty Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 172-175 (1908).

462. ——. *Assoc.with* Gold in quartz. *Loc.* Weatherley's Reef, Weatherley's Cr., Soldier's Cap, 25 miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 15 (1885).

463. ——. *Assoc.with* Fluorspar, Siderite, and Serpentine, in granite. Golden Gate Reef, Golden Gate Mining Centre, 4 miles N.W. of Croydon Rail. Stn., 98 miles (by rail and road) S.E. of Normanton, Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 202, p. 10 (1905).

464. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende. *Loc.* Golden Gate Reef, Golden Gate Mining Centre (*ante*). *Ref.* G.S.Q. Pub. 202, p. 15 (1905).

465. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Argentite, and Fluorspar, in altered granite. *Loc.* Plant's Shaft, G.G. Gold Mines, Golden Gate Mining Centre (*ante*). *Ref.* G.S.Q. Pub. 202, p. 26 (1905).

466. ——. *Assoc.with* Gold and Graphite, in granite. *Loc.* Plant's Shaft, G.G. Nancy Lee Reef, G.G. Gold Mines (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 26-30 (1905).

467. ——. Roger's No. 1 Mine, G.G. Reef, Golden Gate Mining Centre, 4 miles N.W. of Croydon. *Co.* Surrey; *Dist.* Burke. *Ref.* B.D.

468. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Limonite, and Ferro-calcite, in quartz. *Loc.* Glenferrie P.A. (300), Dobbyn Group, nr. Old Man Cr., Coolullah, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 344 (1908).

469. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Jasper, in slate, gossan, and quartz. *Loc.* Queenslander M.L. (436), Mt. Metallic Group, Prospector Cr., Leichhardt R., 52 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 297-299 (1908).

470. ——. *Assoc.with* Copper Pyrites, Redruthite, and Limonite, in schist and quartz. *Loc.* Hare's Excelsior M.L. (?), Von Bremen's Group, St. Paul's Cr., Leichhardt R., 70 miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 327 and 328 (1908).

471. ——. In altered sedimentary rocks, 1½ miles S. of Moolboolaman Rail. Stn. (Mt. Perry line), 42½ miles (by rail and road) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* L.C.B.

472. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Tile Ore, Chalcotrichite, and Zinc-Blende, in quartz lode. *Loc.* Mt. Perry Copper Mine, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* G.S.M.

473. ——. *Loc.* Sandy Cr., Mt. Perry (*ante*). *Ref.* G.S.Q. Pub. 21, p. 10 (1885).

474. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, Magnetite, Mispickel, Native Bismuth, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Erythrine, Viridite, Actinolite, Chalcedony, and Epidote, in slate and hornblende rock. *Loc.* Biggenden Gold and Bismuth Mine, Mt. Biggenden, 4½ miles W. of Biggenden, 58 miles (by rail and road) W. of Maryborough (Gayndah Rail. line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 60 (1890), 173 (1902), and 194, p. 48 (1904), and G.S.M.

475. ——. *Assoc.with* Aragonite. *Loc.* Biggenden Gold and Bismuth Mine, Mt. Biggenden (*ante*). *Ref.* G.S.Q. Pub. 60, p. 2 (1890).

476. ——. *Assoc.with* Copper Pyrites, Mispickel, and Bismutite, in lode. *Loc.* 1 mile N.N.E. of Mt. Biggenden, 5 miles W. of Biggenden Rail. Stn. (Gayndah line), 59 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 60, p. 3 (1890).

477. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Pyrrhotite, Copper Pyrites, Cuprite, Tenorite, Malachite, Bismuthinite, Hematite, and Zinc-Blende, in lode. *Loc.* Commonwealth Copper-Bismuth Mine, Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), and 207, pp. 14-19 (1907).

478. ——. *Assoc.with* Garnet *var.* Andradite and *sub.var.* Colophonite. *Loc.* Don Jon (Unique) Mine, Mt. Havilah (*ante*). *Ref.* G.S.M.

479. ——. *Assoc.with* Hematite, Bismuth (native), Bismuthinite, and Limestone. *Loc.* Don Jon (Unique) Mine, Mt. Havilah (*ante*). *Ref.* B.D.

479A.——. *Assoc.with* Garnet and Epidote. *Loc.* Mt. Havilah Mine, Mt. Havilah (*ante*). *Ref.* B.D.

480. ——. *Assoc.with* Gold, Telluride of Gold, Native Bismuth, Bismuthinite, Molybdenite, Mispickel, Joseite, Zinc-Blende, Copper Pyrites, Malachite, in quartz. *Loc.* Mt. Shamrock Mine, 5½ miles W.N.W. of Degilbo (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett.

481. ——. *Assoc.with* Gold, in quartz. *Loc.* Black Watch Reef, Scrub Paddock Diggings, 23 miles N.N.E. of Nanango. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 29, p. 3 (1886).

482. ——. in quartz. *Loc.* Mt. Hawick (formerly Robina) Copper Mine, 12 miles by road) W.S.W. of Degilbo (Gayndah Rail. line). *Co.* Mackenzie; *Dist.* Burnett. *Ref.* L.C.B.

482A.——. *Assoc.with* Redruthite, Malachite, Azurite, Ironstone, and Barytes. *Loc.* Burnett Range, nr. Gaeta, about 25 miles N.byW. of Mt. Perry Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* A.R., p. 263 (1910).

483. ——. *Assoc.with* Gold, Copper Carbonate, and Galena. *Loc.* Black Ball Lease, Hodgkinson Goldfield, 19 miles (by coach) from Dimbullah (Chillagoe line). *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 16, p. 6 (1884).

484. Calcite. *Assoc.with* Andradite Garnet, and Fluorspar. *Loc.* Dorothy Mins, 1½ Muldiva, 6 miles S.W.byS. of Almaden, Chillagoe Rail. line, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 119, p. 35 (1897).

484A. ——. *Assoc.with* Andradite Garnet, and Fluorspar. *Loc.* Dorothy Mine, 1½ miles S.E. of Mungana Rail. Stn. (Chillagoe Rail. Line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

485. ——. In limestone deposits. *Loc.* Mungana (on Chillagoe line), 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q. vol. 15, p. 64 (1900).

486. ——. *Assoc.with* Gold, Iron Pyrites, Fluorspar, and Pinite. *Loc.* Daisy Mine, Coen Goldfield, 45 miles by road N.N.W. of Port Stewart, 189 miles N.W. of Cooktown. *Co.* Sidmouth; *Dist.* Cook. *Ref.* G.S.M.

487. ——. *Assoc.with* Turgite. *Loc.* Por. 4064, Pittsworth, 137 miles (by rail) S.W.byS. of Toowoomba. *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* L.C.B.

488. ——. *Assoc.with* Garnet and Copper Pyrites. *Loc.* Malone's Mine, S. of Pikedale Hotel, 11 miles W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs.

489. ——. In shaft. *Loc.* Pikedale Silver Mine, Woolshed Gully, near Pikedale Head Stn.; 20 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 88 (1898).

490. ——. *Assoc.with* Copper Pyrites, Mispickel, Cassiterite, Wolfram, Zinc-Blende, Chlorite, and Orthoclase. *Loc.* Sundown Copper Mine, 12 miles S.W.byW. of Ballandean, 26 miles (by rail and road) S.W. of Stanthorpe. *Ref.* G.S.Q. Pub. 191, p. 22 (1904), G.S.M. and B.D. Assay: *See* No. 2192.

491. ——. *Assoc.with* Gold, Pyrargyrite, Iron Pyrites, Copper Pyrites, Cuprite, Tile Ore, Azurite, Malachite, Galena, Cerussite, Zinc Blende, Ironstone, and Smithsonite. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120 (1898), p. 191 (1904).

492. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Limonite, and Epsomite, in quartz lode in schist and quartzite. *Loc.* Duchess M.L. 275, Duchess Group, Jack's Cr., trib. Burke R., 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 18-23 (1908).

493. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, Atacamite, and Limonite, in quartz and chloritic schist. *Loc.* Blue Jacket M.L. (632), Mt. Hope Group, 53½ miles S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 43, 44 (1908).

494. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Limonite, Iron Pyrites, and Covellite (?), in chloritic schist. *Loc.* Monarch Senior M.C. (352), Mt. Hope Group, 56 miles S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 42 and 43 (1908).

495. ——. *Assoc.with* Gold, Cuprite, Tile Ore, Tenorite, Malachite, Atacamite, Chalcanthite, Limonite, Iron Pyrites, and Chalcedony, in kaolinised slate and gossan. *Loc.* Mt. Elliott Copper Mines, Mt. Elliott Group, Maggies Cr., 58 miles S. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 2-14 (1903).

496. ——. Newellton (Silver Valley), 10 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills, Chillagoe br. line, Walsh and Tinaroo Mineral Field. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* Q.M.

496A. ——. *Assoc.with* Scolecite, in granite. *Loc.* Mary Mine, Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 110 (1887).

497. ——. *Assoc.with* Scolecite, in granite. *Loc.* Mexican Claim, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 110 (1887).

498. ——. *Assoc.with* Gold, Iron Pyrites, Gypsum, Chalcedony, in quartz. *Loc.* North Australian Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q. vol. 4, p. 36 (1887).

499. ——. *Assoc.with* Scolecite, in granite. *Loc.* Queen Block Extended Mine, Charters Towers Goldfield (*ante*) *Ref.* P.R.S.Q., vol. 4, p. 109 (1887).

500. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc-Blende, Gypsum, and Chlorite, in quartz. *Loc.* Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 26 (1879), P.R.S.Q., vol. 4, pp. 36, 47 (1887), G.S.M., and W.C.T.

501. ——. *Assoc.with* Iron Pyrites, Malachite, Magnetite, Ironstone, Graphite, and Garnet. *Loc.* Double-barrel Cr. (Manton), on Northern line, 27 miles S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* L.B. 2, p. 720 (1891).

502. ——. In beach sand-rock. *Loc.* Magnetic Is., Cleveland Bay, 5½ miles N. of Townsville. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 75, p. 2 (1892).

503. ——. *Assoc.with* Zinc Blende. *Loc.* Black Jack Mine, Ravenswood, 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

504. ——. *Assoc.with* Gold and Silver, with traces of Copper and Lead. *Loc.* Upper Cape Diggings, 17 miles W.byN. of Cape River Rail. line, 77 miles (by rail and road) W.S.W. of Charters Towers. *Co.* Griffiths; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 38 (1887).

505. ——. *Assoc.with* Chrysocolla, Pyrolusite, Cerussite, and Galena, in garnet rock. *Loc.* Mt. Moss South Lease (168), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Assay:* Silver = 16 oz. 6 dwt. 16 gr. per ton; Lead = 69·8 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

506. ——. *Assoc.with* Garnet, Chlorite, and Copper Carbonate, in lode. *Loc.* Running R. North Lease (164), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

507. ——. *Assoc.with* Azurite and Malachite. *Loc.* Emu Plains Silver Field, E. of Bowen R., 50 miles S. of Bowen. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 54, p. 4 (1889).

508. ——. *Assoc.with* Laumonite, Chalcedony, and Agate, in basic volcanic rock. *Loc.* Near Mt. McGregor, 2½ miles S.E. of Mt. Toby, 2½ miles S.E. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, p. 15 (1901).

509. ——. *Assoc.with* Copper carbonate. *Loc.* McDougall's Head Stn. (Biralee), Bowen R., 50 miles S.W. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

510. ——. In dolerite, Rosella Cr., Bowen R., 60 miles W.S.W. of Bowen. *Co.* Drake (*ante*). *Ref.* G.S.Q. Pub. 4, p. 29 (1879).

511. ——. In vein, ¼ mile W. of Three-mile Yards, between Two-mile Cr. and Sellheim R., 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

511A. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Tile Ore, Malachite, Azurite, and Chlorite, in slate and granite. *Loc.* MacFadzen's M.F. (1749), Douchang, Flora, Essie, Dozzler, and Green Outcrops lodes, Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 228, pp. 31-35 (1910).

512. ——. *Assoc.with* Gold, in quartz. *Loc.* Hidden Treasure Mine, Yatton Goldfield, 21 miles S.W.byW. of St. Laurence. *Co.* Killarney (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

513. ——. *Assoc.with* Gold and Siderite, in quartz. *Loc.* Mountain Maid Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

514. ——. *Assoc.with* Gold, Copper Pyrites, Chalcanthite, and Orthoclase, in quartz. *Loc.* Red Streak Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

515. ——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* Southern Cross Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

516. ——. *Assoc.with* Gold, Iron Pyrites, Siderite, Steatite, and Felspar, in quartz. *Loc.* St. Catherine Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

517. ——. In tuff and sandstone. *Loc.* Balcomba Range, nr. Balcomba Stn., 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* B.D.

518. ——. *Assoc.with* Gold, in quartz. *Loc.* Erratic Star Reef, Nuggety Gully, Mt. Britton Goldfield, 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

519. ——. *Assoc.with* Gold, Iron Pyrites, in quartz. *Loc.* Keeley and Valentine's Claim, Nuggety Gully (*ante*). *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

520. ——. *Assoc.with* Gold, in quartz. *Loc.* Little Wanderer Reef, Nuggety Gully (*ante*). *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

521. ——. *Assoc.with* Gold, in quartz. *Loc.* Union Reef, Nuggety Gully (*ante*). *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

522. ——. *Assoc.with* Limonite. *Loc.* Main Range, Maranoa Range. *Dist.* **Maranoa.** *Ref.* P.R.S.Q., vol. 4, p. 61 (1887).

523. ——. *Assoc.with* Chlorite and Hematite. *Loc.* Caboonbah, 12 miles N.N.E. of Esk Rail. Stn. (Brisbane-Valley line), 55 miles (by rail and road) N.N.E. of Ipswich. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.M.

524. Calcite. *Assoc.with* Gold, Iron Pyrites, Massicot, Cassiterite, Cerussite, and Bismuth, in kaolinised greisen. *Loc.* Snowdrop P.A., Mt. Langan, Emu Cr., 14½ miles W.N.W. of Kannungar Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Ref.* Q.G.M. Journal, vol. 7, p. 467 (1906).

525. ——. *Assoc.with* Turgite. *Loc.* Por. 1, Dugandan, 59 miles (by rail) S. of Ipswich. *Co.* Churchill; *Dist.* Moreton. *Ref.* G.S.M.

525A.——. *Assoc.with* Magnesite, Chabazite, and Natrolite. *Loc.* Forest Gate Farm (pors. 27 and 81v), Mt. Davidson, 5 miles E.S.E. of Toowoomba. *Co.* Churchill (*ante*). *Ref.* G.S.M. and Q.G.M. Journal, vol. 12, p. 174 (1911).

526. ——. In serpentinous schist. *Loc.* Kelly's Gold Mine, Calliope Goldfield, 12 miles S.S.W. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* L.C.B.

527. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Connemarra Reef, Pancake Gully, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 4 (1885).

527A.——. *Assoc.with* Gold, in casing of calcareous clay. *Loc.* Alexander Reef, Boyne Range, 5 miles S.E. of Calliope, 17 miles S.E. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 5 (1885).

527B.——. *Assoc.with* Gold, in quartz. *Loc.* Mitchell Reef, above New Zealand Gully, 5 miles S.E. of Calliope (*ante*). *Ref.* G.S.Q. Pub. 21, p. 5 (1885).

528. ——. *Assoc.with* Copper Pyrites, Bornite, Tenorite, Malachite, Azurite, Galena, Zinc-Blende, Hematite, Magnetite, Garnet, and Chlorite. *Loc.* Glassford Cr. Copper Mines, Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne Valley br. line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 150, p. 5 (1900), and 194, p. 28 (1904).

529. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Tile Ore, Azurite, Malachite, Iron Pyrites, Hematite, Limonite, and Magnetite. *Loc.* Many Peaks Copper Mine, Deception Cr., 2 miles W. of Nevertire, 58 miles (by rail) due S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 150, pp. 7 and 8 (1900), and 194, p. 28 (1904).

530. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Mispickel, Galena, and Zinc-Blende, in quartz. *Loc.* Advance Reef, Norton Goldfield, 32½ miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 6 (1885), 208, p. 11 (1907), and G.S.M.

531. ——. *Assoc.with* Gold. *Loc.* Calcite Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 17 (1907).

532. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende. *Loc.* Frampton United Mines, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

533. ——. *Assoc.with* Gold, Zinc-Blende, Galena, and Iron Pyrites, in quartz. *Loc.* Hickey's Reef, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

534. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, Mispickel, and Zinc-Blende, in quartz. *Loc.* Who'd-ha'-thought-it Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 6 (1885), and 208, p. 39 (1907).

535. ——. *Assoc.with* Gold, Copper Carbonate, Garnet, and Quartz Crystals. *Loc.* Mt. Grim, 3½ miles W.S.W. of Mt. Alma Stn., 30 miles W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 24 (1904).

535A.——. *Assoc.with* Gold, Iron Pyrites, and Tourmaline. *Loc.* Union Gold Mine, Cawarral Goldfield, 23 miles (by rail) N.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 67 (1887).

536. ——. *Assoc.with* Natrolite and Analcime. *Loc.* Morinish Goldfield, 25 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*).

537. ——. *See* 527A.

538. ——. *See* 527B.

539. ——. Malchi Cr., trib. of Neerkol Cr., about 9 miles W.S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898). *See* Table of Analyses *under* Limestone.

540. —— (crystalline). *Loc.* Mt. Hay, 1½ miles S. of Wycarbah (Central Rail. line), 25½ miles (by rail and road) S.W.byS. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

541. ——. In limestone belt. *Loc.* Stewart's Cr., trib. of Neerkol Cr., 1 to 3 miles W.N.W. of Stanwell Rail. Stn. (Central line), 16 to 20 miles (by rail and road) S.W.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

542. ——. *Assoc.with* Limonite. *Loc.* Stoney Cr., trib. of Neerkoll Cr., Stanwell, 16 miles (by rail) S.W.byW. of Rockhampton (*ante*). *Ref.* B.D.

543. ——, with included Natrolite. Stanwell (*ante*). *Ref.* B.D.

544. ——. In sandstone. *Loc.* Stockyard Cr., Styx R., 12 miles S.E. of St. Lawrence, 52 miles N.W.byN. of Rockhampton. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 84, p. 2 (1892).

545. ——. *Assoc.with* Gold and Chlorite. *Loc.* Rosewood Goldfield, 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 73 (1887), and G.S.M.

546. ——. In shales. *Loc.* Dundee Road, nr. Westwood, 31 miles (by rail) S.W. of Rockhampton. *Co.* Pakington (*ante*). *Ref.* B.D.

547. ——. *Assoc.with* Gold, Copper Pyrites, and Molybdenite, in quartz. *Loc.* Mt. Rose Reef, Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.M.

547A. ——. *Assoc.with* Copper Pyrites and Epidote, in quartz lode. *Loc.* 1½ miles S. of Dee Alluvial Gold Mines, 6 miles N.E. of Mt. Morgan Rail. Stn. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* B.D.

548. ——. *Assoc.with* Gold, Iron Pyrites, and Limonite, in euritic granite. *Loc.* Hidden Treasure Mine, Mundic Cr., Mt. Morgan (Crocodile Cr.) Goldfield, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 11 (1898), and 161, pp. 9-12 (1901).

549. ——. *Assoc.with* Gold, Iron Pyrites, and Tourmaline. *Loc.* Union G.M. Co.'s Lease, Mt. Morgan (Crocodile) Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 40 (1887).

550. ——. *Assoc.with* Ankerite, in quartz. *Loc.* No. 7 Tunnel, Moonmera Copper Mines, 20 miles (by rail) S.S.W. of Rockhampton (Mt. Morgan line). *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 195, p. 22 (1904).

551. ——. *Assoc.with* Cinnabar, in lode. *Loc.* King Bombi Cr., Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 28, p. 8 (1886).

552. ——. *Assoc.with* Gold, in porphyry. *Loc.* Long Tunnel 2 North Mine, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1886).

553. ——. *Assoc.with* Cinnabar, in quartz. *Loc.* 1 mile E. of Messenger's Sel., Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 8 (1886).

554. ——. *Assoc.with* Gold, in mullocky reef. *Loc.* Perseverance Reef, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 3 (1886).

555. ——. *Assoc.with* Gold. *Loc.* Three Bells Claim, Running Cr., Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

556. ——. *Assoc.with* Cinnabar. *Loc.* Wolf Lode, Wide Bay Cr., Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 8 (1886).

557. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Graphite, in diorite. *Loc.* Campbell's Reef, Yorkey's Goldfield, 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 179, p. 8 (1902), and G.S.M.

558. ——. *Assoc.with* Gold and Magnesite, in quartz reef. *Loc.* Waratah Lease, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 7 (1902).

559. ——. As veins, in slate, shale, and other sedimentary rocks. *Loc.* In most of the reefs on the Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Cos.* Lennox and March; *Dist.* Wide Bay.

560. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, Azurite, Malachite, Galena, Zinc-Blende, and Iron Pyrites, in slate, diorite, andesite, etc. *Loc.* Blue Bell Copper Mine, Amamoor Cr., 19 miles S.S.E. from Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* Q.G.M. Journal, vol. 8, pp. 524-526 (1907).

561. ——. *Assoc.with* Celestine. *Loc.* Kawataria [Kiriwinia], 272 miles E.byN. of Port Moresby, **Brit. New Guinea.**

562. ——. *Assoc.with* Quartz, in dolorite dykes. *Loc.* Kimuta Island (Renard Group), 409 miles E.byS. of Port Moresby (*ante*). *Ref.* G.S.Q. Pub. 85, p. 26 (1892).

563. ——. **Argentine** (*var.*). *Assoc.with* Iron Pyrites, in quartz vein traversing granite. *Loc.* Highland Mary Block Shaft, 1 mile S.E. of Croydon Rail. Stn. (Normanton line), Croydon Goldfield, 94 miles (by rail) S.E. of Normanton. *Co.* Surrey; *Dist.* **Burke.** *Ref.* B.D.

564. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, Fluorspar, and Calcite, in quartz and altered syenitic granite. *Loc.* Plant's Shaft, Golden Gate Reef, 4 miles N.W. of Croydon Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 202, p. 26 (1905).

565. —— ——. In quartz reef. *Loc.* Roger's No. 1 Mine, Golden Gate Reef (*ante*). *Ref.* B.D.

566. ——. **(Black.)** In nodules, in coal measure shales. *Loc.* Mt. Wiseman, nr. Banana, 85 miles S.S.W. of Rockhampton. *Co.* Ferguson; *Dist.* Leichhardt. *Ref.* B.D.

567. Calcite. **(Chalk)** (foraminiferal), as irregular bands in masses alternating with gypsum, limestone, and sandstone. *Loc.* Cattle Creek Block, Eva No. 2, trib. of Vergemont R., about 100 miles S. of Winton, and 10 miles E. of Rosebrook Stn. *Co.* Vergemont; *Dist.* Mitchell. *Ref.* B.D.

568. ——. **(Dog-tooth Spar.)** *Loc.* Chillagoe Caves, Calcifer, 133 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 59 (1900).

569. —— ——. *Assoc.with* Ferro-Calcite, Natrolite, and Phacolite, in volcanic tuff. *Loc.* between Harlaxton and Spring Bluff, 5 miles (by rail) N. of Toowoomba. *Co.* Aubigny; *Dist.* Darling Downs. *Ref.* B.D.

570. —— ——. In basic volcanic tuff. *Loc.* Spring Bluff, 10 miles (by rail) N. of Toowoomba, 91 miles (by rail) W. of Brisbane. *Co.* Churchill; *Dist.* Moreton. *Ref.* B.D.

571. —— ——. *Loc.* Mt. Wilson (Wilson's Peak), 20 miles S.W. of Boonah Rail. Stn. (Fassifern line), 79 miles (by rail and road) S. of Ipswich. *Co.* Ward; *Dist.* Moreton.

572. ——. **(Ferro-Calcite.)** *Assoc.with* Native Copper, Redruthite, Cuprite, Malachite, Cyanochalcite, Limonite, and Calcite, in granular limestone. *Loc.* Dandy P.A. (297), McPhail Group, 2 miles S. of Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, pp. 76 and 77 (1908).

573. —— ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Malachite, Chrysocolla, Iron Pyrites, Limonite, Turgite, and Calcite, in quartz, quartzite, and limestone. *Loc.* Florence River Copper Lease, ½ mile W. of Hampden Rd., 33 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

573A. —— ——. *Assoc.with* Copper Pyrites, Limonite, and Calcite. *Loc.* Ida Copper M.C. (179), Slaty Cr., Timberoo Group, 18 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub 215, pp. 178-179 (1908).

574. —— ——. *Assoc.with* Malachite, Limonite, Calcite, Tourmaline, in cellular gossan and chloritic schist. *Loc.* Marguerite M.C. (151), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 177 and 178 (1908).

575. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Limonite, and Calcite. *Loc.* Glenferrie P.A. (300), nr. Old Man Cr., Dobbyn Group, Coolullah, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 344 (1908).

576. —— ——. *Assoc.with* Calcite, Phacolite, and Natrolite, in basic volcanic tuff, in railway cuttings. *Loc.* between Harlaxton and Spring Bluff Rail. Stns., 5 miles N. of Toowoomba. *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* B.D.

577. —— ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Galena. *Loc.* Louisa Mine, 3 miles W. of Pratten, Talgai Goldfield, 51 miles (by rail) S. of Toowoomba. *Co.* Merivale; *Dist.* Darling Dwns. *Ref.* G.S.Q. Pubs. 120, p. 55 (1898), 159 p. 1 (1900), and 186, pp. 17, 18 (1903), and G.S.M.

578. —— ——. *Assoc.with* Epidote and Malachite. *Loc.* *Collaroy Stn.*, 25 miles N.W. of St. Lawrence. *Co.* Killarney; *Dist.* **Leichhardt.** *Ref.* G.S.M.

579. ——. **(Fontainbleau Sandstone.)** *Loc.* Pascoe's Coal Mine, S. of *Bluff* Rail. Stn., 107 miles (by rail) W.byS. of Rockhampton. *Co.* Humboldt; *Dist.* Leichhardt. *Ref.* B.D.

580. —— ——. *Loc.* below basalt at Amby Creek, Falls of Timburn, nr. Kilmorey Stn., 55 miles N.W .of Roma. *Co.* Bundara; *Dist.* Maranoa.

581. ——. **(Iceland Spar.)** *Loc.* Biggenden Mine, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.M.

582. ——. **(Marble.)** *Loc.* opposite Mt. Emma, 3 miles N.E. of Palmerville, 85 miles S.W.byW. of Cooktown. *Co.* Chelmsford; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 35, p. 12 (1887).

583. —— —— (white, fine quality). Localities near Chillagoe, 139 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 77, p. 4 (1891) and L.B. 2, p. 648 (1891).

584. —— ——. *Loc.* Herberton, 12 miles S.S.W. of Atherton Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 4, p. 74 (1887).

585. —— —— (white, saccharoidal). *Loc.* Mountain, nr. Double-barrel Cr. (Manton), 27 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 2, p. 3 (1879).

586. —— —— (grey and of fine quality). *Loc.* Northern Railway, 30 miles S. of Townsville (*ante*). *Ref.* L.B. 2, p. 648 (1891).

587. —— —— (white, saccharoidal). *Loc.* On hill, W. of Reid Cr. Rail. Stn., N. of Torrent Cr., 30 miles S. of Townsville (*ante*). *Ref.* G.S.Q. Pub. 2, p. 35 (1879).

588. —— —— (white). *Loc.* Mt. Roundback, 35 miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* L.B. 2, p. 648 (1891).

589. —— —— (white, saccharoidal). *Loc.* Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 1 (1892).

590. —— ——. *Loc.* Glenmore, 16 miles N.W.byN. of Clermont. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.M.

591. —— ——. *Loc.* Calliope R., 1 mile below Carrara Stn., 12 miles S.W. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 21, p. 3 (1885), and 194, p. 21 (1904).

592. —— ——. *Loc.* Ferguson's Crossing, Calliope R., nr. Catfish, 21 miles S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 34 (1904).

593. —— —— (grey, white). *Loc.* Marblestone, Raggote Cr., trib. of Fuller's Cr., Boyne R., 20 miles S. of Gladstone (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885), and 194, p. 33 (1904). Very beautiful brecciated marble occurs in this locality which is well adapted for ornamental work. The colour of the stone is grey, white, and red.

594. —— ——. *Loc.* Mt. Grim, 31 miles W.S.W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 34 (1904).

595. —— —— (blue and white). *Loc.* Jones's Quarry, nr. Rosedale Rail. Stn., 34 miles (by rail) N.W. of Bundaberg. *Co.* Flinders; *Dist.* Port Curtis. *Analysis:* Carbonate of Lime = 97 per cent. *Ref.* A.R. 1906, p. 59.

596. —— —— (white). *Loc.* nr. McRitchie's Wolfram Claim, nr. Rosedale Rail. Stn. (*ante*). *Ref.* B.D.

597. —— —— (white, rose). *Loc.* Hunter Island, Duke Group, 45 miles N.E.byE. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 19 and 21 (1904), L.B. 2, p. 648 (1891), and G.S.M.

598. —— —— (pink, green). *Loc.* Verde Antique Point, Hunter Is. (Duke Group) (*ante*). *Ref.* G.S.Q. Pub. 194, p. 21 (1904).

599. —— —— (white, saccharoidal). *Loc.* Iron Is., Duke Group, 40 miles N.E. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 10 (1904), and G.S.M.

600. —— ——. *Loc.* Marble Is., Duke Group, 45 miles N.E.byE. of St. Lawrence (*ante*). *Ref.* G.S.Q. Pub. 194, p. 20 (1904).

601. —— —— (white, grey). *Loc.* Moreton Is., Duke Group (*ante*). *Ref.* G.S.Q. Pub. 194, p. 19 (1904), and G.S.M.

602. —— ——. Gigoomgan Head Stn., 35 miles W.S.W. of Maryborough. *Co.* Lennox. *Ref.* G.S.Q. Pub. 194, p. 52 (1904). *Dist.* **Wide Bay.**

603. —— ——. *Loc.* Taupota, 224 miles E.byS. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 55, p. 1 (1889).

604. ——. **(Nail-head Spar.)** *Loc.* Roger's No. 1 Mine, Golden Gate Reef, 4 miles N.W. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* **Burke.** *Ref.* B.D.

605. ——. **(Purple.)** *Assoc.with* Gold, Iron Pyrites, and Magnetite, in quartz reef. *Loc.* Mt. Hastings Mine, 2 miles S.E. of Mt. Biggenden, 5 miles S.byW. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 60, p. 4 (1890), and G.S.M.

606. ——. **(Satin Spar.)** *Loc.* in Chillagoe Caves, Calcifer, 133 miles (by rail) W.S.W. of Cairns, Cairns-Chillagoe Rail. *Co.* Lynd; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 65 (1900).

607. ——. **(Stalactite.)** In Chillagoe Caves (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 65 (1900), and G.S.M.

608. —— ——. *Loc.* Glenlyon, 30 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* P.R.S.Q., vol. 4, p. 73 (1887).

609. —— ——. In caves, Fanning Stn., 59 miles S.byW. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

610. —— ——. *Loc.* Caves, nr. Gulewa Cr., St. Aignan (Misima) Is., 379 miles E.byS. of Port Moresby, Brit. New Guinea. *Ref.* G.S.M.

611. —— ——, in limestone caves. *Loc.* South Coast of Vakuta Is., Trobriand Group, 278 miles E.byN. of Port Moresby, Brit. New Guinea. *Ref.* G.S.M.

612. ——. **(Stalagmite.)** *Loc.* In Chillagoe Caves, Calcifer, 133 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe Rail). *Co.* Lynd; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 65 (1900).

613. Calcite **(Strontiano-calcite).** *Loc.* Edward's Sel., Mt. Toby, 4½ miles N. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 164, p. 16 (1901).

614. —— ——. *Loc.* nr. Gatton, 61 miles (by rail) W. of Brisbane. *Co.* Churchill; *Dist.* Moreton. *Ref.* G.M.

615. ——. **(Limestone.)** Dugald River, 45 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 3 (1885).

616. —— ——. Mt. Eurie, nr. head of Dugald R., 40 miles N.byW. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 10, p. 7 (1885).

617. —— ——. *Loc.* Sunday Gully, 3 miles N. of Leichhardt R., 95 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 1 (1895).

618. —— ——. Fisher's Cr., trib. of Canal Cr., 8 miles E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 2 (1885).

619. —— ——. Between Devoncourt Stn. and Malvern Cr., 35 to 40 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 6 (1895).

620. —— ——. Spring Cr., 40 miles S.S.W. of Cloncurry (*ante*). *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 6 (1895).

621. —— ——. *Loc.* Gunpowder Cr., 87 miles N.W.byW. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 12 (1885).

622. —— ——. *Assoc.with* Hematite, in sedimentary rocks. *Loc.* 5 miles up Percy R., br. of Gilbert R., near Gilberton, 60 miles S. of Georgetown. *Co.* Victor; *Dist.* Burke. *Ref.* G.S.Q. Pub. 151, p. 2 (1900).

623. —— ——. *Assoc.with* Ironstone. *Loc.* Flinders R., 18 miles N.W. of Warreah (Coalbrook) Rail Stn. (Hughenden line). *Co.* Wongalee; *Dist.* Burke. *Ref.* G.S.Q. Pub. 44, p. 1 (1888).

624. —— ——. In belt running S. from Biggenden to Degilbo, crossing rail. line 2 miles N.W. of Biggenden Rail. Stn. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 194, p. 52 (1904). Selections here contain limestone, and quarries have been opened up. *See* Table of Analyses *under* Limestone.

624A. —— ——. On railway near Mundubbera Rail. Stn., Burnett River. *Co.* Bowen; *Dist.* Burnett. Ref. B.D. *See* Table of Analyses *under* Limestone.

625. —— ——. *Loc.* Biggenden Mine, No. 2 Cutting, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 60, p. 1 (1890).

626. —— ——. *Assoc.with* Bismuth (native), Bismuthinite, Hematite (micaceous), and Calcite. *Loc.* Don Jon Mine, nr. Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn (Gayndah line). *Co.* Cook (*ante*). *Ref.* B.D.

627. —— ——. *Loc.* N.E. side of Scrubby (Paradise) Cr., 8 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 68, p. 1 (1891).

628. —— ——. Between Degilbo and Kilkivan Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 194, p. 52 (1904).

628A. —— —— (*var.*). In large quantities and of good quality. *Loc.* 96¾-mile peg, Gayndah-Mundubbera Rail. line (under construction). *Co.* Mackenzie; *Dist.* Burnett. *Ref.* B.D.

629. —— ——. *Loc.* between Kabonga and Splinter Creeks, Mt. Cannindah, 40 miles S.W. of Miriam Vale Stn. (North Coast line). *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 194, p. 35 (1904).

630. —— ——. As large outcrops at New Cannindah Stn., Mt. Cannindah (*ante*). *Ref.* B.D.

631. —— ——. As large outcrops. *Loc.* Burnett R., on road between New Cannindah and Mt. Perry, 7 miles below Yarrol, about 20 miles from Mt. Perry Rail. Stn. *Co.* Yarrol (*ante*). *Ref.* B.D.

632. —— ——. *Loc.* Gorge Cr., to Zillmanton, Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 69, p. 2 (1891).

633. —— ——. *Loc.* Opposite Mt. Emma, 3 miles N.E. of Palmerville, 37 miles S.S.W. of Laura Rail. Stn. (Cooktown line). *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 12 (1887).

634. —— ——. *Loc.* Potosi Mine, Irvinebank, 10 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe line), 12 miles W.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook.

635. —— ——. *Loc.* Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe Rail. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

636 —— ——. *Loc.* In numerous localities at Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 3 (1891).

637. —— ——. *Loc.* Royal Arch Caves, 4 miles S.W. of Chillagoe Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

638. —— ——. *Loc.* Tower of London, 3 miles S. of Chillagoe Rail. Stn. (*ante*). *Ref.* B.D.

638A.—— ——. *Assoc.with* Hematite, Magnetite, Wollastonite, Chert, Garnet, and Epidote. *Loc.* Mt. Lucy, 4 miles W. of Almaden Rail. Stn. (Chillagoe line), 125 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 134, p. 16 (1898), and 196, pp. 6-8 (1905).

639. —— ——. *Loc.* Muldiva Road, W.S.W. of Almaden Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 2 (1891).

640. —— ——. *Loc.* N. of McIlwraith Lease, Redcap Cr., Zillmanton, 142 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 6 (1891).

641 —— ——. In masses. *Loc.* North of Walsh R., opposite junction of Rookwood Cr., 10 miles N.W. of Mungana Rail. Stn. (Chilagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

642. —— ——. In large masses, between Welcome Cr. and Rookwood Cr., br. of Walsh R., N.W. of Mungana (Chillagoe line) (*ante*). *Ref.* B.D.

643. —— ——. *Loc.* Commissioner's Hill, Gilberton, 66 miles S. of Georgetown, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.M.

644. —— ——. *Loc.* between the Burdekin and Einasleigh Waters. *Co.* ——; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 2 (1887).

645. —— ——. *Loc.* 5 miles N. of Glenelg, Warwick Road, about 35 miles W.byS. of Warwick. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 40, p. 1 (1887).

646. —— ——. *Loc.* Block R 1, Glenlyon Lease, 30 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* B.D. and P.R.S.Q., vol. 4, p. 73 (1887).

647. —— ——. In large quantities. *Loc.* 2 miles S.W.(?) of Silverwood Rail. Stn., nr. Warwick. Quarries are at Bald Mt., Lock's Sel., and Reeve's Sel. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 194, p. 65 (1904), and B.D. (1912). *See* Table of Analyses *under* Limestone.

648 —— ——. In quarries, Warwick, 169 miles (by rail) S.W. of Brisbane. *Co.* Merivale (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 73 (1887).

648A.—— ——. In large quantities. *Loc.* Gore Limestone Quarries, 4 miles from Gore Rail. Stn., and 48 miles (by rail and road) from Warwick. *Co.* Bentinck; *Dist.* Darling Downs. Ref. B.D. *See* Table of Analyses *under* Limestone.

649 —— ——. *Loc.* nr. Mount Garnet, 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q. vol. 15, p. 64 (1900).

650 —— ——. *Assoc.with* Ironstone and Garnet Rock. *Loc.* Newellton (Silver Valley), Dry R., 10 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*).

651 —— ——. *Loc.* Broken R., trib. of Clark R., 120 miles W.byS. of Townsville. *Co.* Clarke; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 35, p. 2 (1887).

652. —— ——. (dark blue.) *Loc.* on hill, W. of Reid's Gap Rail. Stn., N. of Torrent Cr., 30 miles S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 2, p. 35 (1879).

653. —— ——. *Loc.* Ben Lomond, Gregory R., 18 miles S.E. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* O.R.

653A.—— ——, friable, and in large quantities, hundreds of tons exposed in bed of creek. *Loc.* (?) Don River, nr. Bowen Road, 10 miles S. of Bowen. *Co.* Herbert (*ante*). *Ref.* B.D.

654. —— ——. *Loc.* Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 1 (1892).

655. —— ——. *Loc.* Burdekin R., above Burdekin Downs Stn., 15 miles N. of Charters Towers. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 94, p. 12 (1893).

656. —— ——. *Loc.* nr. Hillgrove Stn., Basalt R., Dalrymple, 21 miles N.W.byN. of Charters Towers. *Co.* Wilkie Gray (*ante*). *Ref.* G.S.Q. Pub. 35, p. 12 (1887).

657. —— ——. *Loc.* nr. Mt. MacGregor, 2½ miles S.E. of Mt. Toby, 2½ miles N.N.E. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Analysis:* Silica = 19·88, Carbonate of Lime = 71·00, Iron and Alumina = 3·06, Carbonate of Magnesia = 0·76 per cent. *Ref.* G.S.Q. Pub. 164, p. 15 (1901).

658. Calcite (Limestone). *Loc.* Repulse Is., 46 miles N.N.W. of Mackay. *Co.* Carlisle (*ante*). *Analysis:* Carbonate of Lime = 84 per cent. *Ref.* B.D.

658A.—— ——. *Loc.* Glenmore, 16 miles N.W.byN. of Clermont. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.M.

659. —— ——. *Loc.* Jack's Cr., trib. of Bowen R., 50 miles S.S.W. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 4, p. 23 (1879).

660. —— ——. *Assoc.with* Gold, in ironstone and quartz. *Loc.* Lincoln Leaders, Copperfield Road, 2½ miles S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 176, p. 22 (1902).

661. —— ——. *Loc.* Bellridge's Sel. (35), 3 miles below junction of Douglas and Drummond Crs., 4 miles S.E. of Copperfield, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 148, p. 3 (1900).

662. —— ——. *Loc.* Douglas Cr., Copperfield, 5 miles S.S.W. of Clermont (*ante*). *Ref.* L.B., p. 762 (1886).

663. —— ——. *Assoc.with* Ironstone. *Loc.* nr. Mt. Clifford, between Retreat and Ruby Creeks, 9 miles (by road) N.W. of Anakie Rail. Stn. *Co.* Clermont; (*ante*). *Ref.* G.S.Q. Pub. 127, p. 2 (1898).

664. —— ——. Pine Mountain, 7 miles (by rail) N.W. of Ipswich. *Co.* Churchill; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 194, p. 58 (1904).

664A.—— ——. Small lenticular beds occur in association with calcareous shales and sandstones belonging to the Ipswich Coal Measures. *Loc.* About Flinders, Munbilla, and Anthony, on the Ipswich-Fassifern Rail. Line. *Co.* Churchill; *Dist.* Moreton. *Note:* Some of the lenses of limestone contain 70 per cent. of carbonate of lime, but large beds of sandstone exist which contain from 30 to 40 per cent. of carbonate of lime. *See* Table of Analyses *under* Limestone.

664B. —— ——. Ryan's Sel. and at base of Mt. Cross, 8 miles northerly from Helidon Rail. Stn. *Co.* Cavendish; *Dist.* Moreton.

665. —— ——. *Assoc.with* Chalcedony, Chert, Magnesite, and Ironstone. *Loc.* Limestone Hill, Ipswich, 24 miles (by rail) W.S.W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 194, p. 58 (1904), G.S.M., and B.D. *See* Table of Analyses *under* Limestone.

666. —— ——. *Loc.* Booreeco Cr., 30 miles S.W. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 194, p. 34 (1904).

667. —— ——. Marblestone, between Tucker's Gully and Boyne R., 20 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885), 194, p. 33 (1904).

668. —— ——. *Loc.* Marblestone Road, Boyne R. (*ante*). *Ref.* G.S.Q. Pub. 194, p. 34 (1904).

669. —— ——. *Loc.* New Zealand Gully, Boyne Goldfield, 5 miles S.E. of Calliope, 17 miles S.E. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

670. —— ——. Brennan's Flat, 3 miles S.S.E. of Calliope, 15 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

671. —— ——. *Loc.* Calliope R., from 10 to 24 miles S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194. pp. 31, 32 (1904).

672. —— ——. *Loc.* nr. Catfish, 21 miles S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 34 (1904).

673. —— ——. *Loc.* Diglum Cr., 30 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 34 (1904).

674. —— ——. *Loc.* Bompa Copper Mine (Lease 5), Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn., 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 29 (1904).

675. —— ——. *Glassford Cr.* (*ante*). *Ref.* G.S.Q. Pub. 194. p. 35 (1904).

676. —— ——. *Loc.* Gordon Gully, trib. of Leixlip Cr., 4 miles S.E. of Calliope, 16 miles S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

677. —— ——. Bald Hills, 6 miles S. of Langmorn, 14 miles W.S.W. of Gladstone. *Co.* Deas Thomson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

678. —— ——. On hill near Langmorn, 8 miles W. of Gladstone. *Co.* Deas Thomson (*ante*). *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

679. —— ——. In large quantities. Grey's Quarries, Raglan, 22 miles S.E. of Rockhampton, on Gladstone-Rockhampton Rail. line. *Co.* Deas Thomson (*ante*). *Ref.* G.S.Q. Pub. 194, p. 22 (1904). *See* Table of Analyses *under* Limestone.

679a. —— ——. A large outcrop extending over many acres. *Loc.* Ambrose Quarry, $\frac{3}{4}$-mile S.W.(?) of Ambrose Rail. Stn. (Gladstone-Rockhampton line). *Co.* Deas Thompson (*ante*). *Ref.* B.D. *See* Table of Analyses *under* Limestone.

679b. —— ——. Two hills, McDonald's Sel., 2 miles from Raglan Rail. Stn., and $\frac{3}{4}$-mile W. of line. *Ref.* B.D. *See* Table of Analyses *under* Limestone.

680. —— ——. *Loc.* Jones's Quarry, nr. Rosedale Rail. Stn., 34 miles (by rail) N.W. of Bundaberg. *Co.* Flinders; *Dist.* Port Curtis. *Analysis:* Carb. of Lime = 97 per cent.

681. —— ——. Bedded with shales, etc. *Loc.* 8 miles from Rosedale Rail. Stn., $\frac{1}{2}$ mile from McRitchie's Wolfram Mine, nr. road, 42 miles (by rail and road) N.W. of Bundaberg. *Co.* Flinders (*ante*). *Analysis*: Carbonate of Lime = 98·88 per cent., Silica = 1·12 per cent. *Ref.* B.D.

682. —— ——. North of Fitzroy R., 24 miles above Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 22 (1904).

682a. —— ——. In large quantities at low levels. Fitzroy River, at Glenmore Quarries, 1 mile from Glenmore Rail. Stn., 4 miles from Rockhampton (*ante*). *Ref.* B.D. *See* Table of Analyses *under* Limestone.

683. —— ——. Left bank above Long Is., Fitzroy R., near Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

684. —— ——. *Loc.* Johannsen's Caves, nr. Mt. Etna, 16 miles N.N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 86, p. 2 (1892).

685. —— ——. Olsen's Caves, nr. Mt. Etna (*ante*). *Ref.* G.S.Q. Pub. 86, p. 2 (1892). *See* Table of Analyses *under* Limestone.

685a. —— ——. *See* 539.

686. —— ——. *Loc.* Tungamul, 18 miles (by rail) E.N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Analysis:* Silica and insoluble = 0·32 per cent., Lime = 54·60 per cent.

687. —— ——. *Loc.* Hunter Is., Duke Group, 45 miles N.E.byE. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, pp. 21, 22 (1904).

688. —— ——. Marble Is., Duke Group (*ante*). *Ref.* G.S.Q. Pub. 194, p. 20 (1904).

689. —— ——. *Loc.* Mortar Is. (Duke Group) (*ante*). *Ref.* G.S.Q. Pub. 194, p. 20 (1904). *See* Table of Analyses *under* Limestone.

690. —— ——. *Loc.* Northumberland Islands, 45 miles N.E.byN. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* P.R.S.Q. vol. 4, p. 74 (1887). *Analysis:* Carbonate of Lime = 96 per cent.; Foreign matter = 2 per cent.

691. —— ——. *Loc.* Three Moon Cr., Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 8 (1885).

692. —— ——. *Loc.* Glen Dee, Dee R., 5 miles E.N.E. of Mt. Morgan. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 161, p. 15 (1901).

693. —— ——. *Loc.* Daylesford, 36 miles (by rail) W.S.W. of Bundaberg (Mt. Perry line). *Co.* Bowen; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 194, p. 50 (1904). *See* Table of Analyses *under* Limestone.

See also under Limestone for further references.

Calcite Reef, Norton Goldfield. *Min.Ref.* Calcite, *see* 531; Gold, 4268.

Calcium. (Ca). *Atom. Wt.* = 40·07. *Sp.gr.* = 1·554. MINERALS: *See* Calcite (and *vars.*), Dolomite, Apatite, Fluorspar, Gypsum; *see also under* Silicates of Lime, etc.

USES: Calcium in its metallic form has very few industrial applications, but lime, formed by burning the carbonate to an oxide, has a variety of uses in building construction and decoration. Lime, when treated with chlorine gas, forms chloride of lime (bleaching powder), and when heated with coke in an electric furnace forms calcium carbide. If fused with silica and clay in definite proportions, and then ground, it makes Portland Cement. *Limestone,* when used for making lime, must be free from iron, and should contain very little silica, alumina, or magnesia, but in Portland Cement manufacture the limestone may contain silica, clay, and a few per cent. of iron oxide, as these substances enter into the composition of the cement. Limestone is an important flux for silica and siliceous gangues, and is used in nearly all smelting operations for copper, silver, iron, etc. Silica in limestone, for obvious reasons, is undesirable, but iron oxides are usually of advantage in helping to form fusible slags. In ornamental and decorative work, coloured and banded limestones and marbles are extensively used, but no attempt has been made to exploit the numerous deposits of fine limestones known to exist in many parts of the State. *Fluorspar,* the fluoride of lime, is a common flux in some processes of steel manufacture and in iron foundries, and is a useful addition to limestone flux when trouble is experienced in slaging charges in smelting furnaces. Fluorspar is also used in enamelling processes, in glass-staining, and in the manufacture of hydrofluoric acid which is applied to etching glass; finer qualities are made into vases and other carved and turned ornaments. The phosphates of lime, *Apatite,* Rock Phosphate, Guano, etc., are commonly utilised as fertilisers, both in their natural condition and after treatment with sulphuric acid to convert them into "superphosphates." *Gypsum (Alabaster, Selenite,* etc.), is commonly used in the manufacture of Plaster of Paris, the crystallised variety, Selenite, which occurs at Mt. Elliot, near Cloncurry, being eminently suited for this purpose. Compact Gypsum is also good for plaster-making, but it usually contains clay and carbonate of lime as impurities. Plaster of Paris should absorb its own weight of water, although the finer quality, made from crystal, does this more slowly than that made from compact Gypsum. Alabaster, the white, massive, finely-granular variety of Gypsum, in addition to being used in making Plaster of Paris, is in demand for ornamental and statuary purposes, and is commonly known as Parian Marble.

Callide Cr. Coalfield, 52 miles S.W.byW. of Gladstone. *Lat.*, about 24° 16′—34° 30′ S.; *Long.*, about 150° 30′—15′ E. *Min.Ref.* Coal, *see* 1803. *See also under* Gov. Mining Journal, Report No. 64, and "Test of Callide Coal" in Gov. Ming. Jour., Oct., 1912, p. 524, the latter article containing an account of 4½ tons boiler test by Harbours and Rivers Department.

Geological Note: The rocks about the Callide consist of slates, etc., of Gympie Formation (Permo-Carboniferous), sandstones and shales of Ipswich Formation (Trias-Jura), and granite. In the Ipswich Formation there are very thick coal seams of good quality, and prospecting operations, it is said, have recently shown that a coal seam exists 54 feet thick. *See* G.S.Q. Pub. No. 80 for details, and Gov. Ming. Jour., 1906 (vol. 7), p. 139, for notes.

—— Creek. Heads at Dawes Range, flows W. and N. into Dee R. 70 miles W. of Gladstone. *Min.Ref.* Copper Carbonate, *see* 1963; Gold (alluvial), 3399; Magnetite, 6053.

—— (or 5-mile) Copper Mine, Kroombit, S.S.W. of Gladstone. *Min.Ref.* Copper Carbonate, *see* 1961; Copper Pyrites, 2306; Hematite, 4799; Hornblende, 4868; Iron Pyrites, 5414; Magnetite, 6054; Manganese-dioxide, 6480.

Callide Range, Mt. Rainbow Goldfield. *Min.Ref.* Gold (alluvial), *see* 3400.

Geological Note: The Range consists principally of rocks belonging to the Gympie Formation (Permo-Carboniferous), capped in places by basalt. *See* G.S.Q. Pub. No. 126 for notes and map.

Calliope Goldfield—

Situation: *Lat.*, 24°—24° 10′ S.; *Long.*, 167° 10′—151° 20′ E. *See maps*, Pls. 2, 3, 34. The township is situated about 12 miles S.S.W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis.

Discovery: Here in December, 1853, Geologist Stutchbury made the first discovery of an alluvial gold deposit in Queensland. In March, 1862, the first development of the alluvial deposits took place. The reefs were first worked by Pascoe in 1870.

Proclamation of Field: First gazetted, 26th May, 1863; last, in 1871, as follows:—Commencing at the north-east corner of portion 53, par. of East Stowe, and bounded thence on the west by the east boundaries of portions 53 and 54, and a line bearing south 3 miles; on the south-west by a line bearing south-east 4 miles, crossing the Boyne Range about ¾ of a-mile southerly from Nuggety Gully; on south-east by a line bearing north 30 degrees east 5 miles and 58 chains; on the north by a line bearing west 6 miles and 15 chains, crossing the Boyne Range, to the point of commencement.

Area: 15,360 acres (24 square miles).

Principal Mining Centres: Nuggety Gully, New Zealand Gully, Tucker's Gully, *which see.*

Mineral Statistics: *Included in* "Other Goldfields" *in tables and diagram*, Pls. 36, 46, 46a, 47.

Mineral References: **Gold** (alluvial), *see* 3380-3385; (nugget), 3444; (reef), 4257-4259; Iron Pyrites, 5362, 5363; Limestone, 670; Calcite, 526, 527; Sanidine, 7055.

Geological Note: The principal rock on the field is an altered slate, but granite, limestone, serpentine, diorite, and porphyry also occur, the three latter forming dyke masses. Gold-bearing reefs have been worked, but most of the gold found in this locality was obtained from alluvial deposits. *See* G.S.Q. Pubs. 21, p. 3, and 92, p. 107, for details.

Geological Publications: Reports—Nos. 21 (1885), 48 (1888), and 58 (1890). *See* Geol. Sur. Pub. List for title. *See also* Supplementary Report List, No. 22.

Warden: Stationed at Gladstone.

Inspector of Mines: Stationed at Rockhampton.

Canal Cr. Goldfield—

SITUATION: *See maps,* Pls. 12, 13. The field is 28 miles W.byS. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. Centre about *Lat.* 28° 14′ S.; *Long.* 151° 40′ E.

DISCOVERY: In 1863.

AREA: 13,960 acres (nearly 22 square miles).

PROCLAMATION OF FIELD: First gazetted, 9th September, 1864; last, in 1868, as follows:—Commencing at the junction of the west branch of Canal Creek, and bounded by the west branch upwards about 10 chains to the road from Leyburn to Glenelg Station, thence by said road southerly about 2 miles; on the south by the watershed separating Canal Creek from the Macintyre Brook easterly to the head of Canal Creek; and on the east by Canal Creek northerly about 3 miles to the point of commencement.

MINERAL STATISTICS: *Included in* "Other Goldfields" *in tables and diagrams,* Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: **Gold** (alluvial), 3250; Manganese-dioxide, 6421.

GEOLOGICAL NOTE: The country consists of slates and other rocks of Gympie Formation (Permo-Carboniferous), covered in places by Walloon Coal Measures (Trias-Jura). The field has extensive gold-bearing alluvial deposits, but reefs are unknown.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 40 (1887), 120 (1898). *See under* Geol. Sur. Pub. List for title.

WARDEN: Stationed at Warwick.

INSPECTOR OF MINES: Stationed at Gympie.

Candle-light Cr., near Stanwell. *Min.Ref.* Gold (alluvial), *see* 3397.

Cania and Kroombit Goldfield—

Situation: *See maps,* Pls. 2, 3, 4, 5, and 34. 60 miles S.S.W. of Gladstone. *Cos.* Pelham and Rawbelle; *Dists.* Port Curtis and Burnett. Centre about *Lat.* 24° 43′ S.; *Long.* 150° 58′ E.

Discovery: In 1870.

Area: 54,720 acres (85½ square miles).

Proclamation of Field: First gazetted, 17th February, 1871; last, 8th November, 1905, as follows:—Commencing on the right bank of Three Moon Creek at an apple-tree marked broad-arrow over XXXV over TM in shield, about sixteen chains above the junction of Spring Creek, and bounded thence by that creek upwards to a point west of the north-west corner of portion 3v, parish of Clonmel; thence by a line across Three Moon Creek to the said north-west corner; thence by the north, west, and north boundaries of portion 3v aforesaid, east, north, and easterly to a point south of the south-east corner of portion 1v, parish of Cania; on the east by a line bearing north about four miles twenty-one chains to a point about sixty-six chains east of the south-east corner of portion 6v, parish of Cania; on the north by a line, the south boundary of the said portion 6v, and a line bearing west—eleven miles; on the west by a line bearing south eight miles; on the south by a line bearing east to the west boundary of portion 25, parish of Bingmann; thence by the boundaries of that portion in a general north-easterly and south-easterly direction to a point west of the point of commencement; and again on the south by a line bearing east to that point.

Mineral Statistics: *All included in* "Other Goldfields." *See tables,* Pls. 36, 46, 46a. *Also diagram,* Pl. 47.

Mineral References: **Gold,** *see* 4356, 4358; Copper (Azurite), 252; (Copper Carbonate), 1961; (Copper Pyrites), 2303-2306; (Cuprite), 2479; Tin (Cassiterite), 1175; Molybdenite, 6865; Zinc-Blende, 8205; Manganese-dioxide, 6480; Iron (Hematite), 4799; (Iron Pyrites), 5413, 5414; (Ironstone), 5626; (Limonite), 5916; (Magnetite), 6054; (Mispickel), 6802, 6803. Other Minerals: Limestone, 691; Calcite, 547; Halite, 7020; Opal (common), 6998.

Geological Note: The rocks on the Cania and Kroombit Goldfields comprise a series of alternating layers of sandstones, shale, and fossiliferous limestone, of probably Devonian Age. "Desert Sandstone," as high tablelands, also occurs in the locality. Quartz reefs in the slate country have been worked to a small extent, but alluvial deposits on the fields were worked exhaustively some years ago. *See* G.S.Q. Pub. No. 21, p. 8, for details.

Geological Publications: Reports Nos. 21 (1885), 48 (1888), 77 (1891). *See* Geol. Sur. Pub. List for titles. *See also* Supplementary List. No. 25.

Canoona Goldfield—

Situation: *See maps,* Pls. 2, 3. The field is situated about 35 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. Centre about *Lat.* 22° 58′ S.; *Long.* 150° 5′ E.

Discovery: The first discovery of gold (in payable quantities) in Queensland was made about 4 miles from Ramsay and Gaden's head station, Canoona, about the end of July, 1857, the prospectors being W. C. Chappel and party. *See* other notes in the "Geographic History of Queensland," by A. Meston, pp. 39, 40. By Auth. 1895.

Proclamation of Field: First (and only one) gazetted, 31st October, 1889, as follows:—Commencing at the junction of Canoona Creek with the Fitzroy River, and bounded thence by that creek upwards to the north corner of portion 1062, parish of Yaamba, by the eastern boundaries of portion 1062, a reserve, and portion 781 southerly; by a line east passing along the north boundary of portion 1974; by part of the west and north boundaries of portion 531; by the west and north boundaries of portion 629; by the west boundary of portion 572; by a line west to the east boundary of portion 660 on Pointer Range; by the eastern boundaries of portions 660, 925, and 1042; by the southern boundary of portion 1042 to its south-west corner; thence by the northern watershed of all tributaries falling into the Fitzroy River, north-westerly to the north-east corner of Princhester Lease under "*The Crown Lands Act of* 1884"; by the south-east boundary of that lease south-westerly to the confluence of Marlborough Creek with the Fitzroy River; and by that river downwards to the point of commencement;—exclusive of all alienated or selected lands.

Area: 124,800 acres = 195 sq. miles.

Mineral Statistics: *Included in* "Other Goldfields" *in tables and diagram,* Pls. 36, 46, 46A, 47.

Mineral References: **Gold** (alluvial), *see* 3391, 3392; (reef), 4315A-4315C; Silver, 7527A; Lead (Galena), 3058A; Copper (Copper Pyrites), 2295A; Chromite, 1479, 1480; Iron (Ilmenite), 4911; (Iron Pyrites) 5398A, 5398B; (Limonite), 5910; Zinc Blende, 8200A. Other Minerals: Chalcedony, 1361; Magnetite, 5956; Serpentine, 7391, 7392.

Geological Note: The country rock is exclusively serpentine, in which the gold is finely disseminated in belts or zones. Up to the end of 1860 gold to the value of £180,000 was taken out of alluvial deposits. Since that year Canoona has produced very little gold.

Geological Publications: Report—No. 31 (1886). *See under* Geol. Sur. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Rockhampton.

Canterbury Copper Mine, nr. Mount Perry. *Min.Ref.* Copper, *see* 1841A; Copper Pyrites, 2123B; Gold, 3584; Iron Pyrites, 4985; Limonite, 5828.

Canton Diggings, Ravenswood Goldfield. *Min.Ref.* Gold, *see* 4080.

—— Lead, Capeville, Cape R. Goldfield. *Min.Ref* Gold (alluvial), *see* 3272A.

—— Reef, Canton Diggings, Ravenswood Goldfield. *Min.Ref.* Gold, *see* 4080.

Canungra Cr., 10 miles E. of Beaudesert. *Min.Ref.* Tripolite, *see* 7032.

Capalaba (Par. of), 2½ miles S.S.W. of Cleveland. *Min.Ref.* Coal, *see* 1761; Gold, 4208, 4209. The coal measures belong to the Ipswich Series, the auriferous rocks to the Devonian System.

Cape Bedford, 16 miles N.N.E. of Cooktown. *Min.Ref.* Coal, *see* 1605.

—— Hillsborough, 18 miles N.W. of Mackay. *Min.Ref.* Agate, *see* 1379; Opal (common), 6980.

—— La Billardiere (Fergusson Is.), Brit. New Guinea. *Min.Ref.* Mineral Water, *see* 6574.

—— Goleburra Bore. *See under* Artesian Bores. No. 256.

Cape Moreton, 40 miles N.E. of Brisbane. *Lat.*, 27° 2′ S.; *Long.*, 153° 28′ E. *Min.Ref.* Coal, *see* 1768.

GEOLOGICAL NOTE: The rocks at the Cape comprise sandstones and shales belonging to the Walloon Formation (Trias-Jura). They have not been proved to contain seams of workable coal, although several bands of coal are known to exist in them.

Cape Possession, Brit. New Guinea. *Min.Ref.* Coralline Limestone, *see* 729.

Cape R. Goldfield—

SITUATION: *See maps*, Pls. 16, 17. The field is 66 miles (by rail) S.W.byW. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. Centre about *Lat.* 20° 31′ S.; *Long.* 114° 15′ E.

DISCOVERY: Rich deposits of gold were discovered at the beginning of October, 1868.

POPULATION: Included in Charters Towers returns for 1910.

PROCLAMATION OF FIELD: First gazetted, 4th September, 1867; last, 24th November, 1882, as follows:—Commencing on Granite Creek where it is intersected by the Queensland Northern Railway, and bounded thence by that creek upwards to its head in the range dividing Fletcher's Creek from the Cape River waters; by that range westerly to a point bearing north from Mount Richardson; on the west by a line bearing south to the watershed separating the Thomson River waters from those of the Cape River, and by that watershed easterly to the railway line, and by the railway line north-easterly to the point of commencement.

AREA: 197,120 acres (308 square miles).

PRINCIPAL MINING CENTRES: Lower Cape, Upper Cape, Pentland, Mt. Remarkable, Mt. Davenport, Mt. Richardson, *which see.*

MINERAL STATISTICS: Gold, included in Charters Towers. *See tables and diagram*, Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: **Gold** (alluvial) 3265-3272, (reef) 4045-4062; Silver, 7488, 7489; Lead (Cerussite), 1230; (Galena), 2946-2951; Copper (Copper Pyrites), 2236; Iron (Hematite), 4737, 4738; (Iron Pyrites), 5260-5269; (Ironstone), 5551-5554; (Limonite), 5878; (Mispickel), 6749. Other Minerals: Calcite, 504; Mica, 6560; Prase, 1401.

GEOLOGICAL NOTE: The country rocks are quartzite, mica schist, and hornblende schist in association with granite, felsite, and diorite; the felsite and diorite forming dykes in the granite, the latter intruding the schist. Gold-bearing quartz reefs and felspathic formations traverse both the schist and the granite. Desert Sandstone (Upper Cretaceous) forms a covering to the granite, etc., in places, and is well developed on the Main Range, and basalt forms the cap of Mt. Black, 9 miles W. of the field. Alluvial deposits containing gold occur at Pentland, but so far have not proved to be rich.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 73 (1891), and 99 (1894). *See under* Geol. Sur. Pub. List for title; *also under* Gov. Mining Journal, Reports Nos. 95, 102.

WARDEN and INSPECTOR OF MINES: Both stationed at Charters Towers.

REPORTS: Inspector's and Warden's, monthly (usually), in Q.G.M. Jour.; annually in A.R.D.M.

Cape Upstart, 40 miles N.W.byW. of Bowen. *Lat.*, 19° 42′ S.; *Long.*, 147° 40′ E. *See maps*, Pls. 16, 17. *Min.Ref.* Chiastolite, *see* 1415; Graphite, 4599.

GEOLOGICAL NOTE: The rocks at Cape Upstart consist of slates, schists, greywackes, &c., of undetermined age.

Cape York Peninsula. *Min.Ref.* Cassiterite, *see* 965, 972; Gold, 3243A, 3243B, 3660A, 3827A; Ironstone, 5527, 5535, 5536; Silver, 7468A, 7468B; Wolfram, 7982. *See also under* Q.G.M. Jour., Report No. 111.

—— —— ——. *See* map of Cape York Peninsula Gold and Mineral Fields. Ann. Rep. Dep. Mines, 1910.

Capella, W.byN. of Rockhampton, on Clermont Rail. *Lat.*, 23° 1′ S.; *Long.*, 148° 1′ E. *Min.Ref.* Coal, *see* 1697.

GEOLOGICAL NOTE: At Capella there are flows of basaltic and trachytic lavas close to outcrops of coal measures, marine sandstones, and limestones belonging to the Lower Bowen Formation (Permo-Carboniferous), apparently resting on granite. *See* G.S.Q. Pub. No. 107 for details and maps.

Capeville (Lower Cape), Cape R. Goldfield, W.S.W. of Charters Towers. *Lat.*, 20° 36′ S. *Long.*, 145° 23′ E. *See maps,* Pls. 16, 17. *Includes* Bluff Lead, Canton Lead, White Hill, Chinaman's Gully, Gahn's Gully, Red Hill, Milkonan's Point, situated between Rocky and Sandy Creeks and on the S. side of Sandy Cr. *Min.Ref.* Gold (alluvial), *see* 3265.

Capricornian Mine, Ulam Goldfield. *Min.Ref.* Galena, *see* 3053; Gold, 4300; Iron Pyrites, 5391.

Captain M.L., Cloncurry. *Min.Ref.* Azurite, *see* 165; Chrysocolla, 1498; Copper Pyrites, 2079; Malachite, 6116; Redruthite, 7223; Tile Ore, 2509.

—— P.C., Rockford, Ravenswood Goldfield. *Min.Ref.* Gold, *see* 4034.

—— Brown's Lease, Grass-tree Goldfield. *Min.Ref.* Gold, *see* 4111; Limonite, 5885.

—— Cook Reef, Woodville, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3762; Mispickel, 6685.

—— —— ——, Palmer Goldfield. *Min.Ref.* Gold, *see* 3681.

—— Townley Mine, Mt. Hogan, Etheridge. *Min.Ref.* Gold, *see* 3792.

Carandotta Sub-artesian Bore. *See under* Artesian Bores. No. 256.

Carbine Cr., Diamantina R. *Min.Ref.* Gypsum, *see* 4617.

Carbon (C). *Atom.Wt.* = 12·0. *Sp.gr.* = 1·57 (amorphous); 3·55 (diamond).

MINERALS: *See* Asphaltum, Carbonaceous Shales, Coal, Diamond, Graphite, Kerosene Shale, Natural Charcoal, Oil-bearing Shales.

752. Carbonaceous Shale, Duaringa Bore, near Duaringa Rail. Stn., 66 miles (by rail) W.S.W. of Rockhampton. *Co.* Kimberley; *Dist.* Leichhardt. *Analysis:* Moisture = 2·76, Vol. Hydrocarbons = 29·2, Fixed Carbon = 4·86, Ash = 63·18 per cent. *Ref.* G.S.Q. Pub. 159, p. 16 (1901). Analyses show that some of the shale in this bore contains 31 gallons of crude oil to the ton.

752A. —— ——, beneath fireclay. *Loc.* Munduran Fire, Brick, Tile, and Pottery Co., about 19 miles N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.M.

Carbonates—of barium, *see* Witherite; of bismuth, *see* Bismutite; of copper, *see* Azurite, Malachite; of iron, *see* Siderite; of lime, *see* Aragonite, Calcite; of lime, magnesia, *see* Dolomite; of lime, magnesia, iron, *see* Ankerite; of lead, *see* Cerussite; of magnesia, *see* Magnesite; of manganese, *see* Rhodochrosite; of strontium, *see* Strontianite; of zinc, *see* Calamine; of zinc and copper, *see* Aurichalcite.

Carborough Cr., 10 miles W. of Nebo. About *Lat.* 21° 45′ S.; *Long.* 148° 20′ E. *Min.Ref.* Coal, *see* 1704.

Card (C. W.)—

GEOLOGICAL SURVEY PUBLICATION:

154. Bulletin No. 12. Oolitic Limestones from Lion Creek, Stanwell, near Rockhampton 1900

Cardigan Stn., 19 miles S.W. of Ravenswood. *Min.Ref.* Copper Ore, *see* 2037; Galena, 2954A; Massicot, 6538A.

—— Tin Syndicate's Mines, Thompson's Cr., S. of Watsonville. *Min.Ref.* Cassiterite, *see* 1143; Fluorspar, 2680.

Cardowan Run, Connor's R., S.byW. of Mackay. *Min.Ref.* Coal, *see* 1690A.

Cardwell, N.W.byN. of Townsville. *Lat.*, 18° 17′ S. *Long.*, 146° 3′ E. *See maps,* Pls. 16, 17. *Min.Ref.* Fayalite, *see* 2623.

GEOLOGICAL NOTE: The rocks of this part of the coast comprise slates and quartzites, etc. (of undetermined age). Granite occurs some miles away to the west. *See* G.S.Q. Pub. No. 217 (map).

—— *Co.*; Kennedy North *Dist.* *See map,* Pl. 16.

Carey's Mine, Mareeba Goldfield. *Min.Ref.* Gold, *see* 3776.

Cargoon Holding, Mt. Emu Plains Stn. *Min.Ref.* Gold, *see* 3561B; Massicot, 6521B.

Carlisle *Co.*; Kennedy South *Dist.* *See map,* Pl. 14.

Carter and Armstrong. Report on Queensland Silver-Lead Mines, Ltd., Lawn Hills. Q.G.M. Jour., vol. 2, p. 329 (1901).

Carlton Hills Run, N.W.byW. of Cloncurry. *Min.Ref.* Cuprite, *see* 2392c; Limonite, 5748c; Malachite, 6088a; Tile Ore, 2493a.

Carmichael Reef (Goody's), Norton Goldfield. *Min.Ref.* Galena, *see* 3049; Gold, 4277; Iron Pyrites, 5376; Mispickel, 6792; Redruthite, 7302; Silver, 7524; Zinc-Blende, 8194.

Carmilla, Carmilla Cr., St. Lawrence. *Min.Ref.* Anglesite, *see* 63; Cerussite, 1300; Galena, 3064, 3065; Gold, 4346; Silver Ore, 7566.

Geological Note: The rocks about this mining locality comprise granite, shale, slate, sandstone, and felsite. The sedimentary rocks are of Gympie Formation (Permo-Carboniferous), and the felsite in the form of dykes, intersect both the granite and the sedimentaries. On the side of a dyke of felsite there is a very large quartz reef, containing gold, but of too low a grade to be profitably worked. *See* G.S.Q. Pub. No. 141 for details and map.

Carnarvon *Co.*; Darling Downs *Dist.* *See map,* Pl. 12.

Carnelian. *Var.* of Chalcedony, *which see.* Quantities of Carnelian, assoc.with Agates, occur at the Percy River near Gilberton, and at the Little River near Croydon.

Carney's Cr., Coochin Coochin, 3 miles S. of Biggenden. *Min.Ref.* Ilmenite, *see* 4910; Garnet, 3138a.

Caroline Mine, Charters Towers. *Min.Ref.* Gold, *see* 3892.

Carpentaria *Co.*; Burke *Dist.* *See map,* Pl. 20.

Carrington Goldfield—

Situation: *See maps,* Pls. 16, 17. The township of Liontown is 20 miles S.S.W. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. Centre about *Lat.* 20° 50′ S.; *Long.* 146° 5′ E.

Discovery: In 1905.

Population: Included in Charters Towers Goldfield return for 1910.

Proclamation of Field: First gazetted, 28th February, 1905; last, 13th October, 1909, as follows:—Commencing at the intersection of the north boundary of Nelson No. 1 Block with the right bank of Oaky Creek, and bounded thence by the north of that block easterly to the south-east corner of Windsor No. 2 Block; thence northerly to the north-east corner of that block; by the north of the same block westerly to Oaky Creek; by that creek downwards to the point of commencement.

Area: 3,940 acres (6 1/6 square miles).

Mineral Statistics: *Included in* "Other Goldfields" *in tables and diagrams,* Pls. 36, 46, 46a, 47.

Mineral References: Gold, *see* 3880.

Geological Publications: None issued.

Warden and Inspector of Mines: Both stationed at Charters Towers.

Smelting Works: *See under* Smelting Works in Queensland.

Carrington's Lion 1 and 2 E. Lease, Charters Towers Goldfield. *Min.Ref.* Copper Pyrites, *see* 2217; Galena, 2875; Gold, 3893; Iron Pyrites, 5156; Zinc-Blende, 8119.

773A. ——. *Assoc.with* Ilmenite, Rutile, Topaz, Zircon, and Amethyst, in alluvial deposits. *Loc.* P.C. Workings, Rocky Cr., 5 miles above Brovinia Cr., br. Cadarga Cr., 35½ miles S.S.W. of Gayndah, 60 miles (by road) *viâ* Cooranga Head Station. *Co.* Newcastle; *Dist.* Burnett. *Ref.* Q.G.M.J., vol. 5, p. 62 (1904).

774. ——. *Assoc.with* Tourmaline. *Loc.* Stockman Reef, Eidsvold Goldfield, 37 miles W.S.W. of Mt. Perry Rail. Stn., 40 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 43, pp. 3, 4 (1887).

775. ——. In alluvial deposits. Tin Cr., eastern head of Archer R., 20 miles E.byS. of Mein Telegraph Stn., 36 miles N.W.byN. of Coen, Archer R. Tinfield. *Co.* Archer; *Dist.* **Cook.** *Ref.* A.R.D.M. 1907, p. 47.

776. ——. In alluvial deposits. *Loc.* Mahoney and Sullivan's Claim, Baird's and Kimberley Creeks, nr. Romeo Cr., 20 miles S. of Cooktown, **Annan R. Tinfield.** *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 20, p. 19 (1907).

777. ——. In alluvial deposits. Wilson and Muir's Claim, Baird's and Kimberley Creeks, Romeo (*ante*). *Ref.* G.S.Q. Pub. 210, p. 19 (1907).

778. ——. *Assoc.with* Tourmaline. *Loc.* Wheal Davey Tin Lease (58), S.E. of Mt. Leswell, 1½ miles W.S.W. of Rossville, 26 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 66, p. 3 (1891).

779. ——. *Assoc.with* Tourmaline, in quartz. *Loc.* Southern Cross Lode, ¼ mile below Clunn's Falls, 20 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 91, p. 5 (1893).

780. ——. In alluvial deposits. Grass-tree Cr., 20 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 210, p. 20 (1907).

781. ——. In alluvial deposits Byer's Gully, E. side of Mt. Leswell, 20 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

782. ——. *Assoc.with* Mispickel and Tourmaline, in quartz lode. *Loc.* Cahill Bros.' Lease (89), Jones's Cr., trib. of Wallaby Cr., nr. Rossville, 26 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

783. ——. *Assoc.with* Iron Pyrites, Mispickel, and Tourmaline, in quartz, aplite, and granite. *Loc.* Collingwood Tin Lease (176), Jones's Cr., trib. of Wallaby Cr., nr. Rossville (*ante*). *Ref.* G.S.Q. Pubs. 66, p. 4 (1891), and 210, p. 15 (1907).

784. ——. *Assoc.with* Tourmaline, Mispickel, and Chlorite, in quartz lode. *Loc.* Dodd's Tin Mine, head of Byer's Gully, trib. of Jones's Creek, nr. Rossville (*ante*). *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

785. ——. In alluvial deposits. Jones's Cr., E. side of Mt. Leswell, nr. Rossville (*ante*). *Ref.* G.S.Q. Pub. 66, p. 7 (1891).

786. ——. *Assoc.with* Tourmaline, in felspar. *Loc.* Richmond Tin Mine, Jones's Creek, S.E. of Collingwood Lease, nr. Rossville (*ante*) *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

787. ——. In alluvial deposits Kerr Bros.' Claim, between Jones's and Byer's Creeks, nr. Rossville (*ante*). *Ref.* G.S.Q. Pub. 210, p. 24 (1907).

788. ——. In alluvial deposits. Yateman's Claim, between Jones's and Byer's Creeks, nr. Rossville (*ante*). *Ref.* G.S.Q. Pub. 210, p. 24 (1907).

789. ——. In alluvial deposits. Jackeroo Cr. Tin Workings, about 33 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 210, pp. 20, 21 (1907).

790. ——. *Assoc.with* Tourmaline, in quartz lode. *Loc.* Creighton's Tin Mine, Mt. Amos, about 20 miles S.S.E. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pubs. 66, p. 9 (1891), and 210, p. 26 (1907).

791 ——. *Assoc.with* Tourmaline, in quartz lode. *Loc.* Fiery Star Tin Mine, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub 66, p. 8 (1891).

792. ——. *Assoc.with* Tourmaline, Mispickel, and Wolfram, in talc and quartz. *Loc.* Gladstone Tin Mine, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub. 66, p. 9 (1891).

793. ——. *Assoc.with* Iron Pyrites, in tourmaline and quartz. *Loc.* Keating, Madden, and Co.'s Tin Lease, Mt. Amos (*ante*). *Assay:* (1) Metallic Tin = 48½ per cent. (2) Metallic Tin = 30 per cent. *Ref.* G.S.Q. Pub. 35, p. 15 (1887).

794. ——. *Assoc.with* Tourmaline, in quartz. *Loc.* Lake's Original Opening, below Fiery Star Level, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub. 66, p. 8 (1891).

794A.——. *Assoc.with* Wolfram, Mispickel, Tourmaline, and Talc, in quartz. *Loc.* Mt. Amos Tin Mine, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub. 35, p. 15 (1887).

795. ——. In alluvial deposits. Mt. Amos (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 15 (1887), 66, p. 7 (1891), and 210, p. 26 (1907).

796. ——. *Assoc.with* Tourmaline in talc, kaolin, and quartz. *Loc.* Mt. Browning Tin Mines, Mt. Amos (*ante*). *Assays:* Metallic Tin = 10·9, 4·1, 15·2, 19·8, 18·4, 36·3 per cent. *Ref.* G.S.Q. Pub. 66, p. 8 (1891).

797. ——. *Assoc.with* Tourmaline, in quartz lode. *Loc.* Murray and McArdle Tin Mines, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub. 66, p. 9 (1891).

798. ——. *Assoc.with* Ruby Tin, Tourmaline, Talc, Orthoclase, in quartz. *Loc.* Owen and Davidson's Lease, Mt. Amos (*ante*). *Assays:* Metallic Tin = from 38 to 61 per cent. *Ref.* G.S.Q. Pub. 35, p. 15 (1887).

798A.——. *Assoc.with* Tourmaline and Quartz, in granite. *Loc.* Phœnician Lease (189), Mt. Browning Lodes, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub. 210, pp. 16, 17 (1907).

799. ——. *Assoc.with* Tourmaline, in quartz lode. *Loc.* Sullivan and party's Tin Claim, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub. 35, p. 15 (1887).

800. ——. *Assoc.with* Tourmaline, in lode. *Loc.* Mt. Harbord Tin Mine, between Baird's and Jones's Cr., Mt. Leswell, 1½ mile W.S.W. of Rossville, 26 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 66, p. 4 (1891).

801. ——. *Assoc.with* Tourmaline, Mispickel, Wolfram, and Felspar, in quartz lode. *Loc.* Wright's Lease (99), Black Prince Lode, Mt. Hartley, about 4½ miles E.byS. of Rossville, 26 miles S.S.E. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 7 (1891).

802. ——. In talcose rock. Caledonia Tin Claim, Mt. Hartley (*ante*). *Ref.* G.S.Q. Pub. 66, p. 7 (1891).

803. ——. In alluvial deposits. Granite Cr., nr. Mt. Hartley (*ante*). *Ref.* L.B. 1, p. 929 (1887).

804. ——. In alluvial deposits. On both sides of Mt. Hartley (*ante*). *Ref.* G.S.Q. Pub. 66, p. 7 (1891).

805. ——. *Assoc.with* Tourmaline, in quartz lode. *Loc.* Mt. Leswell Leases (22, 28, 51, 52), between Baird's Cr. and Jones's Cr., 1½ mile W.S.W. of Rossville and about 26 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Assay:* Metallic Tin = 21·7 per cent. *Ref.* G.S.Q. Pubs. 66, pp. 1 and 3 (1891), and 120, p. 15 (1907).

806. ——. In alluvial deposits. Annan R. Company's Hydraulic Sluicing Workings, head of Baird's Cr., Mt. Leswell Leases (*ante*). *Ref.* G.S.Q. Pub. 210, p. 23 (1907).

807. ——. *Assoc.with* Tourmaline, in alluvial deposits. *Loc.* Tin Mines, Mt. Romeo, 5 miles S.S.W. of Rossville, 28 miles S. of Cooktown. *Co.* Bank; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 35, p. 16 (1887), and 210, p. 21 (1907).

808. ——. In alluvial deposits. Finnegan's Tin Claim, Mt. Romeo (*ante*). *Ref.* G.S.Q. Pub. 210, pp. 21 and 22 (1907).

809. ——. *Assoc.with* Tourmaline, Felspar, and Iron Pyrites, in quartz lode. *Loc.* Lease No. 96, Mulligan's Gully, trib. of Jones's Cr., E. of Mt. Leswell, 1 mile S. of Rossville, 26 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 66, p. 5 (1891), and G.S.M.

810. ——. *Assoc.with* Tourmaline, in porphyry. *Loc.* Lion's Den Tin Mines, Mungumby Cr., about 24 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Assays:* Metallic Tin = 5·4 per cent., 11·4 per cent., 10·78 per cent. *Ref.* G.S.Q. Pub. 66, p. 6 (1891).

811. Cassiterite. In alluvial workings. *Loc.* nr. Lion's Den Tin Mines, Mungumby Cr. (*ante*). *Ref.* G.S.Q. Pub. 66, p. 7 (1891).

812. ——. *Assoc.with* Wolfram, in alluvial deposits. *Loc.* Tableland Tin Claim, Lion's Den Mines, Mungumby Cr. (*ante*). *Ref.* G.S.Q. Pub. 210, p. 26 (1907), and G.S.M.

813. ——. In alluvial deposits. Shipton's Tin Claim, Parrot Cr., nr. Mt. Walker, 3½ miles S. of Rossville, about 28 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 210, p. 22 (1907).

814. ——. In alluvial deposits. Spargo's Tin Claim, Parrot Cr., nr. Mt. Walker, 3½ miles S. of Rossville (*ante*). *Ref.* G.S.Q. Pub. 210, p. 22 (1907).

815. ——. In alluvial deposits. Romeo Cr., below the falls at Romeo, about 7 miles S. of Rossville, and 33 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 210, p. 20 (1907).

816. ——. In alluvial deposits. Yates's Tin Claim, Romeo R., Upper Annan, 7½ miles S. of Rossville (*ante*). *Ref.* G.S.Q. Pub. 210, p. 18 (1907).

817. ——. In alluvial deposits. Tin Mines, Wallaby Cr., Rossville, 25 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 35, p. 16 (1887), and 210, pp. 23-25 (1907).

818. ——. In alluvial deposits. *Loc.* Dick and Coutt's Claim, 3 miles from Rossville Cr., near Rossville (*ante*). *Ref.* G.S.Q. Pub. 210, p. 25 (1907).

819. ——. *Assoc.with* Tourmaline, Mispickel, Felspar, and Mica, in decomposed rock. *Loc.* Harris and Party's Tin Claim, Wallaby Cr., Rossville (*ante*). *Ref.* G.S.Q. Pub. 35, p. 16 (1887).

820. ——. In alluvial deposits. Hatfield's Tin Claim, junction of Jones's and Wallaby Cr., Rossville (*ante*). *Ref.* G.S.Q. Pub. 210, p. 24 (1907).

821. ——. In alluvial deposits. Home Rule Tin Claim, Wallaby Cr., Rossville (*ante*). *Ref.* G.S.Q. Pub. 210, p. 25 (1907).

822. ——. In chloritic rock. Johnston and Party's Tin Mine, Wallaby Cr., Rossville (*ante*). *Ref.* G.S.Q. Pub. 35, p. 16 (1887).

823. ——. *Assoc.with* Tourmaline, in alluvial deposits. *Loc.* Native Youth Tin Mine, junction of Jones's Cr. with Wallaby Cr., Rossville (*ante*). *Yield:* Tin = 70·8 per cent. *Ref.* G.S.Q. Pub. 91, p. 5 (1893), and p. 210, p. 23 (1907).

824. ——. In alluvial deposits. *Loc.* Stoney Cr., 6 miles S. of Rossville, about 31 miles S. of Cooktown. Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 210, p. 21 (1907).

825. ——. In alluvial deposits. Brisbane Claim, Trevethan Cr., about 23 miles S.S.E. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* A.R., p. 170 (1908).

826. ——. In alluvial deposits. Hit-or-Miss Claim, Trevethan Cr. (*ante*). *Ref.* A.R., p. 170 (1908).

827. ——. In alluvial deposits. Archbold's Tin Claim, Waterfall Cr., about 20 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 210, p. 26 (1907).

828. ——. In alluvial deposits. China Camp, nr. Bloomfield R., 3 miles S. of Cape Tribulation, about 42 miles S. of Cooktown. *Co.* Banks (*ante*). *Ref.* G.S.Q. Pub. 150, p. 11 (1900).

829. ——. In alluvial deposits. Mt. Windsor, nr. head of the Palmer R., about 57 miles N.W. of Port Douglas. *Co.* Banks (*ante*). *Ref.* A.R.D.M., 1892, p. 98.

830. ——. In altered greywacke. Admiral Tin Claim, Arbouin, 18 miles W. of Mungana Rail. Stn. (Chillagoe line), **Walsh and Tinaroo Mineral Fields.** *Co.* Bolwarra; *Dist.* Cook. *Ref.* G.S.M.

830A. ——. In alluvial deposits. Fulford Cr., br. of Lynd R., about 20 miles S.W. of Fisherton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* A.R., p. 317 (1911).

831. ——. *Assoc.with* Wolfram, Native Bismuth, Bismutite, Molybdenite, and Scheelite, with traces of Copper Pyrites, in quartz, chlorite, and muscovite, *Loc.* Pinnacle Cr., br. of Lynd R., 16 miles W. of Fossilbrook, 50 miles S.W. of Almaden (Chillagoe Rail. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

832. ——. *Assoc.with* Wolfram and Molybdenite, in quartz, chlorite, and muscovite. *Loc.* Tableland, head of Dixon's Cr., br. of Lynd R., 30 miles W. of Fossilbrook, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

833. ——. *Assoc.with* Wolfram and Molybdenite, in quartz and muscovite. *Loc.* Spring Cr., br. of Blackfellow's Cr., trib. of Lynd R., 12 miles W. of Fossilbrook, 45 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

834. ——. Head of Campbell's Cr., Maytown, 36 miles S. of Laura Rail. Stn., 103 miles (by rail and road) S.byW. of Cooktown. *Co.* Chelmsford; *Dist.* Cook. *Ref.* O.R.

835. ——. Cannibal Cr. Tin Mine, Mt. Hurford, 15 miles S.E. of Maytown. *Co.* Chelmsford (*ante*). *Ref.* A.R.D.M., 1887, p. 88.

836. ——. Phoenix Tin Mine, Cannibal Cr. (Spring Cr.), Mt. Hurford (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

837. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Granite Cr., 9 miles E.byS. of Maytown. *Co.* Chelmsford; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 35 (1887).

838. ——. In alluvial deposits. Mt. Alto, right bank of Mitchell R., 40 miles S.W. of Port Douglas. *Co.* Dagmar; *Dist.* Cook. *Ref.* A.R.D.M., 1892, p. 98.

839. ——. *Assoc.with* Wolfram, Molybdenite, Scheelite, and Tungstite, with traces of Tenorite, Malachite, Chrysocolla, and Iron Pyrites, etc., in defined quartz lodes, in slates. *Loc.* Mt. Carbine, 11 miles W. of Port Douglas, 34 miles (*viâ* Mt. Molloy) N.N.W. of Biboohra Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Dagmar (*ante*). *Ref.* B.D.

840. ——. *Assoc.with* Tourmaline and Garnet, in alluvial deposits. *Loc.* Bakerville Mine, 5 miles S.W. of Stannary Hills (br. of Chillagoe Rail. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 42 (1897).

841. ——. In felspathic lode. Last Kick Tin Mine, Bakerville, 4 miles W. of Watsonville, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson (*ante*). *Ref.* G.S.Q. Pub. 119, p. 25 (1897).

842. ——. *Assoc.with* Ironstone and Manganese-dioxide, in quartzite. *Loc.* Tourmaline United Mine, Bakerville (*ante*). *Ref.* G.S.Q. Pub. 119, p. 27 (1897).

843. ——. *Assoc.with* Wolfram, Molybdenite, Bismuth (native), Bismutite, Mispickel, and Scorodite, with traces of Copper Pyrites, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, Hematite, etc., in irregular masses of quartz and greisen, in granite. *Loc.* Boonmoo, 81 miles (by rail) S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

844. ——. *Assoc.with* Turgite and Chlorite, in lode. *Loc.* Black Rock Extd. Mine, Eureka Cr., nr. Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Field (*ante*). *Ref.* G.S.Q. Pub. 125, p. 39 (1897).

845. ——. *Assoc.with* Azurite and Malachite. *Loc.* Clan Ronald Tin Mine, Eureka Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887), and G.S.Q. Pub. 125, p. 47 (1897).

846. ——. *Assoc.with* Chlorite, in lode. *Loc.* Eclipse Mine, Eureka Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 45 (1897).

847. ——. *Assoc.with* Copper Carbonate, in lode. Eureka Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 40 (1897).

848. ——. *Assoc.with* Chalcolite, and traces of Pitchblende. *Loc.* Gladstone Tin Mine, Eureka Creek (*ante*). *Ref.* B.D.

849. ——. *Assoc.with* Fluorspar, in lode. *Loc.* Gladstone Tin Mine, Eureka Cr. (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 54 (1900).

850. ——. In Kaolin. Great Eastern Tin Mine, Eureka Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

851. ——. In lode. Joss's Rush, Eureka Cr. (*ante*). *Ref.* G.S.M.

852. ——. *Assoc.with* Fluorspar. *Loc.* Lass o' Gowrie Mine, Eureka Cr. (*ante*).

853. ——. *Assoc.with* Wolfram. Rose of England Mine, Eureka Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

854. ——. In chloritic shales. Stannary Hills Tin Mines, Eureka Cr. (*ante*). *Ref.* G.S.Q. Pubs. 146, pp. 1 anl 2 (1900), and 192, p. 25 (1904).

855. ——. In quartz and felspar, in micaceous rock. Galtmore, Walsh R., nr. Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 41 (1897), and G.S.M.

856. ——. Oberlin Mine, Glen Linedale, 6 miles N.W. of Coolgarra, 11 miles N. of Mt. Garnet Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 41 (1897).

857. Cassiterite. In quartz lode. Specimen Mine, Glen Linedale (*ante*). *Ref.* G.S.Q. Pub. 125, p. 40 (1897).

858. ——, in quartz stained with copper. *Loc.* Columbia Mine, Irvinebank, 12 miles W.S.W. of Herberton, 10 miles S.W. of Stannary Hills, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

859. ——. *Assoc.with* Turgite. *Loc.* Comet Tin Mine, Irvinebank (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

860. ——. *Assoc.with* Fluorspar. *Loc.* Crœsus Tin Mine, Irvinebank (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

861. ——. *Assoc.with* Tourmaline. *Loc.* Day Dawn Tin Mine, Irvinebank (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

862. ——. *Assoc.with* Galena, in quartz. *Loc.* Freethinker Tin Claim, Irvinebank (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

863. ——. *Assoc.with* Bismuthinite, in chlorite. *Loc.* Gt. Southern Mine, Irvinebank (*ante*). *Ref.* G.S.Q. Pub. 25, p. 47 (1897).

864. ——, in lode. *Loc.* Halpin's Camp, Irvinebank (*ante*). *Ref.* B.D.

865. ——. *Assoc.with* Kaolin, in lode. *Loc.* Jester Mine, Irvinebank (*ante*). *Ref.* G.S.M.

866. ——. Mt. Agnes, Irvinebank (*ante*). *Ref.* G.S.Q. Pub. 125, p. 50 (1897).

867. ——. *Assoc.with* Bismuthinite, in quartz. *Loc.* North Britain Mine, Irvinebank (*ante*). *Ref.* G.S.M.

868. ——, in lode, Pandora Tin Mine, Irvinebank (*ante*). *Ref.* G.S.Q. Pub. 192, p. 24 (1904).

869. ——, in lode. Red King Tin Mine, Irvinebank (*ante*). *Ref.* G.S.Q. Pub. 192, p. 23 (1904).

870. ——, as a lode deposit. Royal Standard Mine, Irvinebank (*ante*). *Ref.* G.S.M.

871. ——. *Assoc.with* Bismuthinite. *Loc.* Southern Tin Mine, Irvinebank (*ante*). *Ref.* G.S.M.

872. ——, as a lode deposit. Star of the South Tin Mine, Irvinebank (*ante*). *Ref.* G.S.M.

873. ——, as a lode deposit. Tornado Mine, Irvinebank (*ante*). *Ref.* G.S.Q. Pub. 192, p. 23 (1904), and G.S.M.

874. ——. *Assoc.with* Native Bismuth, in chlorite. *Loc.* Vulcan Tin Mine, Irvinebank (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 54 (1900).

875. ——. In lode. *Loc.* Adventure Tin Mine, 3 miles S. of Montalbion, 10 miles S.byW. of Stannary Hills Rail. Stn. (Chillagoe-Stannary Hills br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 192, p. 24 (1904).

876. ——. *Assoc.with* Copper Pyrites, Mispickel, and Zinc-Blende, in lode. *Loc.* Consolidated Tin Mine, 4 miles N.E. of Montalbion, 5 miles S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 119, p. 34 (1897).

877. ——. *Assoc.with* Chlorite, Mica, and Rock Crystal, in quartz lode. *Loc.* Just-in-time Tin Mine, on hill nr. Ragged Cr., 7 miles S. of Montalbion, 14 miles S.byW. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 119, p. 33 (1897).

878. ——. In kaolin. Tornado Silver Mine, Silverfield, 1 mile S.byW. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

879. ——. In chloritic rock. *Loc.* Maud and Mary Tin Mine, Walsh R., nr. Herberton, Walsh and Tinaroo Mineral Fields (*ante*). Black Tin Contents = 18 per cent. *Ref.* G.S.Q. Pub. 125, p. 42 (1897).

880. ——. In quartz. *Loc.* Anna Parnell Tin Mine, Watsonville, head of James Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles S.E.byE. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

881. ——. *Assoc.with* Copper (native), Copper Carbonate, and Wolfram, in lode. *Loc.* Argyll Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

882. ——. *Assoc.with* Garnet and Tourmaline, in porphyry. *Loc.* Baal Gammon Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 119, p. 12 (1897), and G.S.M.

883. ——. *Assoc.with* Garnet, in lode. *Loc.* Baker's 4-Mile Tin Mine, Watsonville (*ante*). *Ref.* G.S.M.

884. ——, in dioritic rock. *Loc.* Bar of Soap Mine, Watsonville (*ante*) . *Ref.* G.S.M.

885. ——. *Assoc.with* Mica, in felsitic rock and quartz. *Loc.* Ben Lomond Mine, Watsonville (*ante*). *Ref.* G.S.M.

886. ——. Bismarck Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 125, p. 40 (1897).

887. ——. *Assoc.with* Garnet, in chlorite. *Loc.* Boulton's Folly Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 26 (1883).

888. ——. *Assoc.with* Felspar, in quartz lode. *Loc.* Boundary Tin Mine, Watsonville (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 13, p. 28 (1883).

889. —— *Assoc.with* Copper Ore, in quartz, in porphyry and diorite. *Loc.* Caledonia Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 28 (1883), 119, p. 18, (1897), and 125, p. 40 (1897).

890. ——. *Assoc.with* Wolfram, Scheelite, Mispickel, Iron Pyrites, and Copper Carbonate, in dioritic dyke. *Loc.* Chance Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 119, p. 18 (1897), and 125, p. 40 (1897).

891. ——. *Assoc.with* Steatite and Serpentine, in quartzite. *Loc.* Come-by-Chance Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 22 (1883).

892. ——. *Assoc.with* Copper Pyrites, Copper Oxide, Azurite, and Malachite, in greywacke and slate. *Loc.* Crucible Tin and Copper Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, pp. 21, 22 (1883).

893. ——. In kaolin, chlorite, and ironstone. Day Dawn Tin Mine, Watsonville (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 13, p. 24 (1883).

894. ——. *Assoc.with* Garnet, Wolfram, and Felspar, in quartz. *Loc.* Dreadnought Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 26 (1883).

895. —— (crystals). Easter Monday Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 125, p. 33 (1897).

896. ——. *Loc.* Excelsior and Watson's Folly Amalgamated Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

897. ——. *Assoc.with* Ironstone and Siderite, in quartzite and kaolin. *Loc.* Federation Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 119, p. 24 (1897), and G.S.M.

898. ——. *Assoc.with* Fluorspar, Iron Pyrites, Wolfram, Chalcanthite, and Chlorite, in quartzite and felspar, in dyke. *Loc.* Glencairn Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 23 (1883), and 125, p. 40 (1897).

899. ——. *Assoc.with* Steatite, Serpentine, and Copper, in greywacke and clay shales. *Loc.* Good Friday Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 21 (1883), and P.R.S.Q., vol. 15, p. 64 (1887).

900. ——. In soft ferruginous rock, with quartz and in greywacke. *Loc.* Grand Secret Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 21 (1883).

901. ——. *Assoc.with* Copper Pyrites, Mispickel, and Orthoclase, in porphyry. *Loc.* Great Western Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 27 (1883).

902. ——. *Assoc.with* Iron Pyrites and Galena. *Loc.* Great Wheal Busy Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 125, p. 46 (1897).

903. ——. *Assoc.with* Native Bismuth, in chlorite and porphyry. *Loc.* Herbertina Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

904. ——. *Assoc.with* Tile Ore, Azurite, Malachite, and Ochre, in quartz lode. *Loc.* Ironclad Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 21 (1883), 119, p. 9 (1897), and P.R.S.Q., vol. 4, p. 59 (1887).

905. ——. *Assoc.with* Iron Pyrites, in brecciated diorite. *Loc.* King of the North Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 22 (1883).

906. ——. *Assoc.with* Copper Pyrites, Mispickel, Galena, Wolfram, Garnet, and Chlorite, in greywacke. *Loc.* King of the Ranges Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 28 (1883), and 222, pp. 41-50 (1910).

907. ——. *Assoc.with* Ironstone, in porphyry and chloritic rock. *Loc.* Leinster Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 22 (1883).

908. ——. *Assoc.with* Iron Pyrites and Galena, in diorite dyke. *Loc.* Mountaineer Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 28 (1883).

909. ——. *Assoc.with* Azurite and Malachite, in greywacke, sandstone, and steatite. *Loc.* North Australian Tin Mine, Watsonville (*ante*). *Refs.* G.S.Q. Pub. 13, p. 20 (1883), and 119, p. 10 (1897), and P.R.S.Q., vol. 4, p. 77 (1887), and vol. 15, p. 64 (1900).

910. ——. In greisen. Paisley and Chamberlain's Mine, Watsonville (*ante*). *Ref.* G.S.M.

911. Cassiterite. *Assoc.with* Ironstone and Wolfram, in chloritic blow. *Loc.* Parnell Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

912. ——. In serpentine and chlorite. Pride of the West Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

913. ——. In felspar and quartz. Queen of the West Tin Mine, Watsonville (*ante*). G.S.Q. Pub. 13, p. 26 (1883), and G.S.M.

914. ——. In sandstone. Ragged Tin Mine, Watsonville (*ante*). *Ref.* G.S.M.

915. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Cuprite, Malachite, Azurite, Stannine, Wolfram, Mispickel, Ironstone, Fluorspar, and Chlorite. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 26 (1883), and 119, p. 15 (1897).

916. ——. *Assoc.with* Garnet, in sandstone, kaolin, and chlorite. *Loc.* Struber's Tin Mine, Watsonville (*ante*). *Ref.* G.S.M.

917. ——. In quartz and porphyry. *Loc.* St. Kilda Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

918. ——In felspar and quartz. *Loc.* St. Patrick's Day Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

919. ——. *Assoc.with* Copper Pyrites, Copper Carbonate, Chalcanthite, Mispickel, Marcasite, Iron Pyrites, and Wolfram, in earthy hematite, limonite, chlorite, and quartz, in diorite. *Loc.* Try Again and Chance Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

920. ——. *Assoc.with* Mispickel and Chlorite, in quartz lode. *Loc.* Ulster Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, pp. 22, 24 (1883).

921. ——. *Assoc.with* Mispickel and Wolfram, in quartz lode. *Loc.* Victoria Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

922. ——. *Assoc.with* Wolfram, Molybdenite, Native Bismuth, Bismuthinite, Bismutite, Mispickel, Scorodite, Scheelite, and Manganese-dioxide, with traces of Iron Pyrites, Hematite, Limonite, Magnetite, etc., in irregular masses of quartz and greisen. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbullah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

922A.——. *Assoc.with* Garnet, in alluvial deposits. *Loc.* Calcifer, 133 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub., vol. 15, p. 66 (1900).

923. ——. *Assoc.with* Wolfram, Molybdenite, and Tenorite, with traces of Iron Pyrites, Hematite, Limonite, Mispickel, and Scorodite, in veins of coarse mica and quartz in greisen. *Loc.* California Cr., nr. Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

924. ——. In alluvial deposits. *Loc.* California Cr. (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 55 (1900).

925. ——. In lode. Canadian Mine, California Cr. (*ante*). *Ref.* G.S.M.

925A.——. *Assoc.with* Wolfram, Molybdenite, Monazite, Mispickel, Iron Pyrites, in quartz and felspar, in greisen country. *Loc.* California Cr. (*ante*). *Ref.* B.D.

926. ——. Fardowner Mine, California Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 48 (1897).

927. ——. In chlorite. Gladstone Tin Mine, California Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 42 (1897).

928. ——. *Assoc.with* Wolfram and Monazite. *Loc.* Emerson's Wolfram Mine, nr. head of California Cr., 6 miles E. of Ord (Mt. Garnet Rail. line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

929. ——. In lode. *Loc.* Albion Mine, Emu Cr., trib. of Walsh R., 12 miles S.E.byE. of Petford, 109 miles (by rail and road) S.W. of Cairns (Cairns-Chillagoe Rail.), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

930. ——. In lode. City of Pompeii Mine, Emu Cr. (*ante*). *Ref.* G.S.M.

931. ——. In lode. Giblet's Mine, Emu Cr. (*ante*). *Ref.* G.S.M.

932. ——. In lode. Hope Mine, Emu Cr. (*ante*). *Ref.* G.S.M.

933. ——. In lode. New Zealand Mine, Emu Cr. (*ante*). *Ref.* G.S.M.

934. ——. *Assoc.with* Orthoclase, in greisen lode. *Loc.* Pinnacle Lease, Emu Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

935. ——. In lode. Royal Standard Mine, Emu Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

936. ——. In lode. Star and Stripes Mine, Emu Cr. (*ante*). *Ref.* G.S.M.

937. ——. In lode. Tasmanian Mine, Emu Cr. (*ante*). *Ref.* G.S.M.

938. ——. *Assoc.with* Wolfram, Native Bismuth, Bismuthinite, and Bismutite, in quartz, muscovite, fluorspar, etc. *Loc.* Emuford, Emu Cr. (*ante*). *Ref.* B.D.

938A.——. *Assoc.with* Monazite, in alluvial deposits. *Loc.* Emu Cr., 3 miles N. of Fossilbrook, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

939. ——. In alluvial deposits. Five-mile Cr., br. of Rocky Tate R., 5 miles S.E. of Fisherton, Tate R., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

940. ——. In alluvial deposits. *Loc.* 4-Mile Cr., 6-Mile Cr., 9-Mile Cr., and 12-Mile Cr., branches of Tate R., nr. Fisherton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

940A.——. In alluvial deposits. *Loc.* Fossilbrook Stn (Firth's), on Fossilbrook Cr., 16 miles S.S.E. of Fossilbrook, 50 miles S. of Almaden Rail. Stn., Chillagoe Rail. line, Walsh and Tinaroo Mineral Fields (*ante*).

941. ——. *Assoc.with* Wolfram, in quartz and fluorspar. *Loc.* Garden Cr., 4 miles N. of Fisherton, Tate R., 20 miles W.S.W. of Almaden, Chillagoe Rail., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

942. ——. *Assoc.with* Wolfram and Galena, with traces of Chrysocolla and Magnetite, in chlorite, muscovite, and fluorspar. *Loc.* Koorboora, 108 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. (*ante*). *Ref.* B.D.

943. ——. Fair-play Mine, Koorboora (*ante*).

944. ——. *Assoc.with* Iron Pyrites, Galena, and Mispickel. *Loc.* Iolanthe Tin Mine, Koorbora (*ante*). *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

945. ——. Pillar Lease, Koorboora (*ante*). *Ref.* G.S.M.

946. ——. In quartz lode. Rosalind Tin Mine, Koorboora (*ante*). *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

947. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, Mispickel, and Mica, in lode. *Loc.* Shakespeare Tin Lease, Koorboora (*ante*). *Ref.* G.S.Q. Pub. 69, pp. 10, 11 (1891).

947A.——. *Assoc.with* Silver and Galena. *Loc.* Tennyson Tin and Silver Mine, Koorboora (*ante*).

948. ——. *Assoc.with* Native Silver. *Loc.* Mine adjoining the Tennyson Mine, Koorboora (*ante*).

949. ——. *Assoc.with* Wolfram, Molybdenite, Bismutite, Chalcolite, and Topaz; with traces of Hematite and Limonite, in small veins, in large quartz topaz lode in granite. *Loc.* Lappa Wolfram Lode, 2½ miles S.S.W. of Lappa Junction Rail. Stn. (Chillagoe line), 104 miles (by rail and road) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

950. ——. *Assoc.with* Wolfram and Bismutite, with traces of Cuprite, Malachite, and Azurite, in quartz, fluorspar, etc. *Loc.* McCord's Cr., 5 miles N.N.W. of Fisherton, Tate R., 20 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

951. ——. In alluvial deposits. *Loc.* Mt. Barunda, Tate R., 1 mile E.N.E. of Fisherton, 24 miles W.S.W. of Almaden, Chillagoe Rail., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

952. ——. In alluvial deposits. *Loc.* Oakey Cr., Lappa Junction (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 55 (1900).

952A.——. *Loc.* Dalziel's Mines, head of Reid's Cr., 5½ miles N.E. of Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

952B.——. *Assoc.with* Hematite and Wolfram. *Loc.* Gurrumbar, Reid's Cr., br. of Emu Cr., 2 miles S. of Emuford, 12 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* A.R., p. 47 (1906).

953. ——. Gurrumbar, Reid's Cr., br. of Emu Cr. (*ante*). *Assay:* Tin = 31·4 per cent. *Ref.* A.R., 1907, p. 122.

954. ——. In lode in granite. Village Blacksmith Mine, Reid's Cr. (*ante*). *Ref.* G.S.Q. Pub. 192, p. 29 (1904).

955. ——. *Assoc.with* Wolfram, Molybdenite, and Scheelite, with traces of Malachite, Azurite, and Iron Pyrites, in defined quartz lodes and leaders in granite. *Loc.* Glen Atherton, 12 miles S.E. of Mareeba Rail. Stn., 18 miles S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook.

956. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Tinaroo Cr., 6 miles N.N.E. of Tolga Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 49 (1900).

957. Cassiterite. *Assoc.with* Wolfram, in quartz lodes. *Loc.* Red River, Walsh and Tinaroo Mineral Fields. *Co.* —; *Dist.* Cook.

958. ——. In alluvial deposits. *Loc.* Atherton's Mine, Cairns District, 25 miles W. of head of inlet. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.M.

958A. ——. In alluvial deposits. *Loc.* Harkey's Cr., 2 miles inland from Double Is., about 20 miles N. of Redlynch Rail. Stn. (Cairns line). *Co.* Nares (*ante*). *Ref.* Q.G.M.J., vol. 9, p. 94 (1908).

959. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Kingsford's Sluicing Claim, on lead parallel with Barron R., near Cairns. *Co.* Nares (*ante*).

960. ——. *Loc.* Mt. Fraser Tin Mines, 6 miles N.byW. of Mt. Molloy tramway line, 24 miles N.byW. of Biboohra Rail. Stn. (Cairns line). *Co.* Nares (should be Dagmar) (*ante*).

961. ——. *Loc.* Mt. Lewis Tin Mines, 9 miles N.byW. of Mt. Molloy tramway line, 27 miles N.byW. of Biboohra Rail. Stn. (Cairns line) (*ante*).

962. ——. In alluvial deposits. Mt. Spurgeon, 22 miles, N.W. of Port Douglas. *Co.* Nares (should be Dagmar); *Dist.* Cook. *Ref.* A.R.D.M., 1889, p. 84.

963. ——. *Assoc.with* Gold in alluvial deposits. *Loc.* Tachappa Cr. and tributaries, Russell R., 13 miles W.N.W. of Geraldton, Russell Goldfield, 37 miles S. of Cairns. *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 45, p. 2 (1888).

964. ——. *Assoc.with* Gold and Ironstone in alluvial deposits. *Loc.* Claims on Terraces, 20 miles W.byN. of Geraldton, Russell Goldfield (*ante*). *Ref.* G.S.Q. Pub. 89 (1893).

965. ——. *Assoc.with* Ironstone Sand, in alluvial deposits. *Loc.* Lower Crossing, Peach R., 180 miles N.W. of Cooktown, Cape York Peninsula. *Co.* Sidmouth; *Dist.* Cook. *Ref.* G.S.M.

965A. ——. *Loc.* Angor Tin Mines, 33 miles N.E. of Georgetown. *Co.* Tate; *Dist.* Cook.

966. ——. In alluvial deposits. *Loc.* Fossilbrook, 38 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Tate (*ante*). *Assay:* Metallic Tin = 60·9 per cent. *Ref.* A.R. 1906, p. 52.

966A. ——. *Assoc.with* Columbite, in alluvial deposits. In the heads beyond Fossilbrook, 34 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 57 (1900).

967. ——. *Assoc.with* Wolfram, Bismutite, and Molybdenite, with traces of Copper Pyrites, Copper Carbonate, Hematite, Limonite, and Mispickel, in quartz, chlorite and muscovite. *Loc.* 4-Mile Mountain, 4 miles N.W. of Fossilbrook, 35 miles S.W. of Almaden Rail. Stn. (Chillagoe line) (*ante*). *Ref.* B.D.

968. ——. *Assoc.with* Wolfram and Molybdenite, with traces of Hematite and Limonite, in quartz and chlorite. Nightshade, Fossilbrook, 34 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line) (*ante*). *Ref.* B.D.

969. ——. *Assoc.with* Topaz and Beryl (bluish), in alluvial deposits. Lacewood Tin Mines, 10 miles N. of Brookland Stn., 30 miles W.S.W. of Fossilbrook, Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook. *Ref.* B.D.

——. *See further* Walsh and Tinaroo references *under* Kennedy North District.

970. ——. *Assoc.with* Topaz and Beryl. *Loc.* O'Brien's Cr., Nine-mile, nr. Brooklands Stn., 30 miles W.S.W. of Fossilbrook (*ante*).

970A. ——. *Loc.* Truxillo Tin Mines, 15 miles S.byW. of Fossilbrook. *Co.* Tate; *Dist.* Cook.

971. ——. *Var.* Wood Tin, in alluvial deposits. Percy R., br. of Gilbert R., nr. Gilberton, 60 miles S. of Georgetown, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 60 (1887).

971A. ——. In alluvial deposits. Robertson R., 16 miles S. of Charleston, Etheridge Goldfield (*ante*).

972. ——. In alluvial deposits. Five miles up from mouth of Pascoe R., Bowden Mineral Field, Cape York Peninsula. *Co.* Weymouth; *Dist.* Cook. *Ref.* B.D.

973. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Azurite, Mispickel, and Zinc-Blende, in quartz, greisen, and slate. *Loc.* Ballandean Tin Mine, Ballandean, 14 miles S.S.W. of Stanthorpe Main Rail. line. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.M., B.D., and L.C.B.

974. ——. In alluvial deposits. Ballandean, 14 miles S.S.W. of **Stanthorpe** Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 125, pp. 29, 30 (1897), and G.S.M.

975. ——. In alluvial deposits. Blue Mt. Tin Mine, Blue Mt. Cr., trib. of Kettle Swamp Cr., about 2½ miles E.N.E. of Stanthorpe Rail. Stn. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub., p. 52 (1889), and G.S.M.

976. ——. *Assoc.with* Stannite, Topaz, Zircon, Sapphire, Gold, Diamond, and Amethyst. *Loc.* Broadwater Cr. and branches, Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 31 (1898).

977. ——. In alluvial deposits. Brown's Gully, trib. of Sugarloaf Cr., 7 miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 125, p. 52 (1897), and G.S.M.

978. ——. *Assoc.with* Wolfram, in quartz and greisen. Between Blocks 248 and 443, ½-mile from Sugarloaf Mt., Brown's Gully (*ante*). *Ref.* G.S.Q. Pub. 120, p. 44 (1898).

979. ——. *Assoc.with* Wolfram and Molybdenite, in quartz and greisen. *Loc.* Shannon's Reef, Block 459, nr. ridge of Sugarloaf Mt., Brown's Gully (*ante*). *Ref.* G.S.Q. Pub. 120, p. 44 (1898), and G.S.M.

980. ——. *Assoc.with* Wolfram, in greisen. *Loc.* S.W. of Trollope's Hill, nr. Sugarloaf Mt., Brown's Gully (*ante*). *Ref.* G.S.Q. Pub. 120, p. 44 (1898).

981. ——. *Assoc.with* Beryl, in alluvial deposits. *Loc.* Dolcoath Cr., trib. of Quart Pot Cr., 3 miles E.byS. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, p. 85 (1898).

981A. ——. *Assoc.with* Wolfram, in quartz and greisen. *Loc.* Block 450, Dolcoath Cr. (*ante*). *Ref.* G.S.Q. Pub. 120, p. 46 (1898).

982. ——. In alluvial deposits. Dolcoath Flat Tin Mine, Dolcoath Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 51 (1897).

983. ——. In alluvial deposits. *Loc.* Funker's Gap Cr., trib. of Quart Pot Cr., nr. Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.M. and G.S.Q. Pub. 120, pp. 30, 33-36 (1898).

984. ——. In alluvial deposits. *Loc.* Granite Cr., nr. Stanthorpe (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 60 (1887).

985. ——. *Assoc.with* Diamond, Sapphire (green, blue, and pink), Spinel, Beryl, Zircon, Garnet, Tourmaline, Topaz, Amethyst, Cairngorm, Rock Crystal, and traces of Gold, in alluvial deposits. *Loc.* Hunt's, Quart Pot, Sugarloaf, Lode, Arbouin's, Cannon, and Kettle Swamp Creeks, and Severn R., Stanthorpe, 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120 (1898), and B.D.

986. ——. *Assoc.with* Diamond, in alluvial deposits. *Loc.* Kettle Swamp Cr. (Blue Mt. Cr.), N.E.andE. of Mt. Marley, about ½-mile E.N.E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

987. ——. In greisen. Nichol's Lode, Lode Cr., 5½ miles E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M. and A.R.D.M., 1885, p. 58.

988. ——. *Assoc.with* Wolfram and Molybdenite, in quartz and greisen. Noble Tin Mg. Coy., and Lode Cr. Tin Mg. Co.'s Blocks (351 and 352), head of Lode Cr. (*ante*). *Ref.* G.S.Q. Pub. 120, p. 45 (1898).

989. ——. In lode. Wellesley Tin Mg. Co.'s Property (Sel. 347), Lode Cr. (*ante*). *Average Yield:* Tin Ore = 15 per cent. *Ref.* G.S.Q. Pub. 40, p. 4 (1887).

990. ——. In alluvial deposits. Lode Cr. (*ante*). *Ref.* G.S.Q. Pub. 120, p. 39 (1898).

991. ——. In alluvial deposit. London Tin Mines, nr. Cemetery, Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.M.

991A. ——. *Assoc.with* Wolfram, in quartz and greisen. *Loc.* Lord Nolan Claim, Stanthorpe (*ante*). *Ref.* A.R., pp. 326-328 (1911).

992. ——. In alluvial deposits. *Loc.* Maryland Cr., br. of 10-Mile Cr., 9 miles W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

993. —— In alluvial deposits, and in greisen and quartz. Mt. Marley, 1¼ miles N.E.byE. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M., G.S.Q. Pub. 120, pp. 36, 46, 47 (1898), and 125, p. 51 (1897).

994. ——. In quartz lode. Between Mt. Marley and Kettle Swamp Cr., 1½ miles E.N.E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

995. ——. In greisen. Welsby's Lode, Block 588, Mt. Station Gully, trib. of Quart Pot Cr., 4¾ miles S.E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

996. ——. *Assoc.with* Copper Carbonate and Mispickel, in lode. *Loc.* Nundubbermere Run, 13 miles S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 40, p. 4 (1887).

997. ——. *Assoc.with* Wolfram and Iron Pyrites, in quartz lode. Brere's Claim, Pikedale Cr., 9 miles W.byN. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 47 (1898).

998. Cassiterite. *Assoc.with* Mispickel, Wolfram, Molybdenite, in greisen lode, in granite. Pikedale Lode, Sels. (705, 706w), Pikedale Cr. (*ante*). *Assays: See* No. 3840. *Ref.* G.S.Q. Pubs. 40, p. 4 (1887), and 120, p. 47 (1898).

999. ——. In alluvial deposits. In the western streams flowing into Pike's Cr., about 32 to 34 miles S.W.byS. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, p. 30 (1898).

1000. ——. In alluvial deposits. Brisbane Co.'s Tin Dredging Area, Quart Pot Cr., about 3½ miles E.S.E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pubs. 120, p. 34 (1898), and 125, p. 51 (1897), and G.S.M.

1001. ——. *Assoc.with* Ilmenite, etc., in alluvial deposits. Britannia Tin Mine, Quart Pot Creek, 1¼ miles W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

1002. ——. In alluvial deposits. Hannigan's Mine, Quart Pot Cr., nr. Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 125, p. 28 (1897).

1003. ——. *Assoc.with* Sapphire (green and blue), Tourmaline, Topaz, and Diamond, in alluvial deposits. *Loc.* Kettle Swamp, Quart Pot Cr. (*ante*). *Ref.* G.S.Q. Pub. 120, p. 36 (1898).

1004. ——. *Assoc.with* Copper Pyrites, Wolfram, and Molybdenite, in quartz vein in greisen. *Loc.* Kettle Swamp, Quart Pot Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 29 (1897), and G.S.M.

1005. ——. *Assoc.with* Wolfram, in quartz lode. *Loc.* on ridges, left bank of Quart Pot Cr. (*ante*). *Ref.* G.S.Q. Pub. 12, p. 2 (1882).

1006. ——. *Assoc.with* Wolfram, in alluvial deposits. *Loc.* Quart Pot Cr. and its tributaries (*ante*). *Ref.* G.S.Q. Pubs. 12, p. 2 (1882), and 120, pp. 33-35 (1898).

1007. ——. *Assoc.with* Wolfram, in stockwerks in granite rock. *Loc.* Storm King and Lady Normanby Tin Mines, in Blocks 589, 609, junction of Quart Pot Cr. and Mt. Station Gully, 5 miles S.E. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, pp. 46, 47 (1898).

1008. ——. *Assoc.with* Copper Pyrites, Chrysocolla, Wolfram, and Mispickel, in quartz lode. *Loc.* Great Eastern Tin Mine (Block 24), Red Rock Cr., br. of Severn R., 11 miles W.S.W. of Ballandean, 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, pp. 49, 50 (1898).

1008A. ——. In felspathic rock. Johnston's Claim, Red Rock Cr., br. of Severn R. (*ante*). *Ref.* O.R. (1909).

1009. ——. In quartz lode. Sels. 55w, 71w, 72w, 288w, 290, 313, 523w, Red Rock Cr., Severn R. (*ante*). *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

1010. ——. In alluvial deposits. Beverley Tin Mine, Beverley, 5 miles S.W. of Stanthorpe, Main Rail. line. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, pp. 41 and 42 (1898).

1011. ——. *Assoc.with* Wolfram, Molybdenite, and Molybdite, in quartz and greisen. *Loc.* Burnt Hut, Severn R., about 6 miles W.byS. of Ballandean, 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 48 (1898).

1011A. ——. *Assoc.with* Bismutite and Wolfram. Burnt Hut, Severn R. (*ante*). *Assay: see* Ref. *Ref.* A.R., p. 173 (1909).

1012. ——. In alluvial deposits. Glen Aplin, Severn R., 8 miles (by rail) S.S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pubs. 125, p. 52 (1897), and 120, pp. 41, 42 (1898).

1013. ——. *Assoc.with* Sapphire, in alluvial deposits. Junction of Severn R. and Quart Pot Cr., 1¾ miles S.W.byW. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

1014. ——. In alluvial deposits. Killminster, Severn R., 5 miles N.W.byW. of Ballandean Rail. Stn., 19 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 47 (1898).

1015. ——. *Assoc.with* Iron Pyrites, Mispickel, Wolfram, Molybdenite, and Scorodite. *Loc.* P.A. (48), Sluicers, Severn R., 6 miles W. of Ballandean, 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 10 (1904).

1016. ——. *Assoc.with* Common Opal. *Loc.* One mile N.W. of Ballandean, Severn R., 15 miles S.S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

1017. ——. *Assoc.with* Wolfram and Copper Ores, in lodes. *Loc.* Severn R., 7 miles W. of Ballandean, 21 miles (by rail and road) S.S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

1018. ——. *Assoc.with* Copper Pyrites, Zinc-Blende, and Galena, in chlorite, quartz, and fluorspar lodes. *Loc.* On bank of Severn R., 7 miles W. of Ballandean (*ante*). *Ref.* B.D.

1019. ——. In greisen. Smith's Secret Lode, Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

1020. ——. In alluvial deposits. Corrigan's Mine, Spring Cr., trib. of Broadwater Cr., 4¼ miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 32 (1898), and P. 125, p. 28 (1897).

1021. ——. In alluvial deposits. Rosia, Spring Cr., trib. of Broadwater Cr. (*ante*). *Ref.* G.S.M.

1022. ——. In alluvial deposits. Sim's Cr., Spring Cr. (*ante*). *Ref.* G.S.Q. Pubs. 120, p. 32 (1898), and 125, p. 29 (1897).

1022A.——. *Assoc.with* Sapphire, Cairngorm, Zircon, Tourmaline, and Rock Crystal, in alluvial deposits. *Loc.* Camp Reserve, Spring Cr. (*ante*). *Ref.* B.D.

1023. ——. *Assoc.with* Cairngorm, Topaz, Sapphire, Zircon, Spinel, Garnet, Diamond, and Gold, in alluvial deposits. *Loc.* Spring Cr. and its tributaries, 2¾ miles W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, p. 32 (1898).

1024. ——. *Assoc.with* Native Bismuth, in alluvial deposits. *Loc.* Stanthorpe Mineral Field, 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 44 (1887).

1025. ——. In alluvial deposits. Big Ruby Tin Mine, Block 406, Sugarloaf Cr., trib. of Quart Pot Cr., about 8 miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 125, p. 52 (1897).

1026. ——. In lode in greisen country. Block 607, S. of Arbouin's Gully, Sugarloaf Cr., 7½ miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 43 (1898).

1027.——. In alluvial deposits. Victoria Mine, Sugarloaf Cr., trib. of Quart Pot Cr., about 6½ miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 37 (1898), and G.S.M.

1028. ——. In lodes. Sugarloaf Cr., trib. of Quart Pot Cr., 2 miles E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 12, p. 1 (1882).

1029. ——. *Assoc.with* Iron Pyrites, Mispickel, Scorodite, Zinc-Blende, and Hornblende, in slate. *Loc.* Beacroft's Workings, Sundown Cr., 12 miles S.W.byW. of Ballandean, 26 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

1030. ——. *Assoc.with* Mispickel and Wolfram. *Loc.* Clare's Open Cut, nr. Sundown Mine, Sundown Cr. (*ante*). *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

1031. ——. *Assoc.with* Copper Pyrites, Mispickel, Wolfram, Zinc-Blende, Calcite, Chlorite, and Orthoclase, in quartz lode. *Loc.* Sundown Copper Mine, Sundown Cr. (*ante*). *Assay*: *See* No. 2192. *Ref.* G.S.Q. Pub. 191, p. 22 (1904), and G.S.M.

1032. ——. In alluvial deposits. Bottalie Tin Mine, 13-Mile Cr., trib. of Pike's Cr., about 10 miles W.N.W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 125, p. 51 (1897).

1033. ——. *Assoc.with* Gold and Stibnite, in alluvial deposits. *Loc.* Head of 13-mile Cr., trib. of Pike's Cr. (*ante*). *Ref.* G.S.Q. Pub. 120, p. 30 (1898), and B.D.

1034. ——. In alluvial deposits. Waroo Tin Mine, 38 miles W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* B.D.

1035. ——. In lode. Warralto Cr., Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

1036. ——. In lode. William's Mine, Queensland-N.S.W. Border, Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

1037. ——. In chloritic lode and in ferruginous sandstone. Alhambra, Nos. 1 and 2 Mines, Coolgarra, 12 miles (by coach) N.N.E. of Mt. Garnet (Chillagoe Br. Rail.), **Walsh and Tinaroo Mineral Fields.** *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 192, p. 27 (1904), and G.S.M.

1038. ——. In basic dyke. Anderson's Tin Lode, **Coolgarra** (*ante*). *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

1039. ——. In lode. Austral Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

1040. ——. In chlorite. Beaconsfield Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pubs. 72, p. 3 (1891), and 125, p. 47 (1897).

1041. ——. *Assoc.with* Turgite. *Loc.* Blair's Mine, Coolgarra (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

1042. Cassiterite. In lode. Bonnie Dundee Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

1043. ——. In quartz lode. Federal Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 165, p. 4 (1901).

1044. ——. *Assoc.with* Hematite, in quartz lode. *Loc.* Grand Junction Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

1045. ——. In quartz. John Bull Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

1046. ——. Junction Extd. Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

1047. ——. In quartz lode. Koh-i-noor Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

1047A. ——. *Assoc.with* Copper Pyrites and Fluorspar, in chloritic lode. *Loc.* Lottie Mine, Coolgarra (*ante*). *Ref.* G.S.M.

1048. ——. In lode. Lovely Ethel Mine, Coolgarra (*ante*). *Ref.* G.S.M.

1049. ——. *Assoc.with* Hematite and Limonite, in quartz lode. *Loc.* Magdala Tin Mine, Magdala Hill, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

1050. ——. In lode. Mt. Bismarck, Return Cr., Coolgarra (*ante*). *Ref.* G.S.M.

1051. ——. *Assoc.with* Topaz. Never-Can-Tell Mine, Coolgarra (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887), and G.S.Q. Pub. 72, p. 4 (1891).

1052. ——. *Assoc.with* Mispickel, in lode. *Loc.* North Britain Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

1053. ——. In lode, in dyke rock. Stephen's Extd. Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

1054. ——. In quartz lode. St. Patrick's Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

1055. ——. *Assoc.with* Penninite and Hematite, in quartz lode. Tasmania Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

1056. ——. In lode. The Wandering Digger Mine, Coolgarra (*ante*). *Ref.* G.S.M.

1057. ——. *Assoc.with* Galena and Iron Pyrites, in quartzose rock. *Loc.* Victoria Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

1058. ——. In lode. Young Almanac Tunnel, Coolgarra (*ante*). *Ref.* G.S.M.

1059. ——. *Assoc.with* Iron Pyrites, Mispickel, Hematite, Limonite, Göthite, Wolfram, Malachite, Azurite, Fluorspar, Chlorite, Penninite, Websterite, and Topaz. *Loc.* In the Tin Mines at Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

1060. ——. *Assoc.with* Fluorspar and Felspar, in lodes. *Loc.* Return Cr., br. of Herbert R., nr. Coolgarra, about 10 miles S.E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pubs. 13, p. 30 (1883), 72, p. 1 (1891), 125, p. 41 (1897), 134, p. 16 (1898), 165, p. 4 (1901), and 192, p. 27 (1904), and G.S.M.

1061. ——. In chlorite. ½-mile N. of Coolgarra Post Office, 9½ miles N.N.E. of Mt. Garnet Rail. Stn. (Chillagoe Br. line), Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Metallic Tin = 33 per cent. *Ref.* A.R., p. 86 (1907).

1062. ——. In lode. Dalcoath Tin Mine, 3 miles W. of Coolgarra, 9 miles N.N.E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

1063. ——. In alluvial deposits. Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of **Herberton,** Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

1063A. ——. Mt. Ogston Tin Claim, Dry R. (*ante*). *Assay: see* Ref. *Ref.* A.R., p. 270 (1910).

1064. ——. *Assoc.with* Copper. *Loc.* Argylla Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 43 (1887).

1065. ——. In quartz lode. Big Ben Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 8 (1883).

1066. ——. In quartz lode, in fine-grained serpentinous dyke. Birthday Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883).

1067. ——. In quartz lode. Black Chief Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 17 (1883).

1068. ——. In quartz lode. Black King Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 13 (1883).

1069. ——. *Assoc.with* Wolfram and Fluorspar, in quartz, diorite, and chlorite. *Loc.* Bradlaugh Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883), P.R.S.Q., vol. 15, p. 54 (1900), and G.S.M.

1070. ——. In quartz lode. Brisbane United Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 13 (1883).

1071. ——. In chlorite lode. Chance Tin Mine, Herberton (*ante*). *Ref.* B.D.

1072. ——. In ferruginous quartz. Clyde Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 17 (1883).

1073. ——. *Assoc.with* Wolfram, in quartz lode. *Loc.* Cornstalk Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 10 (1883).

1074. ——. In kaolin. Cosmopolitan Mine, Herberton (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 70 (1887).

1075. ——. *Assoc.with* Native Copper, in quartz veins. *Loc.* Cottais Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 5 (1883).

1076. ——. In lode. Crœsus Mine, Herberton (*ante*). *Ref.* B.D.

1077. ——. In quartz and chlorite lode. Dawn of Hope Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 6 (1883).

1078. ——. *Assoc.with* Tourmaline, in quartz. *Loc.* Day Dawn Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 16 (1883).

1079. ——. *Assoc.with* Wolfram, Fluorspar, and Serpentine, in quartz lode. *Loc.* Defiance Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, pp. 7, 16 (1883).

1080. ——. In lode. Denny's Mary Mine, Halpin's Cr., Herberton (*ante*). *Ref.* G.S.M.

1081. ——. *Assoc.with* Fluorspar, in chlorite lode. *Loc.* Erin-go-bragh Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 5 (1883).

1082. ——. In quartz lode. General Grant Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 7 (1883).

1083. ——. *Assoc.with* Wolfram, in serpentine and quartz lode. *Loc.* Glanmire Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 12 (1883).

1084. ——. In lode. Gt. Britain Mine, Herberton (*ante*). *Ref.* G.S.M.

1085. ——. *Assoc.with* Cuprite, in chlorite and serpentine. *Loc.* Gt. Eastern Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 11 (1883).

1085A.——. *Assoc.with* Fluorspar, in quartz. *Loc.* Gt. Eastern No. 1 Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 7 (1883).

1086. ——. *Assoc.with* Mispickel, Hornblende, Steatite, Chlorite, Biotite, and Orthoclase, in lode. *Loc.* Gt. Northern P.C., Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 3 (1883), and P.R.S.Q., vol. 4, p. 77 (1897), vol. 15 (1900).

1087. ——. *Assoc.with* Malachite and Azurite. *Loc.* Gt. Northern Tin Mine, Herberton (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 77 (1887).

1088. ——. *Assoc.with* Fluorspar, in lode. *Loc.* Great Northern Tin Mine, Herberton (*ante*). *Ref.* B.D.

1089. ——. *Assoc.with* Wolfram. Gt. Northern Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 125, p. 43 (1897).

1090. ——. In quartz lode. Gt. Western P.C., Herberton (*ante*). *Ref.* G.S.M.

1091. ——. In quartz lode. Hadleigh Castle, Herberton (*ante*). *Ref.* G.S.Q. Pub. 119, p. 25 (1897), and G.S.M.

1092. ——. In alluvial deposits. Harvey's Cr., Herberton (*ante*). *Ref.* G.S.M.

1092A.——. *Assoc.with* Fluorspar. *Loc.* Hickey's Mine, Herberton (*ante*). *Ref.* Q.M.

1093. ——. *Assoc.with* Native Bismuth, in quartz lode. *Loc.* Home Rule Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 8 (1883).

1094. ——. *Assoc.with* Chlorite, in dyke rock. *Loc.* Irish National League Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 6 (1883).

1095. ——. *Assoc.with* Copper Pyrites, Mispickel, and Chalcanthite, in elvan dyke and quartz. *Loc.* Ironclad Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 8 (1883).

1096. ——. *Assoc.with* Iron Pyrites and Fluorspar, in quartz and serpentine. *Loc.* Levant Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883).

1097. ——. *Assoc.with* Wolfram, Iron Pyrites, and Fluorspar, in quartz and chlorite. *Loc.* Leviathan Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 14 (1883).

1098. ——. In serpentine. London Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 12 (1883).

1099. ——. *Assoc.with* Galena. Louisa Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 18 (1883).

1100. ——. *Assoc.with* Wolfram, in chlorite and quartz. *Loc.* Ly-e-Moon Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 7 (1883).

1101. Cassiterite. In quartz lode. Maori Chief Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 18 (1883).

1102. ——. In quartz and diorite. Monarch Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 13 (1883).

1102A. ——. *Assoc.with* Copper Pyrites, Mispickel, Chlorite, and Muscovite, in quartz. *Loc.* Monazite Claim, Herberton. *Co.* Cardwell (*ante*). *Ref.* B.D.

1103. ——. In quartz lode. Nancy Lee Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 18 (1883).

1104. ——. *Assoc.with* Wolfram and Mica, in ferruginous quartz. *Loc.* Nelly Grant Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 7 (1883).

1105. ——. In quartz and chlorite. New Chum Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 17 (1883).

1106. ——. *Assoc.with* Cairngorm, Common Opal, and Opalised Wood, in alluvial deposits. *Loc.* Brewery Hill, Nigger Cr., Herberton (*ante*). *Ref.* G.S.M.

1107. ——. *Assoc.with* Wolfram and Fluorspar, in quartz lode. *Loc.* Nova Scotia Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 11 (1883).

1108. ——. In chlorite lode. Old Chum Mine, Herberton (*ante*). *Ref.* G.S.M.

1109. ——. *Assoc.with* Malachite and Talc, in quartz. *Loc.* Orient Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 13 (1883).

1110. ——. *Assoc.with* Wolfram, in quartz and chlorite. *Loc.* Perseverance Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 19 (1883), and G.S.M.

1111. ——. *Assoc.with* Iron Pyrites, in lode. *Loc.* Phœnix Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883).

1112. ——. *Assoc.with* Fluorspar, in quartz lode. *Loc.* Poor Stroller Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 18 (1883).

1113. ——. In quartz and chlorite. Queen Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 19 (1883).

1114. ——. In quartz lode. Republic Mine, Herberton (*ante*). *Ref.* G.S.M.

1115. ——. In quartz lode, in diorite dyke. Scotsman Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883).

1116. ——. In chlorite and quartz. Shamrock Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 13 (1883).

1117. ——. *Assoc.with* Wolfram, Steatite, Serpentine, Chlorite, and Orthoclase, in quartz lode. *Loc.* Soggoarth Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 6 (1883), and P.R.S.Q., vol. 4, p. 59 (1887).

1118. ——. *Assoc.with* Chlorite, in dyke. *Loc.* Southern Cross Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 5 (1883), and G.S.M.

1119. ——. In chlorite, talc, and quartz. Surprise Tin Mine, Herberton (*ante*). *Ref*, G.S.Q. Pub. 13, p. 17 (1883).

1120. ——. In Serpentine, Chlorite, and Fluorspar. Syndicate Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 12 (1883).

1121. ——. *Assoc.with* Iron Pyrites and Steatite, in diorite dyke. *Loc.* St. Mungo Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

1122. ——. *Assoc.with* Viridite, Steatite, and Serpentine, in quartz, diorite, and porphyry. *Loc.* St. Patrick Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 8 (1883).

1123. ——. *Assoc.with* Ilmenite, Wolfram, Topaz, and Gold (traces), in alluvial deposits. *Loc.* The Deep Lead, Herberton (*ante*). *Ref.* G.S.Q. Pubs. 115, pp. 1-15, and 125, p. 49 (1897).

1124. ——. In quartz in elvan dyke. Three Star Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 13 (1883).

1125. ——. *Assoc.with* Wolfram, in quartz lode. *Loc.* True Blue Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 16 (1883).

1126. ——. *Assoc.with* Mispickel, in quartz lode. *Loc.* Ulster Tin Mine, Herberton (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

1127. ——. In quartz and felspar. Welcome Claim, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 10 (1883).

1128. ——. *Assoc.with* Copper Pyrites, in penninite and talc. *Loc.* Wheal Vohr Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 16 (1883), and P.R.S.Q., vol. 15, p. 64 (1900).

1129. ——. In alluvial deposits and in lode. Wilsh Irishman Tin Mine, Herberton (*ante*). *Ref.* G.S.M.

1130. ——. *Assoc.with* Wolfram and Fluorspar, in lodes and alluvial deposits. *Loc.* Wild River Tin Mines, Herberton (*ante*). *Ref.* G.S.Q. Pub. 9, pp. 8, 9 (1881).

1131. ——. *Assoc.with* Wolfram and Molybdenite, in diorite. *Loc.* Young American Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 9 (1883).

1132. ——. *Assoc.with* Sapphire, in alluvial deposits. *Loc.* Herberton (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 57 (1887).

1133. ——. In lode. Alexandria Tin Mine, Mowbray Cr., trib. of Dry R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* B.D.

1134. ——. In alluvial deposits and in lode. Mowbray Cr., trib. of Dry R. (*ante*). *Ref.* G.S.M.

1135. ——. Mt. Ormonde, 6 miles E. of Irvinebank, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North.

1136. ——. *Assoc.with* Wolfram, Molybdenite, Scheelite, Wad, and Monazite, with traces of Cuprite, Malachite, Azurite, Iron Pyrites, Limonite, Mispickel, and Scorodite, in irregular masses and in defined lodes in slates and greisen. *Loc.* Nettle's or Innot's Cr. Wolfram Mines, 4 miles E. of and 3 miles S.E. of Coolgarra, and 10 to 14 miles N.E. of Mt. Garnet Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

1137. ——. *Assoc.with* Corundum (green and yellow), in alluvial deposits. *Loc.* Nettle's or Innot's Cr. (*ante*). *Ref.* B.D.

1138. ——. In alluvial deposits. Hot Springs, Nettle's or Innot's Cr. (*ante*). *Assay:* Metallic Tin = 75 per cent. *Ref.* G.S.Q. Pub. 125, p. 49 (1897).

1139. ——. *Assoc.with* Bismuth (native), Copper, and Ironstone, in lode. *Loc.* Lancelot Tin Mine, Newellton (Silver Valley), 9 miles S.W. of Herberton, 10 miles S.E.byS. of Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Assay:* Tin = 63 per cent.; Bismuth = 4½ per cent. *Ref.* G.S.Q. Pub. 119, p. 27 (1897), and G.S.M.

Casuarina Island. Fitzroy River, near Keppel Bay. On the island wells have been sunk to a salt water bed, and works were established to treat the brine. The venture, however, did not succeed, on account, it is said, of the excessive cost of production.

Several shallow bores have been sunk for fresh water, but they met with salt water, and one, known as Murray's Bore, sunk to a depth of about 233 feet, met with several beds of oil-bearing clays between 106 feet and the bottom. A bed of black carbonaceous shale was penetrated at about 190 feet, some of the material, on examination, being found to closely resemble the oil-bearing shales of Duaringa, The Narrows, Miriam Vale, etc.

Caves in Queensland. The two principal groups of limestone caves are those at Chillagoe and Mt. Etna. At the former place several caves are known, but only those close to the town have been considered worthy of reservation by the Crown for recreation purposes. The Mt. Etna caves include Johannsen's and Olsen's Caves, both of which are extensive, and contain considerable quantities of bat guano. *See* G.S.Q. Pub. No. 92, pp. 609-613, for general description.

Cawarral (Ross) Cr., 5 miles S. of Emu Park Rail. Stn. *Min.Ref.* Turquoise, *see* 7909.

Cawarral Gold and Mineral Field.

SITUATION: *See maps,* Pls. 2, 3. The township of Cawarral is 23 miles (by rail) N.N.E. of Rockhampton (Yeppoon line). *Co.* Livingstone; *Dist.* Port Curtis. Centre about *Lat.* 23° 10′ S.; *Long.*, 150° 38′ E.

DISCOVERY: Gold was discovered near Cawarral Station in Sept. (?), 1863, and again in this neighbourhood in 1868. In the latter year gold was also found at Mt. Wheeler and New Zealand Gully, both in alluvial deposits, and in reefs. In April, 1870, a gold discovery was made at the Garibaldi Diggings, situated between Tungamull and Cawarral Township.

PROCLAMATION OF FIELD: First gazetted, 19th November, 1869; last, 13th October, 1909, as follows:—Commencing at the confluence of Thorzet Creek with the left bank of the Fitzroy River, and bounded thence by that creek upwards to the south-east corner of portion 22v, parish of Archer; thence by the east boundaries of that portion and portions 152, 153, 154, 155, 9v, and 1v; thence by a line and the east boundary of the parish of Murchison northerly to the south-west corner of portion 1379, parish of Cawarral; thence by the south boundaries of that portion and portion 1381, part of the east boundary of the latter portion and the south boundary of portion 292 to Limestone Creek, by that creek downwards to the south boundary of portion 1563, by the south-east and east boundaries of that portion, the eastern boundaries of portions 389, 1340, 1487, 2367, 2173, and 862, by part of the south, the west, and part of the north boundaries of R. 273, by the western boundary of portion 1431 and a line northerly to the south-west corner of portion 892, by the south and east boundaries of that portion, the east boundary of portion 933 and a line northerly to the south-east corner of portion 2392, parish of Barmoya, by the south-east and east boundaries of that portion, the eastern boundaries of portions 2288 and 1616 northerly to Limestone Creek, by that creek northerly to the west corner of portion 1622, parish of Yeppoon, by the western boundaries of that portion and subdivision 4 of same portion; thence by the north boundary of the parish of Yeppoon easterly to the sea-coast, by the sea-coast southerly to the south-east corner of portion 1717, parish of Yeppoon, by the south boundary of that portion west to a point north from the north-west corner of portion 461, by a line and the west boundary of portion 461 south to its south-west corner; thence by a line north-westerly to the north-east corner of portion 1627; thence by the east boundary of that portion south to its south-east corner; thence by the parish boundary of Hewittville easterly to the sea-coast at Wreck Point, by the sea-coast southerly to the east corner of subdivision C of portion 195, parish of Hewittville, by the south-east boundaries of subdivision C, D, and E of that portion south-westerly to the north corner of portion 196, by the north-east boundary of portion 196 and a line in continuation south-easterly to the northern boundary of R. 320, by part of the north boundary of that reserve and the northern, western, and part of the southern boundaries of R. 274 to the north-west corner of portion 55 by the west boundaries of portions 55 and 54, by the south boundaries of portions 54 and 53 to the sea-coast; thence by the sea-coast southerly to the mouth of the Fitzroy River; and thence by the left bank of that river upwards to the point of commencement.

AREA: 218,880 acres (342 square miles).

PRINCIPAL MINING CENTRES: Cawarral, New Zealand Gully, Mt. Chalmers, Mt. Warminster, and Mt. Wheeler, *which see.*

MINERAL STATISTICS and STATISTICAL NOTES: *See under* Rockhampton.

MINERAL REFERENCES: **Gold** (alluvial) 3393, (nugget) 3447, (reef) 4319-4329, 4339; Silver, 7530, 7531, (Cerargyrite) 1185; Lead (Cerussite), 1299, (Galena) 3059; **Copper** (Azurite) 251, (Chalcotrichite) 2490, (Copper Pyrites) 2298, (Cuprite) 2477, (Malachite) 6364-6365, (Tenorite) 7741; Zinc-Blende, 8201-8203; Manganese-dioxide, 6475; Chromic Ochre, 1472; Chromite, 1482, 1486; Iron (Iron Pyrites) 5399-5404, (Limonite) 5912. Other Minerals: Asbestos, 112; Barytes, 279, 280; Dolomite, 2590; Jasper, 5665, 5666; Magnesite, 5959; Serpentine, 7393, 7395; Steatite, 7695; Tourmaline, 7870.

GEOLOGICAL NOTE: The rocks about the field comprise altered sedimentaries in association with serpentine, diorite, and other intrusive rocks. Mineral deposits containing gold, copper, and other metals occur as reefs and as massive lode formations in the altered sedimentary rocks. *See* G.S.Q. Pub. No. 216 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 22 (1886), 216 (1907). *See under* Geol. Sur. Pub. List for title. *See also* Supplementary Report List, No. 6, 66.

WARDEN AND INSPECTOR OF MINES: Both stationed at Rockhampton.

REPORTS: Inspector's and Warden's monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Cawildi Bore. *See under* Artesian Bores. No. 397.

Celestial Extd. M.C. (195), Cloncurry. *Min.Ref* Azurite, *see* 160; Copper Pyrites, 2073; Malachite, 6100; Tile Ore, 2500.

Celestine. *Syn.* Celestite. *Compo.*, Sulphate of strontia. *Colour,* Usually white or faint bluish. *H.* = 3—3·5. *Sp.gr.* = 3·9. *Lustre,* Vitreous. Very brittle. *Contents* (*max.*), Strontia 56 per cent.

Cement Hill, Clermont Goldfield. Discovered in 1865. *Min.Ref.* Gold (alluvial), *see* 3339, 3347.

GEOLOGICAL NOTE: The hill consists of schists, slates, and conglomerates, on which there rests 4 or 5 feet of auriferous cement "wash." The wash is Permo-Carboniferous and contains the fossil fern *Glossopteris.* Both the "wash" and the slates and schists are in places covered by a flow of basalt. *See* G.S.Q. Pub. Nos. 176, 201, for details and maps.

Cement-making Materials. *See* Limestone, Gypsum. NOTE: Investigations made regarding the occurrence of Portland cement-making ingredients show that there are many places in the State where abundance of limestone is to be found near existing railway lines. Coal also occurs in innumerable places, but the two, coal and limestone, have not been found close together. The Maryborough district, with its limestone and coal resources, offers special inducements for the establishment of the cement-making industry, and the Gladstone district, too, has advantages in this respect. Limestone deposits at Tamaree and Gympie, with coal at Gunalda, Gundiah, only a few miles further north, and limestone deposits near Warwick, with coal at Allora, are also worthy of attention. *See* Progress Report of Q. Geol. Survey, in A.R.D.M. for 1911, for short account of localities where limestone and coal deposits are known to occur.

Centipede Group of Copper Mines, Cloncurry. Includes Centipede, Coolullah, Emerald Hill, and Pooncairie M. Leases. *Min.Ref.* Bornite, *see* 415; Copper Pyrites, 2104; Limonite, 5805; Malachite, 6163.

1182. ——. Mines at Lappa Junction, 102 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 50 (1900).

1183. ——. Muldiva Silver-Lead Mine, 6 miles S.W.byS. of Almaden (Chillagoe Rail. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 50 (1900).

1183A. ——. *Assoc.with* Gold. *Loc.* Old Silver Mine, One-mile, Ravenswood Goldfield. *Co.* Gladstone; *Dist.* **Kennedy North.** *Ref.* B.D.

1184. ——. Struck Oil Mine, Star R. (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* L.B. 2, p. 139 (1880).

1185. ——. *Assoc.with* Gold. *Loc.* Last Chance Reef, New Zealand Gully, 15 miles (by rail) E.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* **Port Curtis.** *Ref.* P.R.S.Q., vol. 4, p. 40 (1887).

Cerium. (*Ce*). *Atom.Wt.* 140·25. *Sp.gr.* 6·73. *Colour*, grey, metallic. Ductile.

Uses: The metal itself has no industrial application, but the oxide is one of the ingredients composing the fabric of incandescent gas mantles. Monazite is the common source of cerium, and is the only mineral known to contain it in Queensland. Some doubt exists as to whether the cerium-bearing mineral in the beach sands on the coast is actually monazite, the tests not being conclusive.

Cerium-lanthanum-thorium phosphate. *See* Monazite.

Certificates for Mining Managers. *See under* Board of Examiners for Mining Managers.

—— for Engine Drivers. *See under* Inspection of Machinery and Scaffolding Act.

Cerussite. *Syn.* White Lead Ore. *Compo.* Carbonate of Lead. *Colour*, usually white. *Lustre*, inclining to vitreous or resinous. Very brittle. *H.* = 3-3·5. *Sp.gr.* = 6·4. *Contents* (*max.*), Lead 77 per cent.

1185A. ——. *Assoc.with* Galena in lode. *Loc.* Lilydale Mine, Lawn Hills, Mended Hill, 92 miles S.W. of Burketown. *Co.* Gregory; *Dist.* **Burke.** Yield of Carbonate Ore: Silver = 7 oz. per ton; Lead = 70 per cent. *Ref.* G.S.Q. Pubs. 138, p. (1900), and 232, p. 44 (1911).

1186. ——. *Assoc.with* Galena and Zinc-Blende, in lode. *Loc.* Mended Hill Mine, Lawn Hills (*ante*). *Yield of Ore:* Silver = 29 to 34 oz. per ton; Lead = 69 to 76 per cent. *Ref.* G.S.Q. Pubs. 138, p. 2 (1900), and 232, p. 45 (1911).

1187. ——. *Assoc.with* Gold, Iron Pyrites, Redruthite, Chalcotrichite, and Galena, in quartz. *Loc.* Mountain Maid Reef, 2¾ miles N.N.E of Croydon, 96¾ miles (by rail and road) S.E. of Normanton, Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* B.D.

1187A. ——. *Assoc.with* Gold, Pyromorphite, and Ironstone, in quartz. *Loc.* Federation Reef, Tabletop, 9 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

1188. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Pyromorphite, and Massicot. *Loc.* In the reefs at Tabletop (*ante*). *Ref.* G.S.Q. Pub. 118, p. 34 (1896).

1188A. ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Jenny Lind Reef, Lower Twelve-mile, 8 miles N. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 34 (1896).

1188B. ——. *Assoc.with* Gold, Galena, and Massicot, in lode. *Loc.* Boulder Hill, Broken Hill, and Granite Castle Silver-Lead Lodes, Flinders R., Por. 2, Par. of Cracknell, Mt. Emu Plains Stn., 62 miles N.N.E. of Hughenden, 55 miles N.W.byW. of Pentland Rail. Stn. (Northern line). *Co.* Wongalee; *Dist.* Burke. *Assays: See* Refs. *Ref.* Q.G.M.J., vol. 11, p. 136 (1910), and A.R., p. 257 (1910).

1188C. ——. *Assoc.with* Galena, Anglesite, Massicot, Malachite, Azurite, and Limonite, in lode. *Loc.* about 5 miles S. of Coalstoun Lakes, 16 miles S.W. of Biggenden Rail. Stn. (Gayndah line). *Co.* Mackenzie; *Dist.* **Burnett.** *Refs.* A.R., pp. 287, 288, 291 (1910).

1189. ——. *Assoc.with* Anglesite and Galena, in red gossan. *Loc.* Spring Cr., br. of Blackfellow's Cr., trib. of Lynd R., 12 miles W. of Fossilbrook (Chillagoe line), 45 miles S.W. of Almaden Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

1189A.——. *Assoc.with* Massicot, Anglesite, and Malachite, in lode. *Loc.* Popahrairie P.A., Fiery Cr., about 15 miles N.byW. of Georgetown, Etheridge Goldfield. *Co.* Einasleigh; *Dist.* Cook. *Ref.* A.R., p. 194 (1909).

1189A1.——. *Assoc.with* Galena and Anglesite. *Loc.* P.A., between Aurora Cr. and Rocky, about 8 miles S.W. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* A.R., p. 242 (1910).

1190. ——. *Assoc.with* Silver and Anglesite, in lode. *Loc.* Mt. Dee Valley, Castleton, 5 miles S.S.E. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* A.R., p. 200 (1909).

1190A.——. *Assoc.with* Silver, Copper Pyrites, Galena, and Limonite, in lode. *Loc.* Mt. Dee Vall Mine, Charleston, 144 miles (by rail) S.W. of Almaden Rail. Stn., (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* O.R.

1190B. ——. *Assoc.with* Silver, Galena, Anglesite, and Malachite, in quartz. *Loc.* Wright's Leader, Donnyville, 4½ miles S. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* A.R., p. 228 (1910).

1190C.——. *Assoc.with* Copper Carbonate and Magnetite, in schist. *Loc.* Lynd Copper Mine, Einasleigh R., 32 miles E.N.E. of Charleston, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 134, p. 21 (1898).

1190D. ——. *Assoc.wtih* Gold, Galena, Massicot, and Malachite, in quartz and schist. *Loc.* Ancient Briton Mine, Georgetown, Etheridge Goldfield (*ante*). *Ref.* A.R., p. 215 (1910).

1190E.——. *Assoc.with* Gold, Silver, Galena, Massicot, and Anglesite, in lode. *Loc.* 1 mile N. of International Mine, Rocky, 6 miles S.W.byS. of Georgetown, Etheridge Goldfield (*ante*). *Assays: See* No. 2757A. *Ref.* A.R., p. 228 (1910).

1191. ——. Vulcan Tin Mine, Irvinebank, 12 miles W.S.W. of Herberton, 10 miles S.W. of Stannary Hills, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

1192. ——. *Assoc.with* Anglesite. *Loc.* Irvinebank (*ante*). *Ref.* G.S.M.

1193. ——. Montalbion, 7 miles S.W. of Stannary Hills, Chillagoe br. Rail., Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.M.

1194. ——. *Assoc.with* Silver and Malachite, in quartz. *Loc.* Otho Lease, Chillagoe, 139 miles W.S.W. of Cairns, Cairns Chillagoe Rail., Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay:* Silver = 100 oz. per ton. *Ref.* G.S.Q. Pub. 133, p. 10 (1898).

1194A.——. *Assoc.with* Galena and Massicot, in lode. *Loc.* Dolly Brand Mine, 1 mile from Chillagoe, Walsh and Tinaroo Mineral Fields (*ante*). *Assay: See* No. 2790A. *Ref.* A.R., p. 318 (1911).

1194B.——. Christmas Gift Mine, Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Analyses* (2): Lead = 72·5 and 53·7 per cent.; Silver = 10 oz. and 8 oz. per ton. *Ref.* Q.G.M. Jour., vol. 13, p. 56 (1912).

1195. ——. *Assoc.with* Minium, in lode of gossan. *Loc.* Arbouin and Party's P.A., Dargalong, 7 miles S. of Zillmanton Rail. Stn., Chillagoe line, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

1196. ——. *Assoc.with* Galena, Massicot, and Anglesite, in talcose gossan. *Loc.* Ewan and Delaney's P.A., Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

1197. ——. *Assoc.with* Minium, Anglesite, and Hematite. *Loc.* Excelsior Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

1198. ——. *Assoc.with* Minium and Copper Carbonate, in lode. *Loc.* Johnson and Smith's Claim, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

1198A.——. *Assoc.with* Galena and Minium, in ferruginous clay. *Loc.* P.A. (40 acres), Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

1199. ——. *Assoc.with* Galena, Minium, Anglesite, Massicot, and Copper Carbonate. *Loc.* Pandora Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

1200. ——. *Assoc.with* Anglesite and Ironstone, in purple gossan. *Loc.* Quetta or Skardon's Mine, Dargalong (*ante*). *Assay:* Silver = 74 oz. per ton; Lead = 19·12; Silica 4·17 per cent. *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

1201. ——. *Assoc.with* Minium. *Loc.* Silver Crown Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

1202. ——. *Assoc.with* Galena. *Loc.* Lappa Lappa, 102 miles S.W. of Cairns, Cairns-Chillagoe Rail., Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

1203. Cerussite. *Assoc.with* Galena, Malachite, Tetrahedrite, and Zinc-Blende, in lode *Loc.* Eclipse Mine, Muldiva, 7 miles W.S.W. of Almaden, Chillagoe Rail., Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Silver = up to 400 oz. per ton. *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

1204. ——. Paisley Silver Mine, Muldiva (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

1205. ——. *Assoc.with* Atacamite and Azurite. *Loc.* Silver Lead Mines, Muldiva (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 51 (1900).

1206. ——. *Assoc.with* Galena, Malachite, Cuprite, and Ironstone, in clay and quartz. *Loc.* Girofla Mine, Opera Cr., Mungana, 149 miles W.S.W. of Cairns, Cairns-Chillagoe Rail., Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay:* Silver = 5 to 8 oz. per ton; Lead = 23 to 71 per cent.; Copper = 0 to 35 per cent. *Ref.* G.S.Q. Pub 69, p. 3 (1891), and B.D.

1207. ——. *Assoc.with* Hematite and Limonite. *Loc.* Girofla Mine, Opera Cr., Mungana (*ante*). *Ref.* G.S.Q. Pub. 134, p. 12 (1898).

1208. ——. *Assoc.with* Garnet Rock. *Loc.* Lady Jane Mine, 1 mile S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

1209. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Galena, Minium, Zinc-Blende, Hematite, and Garnet. *Loc.* Penzance Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Silver = 26 oz. per ton; Lead = 28·2 per cent.; Copper = 1·31 per cent. *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), and 134, p. 11 (1898).

1210. ——. *Assoc.with* Copper Pyrites, Azurite, and Malachite, in lode. *Loc.* Queenslander Copper Lease, Redcap Cr., 3 miles N.E. of Mungana (*ante*). *Ref.* G.S.Q. Pub. 134, p. 11 (1898).

1211. ——. *Assoc.with* Galena and Minium, in limestone. *Loc.* Queenslander Copper Lease (*ante*). *Assay:* Silver = 30 to 200 oz. per ton. *Ref.* G.S.Q. Pub. 69, p. 7 (1891).

1212. ——. *Assoc.with* Galena, Massicot, Anglesite, Manganese-dioxide, and Actinolite. *Loc.* Macrossan Mine, between Cathedral Range and Arbinjoe Cr., 2 miles E. of Chillagoe, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay: See* No. 28. *Ref.* G.S.Q. Pub. 69, p. 7 (1891).

1213. ——. *Assoc.with* Gold and Galena, in quartz leader. *Loc.* Avis's Lease, Oaks Goldfield, 22 miles S.byE. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy; *Dist.* Cook. *Ref.* A.R., p. 156 (1908).

1213A. ——. *Assoc.with* Galena, Massicot, Iron Pyrites, Mispickel, and Zinc-Blende, in lode. *Loc.* Chillagoe Mine, off Wises's Nob, Oaks Goldfield (*ante*). *Ref.* A.R., p. 187 (1909).

1214. ——. *Assoc.with* Redruthite and Copper Carbonate, in gneiss and basalt. *Loc.* Between Brooklands No. 2 and No. 3, Junction Cr., br. Einasleigh R., 30 miles S. of Fossilbrook. *Co.* Tate; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 20 (1898).

1215. ——. In siliceous lode. Einasleigh R., between Junction Cr. and Herberton Georgetown road. *Co.* Tate (*ante*). *Ref.* G.S.Q. Pub. 134, p. 20 (1898).

1216. ——. *Assoc.with* Minium, Limonite, and Copper Carbonate, in lode in slate, greywacke, and quartzite. *Loc.* Monte Video Mine, nr. Ashton and Bowler Cr., 3 miles E. of Astonville, 15 miles N.N.W. of Mungana, Chillagoe Rail., Walsh and Tinaroo Mineral Fields. *Co.* Wrotham; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 15 (1898).

1216A.——. *Assoc.with* Cuprite, Tetrahedrite, Azurite, Malachite, and Ironstone, in lodes. *Loc.* Tartana Hill, Bowler Cr., Ashtonville (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 15 and 16 (1898).

1216B.——. *Assoc.with* Silver and Galena. *Loc.* Macdonald Goldfield, 31 miles W.byS. of Stanthorpe. *Co.* Clive; *Dist.* **Darling Downs.**

1217. ——. *Assoc.with* Galena, Anglesite, Redruthite, and Copper Carbonate, in gossan. *Loc.* Silver King Mine, Texas, 3 miles N. of Silver Spur Mine, 43 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* B.D.

1218. ——. *Assoc.with* Gold, Pyrargyrite, Iron Pyrites, Galena, Cuprite, Tile Ore, Copper Pyrites, Malachite, Azurite, Zinc-Blende, Smithsonite, Ironstone, and Calcite, in lode. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe (*ante*). *Ref.* G.S.Q. Pubs. 120 (1898), and p. 191 (1904).

1219. ——. *Assoc.with* Galena, Massicot, and Linarite, in lode. *Loc.* Caledonia Mine, Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

1220. ——. *Assoc.with* Galena, Massicot, Carbonate of Copper, and Ironstone, in quartz. *Loc.* Silver Streak Mine, Dry River (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883), and G.S.M.

1220A.——. *Assoc.with* Galena, in blow of red gossan. *Loc.* Spring Cr., on Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

1221. ——. *Assoc.with* Galena and Massicot. *Loc.* Target Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

1222. ——. *Assoc.with* Galena, in lode. *Loc.* Target 1 E. Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

1223. ——. *Assoc.with* Galena and Massicot. *Loc.* White Star Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

1224. ——. *Assoc.with* Gold, Silver, Minium, Iron Pyrites, Hematite, Magnetite, Copper Pyrites, Cuprite, Bornite, Tenorite, Azurite, Malachite, Chalcanthite, Mispickel, and Zinc-Blende, in quartz lodes, in quartzite and porphyry. *Loc.* Mt. Garnet Mines, Return Cr., br. of Wild R., 136 miles S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

1225. ——. *Assoc.with* Galena, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in slate and volcanic tuffs. *Loc.* Lancelot Mines, Newellton (Silver Valley), 9 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* L.B. 1, p. 479 (1883), and P.R.S.Q., vol. 4, p. 75 (1887).

1226. ——. *Assoc.with* Gold, Silver, Anglesite, and Massicot, in lode. *Loc.* nr. Bluff Stn., 9 miles S.E. of Mt. Leyshon, 22 miles S.S.E. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* A.R., p. 260 (1910).

1226A.——. *Assoc.with* Silver and Galena. *Loc.* nr. Chinaman's Gully, about 2½ miles E. of Mt. Leyshon, about 16 miles S.byE. of Charters Towers. *Co.* Davenport (*ante*). *Assay:* Silver = 72 oz.; Lead = 65·2 per cent. *Ref.* A.R., p. 229 (1910).

1226B.——. *Assoc.with* Gold, Silver, Galena, and Limonite, in lode. *Loc.* ¾ mile E. of Mt. Leyshon, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

1226C.——. *Assoc.with* Gold; Silver, Galena, Anglesite, and Massicot, in lode. *Loc.* Right hand br. of One-mile Gully, 1½ miles S.E. of Mt. Leyshon. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

1227. ——. *Assoc.with* Galena. *Loc.* Esperanza Silver Mine, Ravenswood Goldfield, 78 miles (by rail) S. of Townsville, Northern Rail. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

1228. ——. *Assoc.with* Gold, Silver, and Galena, in quartz. *Loc.* Ravenswood Silver Mg. Co's Mine, Ravenswood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 47 (1887), and G.S.Q. Pub. 125, p. 34 (1897).

1229. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Star of the South Reef, Connolly Cr., Trieste, 12 miles S.W.byS. of Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1900), and G.S.M.

1230. ——. *Assoc.with* Galena, in quartz lode. *Loc.* N. side of Specimen Cr., Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn. (Gt. Northern line), Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Assays:* (1) Silver = 6 oz. per ton; Lead = 73 per cent.; (2) Silver = 4 oz. per ton; Lead = 48·75 per cent. *Ref.* G.S.Q. Pub. 93, p. 5 (1891).

1230A.——. *Assoc.with* Galena and Anglesite, in quartz lode. *Loc.* Valley of Lagoons Run, 6 miles E. of Wyandotte Tel. Stn., about 64 miles S.E.byE. of Mt. Surprise Rail. Stn. (Etheridge line). *Co.* Gunawarra; *Dist.* Kennedy North. *Ref.* A.R., p. 176 (1909).

1231. ——. *Assoc.with* Copper Carbonate, in kaolin. *Loc.* Stockyard Cr. Silver Mine, Stockyard Cr., Basalt R., 18 miles N.W. of Hillgrove Hd. Stn., 70 miles N.N.W. of Charters Towers. *Co.* O'Connell; *Dist.* Kennedy North. *Assays:* Silver = from 3 oz. to 966 oz. per ton; Copper = from 8 to 31 per cent. *Ref.* G.S.Q. Pub. 94, p. 13 (1893).

1232. ——. *Assoc.with* Copper Pyrites and Malachite. *Loc.* Alice Shaft, **Kangaroo Hills Mineral Field**, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.M.

1233. ——. *Assoc.with* Galena, Copper Carbonate, Chrysocolla, Manganese-dioxide, and Garnet, in quartz lode. *Loc.* Black Star Lease (116), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, pp. 5 and 6 (1892).

1234. ——. *Assoc.with* Galena, Bornite, and Copper Carbonate, in lode. *Loc.* Blue Bell Lease (226), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

1235. Cerussite. *Assoc.with* Galena, Malachite, Azurite, and Manganese-dioxide, in lode. *Loc.* Bonnybrook Lease (178), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), and 82, p. 4 (1892).

1236. ——. *Assoc.with* Lievrite, Manganese-dioxide, and Garnet, in quartz lode. *Loc.* Boomerang Lease (186), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

1237. ——. In chlorite and quartz. Caledonian Lease (174), Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 46 oz. per ton; Lead = 30·5 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 9 (1892).

1238. ——. *Assoc.with* Lievrite, in lode. *Loc.* Day Dawn Lease 170, Newton's Shaft, Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 57 oz. per ton; Lead = 67·5 per cent.; (2) Silver = 4 oz. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

1239. ——. *Assoc.with* Galena and traces of Gold, in lode. *Loc.* Day Dawn Lease 170, Regner and Nevan's Hole, Kangaroo Hills Mineral Field (*ante*). *Assay:* Copper = 41·1; Lead = 29·5 per cent.; Silver = 17 dwt. 23 gr. per ton. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

1240. ——. *Assoc.with* Galena, Malachite, Azurite, and Manganese-dioxide, in lode. *Loc.* Donnybrook Lease, Running R., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

1241. ——. *Assoc.with* Native Silver, Galena, Malachite, Chrysocolla, Manganese-dioxide, Hematite, Mispickel, Zinc-Blende, and Chlorite, in kaolin lode. *Loc.* Hidden Treasure Lease (165), Running R., 1¾ miles W.S.W. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 314 oz. per ton; Lead = 19 per cent.; (2) Silver = 3 oz. 10 gr. per ton; Lead = 38 per cent.; (3) Silver = 45 oz. 14 dwt. per ton; Lead = 16·1 per cent. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), and 82, p. 7 (1892).

1242. ——. *Assoc.with* Galena, Manganese-dioxide, and Ironstone, in chlorite lode and in limestone. *Loc.* Hidden Treasure Lease (166), Running R., Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 2966. *Ref.* G.S.Q. Pub. 82, pp. 6, 7 (1892).

1243. ——. *Assoc.with* Ironstone and Copper Carbonate, in gossan and kaolinic lode. *Loc.* Junction Lease (181), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1897).

1244. ——. *Assoc.with* Copper Carbonate and Ironstone, in garnetiferous lode. *Loc.* Junction South Lease (180), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

1245. ——. *Assoc.with* Ironstone, in quartz lode. *Loc.* Kairanga Lease (217), 1 mile W. of Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1246. ——. *Assoc.with* Galena, Copper Carbonate, and Hematite, in gossan. *Loc.* Mt. Brown Lease (183), Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 17 dwt. 23 gr. per ton; Lead = 11·5 per cent. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1247. ——. In chlorite rock. New Chum Mine, Butterfly Gully, Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.M.

1248. ——. *Assoc.with* Galena, Minium, Chrysocolla, Copper Carbonate, Hematite, and Zinc-Blende, in gossan lode. *Loc.* White Wings P.A., Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1249. ——. *Assoc.with* Galena, Malachite, Chrysocolla, Manganese-dioxide, Lievrite, and Garnet, in kaolin. *Loc.* Mt. Hishon Lease (210), Kangaroo Hills Mineral Field (*ante*). *Assay: See* No. 2969. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

1250. ——. *Assoc.with* Galena, in quartz and garnet rock. *Loc.* Mt. Hishon 1 E. Lease (224), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

1251. ——. *Assoc.with* Copper (native), Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper Carbonate, Linarite, Manganese-dioxide, Zinc-Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

1252. ——. *Assoc.with* Galena, Chrysocolla, Pyrolusite, Gypsum, and Calcite, in garnet rock. *Loc.* Elsie's Shaft, Mt. Moss Lease (168), Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 16 oz.; Lead = 69·8 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

1253. ——. *Assoc.with* Minium, in lode. *Loc.* Mt. Moss Extended Lease (169), Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 14 oz. per ton; Lead = 44·7 per cent.; Gold = trace; (2) Silver = 14 oz.; Lead = 62·5 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

1254. ——. *Assoc.with* Malachite. *Loc.* Pinnacle Mine, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.M.

1255. ——. *Assoc.with* Manganese-dioxide, in lode. *Loc.* Red Rover Lease (179), Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 4 oz. per ton; Lead = 31·1 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

1256. ——. *Assoc.with* Ironstone and Copper Carbonate, in lodes. *Loc.* Running River Lease (163), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 4 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

1257. ——. *Assoc.with* Copper Pyrites, Bornite, Tile Ore, Galena, Mispickel, and Hematite, in lode. *Loc.* Wallaroo Lease (162), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

1258. ——. *Assoc.with* Ironstone, Manganese-dioxide, and Copper Carbonate, in quartz lode. *Loc.* White Star Lease (160), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

1259. ——. *Assoc.with* Galena, Anglesite, Linarite, Minium, and Pyromorphite, in lode. *Loc.* Alpha Silver Mine, **Star R.** (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Assays:* (1) Silver = 107 oz. per ton.; Lead = 79 per cent.; (2) Silver = 5 oz. per ton; Lead = 20 per cent. *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

1260. ——. Beazley's Tunnel, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.M.

1261. ——. *Assoc.with* Minium, in lode. *Loc.* Ben Lomond Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay:* Silver = 234 oz. per ton; Lead = 27 per cent. *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

1262. ——. *Assoc.with* Minium, Anglesite, Massicot, and Ironstone. *Loc.* Bonanza Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

1263. ——. *Assoc.with* Mispickel. *Loc.* Bowden and Co's Sel. (147), Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

1264. ——. *Assoc.with* Minium. *Loc.* Cleopatra Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

1265. ——. *Assoc.with* Galena, Minium, Copper Pyrites, Malachite, Manganese-dioxide, Mispickel, Ironstone, and Iron Ochre. *Loc.* Colorado Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 7 (1886).

1266. ——. *Assoc.with* Minium and Galena, in ferruginous lode. *Loc.* Crœsus Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

1267. ——. *Assoc.with* Minium, Anglesite, and Ironstone, in ferruginous lode. *Loc.* Eureka Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

1268. ——. *Assoc.with* Lead Ochre and Ironstone, in lode. *Loc.* Excelsior Silver Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

1269. ——. *Assoc.with* Minium and Anglesite, in lode. *Loc.* Humphrey and Co.'s Silver Sel. (172), Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

1270. ——. *Assoc.with* Galena, Minium, Massicot, and Ironstone. *Loc.* John Bull Mine, Star R. (Argentine) Silver Field (*ante*). *Assay: See* No. 2986. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

1271. ——. *Assoc.with* Minium and Ironstone, in lode. *Loc.* Jones's Sel. 139, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

1272. ——. *Assoc.with* Anglesite and Minium. *Loc.* Lady Annie Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay:* Silver = 307 oz. per ton; Lead = 67 per cent. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

1273. ——. *Assoc.with* Minium, Lead, Gossan, and Ironstone, in lode. *Loc.* Morison's Sels. (165 and 166), Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

1274. ——. *Assoc.with* Minium and Galena, in lode. *Loc.* Nonpareil Silver-Lead Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 26 (1886).

1275. ——. *Assoc.with* Minium and Anglesite, in lode. *Loc.* Northbrook Mine, Beazley's Sel. (178), Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

1276. Cerussite. *Assoc.with* Minium, Galena, and Ironstone, in schistose rock. *Loc.* Overlander Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay:* Silver = 150 oz. per ton; Lead = 65 per cent. *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

1277. ——. *Assoc.with* Minium, in gossan. *Loc.* P.F. Hannan Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

1278. ——. *Assoc.with* Galena and Minium, in lode. Prince of Wales Silver-Lead Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

1279. ——. *Assoc.with* Minium and Malachite, in gossan lode. *Loc.* Royal Standard Silver Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

1280. ——. *Assoc.with* Galena and Massicot, in lode. *Loc.* Silver Sel. (169), Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

1281. ——. *Assoc.with* Galena, Minium, Anglesite, and Ironstone. *Loc.* St. John's Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

1281A.——. *Assoc.with* Siderite, Pyrolusite, and Ironstone. *Loc.* Struck Oil Freehold, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886), and L.B. 1, p. 888 (1887).

1282. ——. *Assoc.with* Galena, Minium, and Anglesite, in ferruginous lode. *Loc.* True Blue Silver-Lead Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay:* Lead = 72 per cent.; Silver = 68 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

1283. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Anglesite, Minium, Siderite, and Zinc-Blende, in gossan. *Loc.* Union Silver Mine, Star R. (Argetine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

1284. ——. *Assoc.with* Galena, Anglesite, and Minium, in lode. *Loc.* Venture Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay:* Silver = 82 oz. per ton; Lead = 68 per cent. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

1285. ——. *Assoc.with* Galena, Anglesite, Minium, Massicot, and Ironstone. *Loc.* Washington 1 and 2 Silver Mines, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

1286. ——. *Assoc.with* Galena, Copper Pyrites, Iron Pyrites, Azurite, Malachite, Mispickel, and Zinc-Blende, in lode outcrop. *Loc.* Mt. Barker Silver Mine, 3 miles N. of Eungella Stn., 33 miles W. of Mirani Rail.-Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pubs. 54, p. 3 (1889), and 181, pp. 12-17 (1903).

1287. ——. *Assoc.with* Minium and Mispickel, in quartz lode. *Loc.* Long Hill Gold and Silver Mine, Spur of Coast Range, Scrubby Cr., 9 miles S. of Mackay. *Co.* Carlisle (*ante*). *Assays:* (1) Lead = 42 per cent.; Silver = 19 oz. per ton; (2) Lead = 6 per cent.; Silver = 5 oz. per ton; (3) Silver = 28 oz.; Gold = 7 dwt. per ton. *Ref.* G.S.Q. Pub. 39, p. 10 (1887).

1287A.——. *Assoc.with* Silver, Galena, and Anglesite, in lode. *Loc.* Black Cr., br. of Police Cr., about 30 miles S.byE. of Mt. Wyatt Goldfield. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* A.R., p. 221 (1910).

1288. ——. *Assoc.with* Galena, Iron Pyrites, and Zinc-Blende, in lode. *Loc.* Bonnie Dundee Mine, Sellheim Mineral Field, 92 miles S.W.byS of Bowen. *Co.* Sellheim (*ante*). *Assays:* (1) Lead = 43·89 per cent.; Silver = 38 oz. per ton; (2) Lead = 44·85 per cent.; Silver = 37 oz. per ton; Gold = trace. *Ref.* G.S.Q, Pub. 57, p. 6 (1889).

1289. ——. *Assoc.with* Galena, Minium, Copper Pyrites, Iron Pyrites, Zinc-Blende, and Clay, in lode. *Loc.* General Gordon Mine, Sellheim Mineral Field (*ante*). *Assays:* (1) Lead = 54·96 per cent.; Silver = 45 oz. per ton; Gold = trace; (2) Lead = 41·91 per cent.; Silver = 43 oz. per ton. *Ref.* G.S.Q. Pub. 57, p. 6 (1889).

1290. ——. *Assoc.with* Galena, Minium, and Clay, in lode. *Loc.* New Year's Gift Mine, Two-mile Cr., Sellheim Mineral Field (*ante*). *Assays:* Silver = 244 oz. per ton; Lead = 34·61 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 37, p. 7 (1889).

1291. ——. *Assoc.with* Galena, Anglesite, Minium, Iron Pyrites, Ironstone, and Zinc-Blende, in lode. *Loc.* Pyramid Mine, Sellheim Mineral Field (*ante*). *Assays:* Silver = 71 oz. per ton; Lead = 58·45 per cent. *Ref.* G.S.Q. Pub. 57, p. 3 (1889).

1292. ——. *Assoc.with* Silver, Galena, Minium, Iron Pyrites, Ironstone, and Zinc-Blende, in lode. *Loc.* Rob Roy Mine, Sellheim Mineral Field (*ante*). *Assays:* *See* No. 3017. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

1293. ——. *Assoc.with* Silver, Galena, and Minium, in lode. Silver King Mine, Sellheim Mineral Field (*ante*). *Assays:* Lead = 61·86 per cent.; Silver = 40 oz. 16 dwt. 18 gr. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

1294. ——. *Assoc.with* Galena and Minium, in quartz lode in sandstone. *Loc.* E. of Mt. Clarke, Mt. Britton Goldfield, 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* **Leichhardt.** *Assay:* Silver = 130 oz. per ton. *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

1295. ——. *Assoc.with* Gold. Iron Pyrites, Massicot, Cassiterite, Bismuth, and Calcite, in kaolinised greisen. *Loc.* Snowdrop P.A., Mt. Langan, Emu Cr., 14½ miles W.N.W. of Kannungar, Brisbane-Valley Rail. Line. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* L.C.B.

1296. ——. *Assoc.with* Massicot, Iron Pyrites, Mispickel, Wolfram, and Scorodite. *Loc.* Plant's Leasehold, 4 miles E. of Crow's Nest, 38 miles (by rail and road) N.N.E. of Toowoomba. *Co.* Cavendish; *Dist.* Moreton. *Ref.* A.R., pp. 148-149 (1908).

1297. ——. *Assoc.with* Gold, Silver, Minium, Massicot, Anglesite, Galena, Hematite, and Limonite, in lode. *Loc.* Bompa Silver-Lead Mine, Glassford Cr., 2 miles W.ofS. of Littlemore Rail. Stn. (Boyne Valley line), 53 miles (by rail and road) S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 159, p. 7 (1901).

1298. ——. *Assoc.with* Pyromorphite and Altaite, in quartz. Five miles from Maxwelton, 40 miles S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* O.R.

1299. ——. *Assoc.with* Silver, Cuprite, Tenorite, Malachite, Iron Pyrites, Barytes, and Zinc-Blende, in serpentinous shales. *Loc.* Mt. Warminster Copper-Lead Mine, nr. Mt. Chalmers, 20 miles (by rail) N.E. of Rockhampton, Central Rail., Cawarral Goldfield. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* B.D.

1300. ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Magpie Lode, Carmilla Mine, Connor's Range, 32 miles N.N.W. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Assay:* Gold = 1 dwt. 15 gr. per ton; Silver = 9 oz. 5 dwt. 5 gr. per ton. *Ref.* G.S.Q. Pub. 141, p. 5 (1898).

Cervantite. *Compo.* Oxide of Antimony. *Colour,* usually yellowish. *Lustre,* greasy. *Streak,* yellowish white. *H.* = 4-5. *Sp.gr.* = 4. *Contents* (*max.*), Antimony 80 per cent.

1301. ——. *Assoc.with* Stibnite and Valentinite. *Loc.* St. John's Cr. Goldfield, Burnett R., 16 miles S.W. of Eidsvold. *Co.* Wicklow; *Dist.* **Burnett.** *Ref.* P.R.S.Q., vol. 4, p. 45 (1887).

1302. ——. On ridge, nr. First Call Lode, No. 1, Cocoa Cr., trib. of McIvor R., 33 miles N.N.W. of Cooktown. *Co.* Banks; *Dist.* **Cook.** *Refs.* G.S.Q. Pubs. 91, p. 4 (1893), 209, pp. 6, 7 (1907), and 223, pp. 23 and 24 (1909).

1303. ——. *Assoc.with* Stibnite. *Loc* Cocoa Cr., trib. of McIvor R. (*ante*). *Ref.* G.S.Q. Pubs. 209, p. 6 and 223, pp. 23, 24 (1909).

1304. ——. *Assoc.with* Gold and Stibnite. *Loc.* Starcke R., 22 miles N.W. of Cooktown. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.M.

1304A.——. *Assoc.with* Gold, Iron Pyrites, and Stibnite, in quartz. *Loc.* Craig's Antimony Lease, Emily Reef, Northcote, Hodgkinson Goldfield, 15 miles W. of Mareeba Rail. Stn. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 16, 1885, and 125, p. 48 (1897).

1305. ——. *Assoc.with* Gold, Stibnite, and Iron Pyrites. *Loc.* Emily Antimony Lode, Northcote, Hodgkinson Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 16, p. 31 (1884), and 125, p. 48 (1897).

1306. ——. *Assoc.with* Stibnite. *Loc.* Nil Desperandum Mine, Watsonville, 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.M.

1307. ——. *Assoc.with* Stibnite. *Loc.* Silver Spur Mine, nr. Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* **Darling Downs.** *Assays:* (1) Gold = trace; Silver = 9 dwt. 13 gr. per ton; Antimony = 80·2 per cent.; Gold = 4 dwt. 9 gr.; Silver = 4 dwt. 19 gr.; Antimony = 39·9 per cent. *Ref.* A.R., p. 68 (1906).

1307A.——. *Assoc.with* Stibnite, in silicified slate. *Loc.* Homestead Diggings, 46 miles (by rail) W.S.W. of Charters Towers, Gt. Northern Rail. *Co.* Griffith; *Dist.* **Kennedy North.**

1308. ——. *Assoc.with* Stibnite. *Loc.* 3 miles W. of Homestead, 49 miles (by rail and road) W.S.W. of Charters Towers. *Co.* Griffith (*ante*). *Ref.* A.R., p. 67 (1906).

1309. ——. *Assoc.with* Stibnite, in quartz lode 18 in. thick. *Loc.* 7 miles from Aramara Rail. Stn. (Gayndah line), 39 miles (by rail and road) W. of Maryborough. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* B.D.

1310. Cervantite. *Assoc.with* Gold, Iron Pyrites, and Stibnite. *Loc.* Yorkey's Surprise G.M. Lease and Zealandia G.M. Lease, in the Surprise Zealandia Quartz Reef, Yorkey's Goldfield, 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 14 (1902).

1311. ——. *Assoc.with* Stibnite and Gold (traces), in calcite lode. *Loc.* Gympie Antimony Mine, nr. Sel. 3482, Chatsworth Scrub, 7 miles N.W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* B.D.

1312. ——. *Assoc.with* Stibnite. *Loc.* Neerdie Antimony Mine, 14 miles N.byE. of Gympie. *Co.* March (*ante*). *Ref.* G.S.M.

Cette Is. (*See also* Einauro Is.), Brit. New Guinea. *Min.Ref.* Limestone, *see* 702,

Ceylonite. *Var.* of Spinel, *which see.*

Chabazite. *Compo.* Silicate of alumina and lime. *Colour,* usually white. *Lustre,* vitreous. Brittle. *H.* = 4·5. *Sp.gr.* = 2·0-2·1.

1312A.——. In decomposed basalt. Freestone Cr., N. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* B.D.

1313. ——. In basalt. Peak Downs (Clermont) Goldfield, 229 miles W.byN. of Rockhampton (Clermont Br. Rail.). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 4, p. 69 (1887).

1314. ——. *Assoc.with* Augite. *Loc.* Mt. Drew, 85 miles N.N.W. of Port Moresby. Brit. New Guinea.

——. **Phacolite** (*Var.*). Crystals, colourless and lenticular.

1315. —— ——. *Assoc.with* Calcite, Ferro-Calcite, and Natrolite, in basic volcanic tuff. *Loc.* Railway Cutting, between Spring Bluff and Harlaxton Rail. Stns., 5 miles N. of Toowoomba. *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* B.D.

1316. —— ——. *Assoc.with* Calcite, Magnesite, and Natrolite. *Loc.* Pors. 27 and 81v., Mt. Davidson, 5 miles S.S.E. of Toowoomba. *Co.* Churchill; *Dist.* Moreton.

Chalcanthite. *Syn.* Blue Vitriol, Copper Vitriol. *Compo.* Sulphate of copper. *Colour,* blue shades. *Lustre,* vitreous. *Streak,* colourless. Soluble in water. *H.* = 2·5. *Sp.gr.* = 2·2.

1317. ——. In the old workings, Golden Gate Reef, 4 miles N.W. of Croydon. *Co.* Surrey; *Dist.* **Burke.** *Ref.* B.D.

1318. ——. *Assoc.with* Gold, Tetrahedrite, Cuprite, Azurite, Malachite, and Ironstone, in lodes in gneiss and schist. *Loc.* Arbouin Mines, nr. Nondah Cr., Walsh R., 18 miles W. of Mungana, Chillagoe Rail. *Co.* Bulwarra; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 134, pp. 13 and 14 (1898).

1319. ——. *Assoc.with* Copper Pyrites and Copper Carbonate. *Loc.* Electron Silver Mine, Caledonia Cr., nr. Goldsmith Cr., 26 miles S.S.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

1320. —— (stalactitic). Montalbion Mine, 7 miles S.W. of Stannary Hills (Chillagoe Br. Rail.), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook.

1321. ——. *Assoc.with* Copper Pyrites and Marcasite. *Loc.* Chance Tin Mine, Watsonville, head of James Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills (Chillagoe Br. Rail.), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

1322. ——. *Assoc.with* Cassiterite, Wolfram, Iron Pyrites, Fluorspar, and Chlorite, in diorite dyke. *Loc.* Glencairn Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 23 (1883), and p. 125, p. 40 (1897).

1323. —— (stalactitic). *Assoc.with* Copperas. *Loc.* North Australian Mine, Watsonville (*ante*). *Ref.* G.S.M.

1324. ——. *Assoc.with* Copper Pyrites. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

1325. ——, *Assoc.with* Copper Pyrites, Copper Carbonate, Iron Pyrites, Mispickel, Marcasite, Cassiterite, Wolfram, Limonite, and Red and Yellow Ochre. *Loc.* Try Again and Chance Mine, Watsonville ((*ante*). *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

1326. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Azurite. *Loc.* Wyatt's Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

1327. ——. *Assoc.with* Gold, Cuprite, Tile Ore, Tenorite, Malachite, Atacamite, Iron Pyrites, Limonite, Calcite, and Chalcedony, in kaolinised slate and gossan. *Loc.* Mt. Elliott Copper Mine, Mt. Elliott Group, Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 3-12 (1908).

1328. ——. *Assoc.with* Galena, Minium, Anglesite, Massicot, and Limonite, in slate. *Loc.* John Bull Mine, Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

1329. ——. *Assoc.with* Copper Pyrites, Cassiterite, and Mispickel, in elvan dyke and quartz. *Loc.* Ironclad Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 8 (1883).

1330. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Bornite, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, Mispickel, Hematite, Magnetite, Zinc-Blende, Cerussite, and Minium, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mine, Return Cr., br. of Wild R., 136 miles (by rail) S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 16, 19 (1898).

1331. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, Magnetite, Limonite, Manganese-dioxide, and Talc, in quartz and porphyry. *Loc.* Mt. Leyshon, 16 miles S. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pubs. 18, pp. 1, 2, (1885), and 73, p. 13 (1891).

1332. ——. *Assoc.with* Copper Pyrites. *Loc.* Black Jack Mine, Ravenswood Goldfield, 78 miles (by rail) S. of Townsville (Northern line). *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

1333. ——. *Assoc.with* Copper Pyrites. *Loc.* Bonnet Reef, Strathalbyn Goldfield, Burdekin, 30 miles E.byS. of Ravenswood. *Co.* Gladstone (*ante*). *Ref.* G.S.M.

1334. ——. *Assoc.with* Copper Pyrites, Azurite, and Malachite, in quartz reef in granite. *Loc.* Continong Mine, Burdekin R., 70 miles W. of Townsville. *Co.* O'Connel; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 35, p. 12 (1887), and G.S.M.

1335. ——. *Assoc.with* Gold, Copper Pyrites, Bornite, and Copperas, in diorite. *Loc.* Mt. Clifford Mine, between Retreat and Ruby Creeks, 9½ miles N.W. of Anakie (Central Rail.). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 127, p. 2 (1898).

1336. ——. *Assoc.with* Gold, Copper Pyrites, Orthoclase, and Calcite, in quartz. *Loc.* Red Streak Reef, Yatton Goldfield, 20 miles S.W.byW. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

Chalcedony. *Compo.*, Silica, in a crypto-crystalline form. *Colour*, usually white. *H.* = 7. *Sp.gr.* = 2·6.

VARIETIES: Agate, Bloodstone, Carnelian, Chrysoprase, Hornstone, Lithophyses, Onyx, Prase, Sardonyx.

MINERAL NOTE: Up to the present time none of the chalcedony varieties, except chrysoprase, have been utilized as gems or ornamental stones. Chrysoprase of a very beautiful apple-green colour is found in alluvial drifts and in small veins about Princhester and Marlborough, to the north of Rockhampton. Lithophyses, of scientific interest, are found in abundance at Mt. Hay, near Wycarbah, Central Queensland Railway.

1336A.——. Dismal Cr., Canobie Run, about 84 miles N. of Cloncurry. *Co.* Canobie; *Dist.* **Burke.** *Ref.* G.S.M.

1337. ——. *Assoc.with* Gold, in quartz and ironstone. *Loc.* Saracinesca Reef, between Rose and Thistle Reef and Soldier's Cap, 24 miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 4 (1895).

1338. ——. *Assoc.with* Iron Pyrites, Limonite, and Jasper. *Loc.* Dreadnought M.L. (452), Mt. Metallic Group, Prospector Cr., Leichardt R., 52 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 299 (1908).

1339. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, Magnetite, Mispickel, Native Bismuth, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, and Epidote. *Loc.* Biggenden Mine, Mt. Biggenden, 4½ miles W. of Biggenden, 58 miles (by rail and road) W. of Maryborough, Gayndah Br. Rail. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pubs. 60 (1890), p. 173, p. 2 (1902), and p. 194 (1904), and G.S.M.

1340. ——. *Assoc.with* Sapphire and Rock Crystal, in alluvial deposits. *Loc.* Rossville Tin Mines, Wallaby Cr., trib. of Annan R., 25 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* **Cook.** *Ref.* O.R.

1341. ——. McGann Range, 5 miles N.N.E. of Thornborough, Hodgkinson Goldfield. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 4 (1885).

1342. ——. Mt. Robert Range, 5 miles S.S.E. of Thornborough, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 4 (1887).

1343. Chalcedony. *Assoc.with* Gold, Cuprite, Tile Ore, Tenorite, Malachite, Chalcanthite, Iron Pyrites, Limonite, and Calcite, in kaolinised slate and gossan. *Loc.* Mt. Elliott Copper Mine, Mt. Elliott Group, Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 3-14 (1908).

1344. ——. *Assoc.with* Gold, Iron Pyrites, and Calcite, in quartz. *Loc.* North Australian Reef, Charters Towers, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 36 (1887).

1345. ——. Lake Lucy, Upper Burdekin, 112 miles N.W. of Townsville. *Co.* Gunnawarra; *Dist.* Kennedy North. *Ref.* G.S.M.

1345A.——. *Assoc.with* Gold, Jasper, Lydianstone, Zircon, and Sapphire, in alluvial deposits. *Loc.* 14v, Bunerba, ½ mile S. of Don R., about 39 miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* Q.G.M. Jour., vol. 5, pp. 610, 611 (1904).

1346. ——. Mt. Macedon Range, 75 miles S.W.byW. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1347. ——. Mt. Toussaint Range, 45 miles S.W. of Bowen. *Co.* Salisbury (*ante*). *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1348. ——. Pelican Cr., trib. of Bowen R., 50 miles S.W. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1349. ——. In porphyry. Bowen R., below Blenheim Stn., 64 miles W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 54, p. 5 (1889).

1350. ——. *Assoc.with* Agate, Calcite, and Laumonite, in basic igneous rocks. *Loc.* Mt. McGregor, 2½ miles S.E. of Mt. Toby, W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, p. 15 (1901).

1350A.——. *Assoc.with* Gold, Ilmenite, Magnetite, Rutile, Sapphire, Diamond, Spinel, Amethyst, Garnet, Zircon, Cairngorm, Jasper, Topaz, Magnesite, Tourmaline, and Hornblende, in alluvial deposits. *Loc.* Retreat, Sheep Station, Policeman, Tomahawk, and Central Crs., Anakie Sapphire Field. *Cos.* Clermont and Plantagenet; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pubs. 81 (1892), 125 (1897), and 172 (1902).

1351. ——. Springsure, 206 miles (by rail) W.S.W. of Rockhampton. *Co.* Denison; *Dist.* Leichhardt. *Ref.* P.R.S.Q., vol. 4, p. 63 (1887).

1352. ——. In basalt. Blackall Range, 5 miles W. of Yandina, 74 miles (by rail and road) N. of Brisbane, North Coast Rail. *Co.* Canning; *Dist.* **Moreton.** *Ref.* Q.M.

1353. ——. Mt. Sylvia, 12 miles S. of Gatton Rail. Stn. (Main line), 61 miles (by rail and road) W. of Brisbane. *Co.* Churchill; *Dist.* Moreton. *Ref.* L.C.B.

1354. ——. *Assoc.with* Limestone, Hornstone, and Chert. *Loc.* Limestone Hill, Ipswich, 24 miles (by rail) W.S.W. of Brisbane (Main line). *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.M., B.D., and G.S.Q. Pub. 194, p. 58 (1904).

1355. ——. In petrified wood. Mt. Phillipson, North Pine, 17 miles (by rail) N. of Brisbane (North Coast line). *Co.* Stanley (*ante*). *Ref.* L.C.B.

1356. ——. In basalt. Pine Mt. Road, ¼ mile N. of Muirlea Rail. Stn. (Brisbane-Valley line), 5 miles N.N.W. of Ipswich. *Co.* Stanley (*ante*). *Ref.* L.C.B.

1357. ——. In tuffaceous shales. Redcliffe, Moreton Bay, 26 miles N.N.E. of Brisbane. *Co.* Stanley (*ante*). *Ref.* B.D.

1358. ——. Cliffs nr. beach, Sandgate, 13 miles (by rail) N.byE. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* Q.M.

1359. ——. Cliffs nr. beach, Scarborough, about 25 miles (by rail and road) N.N.E. of Brisbane. *Co.* Stanley (*ante*). *Ref.* Q.M.

1359A.——. *Assoc.with* Common Opal, in ferruginous clay. *Loc.* Railway Cutting, Tingalpa Cr., nr. Hemmant Rail. Stn., 10½ miles (by rail and road) E.byN. of Brisbane. *Co.* Stanley (*ante*). *Ref.* B.D.

1360. ——. In porphyry. Christmas Cr., Beaudesert, 47 miles (by rail) S.byE. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.M.

1361. ——. *Assoc.with* Gold, Magnesite and Serpentine, in gossan. *Loc.* Oaks View Consld. Mine, Oaks View, 4 miles N. of Oaks Stn., 45 miles (by road) N.N.W. of Rockhampton. *Co.* Liebeg; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 205, pp. 16, 17 (1906).

1362. ——. *Assoc.with* Agate, in volcanic tuff and pitchstone. *Loc.* Mt. Hay, 1 mile from Wycarbah Rail. Stn. (Central line), 25 miles (by rail and road) W.S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 47, p. 6 (1889).

1363. —— Stewart's Cr. and Bushley, near Stanwell, about 22 miles (by rail) S.W. of Rockhampton, on Central Rail. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1893).

1363A.—— (pseudomorph after Calcite). Dee Copper Mines, above Dundee, 20 miles S.S.W. of Mt. Morgan. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* B.D.

1363B.——. *Assoc.with* Carnelian, Agate, and Rock Crystal, in quartz. *Loc.* Gilmore Stn., head of Bulloo R., about 38 miles N. of Adavale. *Co.* Gowan; *Dist.* Warrego. *Ref.* O.R.

1364. ——. *Assoc.with* Gold, in cement. *Loc.* Moondilla Goldfield, 10 miles S. of Adavale, 90 miles (by rail and road) W.N.W. of Charleville Rail. Stn. (Western line). *Co.* McKinlay; *Dist.* Warrego. *Ref.* G.S.Q. Pub. 78, p. 1 (1891).

1365. ——. Mungar Junction, 48 miles (by rail) N. of Gympie, 13 miles (by rail) S.W. of Maryborough, North Coast Rail. *Co.* Marsh; *Dist.* **Wide Bay.** *Ref.* O.R.

1366. ——. *Assoc.with* Hornstone. *Loc.* Neighbourhood of Port Moresby, 380 miles N.byE. of Cooktown, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 85, p. 10 (1892).

——. **Agate** (*var.*). (Variegated Chalcedony).

1367. —— ——. In creeks, N. of Nanango, about 14 miles S.S.E. of Kingaroy Rail. Stn. (Kilkivan line). *Co.* Fitzroy; *Dist.* **Burnett.** *Ref.* O. and A., p. 101, and N.B.

1368. —— ——. Burnett R., about 50 miles W. of Bundaberg. *Co.* Yarrol, etc.; *Dist.* Burnett. *Ref.* Q.M.

1369. —— ——. Little R., br. of Gilbert R., 30 miles E. of Croydon. *Co.* Lang; *Dist.* Cook. *Ref.* G.S.Q. Pub. 196, p. 24 (1905).

1370. —— ——. *Assoc.with* Gold. *Loc.* Cameron's Leader, Upper Percy R., br. of Gilbert R., 60 miles S. of Georgetown, Etheridge Goldfield. *Co.* Percy; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 24 (1897).

1371. —— ——. Percy River, br. of Gilbert R., 60 miles S. of Georgetown (*ante*). *Ref.* G.S.Q. Pub. 196, p. 24 (1905).

1372. —— ——. Robertson Cr., head of Percy R. (*ante*). *Ref.* B.D.

1373. —— ——. Agate Creek, br. of Robertson R., 30 miles S. of Georgetown, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 63 (1887).

Note.—Large quantities of well-marked Agates are said to occur at the head of Agate Creek.

1374. —— —— (good specimens). Bellevue Stn., Mitchell R., 90 miles W. of Pt. Douglas. *Co.* Wrotham; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 61 (1900).

1375. —— ——. Bowen R., about 50 miles S.W. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1376. —— ——. Pelican Cr., br. of Bowen R., 50 miles S.W. of Bowen (*ante*).. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1377. —— ——. Mt. Macedon Range, N.W. boundary of Bowen Coal Field, nr. Mt. Toussaint. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1378. —— ——. Mt. Toussaint Range, 45 miles S.W. of Bowen. *Co.* Salisbury (*ante*). *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1379. —— ——. Cape Hillsborough, 18 miles N.W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 53, p. 9 (1889).

1380. —— ——. *Assoc.with* Laumonite and Calcite. *Loc.* Mt. McGregor, 2½ miles S.E. of Mt. Toby, W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, p. 6 (1901).

1381. —— ——. Muttaburra, 70 miles N.W. of Barcaldine Rail. Stn. (Central line). *Co.* Cumberland; *Dist.* **Mitchell.** *Ref.* L.B. 3, p. 479 (1894).

1382. —— ——. *Assoc.with* Chalcedony, in volcanic tuff and pitchstone. *Loc.* Mt. Hay, Wycarbah, 24 miles (by rail) S.W.byS. of Rockhampton. *Co.* Livingstone; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 47, p. 6 (1889).

1382A.—— ——. *Assoc.with* Carnelian, Chalcedony, and Rock Crystal, in quartz. *Loc.* Gilmore Stn., head of Bulloo R., about 38 miles N. of Adavale. *Co.* Gowan; *Dist.* Warrego. *Ref.* O.R.

——. **Bloodstone** (*var.*). *Syn.* Heliotrope. *Colour*, green, with small spots of red Jasper.

1383. —— ——. In creeks N. of Nanango, about 14 miles S.S.E. of Kingaroy (Kilkivan Rail. line). *Co.* Fitzroy; *Dist.* Burnett. *Ref.* O. and A., p. 101, and N.B.

Chalcedony. **Carnelian** (*var.*). *Syn.* Sard. *Colour,* clear red, yellow. Translucent.

1384. —— ——. In creeks N. of Nanango, about 14 miles S.S.E. of Kingaroy (Kilkivan Rail. line). *Co.* Fitzroy; *Dist.* **Burnett.** *Ref.* O. and A., p. 101, and N.B.

1385 —— ——. Tate R., between Koorboora and Ord Rail. Stns. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra or Lynd; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 61 (1900).

1386. —— ——. *Assoc.with* Agate, in vesicular basalt. *Loc.* Little R., br. of Gilbert R., 30 miles E. of Croydon. *Co.* Lang; *Dist.* Cook. *Ref.* B.D.

1387. ——. Wild R. (Upper Herbert R.), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 15, p. 64 (1900).

1388. —— ——. In acidic volcanic rock. Mt. Hay, nr. Wycarbah, about 24 miles W.S.W. of Rockhampton (Central line). *Co.* Livingstone; *Dist.* **Port Curtis.** *Ref.* B.D.

1388A. ——. *Assoc.with* Chalcedony, Agate, and Rock Crystal, in quartz. *Loc.* Gilmore Stn., head of Bulloo R., about 38 miles N. of Adavale. *Co.* Gowan; *Dist.* Warrego. *Ref.* O.R.

——. **Chrysoprase** (*var.*). *Colour,* apple green.

1389. ——. Marlborough, 60 miles N.W. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Ref.* Q.M.

1390. —— ——. Containing Nickel, in 4-inch vein. *Loc.* On range 1 mile E. of Broadsound Road, nr. Princhester, 50 miles N.W. of Rockhampton. *Co.* Liebeg (*ante*). *Ref.* G.S.M.

——. **Hornstone** (*var.*). Resembles flint, but more brittle.

1391. ——. Police Cr., trib. of Gregory R., 90 miles S.S.W. of Burketown. *Co.* Gregory; *Dist.* Burke. *Ref.* B.D.

1392. —— ——. Chalcedony. *Var.* Hornstone. Springsure, 206 miles (by rail) W.S.W. of Rockhampton (Central line). *Co.* Denison; *Dist.* **Leichhardt.** *Ref.* P.R.S.Q., vol. 4, p. 64 (1887).

1393. —— ——. *Assoc.with* Chalcedony, Chert, and Limestone. *Loc.* Limestone Hill, Ipswich, 34 miles (by rail) W.S.W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 194, p. 58 (1904), and G.S.M.

1394. —— ——. *Assoc.with* Chalcedony. *Loc.* Port Moresby, 380 miles N.byE. of Cooktown, Brit. New Guinea. *Ref.* G.S.Q. Pub. 85, p. 10 (1892).

——. **Lithophyses** (*var.*). A pseudomorph occurring in acidic volcanic rocks.

1395. —— ——. Square Top Mt., Cumkillenbar, 17 miles N.W. of Dalby. *Co.* Aubigny; *Dist.* Darling Downs. *Ref.* G.S.M.

1395A. —— ——. 9 inches in diameter, made up of banded Chalcedony. *Loc.* Tambourine Mt., 10 miles S.S.E. of Logan Village Rail. Stn. (Beaudesert line). *Co.* Ward; *Dist.* Moreton.

1396. —— ——. In pitchstone. *Loc.* Mt. Hay, nr. Wycarbah, 24 miles W.S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* B.D.

——. **Onyx** (*sub-var. of* Chalcedony). Flat-banded, with white and black; or white, brown, and black alternate layers.

1397. —— ——. Springsure, 206 miles (by rail) W.S.W. of Rockhampton (Central line). *Co.* Denison; *Dist.* Leichhardt. *Ref.* G.M.

——. **Prase** (*var.*). *Colour,* dull leek-green. Translucent.

1398. —— ——. In alluvial deposits in bed of creek *Loc.* Dargalong, 7 miles S. of Zilmanton Rail Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 60 (1900).

1399. —— ——. In diorite dyke. Stanthorpe, 207 miles (by rail) S.W. of Brisbane, on main line. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* P.R.S.Q., vol. 15, p. 63 (1900).

1400. —— ——. Sandy Cr. (?), 22 miles S.W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* B.D.

1401. —— ——. In diorite dyke. Cape R. Goldfield, 66 miles (by rail) S.W.byW. of Charters Towers (Northern line). *Co.* Griffith; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 15, p. 63 (1900).

1402. —— ——. Gladstone, 328 miles N.N.W. of Brisbane, North Coast Rail. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* Q.M.

——. **Sardonyx** (*sub-var. of* Chalcedony). Flat layers of red, alternating with others of white and brown, and sometimes black.

1403. —— ——. Barkly Tableland, about 164 miles W.byN. of Cloncurry. *Co.* Wonomo; *Dist.* Burke. *Ref.* Q.M.

1404. —— ——. Burnett River, about 50 miles W. of Bundaberg. *Co.* Yarrol; *Dist.* Burnett. *Ref.* Q.M.

Chalcocite. *Syn.* Redruthite, *which see.*

Chalcolite. *Syns.* Uran Mica, Torbernite, Copper-Uranite. *Compo.*, Phosphate of uranium and copper. *Colour*, shades of green. *Lustre*, pearly; micaceous. *H.* = 2-2·5. *Sp.gr.* = 3·5. *Contents* (*max.*), Uranium Oxide 61 per cent.

1405. ——. *Assoc.with* Cassiterite and small quantities of Pitchblende. *Loc.* Gladstone Mine, Eureka Cr., nr. Stannary Hills (Chillagoe Br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* B.D.

1406. ——. Watsonville, 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills (Chillagoe Br. Rail.), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1900).

1407. ——. *Assoc.with* Wolfram, Molybdenite, Bismutite, and Topaz, with traces of Hematite and Limonite, in small veins in a large quartz-topaz lode, in granite. *Loc.* Lappa Wolfram Lode, 2½ miles S.S.W. of Lappa Junction (Chillagoe line), 104 miles (by rail and road) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

1407A. ——. King George Mine, Fingertown, nr. Mt. Garnet. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* B.D.

Chalcopyrite. *Syn.* Copper Pyrites, *which see.*

Chalcostibite. *Syn.* Antimonial Copper Ore. *Compo.*, Sulphide of antimony and Copper. *Colour*, lead grey. *Streak*, black. Metallic. *H.* = 3-4. *Sp.gr.* 4·7. *Contents* (*max.*), Antimony 48 per cent., Copper 25 per cent.

1408. ——. *Assoc.with* Cuprite, Malachite, and Tetrahedrite, in lode formation. *Loc.* Copper Lode, Pumpkin Gully, 12 miles E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 4 (1885), and P.R.S.Q., vol. 4, p. 54 (1887).

Chalcotrichite. *Var. of* Cuprite, *which see.*

Chalk. *Var. of* Calcite, *which see.*

GEOLOGICAL NOTE: The only known occurrence of chalk is that in the Cretaceous Rocks of Western Queensland. The deposit, which is said to be several feet thick, has not been examined officially, but hand specimens show it to be composed of the remains of Infusoria.

Chalybite. *Syn.* Siderite, *which see.*

Chamberlain Bore. *See under* Artesian Bores. No. 240.

Charters Towers Goldfield—

Situation: *See maps,* Pls. 16, 17, 28. The town is 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. Centre about *Lat.* 20° 5′ S.; *Long.* 146° 18′ E.

Discovery: Gold was found early in 1872, by Messrs, Mosman, Clarke, and Fraser. A great "rush" took place in Aug., 1872.

Railway Base for Cape River, Windsor, and Carrington goldfields; Black Knob, Seventy-mile, Mt. Leyshon, and Lucky Creek gold workings; Stockyard Creek and Sandy Creek tin workings.

Population: 22,035 (estimated, 1910).

Rainfall: Yearly aver., 1902 to 1907, 25·41 inches. Wet days, 57.

Proclamation of Field: First gazetted, Aug. 29, 1872. Last alteration gazetted 4th September, 1912, as follows:—Commencing at the southern junction of the Ana-branch and the Burdekin River, and bounded thence by the Ana-branch upwards to its junction with Sandy Creek, by that creek upwards to its junction with the Southern Cross Creek; thence by that creek upwards to the north-east corner of Miner's Homestead No. 2503, by the northern boundary of that homestead and a line west eighty chains, by a line south to the Great Northern Railway line; thence southerly by a watershed to Jesmond Block; thence by the northern boundaries of that block, Windsor No. 4 Block, and portion 6v, parish of Bletchington, and the Seventy-mile Range south-easterly and north-easterly to Spring Creek No. 1 Block; thence by the western boundaries of that block and Cardigan Holding northerly to the northern bank of the Burdekin River; thence by the northern bank of that river north-westerly to a point north-easterly from the point of commencement; thence by a line south-westerly thereto.

Area: 393,600 acres (615 square miles).

Leases: Gold-mining leases in force, and applications for leases, 106; area, 2,177 acres. Mineral leases, and applications, 13; area, 331 acres. Miner's homesteads, and applications, 3,091; area, 18,902 acres (1912).

Principal Mining Centres: Charters Towers; Millchester.

Tin,	,,	,,	Pls. 38, 46, 46A.
Copper,	,,	,,	Pls. 39, 46, 46A.
Antimony,	,,	,,	Pls. 40, 46, 46A.

Charters Towers Goldfield—*continued*:

STATISTICAL NOTES: Greatest recorded annual gold yield (year 1899) = 319,572 fine ounces; value, £1,357,455. Smallest gold yield (1883) = 86,228 fine ounces; value, £366,273.

The yields fluctuated between 1883 and 1899, but gradually increased; those between 1899 and 1905 also fluctuated, but gradually decreased. Between 1905 and 1910 the annual yields have steadily increased, but the two last years show a considerable falling off.

Total yield of gold to end of 1912, 6,359,225 fine ounces; value, £27,012,253. This is equal to 35·92 per cent. of the whole gold production of the State, and 4·93 per cent. of that of Australia.

MINERAL REFERENCES: **Gold**, *see* 3880-3976; Lead (Galena), 2865-2921; Copper (Chrysocolla), 1525; (Copper Carbonate), 1913; (Copper Pyrites), 2216-2219; Arsenic (native), 99A; Zinc (Zinc Blende), 8116-8134; Iron (Iron Pyrites), 5145-5218; (Ironstone), 5549; (Mispickel), 6742-6743; (Pyrrhotite), 7159. Other Minerals—Apatite, 78; Barytes, 272, 273; Calcite, 497-500; Chalcedony, 1344; Chlorite, 1458, 1459; Gypsum, 4620, 4621; Plagioclase, 7071; Scolecite, 7359-7361; Selenite, 4643; Steatite, 7690.

GEOLOGICAL NOTE: The rocks on the field comprise granite, schists, slates, felsites, and diorites. The granite has disturbed and altered the sedimentary rocks, and dykes of felsite have intersected the granite, schists, and slates, all of which have been intruded by numerous dykes of diorite. Several richly gold-bearing quartz reefs have been formed subsequent to the intrusion of diorite, and are of very regular occurrence. *See* G.S.Q. Pub. No. 94 for details and map, and No. 224 for notes.

GEOLOGICAL PUBLICATIONS: *Reports*—Nos. 1 (1878), 2 (1878), 48 (1888), 94 (1893), *Map*—No. 142 (1898). "*Geol. of Queensland*"—No. 92 (1892). *See under* "Geol. Surv. Pub. List," *and also under* Gov. Min. Jour., Report Nos. 61, 118. Chemical Elements.—

Name.	Symbol.	Atomic Weight.	Specific Gravity.	Principal Source.
Aluminium	Al	27·1	2·58	Beauxite, Cryolite
Antimony	Sb	120·2	6·61 to 6·8	Stibnite
Argon	A	39·88	...	Atmosphere
Arsenic	As	74·96	3·70 (yellow); 4·713 (black); 5·727 (normal)	Mispickel
Barium	Ba	137·37	3·6	Barytes, Witherite
Beryllium (Glucinum)	Be	9·1	1·64	Beryl
Bismuth	Bi	208·0	9·78 to 9·823	Native Bismuth, Bismuthinite
Boron	B	11·0	2·45 (amorphous); 2·68 (crystalline)	Borax (native), Colemanite
Bromine	Br	79·92	3·188	Carnallite
Cadmium	Cd	112·4	8·65	Zinc-blende, Cadmium blende
Caesium	Cs	132·8	2·40	Lepidolite, Mineral Waters, Carnallite
Calcium	Ca	40·07	1·554	Limestone and fluoride
Carbon	C	12·0	1·57 (amorphous); 3·55 (diamond)	Graphite, Coal
Cerium	Ce	140·25	6·73	Allanite, Cerite, Monazite
Chlorine	Cl	35·46	2·45	Halite
Chromium	Cr	52·0	6·74	Chromite
Cobalt	Co	58·97	8·50	Asbolane, Smaltite
Columbium (*see* Niobium).				
Copper	Cu	63·57	8·945	Sulphides and Carbonates
Dysprosium	Dy	162·5	...	Yttrium Earths
Erbium	Er	167·7	Er_2O_3=8·64	Gadolinite
Europium	Eu	152·0	...	Erbium Earths
Fluorine	F	19·0	1·14 (Liquid)	Fluorspar
Gadolinium	Gd	157·3	...	Gadolinite
Gallium	Ga	69·9	5·96	Zinc Blende
Germanium	Ge	72·5	5·47	Argyrodite
Glucinum (*see* Beryllium).				
Gold	Au	197·2	19·3 at 15·5° C.	Native, Pyritic and other sulphide ores
Helium	He	3·99	...	Atmosphere, Pitchblende
Hydrogen	H	1·008	·0695	Water
Indium	In	114·8	7·42	Zinc-blende
Iodine	I	126·92	4·95	Kelp, Soda Nitre
Iridium	Ir	193·1	22·42	Osmiridium
Iron	Fe	55·84	7·84 to 8·139	Hematite, Limonite, Magnetite
Krypton	Kr	82·92	2·82	Atmosphere
Lanthanum	La	139·0	6·05	Monazite, Allanite
Lead	Pb	207·10	11·3	Galena
Lithium	Li	6·94	0·59	Lepidolite, Spodumene
Lutecium	Lu	174·0	...	Yttrium Earths
Magnesium	Mg	24·32	1·75	Magnesite, Carnallite
Manganese	Mn	54·93	8·0	Psilomelane, Pyrolusite
Mercury	Hg	200·6	14·193	Cinnabar
Molybdenum	Mo	96·0	9·01	Molybdenite
Neodymium	Nd	144·3		
Neon	Ne	20·2	0·691	Liquid Argon
Nickel	Ni	58·68	8·9	Noumeaite, Pyrrhotite
Niton	Nt	222·4	...	Radium Emanation
Niobium	Nb	93·5	7·06	Columbite
Nitrogen	N	14·01	0·967	Atmosphere
Osmium	Os	190·9	22·47	Osmiridium
Oxygen	O	16·0	1·1056	Atmosphere
Palladium	Pd	106·7	11·8	Native Platinum and Palladium
Phosphorus	P	31·04	1·83-2·34 (varies with condition)	Phosphate of Lime
Platinum	Pt	195·2	21·5	Native Platinum
Potassium	K	39·10	0·88	Carnallite, Kainite Sylvite, Potash Felspar
Praseodymium	Pr	140·6		

Chemical Elements—*continued.*

Name.	Symbol.	Atomic Weight.	Specific Gravity.	Principal Sources.
Radium	R	226·4	...	Pitchblende, Pilbarite, Carnotite
Rhodium	Rh	102·9	12·1	Platinum Group
Rubidium	Rb	85·45	1·52	Lepidolite, Mineral Waters, Carnallite
Ruthenium	Ru	101·7	12·26	Platinum Group, Laurite
Samarium	Sa	150·4	$Sa_2O_3 = 8·35$	Samarskite
Scandium	Sc	44·1	$Sc_2O_3 = 3·8$	Euxenite
Selenium	Se	79·2	4·28	Selenides
Silicon	Si	28·3	2·49	Quartz
Silver	Ag	107·88	10·1-11·1 (varies with condition)	Argentite, Galena, and other silver-lead ores; Native Gold
Sodium	Na	23·0	0·97	Halite
Strontium	Sr	87·63	2·5	Strontianite, Celestine
Sulphur	S	32·07	1·92-2·05 (varies with condition)	Native, Iron Pyrites
Tantalum	Ta	181·5	16·64	Mangano-tantalite
Tellurium	Te	127·5	6·26	Tellurides
Terbium	Tb	159·2	..	Yttrium Earths
Thallium	Tl	204·0	11·9	Lorandite, Crookesite
Thorium	Th	232·4	11·0	Monazite, Thorite, Thorianite
Thulium	Tm	168·5	..	Erbium Earths
Tin	Sn	119·0	7·2	Cassiterite
Titanium	Ti	48·1	3·5 (amorphous); 4·87 (crystalline)	Rutile, Ilmenite
Tungsten	W	184·0	19·13	Wolfram, Scheelite
Uranium	U	238·5	18·7	Pitchblende, Pilbarite
Vanadium	V	51·06	5·5	Carnotite, Vanadinite
Xenon	Xe	130·2	3·52	
Ytterbium	Yb	172·0	$Yb_2O_3 = 9·175$	Gadolinite
Yttrium	Y	89·0	$Y_2O_3 = 5·046$	Yttrocerite, Gadolinite, Monazite
Zinc	Zn	65·37	6·9 to 7·2	Zinc Blende
Zirconium	Zr	90·6	4·2 (amorphous); 5·3 (crystalline)	Zircon

Chillagoe—*continued.*

GEOLOGICAL NOTE: The rocks in the district are granite, schists, limestone, and garnet rock. Between the granite and the limestone the garnet rock occurs as an alteration product. Caves have been formed in the limestone in past ages, which subsequently have been filled with irregular deposits containing gold, silver, copper, and iron. These deposits with others of regular lode formation are now being worked. *See* G.S.Q. Pubs. Nos. 119, 134, 143 *for details. Note.*—From the occurrence of Halysites, a fossil coral, the limestones are considered to be Silurian.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 69 (1890), 119 (1897), 134 (1898). Map No. 220 (1909). *See under* Geol. Surv. Pub. List for title. *See also under* Govt. Mining Jour., Report No. 71. *Also see* Supplementary Report List, Nos. 82, 96.

MINING CENTRES, ETC.: *See under* Chillagoe Gold and Mineral Field.

GENERAL INFORMATION: *Same as under* Charters Towers.

LOCAL NEWSPAPERS: *The Standard, The Walsh and Tinaroo Miner.*

Chillagoe Caves, Calcifer. *Min.Ref.* Dog-tooth Spar, *see* 568; Satin Spar, 606; Stalactitic Calcite, 607; Stalagmitic Calcite, 612.

—— Cr., 6 miles S.byW. of Calcifer. *Min.Ref.* Atacamite, *see* 130; Lazulite, or Lapis Lazuli, 5722.

Chillagoe Gold and Mineral Field.

SITUATION: *See under* Chillagoe. *Cos.* Bolwarra, Dagmar, Hodgkinson, Lynd, Tate, and Wrotham; *Dist.* Cook. Centre about *Lat.* 17° 17′ S.; *Long.*, 144° 33′ E.

POPULATION: 5,345 (Warden's Estimate, 1910).

AREA: 6,144,000 acres = 9,600 square miles.

LEASES: Gold-mining leases and applications in force, 12; area, 173 acres. Mineral leases and applications, 208; area, 3,158 acres. Miners' homesteads, 424; area, 2,346 acres (1912).

PROCLAMATION OF FIELD: First (and only one) gazetted, 13th October, 1909, as follows:—Commencing at the confluence of the Walsh and Mitchell Rivers, and bounded thence by a line south to the north boundary of Eveleigh Block, by parts of the north and east boundaries of that block, the north and part of the east boundaries of Eveleigh No. 5 Block, the north and east boundaries of Eveleigh No. 4 Block; thence easterly by the northern boundaries of Brooklands No. 1, Fixby, Fixby No. 2, Springfield, and Fossilbrook Blocks, by part of the west, the northern, and eastern boundaries of St. Ronans Block, the east boundary of St. George Block, and by a line south to the Great Dividing Range, by that range northerly to where it is crossed by the Mount Garnet Railway; thence by that railway north-westerly to the Chillagoe Railway at Lappa Junction, by the Chillagoe Railway north-easterly to where it crosses the Great Dividing Range near the 11-mile peg from Mareeba Junction; thence by the said range northerly to the watershed between the Mitchell and Hodgkinson Rivers, by that watershed north-westerly of the eastern boundary of Cudgee Cudgee No. 1 Block, by part of that boundary southerly and the southern and western boundaries of same block westerly and northerly to the Mitchell River, by that river downwards to the McLeod River, by the McLeod River upwards to the south-east corner of Telgijah Block, by the east boundary of that block and by a line north to the south-eastern watershed of the St. George River, by that watershed westerly to the Mitchell River, and by that river downwards to the point of commencement.

MINING CENTRES: Almaden, Arbouin, Ashtonville, Bamford, Calcifer, Chillagoe, Fossilbrook, Kingsborough, Koorboora, Lancewood, Lappa Lappa, Mitchell River, Muldiva, Mungana, Northcote, O.K., Parada, Redcap, Tate River, Thornborough, Truxillo, Wolfram Camp, Woodville, Zillmanton, *which see.*

MINERAL STATISTICS: *See under* Chillagoe.

GEOLOGICAL PUBLICATIONS: *See under* Chillagoe.

WARDEN: Stationed at Chillagoe. INSPECTOR OF MINES: Stationed at Herberton.

REPORTS: Inspector's and Warden's monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

SMELTING WORKS: *See* under separate heading.

Chisholm's Bore. *See under* Artesian Bores. No. 272.

Chlorides: copper, *see* Atacamite; lead, Matlockite, Mimetite; silver, Cerargyrite; soda, Halite; ammonia, Sal Ammoniac.

Chlorine (Cl). *Atom.Wt.* = 35·46. *Sp.gr.* = 2·45. *Preparation.*—Chlorine is prepared electrolytically, or by heating manganese dioxide with hydrochloric acid. *Uses.*—It is largely used in the preparation of bleaching powder and disinfectants. *Compounds.*—Combines readily with hydrogen, to form hydrochloric acid, and with metals, to form chlorides, some of which are mentioned above.

MINERALS: *See* Chlorides above.

Chlorite. A general term for a large group of non-metallic minerals of indefinite composition, but which are soft, fine-grained, and greenish, and, when forming rock masses, are slaty or schistose in structure.

1418. ——. *Assoc.with* Redruthite, Azurite, Malachite, Ilmenite, Ironstone, Calcite, and Biotite, in granite, quartz, felspar, and schist. *Loc.* Mavis M.L. (315), Longamundi Group, Dugald R., between 34 and 39 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, pp. 283, 284 (1908).

1419. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Cassiterite, Galena, and Zinc-Blende. *Loc.* Brilliant P.C., on Croydon-Esmeralda road, Stanhills Tinfield, between 12 and 32 miles S.E. of Croydon. *Co.* Esmeralda; *Dist.* Burke. *Ref.* G.S.Q. Pub. 211, p. 6 (1907).

1420. ——. *Assoc.with* Cassiterite, in granite and greisen. *Loc.* Douglas Mine, 10-Mile Cr., Stanhills Tinfield (*ante*). *Ref.* G.S.Q. Pub. 211, p. 9 (1907).

1421. ——. *Assoc.with* Azurite, Malachite, and Chrysocolla, in quartzite, quartz, and gossan. *Loc.* Caine's King (M.L.) 577, Columbiad Group, Duck Cr., nr. Mt. Start, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 142 and 143 (1908).

1422. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, Limonite, Calcite, Actinolite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group, 1½ miles N.N.W. of Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

1423. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, and Calcite, in chloritic schist, gossan, and quartzite. *Loc.* Eva Extd. M.L. (283), Eva Group, 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 155 (1908).

1424. ——. *Assoc.with* Limonite and Calcite, in quartz. *Loc.* Block (25), M.L. (421), Hampden Group, 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 62 (1908).

1424A.——. *Assoc.with* Gold, Copper (native), Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, and Selenite, in quartz, quartzite, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub., pp. 219-224 (1908).

1425. ——. *Assoc.with* Gold and Magnetite (?). *Loc.* Iron Duke Reef, Croydon Goldfield, 94 miles (by rail) S.E. of Normanton. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 35, p. 9 (1887).

1426. ——. *Assoc.with* Gold, Ironstone, and Graphite (impure), in quartz. *Loc.* Sir Walter Reef, ½-mile E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

1427. ——. *Assoc.with* Tourmaline and Olivine, in altered rock. *Loc.* No. 1 Cutting, Biggenden Mine, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 60, p. 1 (1890).

1428. ——. *Assoc.with* Turgite. *Loc.* On hill, 1 mile N.E. of junction of Cadarga and Auburn Rivers. *Co.* Newcastle; *Dist.* Burnett. *Ref.* L.C.B.

1429. ——. *Assoc.with* Cassiterite, Tourmaline, and Mispickel, in quartz. *Loc.* Dodd's Tin Claim, nr. head of Byer's Gully, trib. of James's Cr., 20 miles S. of Cooktown. *Co.* Banks; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

1430. ——. *Assoc.with* Cassiterite and Turgite. *Loc.* Black Rock Extd. Mine, Eureka Cr., nr. Stannary Hill, Chillagoe Br. Rail., Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 39 (1897).

1431. ——. *Assoc.with* Cassiterite. *Loc.* Eclipse Mine, Eureka Cr., Stannary Hills (*ante*). *Ref.* G.S.Q. Pub. 125, p. 45 (1897).

1432. ——. *Assoc.with* Cassiterite and Bismuthinite. *Loc.* Gt. Southern Mine, Irvinebank, 12 miles W.S.W. of Herberton, 10 miles S.W. of Stannary Hills, Chillagoe Br. Rail., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 47 (1897).

1433. ——. *Assoc.with* Cassiterite and Bismuth. *Loc.* Vulcan Tin Mine, Irvinebank (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 54 (1900).

1434. ——. *Assoc.with* Cassiterite, Rock Crystal, and Mica, in quartz lode. *Loc.* Just-in-Time Mine, nr. Ragged Cr., Montalbion, 7 miles S.W. of Stannary Hills, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 119, p. 33 (1897).

1435. ——. *Assoc.with* Cassiterite and Garnet. *Loc.* Boulton's Folly, Watsonville, 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 26 (1883).

1436. ——. *Assoc.with* Cassiterite. *Loc.* Day Dawn Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

1437. ——. *Assoc.with* Cassiterite, Iron Pyrites, Wolfram, Fluorspar, and Chalcanthite. *Loc.* Glencairn Tin Mine, Watsonville ((*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

1438. ——. *Assoc.with* Cassiterite and Native Bismuth. *Loc.* Herbertina Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

1438A.——. *Assoc.with* Copper Pyrites, Cassiterite, Mispickel, Galena, Wolfram, and Garnet, in greywacke. *Loc.* King of the Ranges Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 222, pp. 41-50 (1910).

1439. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Malachite, Iron Pyrites, Mispickel, Cassiterite, Stannite, Wolfram, Ironstone, and Fluorspar, in quartz. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 25 (1883), and 119, p. 15 (1897).

1440. ——. *Assoc.with* Cassiterite and Garnet. *Loc.* Strüber's Tin Mine, Watsonville (*ante*). *Ref.* G.S.M.

1441. Chlorite. *Assoc.with* Cassiterite and Mispickel, in quartz. *Loc.* Ulster Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 22 (1883).

1442. ——. *Assoc.with* Cassiterite. *Loc.* Gladstone Tin Mine, California Gully, nr. Ord (Mt. Garnet Rail.), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook.

1443. ——. *Assoc.with* Cassiterite. *Loc.* Koorboora, 108 miles S.W. of Cairns (Cairns-Chillagoe Rail.), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

1444. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Azurite, Mispickel, and Zinc-Blende, in quartz, greisen, and slate. *Loc.* Ballandean Mine, Severn R., 14 miles (by rail) S. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* L.C.B.

1445. ——. *Assoc.with* Copper Pyrites, Mispickel, Cassiterite, Wolfram, Zinc-Blende, Calcite, and Orthoclase. *Loc.* Sundown Copper Mine, Sundown Cr., 12 miles S.W. of Ballandean Rail. Stn., 26 miles (by rail and road) S.W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay: See* No. 2192. *Ref.* G.S.Q. Pub. 191, p. 22 (1904), G.S.M., and B.D.

1446. ——. *Assoc.with* Cassiterite. *Loc.* Alhambra 1 and 2 Mines, Coolgarra, Return Cr., 9 miles N.N.E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 125, p. 44 (1897).

1447. ——. *Assoc.with* Cassiterite. *Loc.* Beaconsfield Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 125, p. 47 (1897).

1448. ——. *Assoc.with* Cassiterite, Malachite, Azurite, Iron Pyrites, Göthite, Hematite, Limonite, Mispickel, Wolfram, Penninite, Fluorspar, Websterite, and Topaz. *Loc.* Tin Mines, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

1449. ——. *Assoc.with* Cassiterite. *Loc.* ½-mile N. of Coolgarra (*ante*). *Assay:* Metallic Tin = 33 per cent. *Ref.* A.R., 1907, p. 36.

1450. ——. *Assoc.with* Cassiterite, Mispickel, Hornblende, Steatite, Biotite, and Orthoclase, in quartzose dyke. *Loc.* Gt. Northern P.C. Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 3 (1883), and P.R.S.Q., vol. 15, p. 54 (1900).

1451. ——. *Assoc.with* Cassiterite, in elvan dyke. *Loc.* Irish National League Claim, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 6 (1883).

1452. ——. *Assoc.with* Cassiterite and Wolfram, in veins of quartz. *Loc.* Perseverance Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 19 (1883).

1453. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Queen Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 19 (1883).

1454. ——. *Assoc.with* Cassiterite, Wolfram, Orthoclase, Steatite, and Serpentine, in quartz. *Loc.* Soggaorth Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 6 (1883), and P.R.S.Q., vol. 4, p. 71 (1887).

1455. ——. *Assoc.with* Cassiterite, in elvan dyke. *Loc.* Southern Cross Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 5 (1883).

1456. ——. *Assoc.with* Cassiterite. *Loc.* Stenhouse's Tin Mine, Newellton (Silver Valley), 9 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 125, p. 44 (1897).

1457. ——. In serpentinous rock. Newellton (Silver Valley) (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 63 (1900).

1458. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende, as vein in quartz. *Loc.* Bryan O'Lynn Mine (Queen Reef), Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville (Gt. Northern line). *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, pp. 36, 49 (1887).

1459. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc-Blende, Calcite, and Gypsum, in quartz. *Loc.* Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 26 (1879), P.R.S.Q., vol. 4, pp. 36 and 37 (1887), G.S.M., and W.C.T.

1460. ——. *Assoc.with* Copper Carbonate, Calcite, and Garnet, in lode. *Loc.* Running R. North Lease (164), nr. Running R. Crossing, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1461. ——. *Assoc.with* Gold, Iron Pyrites, Ironstone, and Malachite, in quartz reef. *Loc.* Normanby Goldfield, head of Spring Cr., 46 miles S. of Bowen. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 5, p. 7 (1879).

1461a.——. *Assoc.with* Copper Pyrites, Iron Pyrites Tile Ore, Malachite, Azurite, and Calcite, in slate and granite. *Loc.* MacFadzen's M.F. (1749), Douchang, Flora, Essie Dozzler, and Green Outcrops Lodes, Mt. Flora Gold and Mineral Field. *Co.* Killarney; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 228, pp. 31-35 (1910).

1462. ——. *Assoc.with* Steatite and Ironstone, in shale and diorite. *Loc.* Keeley and Valentine's Claim, Nuggety Gully, Mt. Britton Goldfield, 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

1463. ——. *Assoc.with* Iron Pyrites, Galena, Massicot, and Mispickel. *Loc.* Blackbutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* O.R.

1464. ——. *Assoc.with* Hematite and Calcite. *Loc.* Caboombah, 12 miles N.N.E. of Esk, 55 miles (by rail and road) N.N.E. of Ipswich. *Co.* Cavendish (*ante*).

1465. ——. *Assoc.with* Copper Pyrites, Cuprite, Tenorite, Bornite, Malachite, Azurite, Galena, Zinc-Blende, Hematite, Magnetite, Garnet, and Calcite. *Loc.* Glassford Cr. Copper Mines, Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (North Coast line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), and 194, p. 28 (1904).

1466. ——. *Assoc.with* Rhodochrome (*var.* of Penninite), and Chromite, in serpentine. *Loc.* Flat Top Range, nr. Balnagowan Stn., 22 miles E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 159, p. 18 (1901).

1467. ——. *Assoc.with* Gold and Calcite. *Loc.* Rosewood Goldfield, 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Douglas. *Ref.* P.R.S.Q., vol. 4, p. 73 (1887), and G.S.M.

1468. ——. In quartz reefs. Quartz Is., Duke Group, Northumberland Island, 40 to 45 miles N.E.byE. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* L.C.B.

1469. ——. *Assoc.with* Augite, in altered sedimentary rock. *Loc.* Great Monkland Lease (629), Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 52, p. 18 (1889).

Chloropal. *Compo.* Hyd. silicate of iron. *Colour*, shades of green. Fragile. *Fracture*, conchoidal to earthy. *H.* 2·5-4·5. *Sp.gr.* 1·7-2·1.

1470. ——. *Assoc.with* Manganese-dioxide, in slates and quartzites. *Loc.* Nr. Jetty, Auckland Point, 1 mile N.W.byN. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* A.R., p. 153 (1908), and B.D.

Chollarton, nr. Collingwood. *Min.Ref.* Gypsum, *see* 4616a.

Chowey Goldfield—

Situation: *See maps*, Pls. 4, 5. Junction of Didcot and Chowey Crs., 6 miles N. of Didcot Rail. Stn., 74 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. Centre about *Lat.* 25° 25′ S.; *Long.*, 161° 57′ E.

Discovered in 1870.

Proclamation of Field: First (and only one) gazetted, 18th May, 1905, as follows:—Commencing on the left bank of Chowey Creek at the western extremity of the south-east boundary of designed portion 31v, and bounded thence by that portion bearing 71 degrees 56 minutes thirty-four chains and ninety-five links, and 357 degrees 59 minutes sixty chains and forty and three-tenths links; thence by lines bearing 89 degrees eighteen chains fifty and six-tenths links and 56 degrees seventeen chains and fifty links; thence by a line and designed portion 34v bearing 89 degrees 56 minutes sixteen chains and fifty-four links, again by that portion and a line bearing 179 degrees 56 minutes twenty-seven chains and eighty-three and six-tenths links; thence by portion 10v bearing 254 degrees 21 minutes four chains and three and three-tenths links and 320 degrees 29 minutes seven chains and twenty-nine and nine-tenths links, again by that portion and portion 32v bearing 179 degrees 54 minutes seventy-four chains and thirty-six and four-tenths links and 223 degrees 21 minutes fifty-three chains and sixty-two and three-tenths links; thence by a road one hundred and fifty links wide bearing 284 degrees thirty-seven minutes twelve chains and fifty-five and three-tenths links, 324 degrees 3 minutes twenty-one chains and sixty and four-tenths links, and 290 degrees 12 minutes twenty chains and fifty-seven and six-tenths links; thence by portion 31v aforesaid bearing 12 degrees 27 minutes nine chains and forty-one links to the right bank of Chowey Creek; thence by a line crossing said creek in a easterly direction to the left bank of that creek; and thence by that creek upwards to the point of commencement.

Chowey Goldfield—*continued.*

Mineral References: Gold, *see* 3573; Molybdenite, 6819, 6820; Molybdite, 6868.

Mineral Statistics: Included in "Other Goldfields." *See* Pls. 36, 46-46A, 47.

Geological Note: The country rocks are granite and slate. Near their junction the granite is syenitic, but away from the plane of contact it gradually becomes micaceous. The Chowey reefs lie in a defined belt in the granite.

Geological Publications: Reports—Nos. 25 (1886), 60 (1890). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Maryborough. Inspector of Mines at Rockhampton.

Chowey Mine (Old), Chowey Cr., W. of Maryborough. *Min.Ref.* Gold, *see* 3573; Molybdenite, 6820; Molybdite, 6868.

—— and Didcot Crs. (junction of), 62 miles W. of Maryborough. *Min.Ref.* Gold, *see* 3571; Ironstone, 5511; Manganese-dioxide, 6396.

Christensen (I.) Danish Consul. Report on Olsen's Caves, near Rockhampton. Q.G.M. Jour., p. 573 (1903).

Christian's Cr., Sugarloaf, Stanthorpe. *Min.Ref.* Wolfram, *see* 8000.

Christie and Party's Coal Area, 38-Mile Railway Peg, Cooktown. *Min.Ref.* Coal, *see* 1602.

—— Shaft, Chillagoe. *Min.Ref.* Copper Ore, *see* 2029.

Chromate of Iron. *See* Chromite.

1471. **Chrome-bearing Talc** (emerald green), in quartz reef. Head of Dead Horse Lead, ¾-mile S. of Clermont Rail. Stn. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* B.D.

Chrome Iron. *See* Chromite.

Chrome Ochre. *Compo.* A clayey material, containing chromium oxide in varying percentages. *Colour*, green.

1472. —— ——. *Assoc.with* Chromite, in serpentine containing gold. *Loc.* Mt. Wheeler, 18 miles N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 69 (1887).

Chrome Pigments. *See* List under Pigments.

Chrome Spinel. *See under* Spinel.

Chromite. *Syn.* Chrome Iron. *Compo.* Chromate of iron. *Colour*, usually iron-black. *Streak*, brown. Sub-metallic. *H.* = 5·5. *Sp.gr.* = 4·3. *Contents (max.)*, Chromic Acid, 68 per cent. (= Chromium 47 per cent.).

Geological Note: There is a large number of places in the serpentine belt to the north-east of Rockhampton where Chromite is to be found, and it occurs extensively in serpentine in the Kilkivan district. Large deposits exist near Ipswich, at Pine Mountain, and other less important outcrops are known at Stanthorpe. For uses of Chromite, *see under* Chromium.

1473. ——. In 4-foot lode. Junction of Quart Pot and Kettle Swamp Crs., Stanthorpe. 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck; *Dist.* **Darling Downs** *Ref.* B.D.

1474. ——. In diorite. Minnie Cr., Bonnie Doon Stn., about 6 miles N.W. of Blackwater, 125 miles (by rail and road) W.byS. of Rockhampton. *Co.* Humboldt; *Dist.* **Leichhardt.** *Ref.* G.S.M.

1475. ——. In serpentine. Pine Mt., 7 miles N.N.W. of Ipswich, 31 miles (by rail) W.S.W. of Brisbane. *Co.* Churchill; *Dist.* **Moreton.** *Assay:* Iron = 13 per cent.; Chromium = 23 per cent.; (Chromic acid = 33·5 per cent). *Ref.* G.S.Q. Pubs. 103, p. 27 (1895), and 194, pp. 55, 56 (1904).

1476. ——. Por. 29, Par. of Sahl, 11 miles N.N.W. of Ipswich. *Co.* Churchill (*ante*). *Analysis:* Iron = 13 per cent.; Chromium = 23 per cent.; (Chromic acid = 33·5 per cent. *Ref.* G.S.Q. Pub. 194, p. 55 (1904).

1477. ——. Between Cabbage Tree and Banks Crs., Brisbane R., about 8 miles N. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.M.

1478. ——. B.K. Cattle Station, 12 miles N.W.byN. of Ipswich. *Co.* Stanley (*ante*). *Ref.* O.R.

1479. ——. *Assoc.with* Ilmenite, in serpentine. *Loc.* Near Canoona Goldfield, 26 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* **Port Curtis.** *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

1480. ——. Oaks View, 4 miles N. of Oaks Stn., 45 miles (by road) N.N.W. of Rockhampton. *Co.* Liebeg (*ante*). *Analysis:* Ferrous oxide = 16 per cent.; Chromium = 24·9 per cent. (Chromic acid = 36·4 per cent.). *Ref.* A.R., 1906, p. 54.

1481. ——. Princhester, 44 miles N.W. of Rockhampton. *Co.* Liebeg (*ante*). *Analysis:* (1) Chromium = 22·8 per cent. (Chromic acid = 33·2 per cent.); (2) Chromium = 25·0 per cent. (Chromic acid = 36·6 per cent.); (3) Chromium = 23·0 per cent. (Chromic acid = 33·5 per cent.). *Ref.* A.R., pp. 61 and 73 (1906).

1482. ——. In irregular masses in large formation between walls of limestone and serpentine. *Loc.* Kearney's Paddock, foot of Constitution Hill, Cawarral Goldfield, 15 miles N.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Analysis:* (Chromic acid = 48·0 per cent.); Silica = 12·5 per cent.; Iron = 11·8 per cent.; Chromium = 32·9 per cent. *Ref.* A.R., p. 109 (1907), and B.D.

1483. ——. *Assoc.with* Rhodochrome and Chlorite, in serpentine. *Loc.* Flat Top Range, nr. Balnagowan Stn., 22 miles E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 159, p. 18 (1901).

1484. ——. Meadow Flats, N. side of Fitzroy R., nr. Rockhampton. *Co.* Livingstone (*ante*). *Analysis:* Iron = 10·2 per cent.; Silica = 3·6 per cent.; Chromium = 26·2 per cent.; (Chromic acid = 38·1 per cent.). *Ref.* A.R., 1905, p. 31, and B.D.

1485. ——. In lode. Morinish Goldfield, 25 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* B.D.

1486. ——. *Assoc.with* Gold and Chrome Ochre, in serpentine. *Loc.* Mt. Wheeler, 18 miles N.E. of Rockhampton. *Co.* Livingstone (*ante*).

1487. ——. Tooker's Hill, nr. Tungamull Rail. Stn. (Emu Park line), 18 miles (by rail) N.E.byE. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 216, p. 32 (1907), and A.R.D.M., 1907, p. 107.

1488. ——. Tungamull, 18 miles (by rail) N.E.byE. of Rockhampton (Emu Park line) (*ante*). *Assays:* (1) Chromium = 32·8 per cent. (Chromic acid = 47·8 per cent.); (2) Chromium = 35·0 per cent. (Chromic acid = 51·0 per cent.). *Ref.* A.R., 1907, p. 94.

1488A.——.*Assoc.with* Serpentine (?). *Loc.* Four miles S.E. of Tungamull Rail. Stn. (*ante*). *Note:* Quarry face of clean chromite is 40 ft. by 20 ft., and apparently extends for 25 chains.

1489. ——. Harley's P.A., 4 miles S. of Kilkivan, 48 miles (by rail) W. of Gympie. *Co.* Lennox; *Dist.* **Wide Bay.** *Assay:* Chrome acid = 30·6 per cent. (Chromium = 21·0 per cent.). Ferrous oxide = 13·9 per cent. *Ref.* A.R., p. 71 (1906).

Chromium (Cr). *Atom.Wt.* = 52·0. *Sp.gr.* 6·74. *Colour*, white-metallic.

Minerals: *See* Chromite, Chrome Ochre, Penninite, *var.* Rhodochrome. *See also* Note under Chromite.

Uses: The alloy called ferro-chromium is used in the manufacture of exceedingly hard steel, and compounds of the element are applied extensively in tanning and dyeing processes, and in paint-making. Chromite is the mineral from which most chromium compounds are made, and is itself sometimes used as a lining for reverberatory furnaces. Bricks made of chromite mixed with clay are now being manufactured by the Mt. Morgan Gold Mining Co.

Chrysoberyl.

No occurrences are recorded in the State, but peculiarities in some of the small rare gemstones occurring at Anakie suggest that they may be chrysoberyls. More material is required before the matter can be investigated.

Chrysocolla. *Compo. Hyd.* Silicate of copper. *Colour*, usually bluish-green. *Streak*, whitish. *Texture*, enamel-like. *H.* = 2-4. *Sp.gr.* = 2-2·2. *Contents (max.)*, Copper 36 per cent.

1489A.——. *Assoc.with* Copper Pyrites, Malachite, and Limonite. *Loc.* Cameronian M.C. (196), Euston Group, Cameron R., 27 miles W.N.W. of Cloncurry. *Co.* Argylla. *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, p. 267 (1908).

1490. ——. *Assoc.with* Copper Pyrites and Redruthite, in schist, slate, and quartz. *Loc.* Native Companion R.C. (19), Native Companion Group, Palm Tree Cr., 26½ miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 273 and 274 (1908).

1491. ——. *Assoc.with* Redruthite, Cuprite, Bornite, Copper Carbonate, and Ironstone. *Loc.* Mt. Douglas or Pumpkin Gully Copper Leases, 12 miles E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub., pp. 6, 7 (1900).

1491A.——. *Assoc.with* Redruthite, Cuprite, Tile Ore, Malachite, and Limonite, in quartz and quartzite. *Loc.* Rocklands Group of Copper Mines, between Butcher and Morris Crs., 9 miles W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 258-265 (1908).

1492. ——. *Assoc.with* Gold and Lievrite, in clayey talcose material. *Loc.* Agate Downs Goldfield (Tip Top Camp), nr. Maggie's Cr., S. of Cloncurry R., 50 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 104, p. 6 (1895), and G.S.M.

1493. ——. *Assoc.with* Tile Ore and Malachite, in gossan, schist, and quartz. *Loc.* Alice M.L. (717), Alice Group, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 162-164 (1908).

1494. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Hematite, Limonite, and Turgite, in quartz, calcite, and gossan. *Loc.* Belfast M.L. (303), Belfast Group, 2 miles N.N.E. of Mt. Start, 21 miles S.S.W. of Cloncurry (*ante*). *Assay: See* No. 2071. *Ref.* G.S.Q. Pub. 215, pp. 120-122 (1908).

1495. ——. *Assoc.with* Copper Pyrites, Tile Ore, Redruthite, Hematite, and Limonite, in quartz and ferro-calcite. *Loc.* Policeman Copper (M.C.) 206, Boomerang Group, Cone Cr., 23 miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 100 and 101 (1908).

1496. ——. *Assoc.with* Tile Ore and Malachite, in schist and quartz. *Loc.* Speculation M.C. (198), nr. Mt. Start, Chinaman Group, 23½ miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 150-152 (1908).

1497. ——. *Assoc.with* Azurite, Malachite, and Chlorite, in quartzite, quartz, and gossan. *Loc.* Caine's King Copper Lease (577), Columbiad Group, Duck Cr., nr. Mt. Start, 24½ miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 142 and 143 (1908).

1498. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, and Azurite, in gossan, quartz, and quartzite. *Loc.* Captain M.L. Eva Group, 22½ miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 158, 159 (1908).

1499. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Malachite, in quartz and calcite. *Loc.* Commonwealth M.C. (330), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 158 (1908).

1500. ——. *Assoc.with* Malachite, Atacamite, Dioptase (?), and Tourmaline, in schist. *Loc.* Weka M.C., Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 159 and 160 (1908).

1501. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Malachite, Iron Pyrites, Limonite, Turgite, Calcite, and Ferro-Calcite, in quartzite, schist, and limestone. *Loc.* Florence River Copper Leases, ½-mile W. of Hampden Rd., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

1502. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tenorite, Malachite, Iron Pyrites, and Kaolin, in gossan, slates, and diorite. *Loc.* Hampden M.Ls. (244, 245, etc.), Hampden Group, 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 49-60 (1908).

1503. ——. *Assoc.with* Redruthite, Malachite, and Limonite, in quartzite and schist. *Loc.* Lady Jenny M.L. (234), Lady Group, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 195 (1908).

1504. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in gossan, quartzite, and schist. *Loc.* McPhail M.L. (474), McPhail Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 70-72 (1908).

1505. ——. *Assoc.with* Redruthite, Malachite, Iron Pyrites, Dioptase, and Limonite, in gossan, turgite, and schist. *Loc.* Trump Extd. M.C. (368), McPhail Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 73 76 (1908).

1505A.——. *Assoc.with* Gold, Copper (native), Copper Pyrites, Malachite, Atacamite, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

1505B.——. *Assoc.with* Copper Pyrites, Redruthite, Hematite, and Hypersthene, in slate and gossan. *Loc.* Spring's Peak M.L. (562), Pearl Group, Corella R., 30 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 189 (1908).

1506. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, Azurite, Hematite, and Limonite, in slate. *Loc.* Easter Gift Copper Lease (290), (Pioneer Chief Group), 1 miles E. of Mt. Start, W. of Marabah Township, Duck Cr., 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 127-129 (1908).

1507. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Limonite, and Turgite, in slate and quartz. *Loc.* Highland Mary Lease (531), Ready Rhino Group, Duck Creek, 23½ miles S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 91-93 (1908).

1508. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, Malachite, Iron Pyrites, and Limonite, in schist, slate, quartzite, and quartz. *Loc.* Banjo M.L. 590, Tambourine Group, Duck Cr., 26 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 167, 168 (1908).

1509. ——. *Assoc.with* Copper Pyrites, Redruthite, Azurite, Malachite, Iron Pyrites, Limonite, and Tourmaline, in schist, slate, and quartz. *Loc.* Tambourine Copper Lease (286), Tambourine Group, Duck Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 166 and 167 (1908).

1510. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Limonite, and Turgite, in schist and quartz. *Loc.* Brilliant Copper Lease (588), Tharsis Group, 1½ miles N.W. of Mt. Start, 20 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp 114 and 115 (1908).

1511. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Malachite, and Limonite, in gossany quartz and calcareous sinter. *Loc.* Boundary M.L. (582), Bull Cr. Group, Coolullah Run, 74 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 345-347 (1908).

1511A.——. *Assoc.with* Malachite, in siliceous gossan. *Loc.* Decima M.C. (304), Bull Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 347, 348 (1908).

1511A1.——. *Assoc.with* Limonite and Malachite, in quartz. *Loc.* Elsie M.C. (?), Dobbyn Group, Coolullah Run, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 342, 343 (1908).

1512. ——. *Assoc.with* Native Copper, Cuprite, and Limonite, in schist and quartzite. *Loc.* Little Wonder M.L. (258), Mighty Atom Group, 6-Mile Cr., Leichhardt R., 42 miles N.W.byN. of Cloncurry. *Co.*Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 310 and 311 (1908).

1513. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Azurite, Malachite, and Limonite, in schist, slate, and gossan. *Loc.* Mighty Atom M.L. (274), Mighty Atom Group, between 6-Mile and Coppermine Crs., Leichhardt R. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 304-306 (1908).

1514. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, and Limonite, in schist, gossan, and quartz. *Loc.* Mt. Cuthbert No. 1 N. M.L. (381), Mt. Cuthbert Group, 6-Mile Cr., Leichhardt R., 19 miles S.W. of Coolullah H.S., 63 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 318-321 (1908).

1515. Chrysocolla. *Assoc.with* Copper Pyrites, Malachite, Iron Pyrites, Limonite, Ironstone, and Magnesite, in kaolinised schist. *Loc.* Mt. Cuthbert 1 and 2 S. M. Ls. (257 and 396), Mt. Cuthbert Group, 19 miles S.W. of Coolullah H.S. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 321 and 322 (1908).

For further Cloncurry References *see* Nos. 1522-1524.

1516. ——. *Assoc.with* Gold, Malachite, and Jasper, in quartz. *Loc.* F. Achilles's Mine, Brovinia Goldfield, Hawkwood, 50 miles S.W. of Gayndah Rail. Stn. *Co.* Newcastle; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 114, p. 3 (1896), and G.S.M.

1517. ——. *Assoc.with* Cuprite, Tile Ore, Tenorite, Azurite, Malachite, Magnetite, and Hematite, in garnet rock. *Loc.* Boomerang Copper Mine, Marble Cr., Calcifer, 133 miles (by rail) W.S.W. of Cairns, Cairns-Chillagoe line, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 119, p. 36 (1897).

1518. ——. Muldiva Silver-Lead Mines, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

1519. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Malachite, Azurite, and Fluorspar, in garnet rock. *Loc.* Dorothy Mine, Opera Cr., 1½ miles S.E. of Mungana Rail. Stn. (Chillagoe line), 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 2 (1891), and B.D.

1520. ——. *Assoc.with* Malachite and Lithomarge, in quartzite. *Loc.* McIlwraith Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 6 (1891).

1521. ——. *Assoc.with* Copper Pyrites, Cassiterite, Wolfram, and Mispickel, in quartz lode. *Loc.* Great Eastern Mine (Block 24), Red Rock Cr., 11 miles W.S.W. of Ballandean, 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 120, p. 49 (1898).

1522. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Redruthite, Cuprite, Limonite, and Malachite, in hornblendic schist. *Loc.* Mt. Birnie M.L. (686, etc.), Mt. Birnie Group, Burke R., 74½ miles S.S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, p. 367 (1908).

1523. ——. *Assoc.with* Copper Pyrites, Malachite, Covellite, and Iron Pyrites, in quartz, quartzite, and schist. *Loc.* Ardath Copper Lease (656), Mt. Hope Group, Green's Cr., 4 miles S.W. of Mt. Hope, 53 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 47 and 48 (1908).

1524. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in quartz and kaolin. *Loc.* Trickelana Copper Lease (522), Trickelana Group, 70 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, p. 26 (1908).

1526. ——. *Assoc.with* Copper Carbonate, Galena, Cerussite, Manganese-dioxide, and Garnet, in quartz. *Loc.* Black Star Lease (116), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

1527. ——. *Assoc.with* Native Silver, Galena, Cerussite, Malachite, Mispickel, Manganese-dioxide, Zinc-Blende, and Hematite, in lode. *Loc.* Hidden Treasure Lease (165), Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 1241. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), and 82, p. 7 (1892).

1528. ——. *Assoc.with* Bornite, Copper carbonate, and Mispickel, in chloritic matrix, *Loc.* Ingola Lease (177), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

1529. ——. *Assoc.with* Copper Carbonate, Minium, Cerussite, Galena, Hematite, and Zinc-Blende, in gossan lode. *Loc.* White Wings P.A., Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1530. ——. *Assoc.with* Malachite, Galena, Cerussite, Manganese-dioxide, Lievrite, and Garnet, in lode. *Loc.* Mt. Hishon Lease (210), Kangaroo Hills Mineral Field (*ante*). *Assay: See* No. 2969. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

1531. ——. *Assoc.with* Copper (native), Copper Pyrites, Cuprite, Atacamite, Copper Carbonate, Limonite, Cerussite, Manganese-dioxide, Zinc-Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

1532. ——. *Assoc.with* Galena, Cerussite, Pyrolusite, Gypsum, and Calcite, in garnet rock. *Loc.* Elsie's Shaft, Mt. Moss South Lease (168), Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 16 oz. per ton; Lead = 69·8 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

1533. ——. *Assoc.with* Native Copper, Malachite, and Azurite. *Loc.* Keelbottom Copper Mine, Mt. Keelbottom, 21 miles N.W.byN. of Charters Towers. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 43 (1887).

1534. ——. *Assoc.with* Copper (native) and Malachite. *Loc.* E. of Townsville Road, nr. Dalrymple. *Co.* Wilkie Gray (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 68 (1887).

1534A.——. *Assoc.with* Malachite and Hematite, in granite. *Loc.* Brown's M.F. (1807), Native Youth P.P.A. (129), and Paddock Workings, Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 228, pp. 21, 39 (1910).

1534B.——. *Assoc.with* Malachite and Azurite, in gossan in granite. *Loc.* Marjorie M.L. (31), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 35, 36 (1910).

1535. ——. *Assoc.with* Cuprite and Asbestos, in decomposed rock. *Loc.* Cabbage Tree Cr., Princhester Run, 12 miles from Marlborough, 45 miles N.W. of Rockhampton. *Co.* Liebeg; *Dist.* **Port Curtis.** *Ref.* A.R., 1907, p. 85.

1536. ——. *Assoc.with* Copper Carbonate, in lode. *Loc.* On hill, nr. beach, 3 miles N. of Marion Cr., 43 miles S. of Mackay. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 39, p. 10 (1887).

1537. ——. Louisa Lode, Gigoomgan Stn., 25 miles W.S.W. of Maryborough. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.M.

1537A.——. **Cyanochalcite** (*var.*) *Assoc.with* Native Copper, Redruthite, Cuprite, Malachite, Limonite, Calcite, and Ferro-calcite, in granular limestone. *Loc.* Dandy P.A. (297), McPhail Group, 2 miles S. of Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 76 and 77 (1908).

Chrysolite. *Syn.* Olivine, *which see.*

Chrysoprase. *Var. of* Chalcedony, *which see.*

Chrysotile Asbestos. *Var. of* Serpentine, *which see.*

Chudleigh Co.; Burke Dist. *See map*, Pl. 20.

—— Park Stn., 70 miles N. of Hughenden. *Min.Ref.* Ilmenite, *see* 4881.

Chum M.C. (329), Serpent Hill Group, Cloncurry. *Min.Ref.* Cuprite, *see* 2392B; Limonite, 5748B; Malachite, 6087B; Redruthite, 7208B; Tile Ore, 2493B.

Churchill, Pine Mt., nr. Ipswich. *Min.Ref.* Magnesite, *see* 5954.

—— Co.; Moreton Dist. *See map*, Pl. 6.

Chuwar (Par. of), Ipswich. *Min.Ref.* Clay Ironstone, *see* 1588.

Cimolite. *Compo.* Silicate of alumina. *Colour*, white. Clay-like. Adheres to the tongue. *Sp.gr.* = 2·2.

1538. ——. Hughenden, 140 miles (by rail) W.N.W. of Charters Towers. *Co.* Douglas; *Dist.* Burke. *Ref.* L.B. 3, p. 727 (1895).

1539. ——. Emu Vale, 16 miles (by rail) E. of Warwick (Killarney Br. line). *Co.* Aubigny; *Dist.* Darling Downs. *Ref.* O.R.

1540. ——. Oontoo, 160 miles W.byN. of Thargomindah. *Co.* Cooper; *Dist.* Gregory South. *Ref.* G.S.M.

Cinnabar. *Compo.* Sulphide of mercury. *Colour*, usually cochineal-red. *Streak*, scarlet. *H.* = 2-2·5. *Sp.gr.* 8·9. *See map*, Pls, 5, 9. *Contents* (*max.*), Mercury 86 per cent. *Note.*—The occurrences of mercury are not common. The Kilkivan localities mentioned below have been prospected to some extent, and while the quantities of mercury in the deposits are rather low, there still remains the probability of mining operations being successful at some future time owing to the extensive character of the deposits.

——. Uses. *See* Note under Mercury.

1541. ——. As a small isolated pocket (about 5 tons) of high quality. *Assoc.with* Copper Pyrites, in lode in granite. *Loc.* On surface between Elizabeth and St. George's Shaft, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* B.D. [Found in 1872 by Captain Osborne.]

Clackland Bore. *See under* Artesian Bores. No. 255.

Claim, 1½ mile N.W. of Koorboora. *Min.Ref.* Native Bismuth, *see* 340.

Clairview, 12 miles N. of St. Lawrence. *Lat.*, 22° 11′ S.; *Long.*, 149° 33′ E. *Min.Ref.* Azurite, *see* 251A; Copper (native), 2011; Cuprite, 2478; Malachite, 6368.

Clan Ronald Mine, Eureka Cr., nr. Stannary Hills. *Min.Ref.* Azurite, *see* 189; Cassiterite, 845; Malachite, 6218; Wolfram, 7943.

Clanricarde Mines, Mt. Morgan Goldfield. *Min.Ref.* Copper Pyrites, *see* 2309; Gold, 4361; Iron Pyrites, 5416.

GEOLOGICAL NOTE: The country about the mines is made up of greywacke, slate, diorite, and sandstone. The greywacke and slate are of Gympie Formation, the diorite being intrusive. The sandstone forms a covering in places to the Gympie Formation, and belongs to the Stanwell (Walloon) Series. Gold-bearing reefs a few inches thick occur in the sedimentary rocks near the diorite. *See* G.S.Q. Pub. No. 132 for notes. *See also* Supplementary Report List, No. 53.

—— Valley Artesian Bore. *See under* Artesian Bores. No. 332.

Clare's Open Cut (Gt. Eastern Tin Mine), Sundown Cr., Stanthorpe. *Min.Ref.* Cassiterite, *see* 1030; Mispickel, 6730; Wolfram, 8005.

—— Reef, Talgai Goldfield. *Min.Ref.* Gold, *see* 3850; Iron Pyrites, 5121; Limonite, 5856.

Clark River. Rises in Main Range, 160 miles W.byS. of Townsville, flows E.byE. into Burdekin R. 75 miles W.byN. of Townsville. Length, about 100 miles. *Min.Ref.* Cassiterite, *see* 1167.

Clarke (A. W.). Was appointed mineralogical lecturer about the end of 1885. Commenced duties on April 1st, 1886. First annual report in A.R.D.M., 1886; resigned on 31st July, 1888.

Clay. A general term for a group of soft, unctuous non-metallic minerals of various colours, and having silicate of alumina as their principal chemical constituent

GEOLOGICAL NOTE: There are many localities in the vicinity of Brisbane where clays suitable for almost all purposes exist, and where brickworks have been in operation for many years. The Palæozoic and Mesozoic shales have been found very suitable for making ordinary bricks, the latter also being well adapted for the manufacture of firebricks and earthenware. Pottery clays are to be found at Kingston and Dinmore, deposits at both these places yielding what is considered to be first-class pottery clays.

Large-bedded Trias Jura deposits of fireclay are being worked near Mt. Morgan, and at other places on the Ranges in the vicinity, the Mt. Morgan Gold Mining Co. using the clay in the manufacture of crucibles and firebricks. At Wycarbah, on the Central Railway line, there are enormous deposits of fireclay, in the form of an acidic tuff, derived from Mt. Hay, an extinct volcano, and extending over the surrounding country for many square miles. *See Min.Ref.* under Kaolin and fireclay.

1567. —— (deposits). Nr. mouth of Flinders R., 26 miles E. of Normanton. *Co.* Boundary of Carpentaria and Norman; *Dist.* **Burke.** *Ref.* B.D.

Clermont—

Situation: *See maps,* Pls. 10, 11, 14, and 15. Sixty-three miles (by rail) N.W.byN. of Emerald, 229 miles (by rail) W.byN. of Rockhampton. *Cos.* Dickson, Rutledge, and Belyando; *Dist.* South Kennedy; and *Co.* Clermont; *Dist.* Leichhardt. *Lat.*, 22° 45′ S. *Long.*, 147° 38′ S.

Population: (Of Goldfield), 2,331 (estimated 1910).

Railway Base for the gold, copper, and coal mining centres mentioned below.

Discoveries, Etc.: Copper was discovered at Peak Downs (Clermont) by John Mulholland in 1861. Copperfield was opened up in Sept., 1863, and the first copper smelting took place in 1866. The value of copper produced up to the year 1877 (when mine was sold for £3,000) was £1,280,000, the dividends amounting to £300,000.

Gold Discoveries: First discovery in Peak Downs in 1861. First "rush," 1862. McDonald's Flat Reefs discovered, 1866, and the first crushing there was in the Iron Duke Battery, erected by Hon. W. O. Hodgkinson, in 1879. Expedition Rush, 1863. Exodus of Chinamen to Palmer G. Field, 1873. Long Gully Lead discovered, Sept., 1863. Blanket Flat Lead discovered, Oct., 1863. Hurley Gold Lead discovered, April, 1864. Eastern River Lead discovered, Oct., 1864. McMaster's Lead discovered, Dec., 1864. The Springs Lead discovered, 1865. Miclare Diggings, discovered, 1873. Black Ridge (Gowrie Cr.) discovered in 1892. ...

Coal first discovered in well ½-mile N. of Blair Athol Coal Shaft in 1864, and the Blair Athol Colliery was opened in August, 1892. Historical Notes in G.S.Q.P. No. 148.

Rainfall: Yearly average between 1902 and 1907, 24·10 inches, and 49 wet days.

Proclamation of Goldfield: First gazetted, 11th August, 1863; last alteration, 12th May, 1887, as follows:—Commencing on the north-west corner of Gogg's Mineral Selection No. 11, and bounded on the west by a line bearing north about two miles and a-quarter to Sandy Creek; on the north by Sandy Creek easterly about four miles; on the east by a line bearing south about three miles and a-half; and on the south by a line bearing west four miles to the point of commencement.

Area of Goldfield: 1,068,160 acres (1,689 square miles).

Leases: Gold-mining Leases and Applications, in force 1912, 5; area, 96 acres. Mineral Leases and Applications, in force 1912, 23; area, 5,125 acres. Miners' Homesteads and Applications, in force 1912, 82; area, 974 acres.

Principal Mining Centres—

Gold—The Springs, Black Ridge, McMaster's, Miclare, Venus, Hurley's, Apsley, Seven Hills, Wild Cat, Copperfield, McDonald's Flat, Fiddler's Cr., Leo's Flat, Expedition Leads, Oakey Cr., Sandy Cr., Deep Cr., Flyspeck, etc., *which see.*

Copper—Copperfield (Peak Downs Mine).

Coal—Blair Athol Coalfield, comprising collieries of Blair Athol, Imbell, Eldorado, Hope, and Newcastle, *which see.*

Mineral Statistics:

Gold, *see tables,* Pls. 36, 46, 46a, *and diagram,* Pl. 47.
Copper, ,, ,, 39, 46, 46a.
Coal, ,, ,, 43, 46, 46a.

Clermont—*continued:*

Geological Note: The rocks about Clermont comprise slate, schists, and quartzites of indefinite age, fossiliferous limestones (Middle Devonian), and coal measures (Clermont Series) belonging to the Permo-Carboniferous System, on all of which have been formed numerous auriferous alluvial deposits. The schists, etc., contain gold-bearing reefs, and in the limestones there are numerous fossil coral remains, while the coal measures contain good coal seams. The alluvial deposits embrace a large number of gold-bearing "leads," and have yielded many thousands of ounces of gold. They may be considered to have been the richest and most extensive alluvial gold deposits in Queensland. *See* G.S.Q. Pub. Nos. 148, 176, 201 for details.

Geological Publications: Reports—Nos. 27 (1886), 103 (1894), 148 (1900), 176 (1902), 201 (1906). *See* "Geol. Surv. Pub. List" for titles and reports. *See also* List of Maps *under* Department of Mines Publications. *Also see* Supplementary Report List, Nos. 16, 48, 64, 92, 102.

Warden: Stationed at Clermont. Inspector of Mines: Stationed at Rockhampton.

Reports: Inspector's and Warden's monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Crushing Mills: Four Batteries (47 stamps). Charges, 10s. 6d. to £1 per ton.

General Information: Consult *Pugh's Almanac, Queensland Post Office Directory, Post and Telegraph Guide.* Newspaper, *Peak Downs Telegraph.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Clermont Coalfield—

Situation: Thirteen miles N.W. of Clermont, *which see.*

Collieries: Blair Athol, Imbell, Eldorado, Hope, Newcastle, Bastet's, Mercer's. These shafts are now embraced in the Blair Athol, Blair Athol Extended, Bluff Blair Athol, and Newcastle Coal Mining Companies' areas.

Cloncurry Gold and Mineral Field—

Situation: *See maps*, Pls. 20, 21, 23. Cloncurry township is situated 480 miles (by rail) W.byS. of Townsville. *Cos.* Argylla, Allison, Beaconsfield, Brahe, Canobie, Granada, Gregory, Kamilaroi, Landsborough, Manfred, Rochedale, Saxby, Selwyn, Tewinga, Undilla, Wondoola; *Dist.* Burke; *Cos.* Buckingham, Chatsworth, Merlin, Waverly; *Dist.* Gregory North. Centre about *Lat.* 20° 40′ S.; *Long.* 140° 33′ E.

Railway Base: Cloncurry Rail. Station is the base for the Cloncurry Field, and also for the Agate Downs and Bower Bird Goldfields.

Discoveries: Gold was first discovered at Sunday Gully, Leichhardt Run, in 1867. Soon after, in the same year, it was discovered at Top Camp by Cameron and party. In 1870 gold was found at Bishop's Creek, and in 1873 at Fisher's Creek. Copper was first discovered at Cloncurry by Mr. E. Henry in 1867; at Argylla in 1867 (Henry); at Leichhardt River in 1871 (Goodfellow and party); at Mount Oxide in 1881 (Henry); and at Duck Creek in 1867 (Henry and Sheaffe).

Population: 3,152 (Census, 1911). Area: About 22,100 square miles (14,444,000 acres).

Proclamation of Field: First gazetted, 5th May, 1899; last, 9th January, 1913, as follows: Commencing at the confluence of Dismal Creek and Cloncurry River, and bounded thence on the east by that river upwards to its junction with Williams River, by that river upwards to the south-west corner of Rockcliffe No. 1 Block (tree marked broad-arrow over F.1 over M.2 over G.G.R.); thence by a line southerly to the north-west corner of Tooleybuck No. 13 Block, by the north and east boundaries of that block and the east and part of the south boundaries of Mount Merlin No. 13 Block to Mount Merlin No. 10 Block; thence by the east boundary of that block southerly to the south-east corner; thence on the south by the southern boundaries of Mount Merlin No. 10, Mount Merlin No. 1, Mount Merlin No. 4, Mount Merlin No. 5, Chatsworth No. 5, Chatsworth No. 6, Chatsworth No. 7, Northernside No. 4, Laington No. 3, Dundee No. 3, Dundee No. 4, Laington No. 9, and Wonomo No. 1 Blocks; by the south-east boundary of Rufus No. 5 Block to the southern corner; thence on the south-west by the south-west boundaries of Rufus No. 2, Oroopo No. 2, St. Ronans No. 12, and St. Ronans No. 11 Blocks; thence on the west by the western boundaries of St. Ronans No. 11, Waverley No. 1, Thule, Carlton Hills No. 2, Carlton Hills No. 4, Whitman, Rochedale No. 11, Rochedale No. 12, Leadmore No. 5, Leadmore No. 9, Prestbury No. 1, Gundaria, Lema, Calton West, Gundermaine, Burburgate, Graman, Margaret Vale No. 6, Seymour No. 2, Seymour No. 3, and Morella No. 6 Blocks; thence on the north by the northern boundaries of Morella No. 6, Morella No. 9 Excess, Morella No. 9, Morella No. 4, Morella No. 11, Myally South, Violet Downs No. 1, Leichhardt Downs No. 6, Leichhardt Downs, No. 4, Goorala, Talawanta No. 5, and Tinkerbell Blocks to Dismal Creek, and by that creek upwards to the point of commencement;—exclusive of such land as is now freehold, and also as is comprised within now existing pastoral holdings and grazing selections under lease prior to the date hereof, except such pastoral holdings and grazing selections as are at present within the boundaries of—The Cloncurry Mineral Field (proclaimed 6th September, 1906); The Cloncurry Goldfield (proclaimed 29th November, 1889); The Bower Bird Gold and Mineral Field (proclaimed 16th September, 1902); The Duchess Gold and Mineral Field (proclaimed 20th July, 1912); The Mount Oxide Gold and Mineral Field (proclaimed 14th November, 1912); The Agate Downs Gold and Mineral Field (proclaimed 2nd December, 1891).

Leases: Gold-mining Leases in force, 10; area, 79 acres. Mineral Leases, 502; area, 6,973 acres. Miners' Homesteads, 654; area, 1,858 acres (1912).

Principal Mining Centres: Argylla, Bell's Camp, Bishop's Cr., Burke R., Cameron R., Chinaman Cr., Cloncurry, Coolullah, Corella R., Donaldson, Duck Cr., Dugald R., Elder Cr., Florence R., Glenroy, Gunpowder Cr., Hampden, Leichhardt R., Maggie's Cr., Malbon R., Martin's Cr., Morris Cr., Mt. Oxide, Palm-tree Cr., Prospector's Cr., Pumpkin Gully, Slaty Cr., Soldier's Cap, Top Camp, Two-mile Cr., and Will's R., *which see.*

GEOLOGICAL NOTES: Coal is found in Queensland in rocks belonging to the Cretaceous, Trias-Jura, and Permo-Carboniferous Systems. Cretaceous lignite deposits occur at Waterpark Creek, near Port Clinton, to the north of Rockhampton, and other coal seams of the same age are known in Western Queensland. The Burrum Field is also now recognised to be a Cretaceous formation, previously being considered to be Trias-Jura. Trias-Jura coal seams occur in many places between Brisbane and the southern border, and to the west of Brisbane, and also about Warwick, Beaudesert, Darling Downs, and Ipswich. Coal deposits at Callide and Styx River also belong to this System. Permo-Carboniferous Coal Measures extend over an enormous area in Central Queensland, and include the coalfield at Clermont, and the large tract of country reaching northerly from the southern watersheds of the Dawson and Comet Rivers across the Central Railway about the Bluff, and up the Mackenzie and Isaac Rivers as far as the Bowen River to the west of Mackay, a distance of about 400 miles. In Northern Queensland, the Mount Mulligan field, which is a small Permo-Carboniferous area surrounded by older rocks, gives promise of becoming a field of importance, being close to the Chillagoe railway line, and not far either from the coast or from the Chillagoe Smelting Works. Other Permo-Carboniferous fields near Cooktown, and at Little River, further west, and along the coast further north, may be looked upon to produce coal in the future.

AREA OF COAL MEASURES AND COALFIELDS:

Cretaceous Coal Measures. There are 20,000 square miles of country which may be considered to be coal measures belonging to this System, of which 2,000 square miles may be classed as coalfields, containing seams of coal whose value has not yet been determined.

Trias-Jura Coal Measures. This series contains about 23,000 square miles, and is mostly confined to the south-eastern quadrant of the State. 2,000 square miles have been proved to be coal-bearing.

Permo-Carboniferous Coal Measures. The area of this formation, situated to the north and south of the Central Railway line west of Rockhampton, is 30,000 square miles in extent, in which there is 16,000 square miles of country containing good coal seams of varying thicknesses and qualities.

COAL RESOURCES: (For details see separate heading under name of field).

A general review of the State's coal resources shows that there are 22 coalfields, namely:—Beaudesert, Burrum, Bowen River, Callide, Chinchilla, Clermont, Cooktown, Dalby, Dawson River, Hughenden, Ipswich, Little River, Mackenzie River, Central Railway line, Mt. Mulligan, Nebo, Nundah-Eagle Junction, Styx River, Tiaro, Toowoomba, Warwick, and Waterpark Creek. In addition, there is a host of localitites where coal seams are known, but whose thickness, extent, and quality have not been determined, references to which are made further on.

In the above 22 localities there are undoubtedly great areas of productive coalfields, and 120 coal seams have been recorded, each having a thickness of *not less than one foot,* and of fair quality. Hundreds of other seams also exist whose thickness is either less than one foot or has not been determined, and whose quality, where tested, shows they are of no commercial value.

The most conspicuous fields so far as future supplies of coal are concerned, is the Dawson-Mackenzie Area, which has an "actual" reserve of 122,000,000 tons of coal, "probable" reserves being 621,000,000 tons, "possible" reserves being 6,000,000,000 tons. Next in order comes the Clermont Area, with 200,000,000 tons "actual," 300,000,000 tons "probable," and 1,000,000,000 tons "possible."

On the above condition—"not less than one foot in thickness," and also disregarding the question of what is "available," which depends so much on local conditions—the State's coal supply is as follows:—"Actual" reserve, 400,000,000 tons; "probable" reserve, 2,000,000,000 tons; "possible" reserve, 13,000,000,000 tons.

Coal—*continued:*

UNPROSPECTED COAL MEASURES:

Brisbane has Mesozoic Coal Measures in its vicinity which have not yet been thoroughly prospected, the principal localities where the measures are exposed being Caloundra, Bribie, Humpy Bong, Sandgate, Nundah, Queensport, Tingalpa, Logan, Southport, Stradbroke Island, and Moreton Island. The area is 60 miles long, and about 12 miles wide, and coal has been found on almost every portion of it. Ipswich also has large areas not yet prospected, and the same may be said of Beaudesert and the Darling Downs.

Maryborough is the centre of a large coal area, and operations are now in progress prospecting lands adjacent to the proposed deep-water port at Urangan Point.

Gladstone is about 50 miles from the little-prospected Callide Creek Coalfield. Much has to be done on this field before its resources are fully known, and the area might easily be extended by prospecting.

Rockhampton has coalfields on the west and north. Those on the west include the Dawson-Mackenzie Area and Stanwell, the latter being of doubtful value, but within 20 miles of the city. To the north is the Styx field, which will soon be worked now that railway communication is being established.

Mackay, Bowen, Townsville, Cairns, and Cooktown each have inland coalfields, and local developments are reported from time to time in areas known to carry coal seams, but regular outputs have not yet taken place.

Western Queensland coalfields were defined when boring operations for water were being conducted about Winton and Hughenden, and with the necessity of supplying coal for the railways being built in the Western districts, some developments will be expected to take place in this part of the State.

Cape York Peninsula. Coal has been reported to occur at the Pascoe River and at Lloyd Bay, but nothing definite is known about it.

QUALITIES OF THE COALS. (*See also* Tables of Approximate Analyses.)

Hydrous Coals occur at Callide, Hughenden, and Waterpark Creek, those at the latter place being a true brown coal containing over 10 per cent. of moisture. The Dawson, Mackenzie, and Little River coals are very *low in moisture,* the Dawson having a mean of 1·3 per cent. Some of the other coals show very low percentages, being close to volcanic or other disturbances.

Gas Coals are well represented in the seams at Beaudesert, Warwick, Walloon, Dalby, and Waterpark, those conspicuous for having a small amount of volatile matter being Nebo, Dawson River, and Little River coals. Those high in *fixed carbon* include the coals of the Dawson, Mackenzie, and Little Rivers, the Dawson having a mean of 80 per cent. Other extremes are shown in the coals at Warwick, Toowoomba, and Waterpark, each of which contain about 41 per cent. The best *heating coals* are found at the Burrum, Ipswich, Styx River, and Clermont. The Mackenzie and Dawson coals, although showing the highest calorific values, have not yet proved successful, on account of their defective combustion in ordinary fire grates.

In *coke-making* the Ipswich and Burrum coals have proved their excellence for making good coke, some of the Styx coal also being adapted for this purpose.

Friability. The Styx and Ipswich coals are somewhat friable, while those at the Burrum, Clermont, Mackenzie, Dawson, Walloon, Warwick, and Toowoomba are firm.

Sulphur determinations have occasionally been determined, Cooktown showing the highest percentage (1·8), the Styx the lowest (0·2), the Ipswich coals varying between 0·4 and 1·7, other coals being between 1·1 and 1·4.

Ash percentages are lowest in the Burrum coals, which average 5 per cent., while the 66-ft. Blair Athol seam at Clermont, the 20-ft. Mammoth seam at Mackenzie River, and the 52-ft. seam at Waterpark each contain about 7 per cent., the Dawson seams containing about 9 per cent. Ipswich coals fluctuate above and below 10 per cent., the Toowoomba and Warwick coals about 15 per cent.

Coal—*continued :*

MINING OPERATIONS: Coal is being mined in a large number of collieries about Ipswich and West Moreton, and also in a few collieries at Darling Downs, Burrum near Maryborough, Blair Athol near Clermont, and the Bluff on the Central Railway. Developments are in progress, vigorously extending the area of productive coal measures about Ipswich, Burrum, Clermont, and Dawson River, while prospecting operations are being undertaken to test the value of the coal seams about Brisbane, Moreton Bay, Bowen River, Maryborough, Central Railway, and other places. Several coal shafts have been sunk on the Styx, Bowen, Little, Dawson, and Mackenzie Rivers, and Callide Creek coalfields, and from which small bulk quantities of coal have been obtained for experimental purposes, but regular outputs have not begun. A railway line to the Dawson River, now under construction, will be the means of opening up the large area of coal country existing there.

Coal—*continued:*

Discoveries: *See under* "Discoveries," separate heading.

Ports for Coal Export: Brisbane is the port for all the output of the mines in the Ipswich district, Maryborough being the port for the Burrum field. With the building of a deep-water jetty at Urangan Point, Maryborough will become an important shipping centre for coal. Gladstone will be the port for the Callide Coalfield when railway communication is established. Rockhampton has deep-water wharves at Port Alma and Broadmount, near the mouth of the Fitzroy River, and both these ports will be the outlets for the Dawson, Mackenzie, Styx, Bluff, Clermont, and other coals when once an export trade is established. Townsville has very little prospect of a coalfield being opened up in its immediate vicinity, although possibilities exist close to the railway at Stewart's Creek, and near Hughenden, while Bowen has a field at the Bowen River awaiting development. Mackay would be an additional port for the Styx River coal, and the port for Bee Creek and St. Helen's, and Cooktown the port for the Little River field. Coal occurs further north about Lloyd Bay, but of this nothing is known, except that specimens show it to be anthracite.

Statistical Notes:

The coal production in the chief countries of the world for the year 1910 is estimated, approximately, at 1,121,536,190 long tons, to which amount the Australian States contributed 7,659,767 long tons. This is equal to 0.68 per cent. of the world's yield. The coal output of Queensland for the year 1910 is estimated at 871,166 long tons, this being a percentage of 11·37 of the Australian, and 0·07 of the world's production for that year.

The Ipswich, West Moreton, and Darling Downs Coalfields have, between the years 1860 and 1912, yielded an estimated coal output of 11,558,659 tons; the Burrum Coalfield produced, approximately, 2,197,382 tons; the Blair Athol Coalfield, 299,095 tons. The percentages of the above outputs of coal to the estimated total coal production of Queensland are as follows, viz.:—Ipswich and West Moreton (including Darling Downs), 81·66; Burrum, 15·52; and Blair Athol (Clermont), 2·12.

The coal output of the collieries in Queensland has been gradually increasing from a yield of 323,068 tons in the year 1895 to 902,166 tons in 1912. The year 1912 also happens to be the one with the most valuable output (the price per ton being greatest), the amount realised being £338,264, this being equal to 6·29 per cent. of the value of the total coal production of the State.

Queensland's total output of coal to the end of the year 1912 is estimated, approximately, at 14,154,049 tons, valued at £5,377,240, equivalent to 5·17 per cent. of the whole value of the mineral production of the State to the end of the same year, which is estimated to be £104,009,087.

For details, *see tables*, Pls. 43, 45, 46, 46a, and *diagram*, Pl. 55.

1904 ...	6	6	1909	7	1¾			

Coal Imports and Exports.—No records are kept of the quantities of coal and coke imported or exported, but records show that during the last few years between 55,000 and 65,000 tons of coal and coke have been imported annually into Queensland, principally from the Newcastle coal fields, in New South Wales. Very small quantities of coal and coke are exported from Queensland.

1612A.——. Allsort's, or Two-mile Cr., 3 miles N.E. of Koorboora Township, 111 miles (by rail and road) S.W.byW. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* Q.G.M. Jour., vol. 11, p. 175 (1910).

1612B.—— (seam 13 in. wide). Stanley Is., Flinders Group, 114 miles direct N.W. of Cooktown. *Co.* Melville; *Dist.* Cook. *Ref.* A.R.D.M., 1904, p. 48.

1613. —— (semi-anthracite). St. George Coal Mine, Dave Cr., nr. Fairlight Stn., Little R. Coalfield, 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mossman; *Dist.* Cook. *Analyses: See* Coal Table, Nos. 316-318, and 323. *Ref.* G.S.Q. Pub. 91, p. 2 (1893).

1614. ——. Below junction of Dave Cr., E. of Little R., nr. Fairlight, Little R. Coalfield (*ante*). *Analysis: See* Coal Table, No. 321. *Ref.* G.S.Q. Pub. 91, p. 2 (1893).

1615. ——. Four miles above Fairlight Stn., Little R. Coalfield (*ante*). *Analysis: See* Coal Table, No. 319. *Ref.* G.S.Q. Pub. 11, p. 3 (1882).

1616. ——. Shaft in creek, nr. Fairlight, Little R. Coalfield (*ante*). *Analysis: See* Coal Table, No. 322. *Ref.* O.R.

1617. ——. Bank of Little R., nr. Bowerbird Gully, Little R. Coalfield (*ante*). *Analysis: See* Coal Table, No. 320. *Ref.* G.S.Q. Pub. 92, p. 175 (1892).

1617A.—— (lignite). Russell R. Goldfield, 20 miles W.byN. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 67 (1900).

1618. —— (anthracitic). Pascoe R., Weymouth Bay, Bowden Mineral Field, 240 miles N.W. of Cooktown. *Co.* Weymouth; *Dist.* Cook. *Analyses: See* Coal Table, Nos. 348, 349. *Ref.* A.R., 1905, p. 11.

1619. ——. Cambooya, 24 miles (by rail) S.W. of Toowoomba (main line). *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* Q.M.

1620. ——. Clifton Colliery, 145 miles W.S.W. of Brisbane (mail line). *Co.* Aubigny (*ante*). *Analyses: See* Coal Table, Nos. 90, 91. *Ref.* G.S.Q. Pub. 80, p. 4 (1891), and 92, pp. 339, 341 (1892).

1621. ——. Below basalt in well. Clifton, 42 miles (by rail) S. of Toowoomba (main line). *Co.* Aubigny (*ante*). *Ref.* A.C.G.

1621A.——. Balgowan, nr. Muldu Rail. Stn., about 12 miles N. of Oakey. *Co.* Aubigney (*ante*). *Analyses: See* Coal Table, Nos. 343, 344. *Ref.* Q.G.M.J., pp. 158, 159 (1912).

1622. ——. Grazing Farm, Por. 9A, Dingo Pt., Par. of Jimbour, between Dalby and Jimbour, 9 miles N.byW. of Dalby. *Co.* Aubigny (*ante*). *Ref.* G.S.Q. Pub. 103, p. 6 (1894).

1622A.——. Sharer's Sel., Por. (290), Par. of Jimbour, Oaklands, about 8 miles N. of Dalby. *Co.* Aubigny (*ante*). *Analyses: See* Coal Tables, 107 and 108. *Ref.* A.R., p. 230 (1910), and Q.G.M. Jour., vol. 11, p. 388 (1910).

1623. ——. Below Basalt. Gowrie Coal Mine, 7 miles (by rail) N.W.byN. of Toowoomba. *Co.* Aubigny (*ante*). *Analysis: See* Coal Table, No. 238. *Ref.* O.M. and L.B., 7, p. 723 (1902).

1623A.——. Por. 27V., Par. of Meringandan, 1 mile N. of Kingsthorpe Rail. Stn. (Western line). *Co.* Aubigny (*ante*). *Analysis: See* Coal Table, No. 239. *Ref.* A.R., p. 262 (1910).

1624. ——. Hodgson's Cr., 6 miles W.S.W. of Cambooya Rail. Stn. (Main Rail.). *Co.* Aubigny (*ante*). *Analysis: See* Coal Table, No. 75. *Ref.* G.S.Q. Pub. 92, pp. 339 and 341 (1892).

1624A.——. Seam 11 ft. thick at 60 ft. in Cretaceous beds. *Loc.* Wellcamp Sub-Artesian Bore, No. 436, nr. Wellcamp Rail. Stn., 13 miles W. of Toowoomba. *Co.* Aubigny (*ante*). *Ref.* A.R.H.E. (1911).

1625. ——. In shaft. Jimbour Head Stn., 12 miles N.E. of Macalister Rail. Stn. (Western line.) *Co.* Aubigny (*ante*). [Coal seam was worked many years ago.] *Ref.* B.D., and G.S.Q. Pub. 103, p. 6 (1895).

1625A.——. King's Cr. Coal Mines, 40 miles S. of Toowoomba. *Co.* Aubigny (*ante*). *Ref.* G.S.Q. Pub. 87, p. 4 (1892).

1625B.——. Nr. Taylor's Siding, Crow's Nest Rail. Stn., 24 miles N. of Toowoomba *Co.* Aubigny (*ante*). *Analysis: See* Coal Table, No. 380. *Ref.* A.R., p. 288 (1910).

1625C.——. Kingsthorpe Mines—Sugarloaf, Kingsthorpe, Sunrise, and Enterprise.

1626. ——. Federal Colliery, Oakey, 19 miles (by rail) N.W. of Toowoomba (Western line). *Co.* Aubigny (*ante*). *Analysis: See* Coal Table, No. 345. *Ref.* A.R., 1907, p. 111.

1626 (1). ——. In well in road. Agricultural Sel. 2555, Por. 15, Par. of Cameby, 11 miles S. of Chinchilla Rail. Stn. *Co.* Bulwer; *Dist.* Darling Downs. *Ref.* Warden, Roma.

1626A1.——. In Golder's Sel. at Mt. Domville, 6 miles S.byW. of Millmerran. *See* Coal Table, No. 337A. *Ref.* A.R., p. 20 (1912).

1626A. ——. Por. 13V., etc., Par. of Chinchilla, ¾-mile S.W. of Chinchilla Rail. Stn. (Western line), 203 miles (by rail) W.N.W. of Brisbane. *Co.* Lytton; *Dist.* Darling Downs. *Refs.* Q.G.M.J., vol. 11, p. 286 (1910), G.S.Q. Pub. 235, pp. 14-17 (1911).

1627. ——. 14-ft. seam of bright, black coal; depth 180 ft. in bore. Por. 93, Par. Colamba, 6½ miles N. of Chinchilla, 209 miles (by rail and road) W.N.W. of Brisbane. *Co.* Lytton (*ante*). *Refs.* O.R. and G.S.Q. Pub. 235, pp. 14-17 (1911). [Blantyre Coal Co.].

1628. ——. Bringalilly Cr., br. of Canning Cr., 25 miles N. of Inglewood Rail. Stn. (Warwick br. line). *Co.* Marsh; *Dist.* Darling Downs. *Analysis: See* Coal Table, No. 247. *Ref.* Q.G.M.J., 1902, p. 562.

1629. ——. Coal Mine, 1 mile W. of Allora Rail. Stn. *Co.* Merivale; *Dist.* Darling Downs. *Analysis: See* Coal Table, No. 411. *Ref.* "Queensland," by Daintree, p. 79.

1630. Coal. Por. 1985, Avoca Farm, 2 miles S.E. of Emu Vale Rail. Stn., 18 miles (by rail and road) E. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 87, p. 5 (1892).

1631. ——. Coalpit Gully, Farm Cr., 3 miles E.N.E. of Tannymorel Rail. Stn. (Killarney line), 23 miles (by rail and road) E.S.E. of Warwick. *Co.* Merivale (*ante*). *Analyses: See* Coal Table, Nos. 372, 373. *Ref.* G.S.Q. Pub. 87, p. 5 (1892), and A.R., pp. 19, 23 (1905).

1632. ——. Bituminous, gaseous. In well at 40 ft. from the surface. Seams 1 ft., 2 ft., and about 6 ft., latter in bore below well at 70 ft. *Loc.* J. McMillan's Sel., ¼-mile S.W. of Cemetery, nr. Allora Rail. Stn. *Co.* Merivale (*ante*). *Ref.* B.D.

1633. ——. Por. 848, 849, Emu Cr., 3 miles E. of Emu Vale Rail. Stn. (Killarney Br. line), 19 miles (by rail and road) E. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 87, p. 5 (1892).

1633A.——. Near Maryvale Rail. Stn., about 19 miles (by rail) N.E. of Warwick. *Co.* Maryvale (*ante*). *Analyses: See* Coal Table, Nos. 335, 366. *Ref.* A.R., pp. 39, 100 (1912). Several small seams in shaft. Largest 18 in., with bands over 6 in. thick between. No. 335 is a general sample, 336 sample of 18-in. seam.

1633B.——. Mt. Thabor, along Mary Vale Road, on Por. 439 (?), Par. of Warwick, 3 miles N.E. of Warwick. *Co.* Merivale (*ante*). *Analysis: See* Coal Table, No. 403. *Ref.* A.R., 1910, p. 281.

1633C.——. Mt. Thabor (*ante*). *Analysis: See* Coal Table, No. 403A. *Ref.* A.R., p. 347 (1911).

1634. ——. Tannymorel Coal Mine, Tannymorel, 23 miles (by rail) E.byS. of Warwick, on Killarney Br. line. *Co.* Merivale (*ante*). *Analysis: See* Coal Table, No. 378. *Ref.* A.R., 1906, p. 53.

1634A.——. Tannymorel Coal Mine (*ante*). *Analysis: See* Coal Table, No. 379. *Ref.* A.R., p. 42 (1912).

1635. ——. Green's Well, Tannymorel (*ante*). *Analyses: See* Coal Table, Nos. 374-377. *Ref.* A.R., 1906, p. 53.

1636. ——. Por. 36, Par. of Glengallan, 7 miles N. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 87, p. 4 (1892).

1636A.——. Por. 73v., Par. of Glengallan, about 4 miles W.S.W. of Allora. *Co.* Merivale (*ante*). *Analysis: See* Coal Table, No. 12. *Ref.* A.R., p. 275 (1910).

1637. —— (cannel). In well, Spreadborough's Sel. (1855), Killarney, 28 miles (by rail) E.S.E. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 87, p. 5 (1892).

1638. ——. Sels. 5 and 7, Par. of Canning, nr. Swan Cr. Rail. Stn., 7 miles E. of Warwick (Killarney line). *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 87, p. 4 (1892).

1639. ——. Nr. Talgai Rail. Stn., 17 miles N. of Warwick. *Co.* Merivale. (*ante*). *Ref.* G.S.Q. Pub. 87, p. 4 (1892).

1640. ——. Government Well, Winton, 132 miles S.S.W. of Hughenden Rail. Stn., Gt. Northern line. *Co.* Ayrshire; *Dist.* **Gregory North.** *Analysis: See* Coal Table, No. 407. *Ref.* G.S.Q. Pub. 10, p. 20 (1885).

1641. ——. Sheppards' Well, Winton (*ante*). *Analysis: See* Coal Table, No. 408. *Ref.* G.S.Q. Pub. 10, p. 20 (1885), (Reprint 136, p. 40 (1898).

1641A. ——. In bore. Winton, 368 miles (by rail) S.W. of Townsville; *Co.* Ayrshire (*ante*).

1641B.——. Seam 7 ft. thick in Cretaceous beds. *Loc.* Kynuna No. 5 Artesian Bore, No. 306, Tumulca Cr., about 80 miles N.W.byW. of Winton Rail. Stn. *Co.* Kynuna; *Dist.* Gregory North. *Ref.* A.R.H.E. (1911).

1642. ——. Well, Ayrshire Downs, 3 miles S.E. of Werna, 35 miles N.N.W. of Winton. *Co.* Wokingham; *Dist.* Gregory North. *Analysis: See* Coal Table, No. 409. *Ref.* G.S.Q. Pub. 10, p. 20 (1882), (Reprint 136, p. 42 (1898).

1642A.——. Stewart's Cr. Rail. Cutting, 6 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* **Kennedy North.** *Analyses: See* Coal Table, Nos. 401, 402. *Ref.* G.S.Q. Pubs. 35, p. 14 (1887), 196, pp. 18-20 (1905), A.R., 1905, p. 3, and Q.G.M.J., vol. 7, pp. 406-9 (1906).

1643. ——. Black's Cr., Mt. Spencer Run, 30 miles S.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* O.M.

1644. ——. Por. (1450), Black Rock Cr., 35 miles N.W. of Mackay. *Co.* Carlisle (*ante*). *Analyses: See* Coal Table, Nos. 326-328D. *Ref.* G.S.Q. Pubs. 53, p. 7 (1889), 164, p. 14 (1901), 175, p. 13 (1902), and 181, p. 8 (1903), and Q.G.M.J., 1910, p. 283.

1645. ——. In gullies between Blenheim Stn. and Mt. Leslie, 65 miles S.byW. of Bowen R. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 54, p. 5 (1889).

1646. —— (inferior anthracitic). Hampden, Constant Cr., 20 miles N.W. of Mackay. *Co.* Carlisle (*ante*). *Analyses: See* Coal Table, Nos. 329, 330. *Ref.* G.S.Q. Pub. 164, pp. 12, 13 (1901).

1647. ——. Mt. Toby, 4½ miles N. of Mirani Rail. Stn., 26 miles (by rail and road) W. of Mackay. *Co.* Carlisle (*ante*). *Analysis: See* Coal Table, No. 331. *Ref.* G.S.Q. Pub. 164, p. 14 (1901).

1648. ——. Murray Cr., trib. of Cattle Cr., 34 miles W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, p. 14 (1901).

1649. ——. St. Helen's Cr., 30 miles N.W. of Mackay. *Co.* Carlisle (*ante*). *Analysis: See* Coal Table, No. 332. *Ref.* G.S.Q. Pub. 39, p. 2 (1887), and 164, p. 14 (1904).

1650. ——. Daintree Seam, Bowen R., Bowen R. Coalfield, 60 miles S.W.byS. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Analyses: See* Coal Table, Nos. 17-21 and 38, 39. *Ref.* G.S.Q. Pub. 4, pp. 36, 38, 39 (1879).

1651. ——. Macarthur's Seam, Macarthur's Cr., Bowen R. Coalfield (*ante*). *Analysis: See* Coal Table, No. 26. *Ref.* G.S.Q. Pub. 4, p. 38 (1879).

1652. ——. Garrick Seam, Pelican Cr., Bowen R. Goldfield (*ante*). *Analyses: See* Coal Table, Nos. 22, 23. *Ref.* G.S.Q. Pub. 4, p. 37 (1879).

1653. ——. No. 1 Bore, Garrick Seam (*ante*). *Analysis: See* Coal Table, No. 24. *Ref.* L.B. 1, p. 702 (1885), G.S.Q. Pub. 22, p. 56 (1886), and A.R.D.M., 1885, p. 55.

1654 ——. Kennedy Seam, Pelican Cr., Bowen R. Coalfield, 60 miles S.S.W. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Analysis: See* Coal Table, No. 25. *Ref.* G.S.Q. Pub. 4, p. 37 (1889).

1655. ——. Kennedy Seam (?), Pelican Cr., Bowen R. Coalfield (*ante*). *Analysis: See* Coal Table, No. 27. *Ref.* L.B. 1 (1885), and G.S.Q. Pub. 31, p. 47 (1886).

1655A. ——. Pelican Cr., Bowen R. Coalfield (*ante*). *Analysis: See* Coal Table No. 28. Thickness of seam, 4 ft. 6 in., with two bands. One band, less than 1 in. thick, is about 1 ft. from the top; the other, of same thickness, is 1 ft. from the bottom.

1656. ——. Byerwin Stn. Well, Kangaroo Cr., 75 miles S.W.byS. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Analysis: See* Coal Table, No. 16. *Ref.* G.S.Q. Pub. 181, p. 21 (1903).

1657. ——. Kangaroo Cr., Byerwin Run, 70 miles S.W.byS. of Bowen (*ante*). *Ref.* G.S.Q. Pub. 54, p. 5 (1889).

1658. ——. Greendale Well, Eaglefield Cr., 25 miles E. of Elphinstone Stn., 90 miles W.S.W. of Mackay. *Co.* Drake; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 54, p. 4 (1889).

1659. ——. Nr. Durham Downs Stn., 40 miles N.byE. of Roma. *Co.* Aberdeen; *Dist.* Leichhardt. *Ref.* O.M.

1659A. ——. Expedition Cr., 64 miles W.byS. of Banana. *Co.* Bauhinia; *Dist.* Leichhardt. *Ref.* O.R.

1659B. ——. Seam several feet thick in bore, 300 feet from the surface. *Loc.* about 3 miles S.E. of Malvern Downs Stn., and 17 miles E. of Capella Rail. Stn. (Clermont line). *Co* Cairns; *Dist.* Leichhardt.

1659C. ——. Outcrops W. side of Oakey Cr., 12 miles E. of Malvern Downs Stn., and 28 miles E. of Capella Rail. Stn. (Clermont line). *Co.* Cairns; *Dist.* Leichhardt.

1660. —— (bands). *Assoc.with* Gold, in alluvial deposits. *Loc.* Bantam Claim, Deep Ground, Black Ridge, 12¾ miles N.byW. of Clermont. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 201, p. 109 (1906).

1661. —— (as bands). *Assoc.with* Gold, in alluvial deposits. *Loc.* Eldorado Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 113 (1906).

1662. —— (as bands). *Assoc.with* Gold and Epsomite, in alluvial deposits. *Loc.* Mason's Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 50 (1906).

1663. —— (as bands). *Assoc.with* Gold, in alluvial deposits. *Loc.* Nipper Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 122 (1906).

1664. —— (as bands). *Assoc.with* Gold, in alluvial deposits. *Loc.* True Blue Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 129 (1906).

1665. Coal (dull). Bastet's M.L. (36), Blair Athol, Clermont Coalfield, 11 miles (by rail) N.W. of Clermont, and 240 miles (by rail and road) N.W.byN. of Rockhampton. *Co.* Clermont; *Dist.* Leichhardt. *Analysis: See* Coal Table, No. 77. *Ref.* G.S.Q. Pub. 148, p. 12 (1900).

1666. ——. Blair Athol Colliery, Clermont Coalfield (*ante*). *Analyses: See* Coal Table, Nos. 73, 78, and 79. *Ref.* G.S.Q. Pub. 148, pp. 10, 11 (1900).

1667. ——. Eldorado Colliery, Blair Athol, Clermont Coalfield (*ante*). *Analysis: See* Coal Table, No. 81. *Ref.* G.S.Q. Pub. 148, p. 12 (1900).

1668.——. *Assoc.with* Turgite. *Loc.* Federal Colliery, Blair Athol (*ante*). *Ref.* G.S.Q. Pub. 201, p. 85 (1906).

1669. ——. Hope Colliery, Blair Athol (*ante*). *Analyses: See* Coal Table, Nos. 82 and 83. *Ref.* G.S.Q. Pub. 148, p. 12 (1900).

1670. ——. Imbell Colliery, Blair Athol (*ante*). *Analysis: See* Coal Table, No. 84. *Ref.* G.S.Q. Pub. 148, p. 12 (1900).

1671. ——. Mercer's Lease (32), Blair Athol (*ante*). *Analysis: See* Coal Table, No. 85. *Ref.* G.S.Q. Pub. 148, p. 16 (1900).

1671A——. Newcastle Colliery, Blair Athol (*ante*). *Note.*—Recent developments by the Newcastle Coal Company, Ltd., show that their working shaft passed through 72 feet of good clean coal, the bottom portion showing an analysis between two and three per cent. of ash.

1672. —— (small bands, inferior, Cretaceous (?) Age). *Loc.* Flyspeck, McDonald's Flat, 4½ miles S.S.E. of Clermont. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 148, p. 11 (1900).

1672A.——. Five-foot seam, 80 ft. below surface, over gold "lead." *Loc.* Hurley's Flat, 3 miles W.S.W. of Blair Athol, Clermont Rail. line. *Co.* Clermont (*ante*).

1673. —— (bands). *Assoc.with* Gold, in conglomerate, in alluvial deposits. *Loc.* Lower Camp, Mill's Cr., Miclere, 17 miles N.byW. of Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 201, p. 70 (1906).

1674. —— (as small bands). Quarry Hill Shaft, Clermont. *Co.* Clermont (*ante*). *Analysis: See* Coal Table, No. 86. *Ref.* G.S.Q. Pub. 148, p. 12 (1900).

1675. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Appleton's Claim, Linklater's Lead, The Springs, 11 miles N.N.W. Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 201, p. 21 (1906).

1676. —— (bands). *Assoc.with* Gold, in old alluvial deposits. *Loc.* Spring Cr., The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 19 (1906).

1676A.——. Ten-foot seams in bores. Varies from 80 ft. to 200 ft. below the surface. Occurs below flows of basalt. *Loc.* various places on Meteor Downs and Orion Downs Runs, about 20 miles S.E. of Springsure. *Co.* Denison; *Dist.* Leichhardt. *Ref.* B.D. NOTE: Evidently the coal measures here are a continuation of those existing on the Dawson River further east.

1677. ——. Coringa, 35 miles N.byW. of Miles Rail. Stn. (Western line). *Co.* Fortescue; *Dist.* Leichhardt. *Ref.* O.M.

1678. ——. Roche Cr., nr. Rochedale Stn., 50 miles N.N.W. of Miles Rail. Stn. (Western line. *Co.* Fortescue (*ante*). *Analysis: See* Coal Table, No. 337. *Ref.* O.M.

1679. ——. Taroom, 75 miles N.byW. of Miles Rail. Stn., and 306 miles (by rail and road) from Brisbane (Western line). *Co.* Fortescue (*ante*). *Ref.* O.M.

1680. ——. McFadgen's Mine, Annandale South, nr. Denham Range, 80 miles W.N.W. of St. Lawrence. *Co.* Grosvenor; *Dist.* Leichhardt. *Ref.* O.M.

1681. ——. Cherwell Cr., trib. of Isaacs R., 40 miles S. of Lake Elphinstone Stn., 80 miles S.W. of Mackay. *Co.* Grosvenor (*ante*). *Ref.* O.M.

1682. ——. Eurora Run, nr. Elphinstone, 70 miles S.W. of Mackay. *Co.* Grosvenor (*ante*). *Ref.* O.M.

1683. ——. As blocks in river debris, 25 miles S. of Greendale Well, S. of Eungella Stn., Isaacs R. *Co.* Grosvenor (*ante*). *Ref.* B.D.

1684. ——. In well, 3 miles W. of Lenton Downs, 80 miles W.S.W. of Mackay. *Co.* Grosvenor (*ante*). *Ref.* G.S.Q. Pub. 54, p. 4 (1889), and O.M.

1685. ——. Bluff Colliery, 107 miles (by rail) W. of Rockhampton (Central line). *Co.* Humboldt; *Dist.* Leichhardt. *Analyses: See* Coal Table, Nos. 110-122, 416-419. *Ref.* L.B. 8, p. 570 (1894), A.R., p. 24 (1905), and p. 132 (1908), and G.S.Q. Pub. 151 (1901), and Q.G.M. Jour., p. 16 (1905).

1686. ——. Bluff Colliery (*ante*). *Analysis: See* Coal Table, No. 214. *Ref.* L.B. 8, p. 411 (1903).

1687. —— (semi-bituminous). Columba Colliery, S. br. of Wild Horse Cr., 2½ miles N.W. of Graham's Siding (Central Rail. line). *Co.* Humboldt; *Dist.* Leichhardt. *Analyses: See* Coal Table, Nos. 126-132. *Ref.* A.R., p. 21 (1905), p. 49 (1906), Q.G.M. Jour., p. 330 (1904), Q.G.S. Pub. 155, etc. (1901).

1688. —— (bituminous). Comet R., nr. Comet Rail. Stn. (Central line), 141 miles W. of Rockhampton. *Co.* Humboldt (*ante*). *Analysis: See* Coal Table, No. 136. *Ref.* Q.M.

1688A.——. Frenchman's Plains Coal Mine, Blackwater Cr., N.E. of Blackwater Rail. Stn. (Central line), 119 miles W. of Rockhampton. *Co.* Humboldt (*ante*). *Ref.* B.D.

1689. —— (semi-bituminous). Mammoth Coal Mine (Frenchman's Plains Seams), nr. Blackwater Rail. Stn. (Central line) (*ante*). *Analyses: See* Coal Table, Nos. 186-201, and 428. *Ref.* G.S.Q. Pub. 155 (1901), Q.G.M. Jour., p. 330 (1904), L.B. 8, pp. 175 (1903), 507, 559 (1904), A.R., pp. 3 (1905), 55, 57 (1906).

1689A.—— (semi-bituminous), nr. Stanley Rail. Stn. *Co.* Humboldt (*ante*). *Analyses: See* Coal Table, No. 215 (unofficial).

1690. ——. As small seams, separated by thick clay bands. *Loc.* Nr. Tolmie's Rail. Stn. (Central line), 129 miles W. of Rockhampton. *Co.* Humboldt (*ante*). *Analyses: See* Coal Table, Nos. 216-219. *Ref.* G.S.Q. Pub. 107 (1895), and p. 155 (1901).

1690A.——. Coldwater Stn., Cardowan Run, Connor's R., 66 miles S.byW. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* O.M.

1691. —— (semi-anthracitic). Dawson Co.'s Coal Mines, W. side of Dawson R., 75 miles S.W. of Rockhampton. *Cos.* Ferguson and Kimberley; *Dist.* Leichhardt. *Analyses: See* Coal Table, Nos. 139-158, 422. *Ref.* G.S.Q. Pub. 155, p. 6 (1901), L.B. 8, p. 194 (1903), Q.G.M. Jour., pp. 15, 654 (1905), A.R., p. 90 (1907), and G.S.Q. Pub. 216, p. 31 (1907).

1691A.——. In Government Bores, E. side of Dawson River (*ante*). *Analyses: See* Coal Table, Nos. 159-161D.

1691B.——. W. side of Dawson River (*ante*). *Analyses: See* Coal Table, Nos. 161E-164.

1692. —— (semi-anthracitic). Dunstan Coal Mine, Dawson R., 35 miles S .of Boolburra Rail Stn. (Central line), 94 miles (by rail and road) S.W. of Rockhampton. *Co.* Kimberley (*ante*). *Analyses: See* Coal Table, Nos. 165-180, 425. *Ref.* G.S.Q. Pub. 155, pp. 6 and 25 (1901), A.R.D.M., pp. 170 and 171 (1902), Q.G.M. Jour., p. 14 (1905), A.R., pp. 72, 75 (1906).

1693. —— (lignite). Small bands in clay deposits of Cretaceous (?) Age. *Loc.* Duaringa Bore, nr. Duaringa Rail. Stn. (Central line), 66 miles W.S.W. of Rockhampton. *Co.* Kimberley (*ante*). *Ref.* B.D.

1694. ——. Wallaroo Coal Mine, 3 miles S. of Tryphinia Rail. Stn. (Central line), 81 miles (by rail and road) W. of Rockhampton. *Co.* Kimberley (*ante*). *Analyses: See* Coal Table, Nos. 435-437. *Ref.* A.R., p. 10 (1905), and O.R.

1695. —— (semi-bituminous). From bores on Wallaroo Mine (*ante*). *Analyses: See* Coal Table, Nos. 184, 222-226. *Ref.* A.R.D.M., p. 173 (1903), Q.G.M. Jour., pp. 128, 330 (1904), A.R., p. 6 (1905).

1696. —— (semi-bituminous). Jellinbah, Mackenzie R., 22 miles N.byW. of Blackwater Rail. Stn. (Central line), 141 miles (by rail and road) W.byN. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Analyses: See* Coal Table, Nos. 206-210, 430-432. *Ref.* G.S.Q. Pub. 155, p. 25 (1901), L.B. 7, p. 785 (1902), A.R., pp. 6, 10 (1905).

1696A.——. Few inches thick. In well 80 ft. deep. *Loc.* 3 miles S. of Anakie Rail. Stn. *Co.* Plantagenet; *Dist.* Leichhardt.

1697. ——. Por. (17v) (Thompson's), Capella, 197 miles (by rail) W.byN. of Rockhompton (Central line). *Co.* Talbot; *Dist.* Leichhardt. *Analysis: See* Coal Table, No. 80. *Ref.* G.S.Q. Pub. 107, p. 5 (1895).

1698. ——. Bedourie Stn., 160 miles S.W. of Rockhampton. *Co.* Tingarra; *Dist.* Leichhardt. *Ref.* O.M.

1699. ——. As a large seam. Hutton Cr., Mt. Hutton Stn., 65 miles N. of Roma. *Co.* Westgrove; *Dist.* Leichhardt. *Ref.* O.M.

1699A. Coal. 40 miles N. of Roma. *Co.* Westgrove (*ante*). *Analyses: See* Coal Table, No. 350. *Ref.* A.R., p. 343 (1911).

1700. ——. Head of Bee Cr., nr. Elphinstone Stn., 60 miles W.S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 200, p. 15 (1905).

1701. —— (anthracitic). Bee Cr., junction of Hail Cr., 11 miles W.byN. of Finch-Hatton Rail. Stn. (Mackay line), and 18 miles N.W.byW. of Nebo. *Co.* Wodehouse (*ante*). *Analysis: See* Coal Table, No. 334. *Ref.* G.S.Q. Pubs 39, p. 21 (1887), 54, p. 4 (1889), 200, p. 15 (1905).

1702. ——. Black Waterhole Cr., 5 miles N.byE. of Hazledean, 40 miles (by rail and road) S.W. of Mackay (*viâ* Eton Rail. Stn.). *Co.* Wodehouse (*ante*). *Ref.* G.S.Q. Pub. 164, p. 7 (1901).

1702A. ——. Said to be from seam several feet thick. *Loc.* H. E. Edward's property, St. Albans, nr. Fort Cooper. *Par.* Womberoo. *Co.* Wodehouse (*ante*).

1703. ——. Head of Cooper Cr., 4 miles W. of Mt. Britton, 50 miles W.S.W. of Mackay. *Co.* Wodehouse (*ante*). *Ref.* G.S.Q. Pub. 200, p. 15 (1905).

1704. —— (anthracitic). Walker's Cr., 2 miles above junction of Carborough Cr., 10 miles W. of Nebo. *Co.* Wodehouse (*ante*). *Analysis: See* Coal Table, No. 333. *Ref.* G.S.Q. Pubs. 39, p. 3 (1887), and 200, p. 14 (1905).

1705. ——. Between Kerlong and Coppermine Range, nr. Mt. Orange, 52 miles S.W. of Cape Palmerston. *Co.* Wodehouse (*ante*). *Ref.* A.G.M.

1706. ——. Mt. Yuckawow, 5 miles E. of Elphinstone, about 72 miles S.W.byW. of Mackay. *Co.* Wodehouse (*ante*). *Ref.* O.M.

1706A. ——. Exposed in bank of river, Forest Vale Station, Maranoa River, 40 miles N. of Mitchell Rail. Stn. (Western line). *Co.* Bundara; *Dist.* **Maranoa.** *Analysis:* Moisture = 5 per cent.; vol. hydrocarbons = 46·25 per cent.; fixed carbon = 34·2 per cent.; ash = 14·55 per cent. *See* Coal Analysis, No. 338.

1706B. —— (bands). At 930 ft., in Cretaceous beds. *Loc.* Mitchell Town Artesian Bore, No. 37, 352 miles (by rail) W. of Brisbane. *Co.* Dublin; *Dist.* Maranoa. *Ref.* A.R.H.E. (1911).

1706C. ——. Bungeworgorai Creek, 16 miles N. of Hodgson Rail. Stn. *Co.* Waldegrave; *Dist.* Maranoa. *Ref.* W.E.C.

1706D. ——. In large loose lumps and small seams. Bungeworgorai Creek, near Euthulla Stn., 31 miles N. of Muckadilla Rail. Stn. *Co.* Waldegrave (*ante*). *Ref.* W.E.C.

1707. ——. Between Mt. Abundance and Rail. line, 10 miles S.S.E. of Muckadilla Rail. Stn. (Western line), 36 miles (by rail and road) W. of Roma. *Co.* Waldegrave (*ante*).

1707A. ——. Eight seams varying from 3 in. to 2 ft., *assoc.with* Natural Gas. *Loc.* Roma No. 2 Artesian Bore, No. 46(2). *Co.* Waldegrave (*ante*). *Ref.* A.R.H.E. (1911).

1707A1. ——. Two bores, in one, 11 ft. coal at 800 ft., in other, 40 ft. coal at 400 ft. Welford Lagoon, junction of Barcoo R. and Powlett's Cr., 120 miles W.S.W. of Blackall. *Co.* Cheviott; *Dist.* **Mitchell.** *Ref.* O.R.

1707B. ——. Band at 860 ft. in Cretaceous beds. *Loc.* Camoola Artesian Bore, No. 198, about 30 miles N.N.E. of Longreach Rail. Stn. (Central line). *Co.* Cumberland; *Dist.* Mitchell. *Ref.* A.R.H.E. (1911).

1707C. ——. Seam 1 ft. thick at 3,149 ft., in Cretaceous beds. *Loc.* Darr River Downs Artesian Bore, No. 245, about 50 miles N.N.W. of Longreach Rail. Stn. *Co.* Cumberland (*ante*). *Ref.* A.R.H.E. (1911).

1708. —— (lignite). As a fragment, in sandstone. Muttaburra Bore, at depth of 2,700 ft., 65 miles N.N.E. of Longreach Rail. Stn. (Central line). *Co.* Cumberland; *Dist.* Mitchell. *Ref.* B.D.

1709. ——. *Assoc.with* Blue Shale, in 70 ft. shaft. *Loc.* McLennan's Grazing Farm, 16 miles from Isisford. *Co.* Mitchell (*ante*). *Ref.* B.D.

1709A. ——. Seam of good coal at 150 ft., in Cretaceous beds. *Loc.* Rosedale Artesian Bore, No. 318, close to Longreach Rail. Stn. (Central line). *Co.* Portland; *Dist.* Mitchell. *Ref.* A.R.H.E. (1911).

1709B. ——. Seam 4 ft. 6 in. thick, 40 ft. in well. Moonda Park, near Thompson River and about 75 miles S.W. of Longreach Rail. Stn. (Central line). *Co.* Wolseley; *Dist.* Mitchell.

1709c.—— (bands). At 3,700 ft., in Cretaceous beds. *Loc.* Bimerah No. 2 Bore, Bimerah Lease Bores, No. 167(2), about 65 miles S.W.byS. of Longreach Rail. Stn. *Co.* Wolseley; *Dist.* Mitchell. *Ref.* A.R.H.E. (1911).

1709d.——. Prairie (near), 28 miles E. of Hughenden. *Co.* Woura; *Dist.* Mitchell. *Analysis: See* Coal Table, No. 245a. *Ref.* A.R., p. 279 (1910).

1709e.——. Blantyre Coal Mine, 7 miles N. of Karoon Rail. Stn., 9 miles from Warreah. *Co.* Woura (*ante*). Note: Shaft 562 ft. deep. Cretaceous shells at 294 ft., 4-in. coal band at 406 ft., 3 ft. of coal bands at 532 ft., 2 ft. 6in. of coal at 562 ft., and white sandstone at 555 ft. The sandstone yielded 2,200 gals. of water per hour, and caused the cessation of operations. *See* Analyses under Coal, Nos. 402a, 402b. *See also under* Coal Bores.

1710. ——. Bullock Cr., 195 miles S.W. of Townsville, and 18 miles from Warreah Rail. Stn. *Co.* Woura (*ante*). *Ref.* A.R.D.M., p. 51 (1884).

1711. ——. Donnelly's Sel. (39v), Paynter's Cr., Blackall Range, 2½ miles W. of Eudlo Rail. Stn. (North Coast line), 57 miles N. of Brisbane. *Co.* Canning; *Dist.* **Moreton.** *Analysis: See* Coal Table, No. 231. *Ref.* G.S.Q. Pub. 98, p. 4 (1894).

1711a.——. Four miles from (north?) of Landsborough Rail. Stn., on Blackall Range *Co.* Canning; *Dist.* Moreton.

1712. ——. In well, 40 ft. from surface. *Loc.* Caboolture Butter Factory, 31 miles (by rail) N. of Brisbane (North Coast line). *Co.* Canning (*ante*).

1713. ——. Caloundra Head (north and south end), 45 miles N. of Brisbane. *Co.* Canning (*ante*). *Analyses: See* Coal Table, Nos. 34 and 35. *Ref.* A.R., p. 142 (1908).

1714. ——. Torway Cr., N. of Caloundra Head, 45 miles N. of Brisbane. *Co* Canning (*ante*). *Analysis: See* Coal Table, No. 42. *Ref.* A.R., p. 143 (1908)

1714a.——. Of inferior quality. Toorbul Point, 28 miles N. of Brisbane. *Co.* Canning (*ante*). *Ref.* B.D.

1715. —— (bituminous). Monkville, Palmwoods, 60 miles (by rail) N. of Brisbane (North Coast line). *Co.* Canning (*ante*). *Ref.* B.D.

1716. ——. Sel. 135, Par. of Mooloolah, nr. Nambour, 65 miles (by rail) N. of Brisbane. *Co.* Canning (*ante*). *Ref.* G.S.Q. Pub. 98, p. 2 (1894).

1717. ——. Cooyar Cr., 8 miles S.E. of Nanango. *Co.* Cavendish; *Dist.* Moreton. *Analysis: See* Coal Table, No. 339. *Ref.* A.R., p. 106 (1907).

1718. ——. Flagstone Cr., Helidon, 72 miles (by rail) W. of Brisbane (Main line). *Co.* Cavendish (*ante*). *Ref.* A.C.G.

1719. —— (lignite). In small bands, in "Ipswich" Measures. Murphy's Cr., 19 miles E. of Toowoomba (Main line). *Co.* Cavendish (*ante*). *Ref.* B.D.

1720. ——. Palm-tree Cr., 8 miles N. of Helidon, 37 miles (by rail and road) W. of Toowoomba (Main line). *Co.* Cavendish (*ante*). *Analysis: See* Coal Table, No. 242. *Ref.* A.R., p. 107 (1907).

1720a.——. Por. 84v, Par. of Cooyar, 3 miles E.byN. of Yarraman. *Co.* Cavendish (*ante*). *Analysis: See* Coal Table, No. 410. *Ref.* A.R., p. 366 (1911).

1721. —— (9 ft. seam). Head of Blackfellow's Cr., Par. of E. Haldon, 10 miles S. of Gatton Rail. Stn. (Main line). *Co.* Churchill; *Dist.* Moreton. *Analysis: See* Coal Table, No. 235. *Ref.* G.S.Q. Pubs. 31, p. 62 (1886), and 92, pp. 338, 341 (1892), and A.C.G.

1722. ——. Boonah, 59 miles (by rail) S.S.W. of Brisbane (Fassifern br. line). *Co.* Churchill (*ante*). *Ref.* O.R.

1722a. ——. (Several seams said to exist). *Loc.* 4 miles S.E. of Cunningham's Gap, near Clumber, to the S.W. of Boonah Rail Stn. *Co.* Churchill. *Dist.* Moreton. *Ref.* B.D.

1723. ——. Nr. Flagstone Cr., 8 miles S.W. of Helidon, 80 miles (by rail and road) S.W.byS. of Brisbane (Main line). *Co.* Churchill (*ante*). *Analysis: See* Coal Table, No. 241. *Ref.* G.S.Q. Pub. 92, p. 338 (1892).

1723a.——. Six-foot seam (?). Hell-hole Cr., near junction with Flagstone Cr., Drayton Commonage, 8½ miles S.W. of Helidon. *Co.* Churchill; *Dist.* Moreton.

1723b.——. Laidley Sub-artesian Town Bore, 51 miles (by rail) W.byS. of Brisbane. *Co.* Churchill (*ante*). *Ref.* G.S.Q. Pub. 92, p. 323 (1892).

1724. ——. Tent Hill Cr., br. of Lockyer Cr., nr. Gatton, 61 miles (by rail) W. of Brisbane (Main line). *Co.* Churchill (*ante*). *Ref.* A.C.G.

1725. Coal. Caledonian Colliery, Walloon, 6 miles W. of Ipswich, 30 miles (by rail and road) S.W. of Brisbane (Main line). *Co.* Churchill (*ante*). *Analysis: See* Coal Table, No. 306. *Ref.* G.S.Q. Pubs. 125, p. 60 (1897), 147, p. 21 (1899).

1726. ——. Walloon Colliery, Walloon (*ante*). *Analysis: See* Coal Table, No. 308. *Ref.* G.S.Q. Pub. 92, p. 345 (1892).

1727. ——. Nr. Walloon (*ante*). *Analysis: See* Coal Table, No. 307. *Ref.* G.S.Q. Pub. 92, pp. 337 and 341 (1892).

1727A.——. Dudley Colliery, Karrabin, 3 miles W. of Ipswich (*ante*). *Ref.* B.D.

1728. ——. West's Good Hope Mine, Yahmahnto (Loamside), 5 miles (by rail) S. of Ipswich (Fassifern br. line). *Co.* Churchill; *Dist.* Moreton. *Analyses: See* Coal Table, Nos. 309C, D, E. *Ref.* A.R., p. 22 (1905).

1728A.——. Good Hope Mine (West's), Yahmahnto (Loamside) (*ante*). *Analysis: See* Coal Table, No. 309. *Ref.* A.R., p. 317 (1911).

1728B.——. Good Hope Mine (*ante*). *Analyses: See* Coal Table, No. 309A, 309B.

1728C.——. Speedwell Colliery, Yahmahnto (Loamside) (*ante*). *Analyses: See* Coal Table, Nos. 310, 310A, 310B, 310C, 310D. *Ref.* A.R., pp. 320, 321, 322.

1729. ——. Aberdare Seam, Bundamba Coal Area, 21 miles (by rail) W.S.W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Analysis: See* Coal Table, No. 420. *Ref.* "Queensland," by Daintree, p. 77 (1873).

1730. ——. Aberdare Colliery, Bundamba Coal Area (*ante*). *Analyses: See* Coal Table, Nos. 249, 250. *Ref.* G.S.Q. Pubs. 125, p. 60 (1897), and 147, p. 21 (1899), and A.R., p. 137 (1908).

1730A.——. Abermain Colliery, Bundamba Coal Area (*ante*). *Ref.* O.R.

1730B.——. Blackheath Colliery, Bundamba Coal Area (*ante*). *Ref.* O.R.

1731. ——. Bogside Colliery, 2½ miles S.byE. of Bundamba Rail. Stn. (Main line). *Co.* Stanley; *Dist.* Moreton. *Analysis: See* Coal Table, No. 254. *Ref.* O.R.

1732. ——. Dobbie's Seam, Bonnie Dundee Colliery, 4 miles S.E. of Bundamba Rail. Stn. (Main line) (*ante*). *Analysis: See* Coal Table, No. 259. *Ref.* L.B. 8, p. 395 (1903).

1733. ——. Bonnie Dundee Colliery (*ante*). *Analysis: See* Coal Table, No. 255. *Ref.* A.R., p. 137 (1908).

1733A.——. Borehole Colliery, 1¼ mile S.byE. of Bundamba Rail. Stn. (Main line). *Co.* Stanley; *Dist.* Moreton.

1734. ——. Box Flat Colliery, about 1 mile S. of Bundamba Rail. Stn. (Main line) (*ante*). *Analysis: See* Coal Table, No. 256. *Ref.* A.R., p. 137, 1908.

1735. ——. Bundamba No. 4 or Hard Seam and No. 1 Seam, Braeside Colliery, ½-mile E.S.E. of Bundamba Rail. Stn. (Main line) (*ante*). *Analyses: See* Coal Table, Nos. 257, 258. *Ref.* G.S.Q. Pubs. 125, p. 60 (1897), and 147, p. 21 (1899).

1735A.——. Denham Colliery, about 3 miles S.byE. of Bundamba Rail. Stn. (Main line) (*ante*). *Ref.* O.R.

1736. ——. New Chum Seam, Dinmore Colliery, 1 mile S.W. of Dinmore Rail. Stn. (Main line), 20 miles (by rail and road) W. of Brisbane, Bundamba Coal Area. *Co.* Stanley; *Dist.* Moreton. *Analysis: See* Coal Table, No. 264. *Ref.* G.S.Q. Pubs. 125, p. 59 (1897), and 147, p. 21 (1899).

1737. ——. Donnybrook Colliery (Bishop Seam), 2 miles N. of Ipswich Rail. Stn. (Main line), North Ipswich Coal Area. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 282. *Ref.* G.S.Q. Pubs. 125, p. 60 (1897), and 147, p. 21 (1899).

1738. ——. Eastwood Colliery, ½-mile N. of Ipswich Rail. Stn. (Main line), North Ipswich Coal Area (*ante*). *Analysis: See* Coal Table, No. 284. *Ref.* G.S.Q. Pub. 92, pp. 336 and 341 (1892).

1738A.——. Ebbw Vale Colliery, Dinmore, 19 miles (by rail) W.S.W. of Brisbane (Main line), Bundamba Coal Area. *Par.* Goodna; *Co.* Stanley; *Dist.* Moreton.

1738B.——. Eclipse Colliery, North Ipswich Coal Area, 24 miles (by rail) W.S.W. of Brisbane (Main line). *Par.* Goodna; *Co.* Stanley (*ante*).

1738C.——. Fairbanks Colliery, Bundamba Coal Area, 21 miles (by rail) W.S.W. of Brisbane (Main line). *Par.* Goodna; *Co.* Stanley (*ante*).

1738D.——. Fernie Cr. Colliery, Bundamba Coal Area (*ante*).

1739. ——. Goodna Colliery, Redbank Rail. Stn. (Main line), 17 miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Analysis: See* Coal Table, No. 260. *Ref.* G.S.Q. Pub. 92, pp. 334, 341 (1892).

1740. ——. Haighmoor Colliery, 2½ miles N.byE. of Ipswich Rail. Stn. (Main line). *Co.* Stanley (*ante*). *Analyses: See* Coal Table, Nos. 286, 287, and 288. *Ref.* G.S.Q. Pubs. 125, p. 59 (1897), and 147, p. 21 (1899), and A.R., p. 139 (1908).

1740A.——. Mafeking Colliery, Bundamba Coal Area, 21 miles (by rail) W.S.W. of Brisbane. *Par.* Bundamba; *Co.* Stanley (*ante*).

1740B.——. ½-mile S.E. of Mafeking Colliery, Bundamba Coal Area (*ante*). *Analysis: See* Coal Table, Nos. 261A, 261B.

1741. ——. New Aberdare Colliery (Top and Bottom Seam), Bundamba Coal Area (*ante*). *Analysis: See* Coal Table, Nos. 262 and 263. *Ref.* A.R., p. 157 (1908).

1741A.——. New Chum Colliery, Bundamba Coal Area (*ante*).

1742. ——. New Colliery, nr. Tivoli, 2 miles N. of Ipswich, Bundamba Coal Area (*ante*). *Analysis: See* Coal Table, No. 289. *Ref.* G.S.Q. Pub. 92, pp. 337, 341 (1892).

1742A.——. New West Moreton Colliery, Bundamba Coal Area (*ante*). *Ref.* O.R.

1743. ——. Oakwood Colliery, 6 miles S.S.E. of Bundamba Rail. Stn. (Main line), 27 miles (by rail and road) W.S.W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Analyses: See* Coal Table, Nos. 266-270. *Ref.* A.R., pp. 95, 114 (1907).

1743A.——. Old West Moreton Colliery, Bundamba Coal Area, 21 miles (by rail) W.S.W. of Brisbane. *Co.* Stanley. *Ref.* O.R.

1743B.——. Purga Colliery, about 6 miles S. of Ipswich. *Co.* Stanley (*ante*).

1744. ——. Rhondda Colliery, Bundamba Coal Area, 21 miles W.S.W. of Brisbane *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 272. *Ref.* G.S.Q. Pub. 147, p. 20 (1899), and O.R.

1744A.——. Rose Hill Colliery, Bundamba Coal Area, 21 miles W.S.W. of Brisbane (*ante*).

1745. ——. Rocky Crossing, Brisbane R., 2 miles N.W. of Tivoli Mine, 4 miles N. of Ipswich. *Co.* Stanley; *Dist.* Moreton. *Analysis: See* Coal Table, No. 290. *Ref.* G.S.Q. Pub. 92, pp. 337, 341 (1892).

1746. ——. Rothwell Haig Colliery (Stafford's), 2 miles N. of Ipswich, North Ipswich Coal Area. *Co.* Stanley (*ante*). *Analyses: See* Coal Table, Nos. 291-298. *Ref.* A.R., pp. 40, 42, 43 (1906), p. 139 (1908).

1747. ——. Swanbank Colliery, 3¼ miles S. of Bundamba Rail. Stn. (Main line), and 24¼ miles (by rail and road) S.W.byS. of Brisbane, Bundamba Coal Area. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 273. *Ref.* G.S.Q. Pubs. 125 (1897), and 147, p. 21 (1899).

1747A.——. Tantivy Colliery, North Ipswich Coal Area, 24 miles W.S.W. of Brisbane. *Par.* Chuwar; *Co.* Stanley (*ante*).

1748. ——. Aberdare Seam, Thomas's Colliery, 1½ mile S. of Bundamba Rail. Stn. (Main line). *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 251. *Ref.* G.S.Q. Pub. 92, pp. 335, 341 (1892).

1749. ——. Old Aberdare Seam, Thomas's Colliery (*ante*). *Analysis: See* Coal Table, No. 271. *Ref.* G.S.Q. Pub. 92, pp. 335-341 (1892), and 147, p. 20 (1899).

1750. ——. Thompson's New Colliery, Por. 174, Par. of Goodna, 1 mile S. of Bundamba Rail. Stn. *Co.* Stanley; *Dist.* Moreton. *Analysis: See* Coal Table, No. 274. *Ref.* G.S.Q. Pub. 92, pp. 335, 341 (1892).

1751. ——. Tivoli Colliery, 2 miles N. of Ipswich. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 299. *Ref.* G.S.Q. Pub. 92, pp. 336, 341 (1892).

1752. ——. Blond and Wright's Seam, Tivoli Colliery (*ante*). *Analysis: See* Coal Table, No. 283. *Ref.* G.S.Q. Pub. 92, pp. 336, 341 (1892).

1753. ——. Tivoli Seam (No. 2), Tivoli Colliery (*ante*). *Analysis: See* Coal Table, No. 443. *Ref.* "Queensland," by Daintree, 1873, p. 78.

1754. ——. Aberdare Seam, Walker's Fairbank Colliery, N. of Bundamba Rail. Stn. *Co.* Stanley; *Dist.* Moreton. *Analyses: See* Coal Table, Nos. 252, 253. *Ref.* A.R., 1905, p. 5.

1755. Coal. Garden Seam, Waterstown Colliery, Tivoli, 1¼ mile N.byE. of Ipswich. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 285. *Ref.* G.S.Q. Pub. 92, p. 344 (1892).

1756. ——. Waterstown Colliery, Tivoli (*ante*). *Analysis: See* Coal Table, No. 300. *Ref.* G.S.Q. Pub. 125, p. 60 (1897), and 147, p. 21 (1899).

1757. ——. New Chum Seam, Whitwood Colliery, 1 mile S.W. of Dinmore Rail. Stn., 20 miles (by rail and road) W. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 265. *Ref.* G.S.Q. Pubs. 125, p. 59 (1897), and 147, p. 21 (1899).

1758. ——. Bishop's Seam, Wright's Bishop Colliery, 2 miles N. of Ipswich Rail. Stn. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 281. *Ref.* G.S.Q. Pubs. 125, p. 60 (1897), and 147, p. 2 (1899).

1759. ——. Tivoli Seam, Wright's New Tivoli Colliery, 2 miles N. of Ipswich Rail. Stn. (*ante*). *Analysis: See* Coal Table, No. 301. *Ref.* G.S.Q. Pub. 147, p. 21 (1899).

1760. ——. Belmont, 8 miles E. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 143, p. 10 (1899).

1760A.——. In bore. Fountain's Selection, about ½-mile N. of Burpengary Creek, nr. Burpengary Rail. Stn., 26 miles N. of Brisbane (North Coast line). *Co.* Stanley (*ante*). *Ref.* B.D.

1761. ——. Capalaba, 10 mles E. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 36. *Ref.* A.R., p. 140 (1908).

1762. ——. (Struck at depth of 790 ft.), Racecourse Bore, Eagle Farm, 6 miles (by rail) N. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 41. *Ref.* G.S.Q. Pub. 58, p. 2 (1890).

1763. ——. Downman's Sel. 68 [63], 1½ mile N. of Logan Village Rail. Stn. (Beaudesert br. line), and 28 miles (by rail and road) S.E. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 4. *Ref.* G.S.Q. Pub. 36, p. 3 (1887), and 225, p. 15 (1910).

1764. ——. Shailer's Sel. 261 [407], Slack's Cr., trib. of Logan R., 4½ miles N.E. of Loganlea Rail. Stn. (South Coast line), 23½ miles (by rail and road) S.E. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 6. *Ref.* G.S.Q. Pub. 36, p. 2 (1887).

1765. ——. Lyon's Shaft, Por. 158, Par. of Moggill, 12 miles S.W. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 261. *Ref.* G.S.Q. Pub. 92, pp. 334, 341 (1892).

1766. ——. Sels. 14 and 15 (Williams's), opposite Wolston Cr., 2 miles N.W. of Wolston Rail. Stn. (on Main line), 14 miles (by rail and road) W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 63, p. 1 (1890).

1767. ——. Moreton Is. (Cape Moreton), 40 miles N.E. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 37. *Ref.* A.R., 1908, p. 143.

1768. ——. Moreton Is. (*ante*). *Analysis: See* Coal Table, No. 39. *Ref.* A.R., p. 145 (1908).

1769. ——. In 18-in. seam, and in other smaller seams, in shaft, Sel. 318, Par. Bulimba, nr. Broawater Bridge, Mt. Gravatt, 4½ miles S.E. of Brisbane Rail. Stn. *Co.* Stanley; *Dist.* Moreton.

1770. ——. Murphy's Seam, Kedron Brook, about 5 miles N. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 38. *Ref.* G.S.Q. Pub. 92, p. 341 (1892), and A.R., 1908, p. 160.

1771. ——. Nundah Coal Mine, 1 mile S.W. of Nundah Rail. Stn., 6 miles (by rail and road) N. of Brisbane. *Co.* Stanley (*ante*). *Analyses: See* Coal Table, Nos. 40 and 40A. *Ref.* G.S.Q. Pub. 104, p. 4 (1896), and 225, p. 35 (1910), and A.R., p. 160 (1908).

1771A.—— (14-in. seam). Baynes Bros.' Works, Queensport, Hemmant, 5 miles N.E. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 40B. *Ref.* G.S.Q. Pub. 225, p. 30 (1910). *Note.*—Fifteen to twenty feet of coal, coaly shale, and clay occurs on the bank of the Brisbane River about this locality, the coal seams being generally very small, and alternating with bands of the shale and clay.

1771B.—— Australian Meat Export Cutting, Queensport (*ante*). *Analysis: See* Coal Table No. 40C. *Ref.* A.R., p. 192 (1913).

1772. ——. Por. 122, Par. Redland, 4 miles N.E. of Kingston Rail. Stn. (South Coast line). *Co.* Stanley (*ante*). *Ref.* O.M.

1773. —— (in several small seams). *Assoc.with* Fireclay. *Loc.* Kelly's Balmoral Brick Works, Bulimba Cr., Par. of Tingalpa, 8 miles E.byN. of Brisbane. *Co.* Stanley (*ante*). *Analyses: See* Coal Table, Nos. 31, 32, 33. *Ref.* A.R., 1907, pp. 109 and 119, and O.M.

1773A.——. Por. 342, Tingalpa Cr., Tingalpa, 10½ miles E.S.E. of Brisbane. *Co.* Stanley (*ante*). *Analysis: See* Coal Table, No. 41A. *Ref.* G.S.Q. Pub. 225, p. 27 (1910).

1773B.——. Por. 357, Tingalpa, about 1¼ mile S.E. of Mt. Petrie, 9 miles E.S.E. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 225, p. 26 (1910).

1774. ——. In quarry, on Por. 50, par. of Tingalpa, 1½ mile S.W. of Manly Rail. Stn. (Cleveland line). *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pubs. 108, p. 4 (1896), and 225, p. 28 (1910).

1774A.——. Seam said to be on Ebenezer Thorn's Sel., on Mt. Mona, nr. Mt. Cotton, 14 miles S.E.byE. of Brisbane. *Co.* Stanley (*ante*).

1775. ——. Por. 58, Par. of Yeerongpilly, 1 mile S.E. of Kuraby Rail. Stn. (South Coast line), 14 miles (by rail and road) S. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.M.

1776. ——. Por. 266, Scrubby Cr., Par. of Yeerongpilly, 1 mile W. of Kingston Rail. Stn. (South Coast line), 18 miles (by rail and road) S. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.M.

1777. ——. Por. 393, Par. Yeerongpilly (*ante*). *Ref.* O.M.

1777A.——. Por. 25, Tygum, W. of Logan R., Par. of Mackenzie, about ½-mile W. of Waterford Rail. Stn. (Beaudesert Br. line). *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 225, p. 14 (1910).

1777B.——. Pors. 68 (?) [63], 64, and 67, Mona Park, Par. of Mackenzie, 1 mile N.W.byW. of Buccan Rail. Stn. (Beaudesert line). *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 225, pp. 15-20 (1910).

1777C.——. Pors. 252, 227A, 257, Scrubby Cr., Par. of Mackenzie, 1 to 1½ mile S.W.byW. of Kingston Rail. Stn. (South Coast line). *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 225, p. 13 (1910).

1777D.——. Dennis Sel., Por. 121, 4 miles N. of Loganlea Rail. Stn. (South Coast line). *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pubs. 36, p. 2 (1887), and 225, p. 11 (1910).

1777E.——. In bore. Sel. 2 (W. H. Couldery), 3 miles E. of Alberton, 8 miles E. of Bethania Junction (South Coast line). *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 51, p. 2 (1889).

1778. —— (cannel). Beaudesert, 47 miles (by rail) S.byE. of Brisbane. *Co.* Ward (*ante*). *Analysis: See* Coal Table, No. 2. *Ref.* A.R., p. 13 (1905).

1779. ——. Brayford's Sel. 137, Par. of Logan, 1½ mile N. of Beaudesert Rail. Stn., 48½ miles (by rail and road) S.byE. of Brisbane. *Co.* Ward (*ante*). *Analysis: See* Coal Table, No. 3. *Ref.* G.S.Q. Pubs. 36, p. 3 (1887), and 51, p. 4 (1889).

1779A.——. Gould's Sel., Por. (137), Par. of Logan, 1½ mile N. of Beaudesert (*ante*). *Analysis: See* Coal Table, No. 4B. *Ref.* G.S.Q. Pub. 225, p. 41 (1910). Bore put down in 1912. *See* list *under* Coal Bores for notes.

1779B.——. Stanfield's Sel., Por. (98), Par. of Beaudesert, about 1½ mile E.byN. of Beaudesert, 48½ miles (by rail and road) S.byE. of Brisbane. *Co.* Ward (*ante*). *Analysis: See* Coal Table, No. 6A. *Ref.* G.S.Q. Pub. 225, p. 42 (1910).

1780. ——. Rafter's Sel. (63), Bromelton, 5 miles W. of Beaudesert Rail. Stn., 52 miles (by rail and road) S.byE. of Brisbane. *Co.* Ward (*ante*). *Analysis: See* Coal Table, No. 5. *Ref.* G.S.Q. Pubs. 49, p. 8 (1889), and 51, p. 4 (1889), and G.S.M.

1781. ——. Water's Sel. (120), 1½ mile N. of Beaudesert, 48½ miles (by rail and road) S.byE. of Brisbane. *Co.* Ward (*ante*). *Analysis: See* Coal Table, No. 7. *Ref.* G.S.Q. Pubs. 49, p. 8, and 51, p. 4 (1889). Bore put down in 1912. *See* list *under* Coal Bores for notes.

1782. ——. Timber Reserve, ½-mile N. of Buccan Rail. Stn., 26 miles (by rail) S. of Brisbane (Beaudesert line). *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 225, pp. 20-22 (1910), and O.M.

1782A.——. Crown Lands Reserve (200), nr. corner and S.E. corner of Por. 26V., Par of Palen, about 29 miles S.W. of Beaudesert, 76 miles (by rail and road) from Brisbane. *Co.* Ward (*ante*). *Analyses: See* Coal Tables, Nos. 3A and 3B. *Ref.* G.S.Q. Pub. 225, p. 46 (1910).

1782B. Coal. Egan's Sel., Por. 37, Par. of Palen, Palen Cr., about 25 miles S.W. of Beaudesert. *Co.* Ward (*ante*). *Analysis: See* Coal Table, 4A. *Ref.* G.S.Q. Pub. 225, p. 45 (1910).

1782C.——. Widgee Cr., Steinhardt's Sel., Pors. 2T and 9T, Par. of Telemon, about 21 miles S.S.E. of Beaudesert, 68 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Analyses: See* Coal Table, Nos. 9A and 9B. *Ref.* G.S.Q. Pub. 225, p. 48 (1910).

1782D.——. Por. 34, in br. of Back Cr., about 14 miles S.S.W. of Innesplain Rail. Stn. (Beaudesert line). *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 225, p. 34 (1910).

1782E.——. Por. 53v. Par. of Kerry, Kerry Cr., about $7\frac{1}{2}$ miles S.E. of Beaudesert Rail. Stn. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 225, p. 48 (1910).

1782F.——. Por. 261, Par. of Moffat, close to Buccan Rail. Stn., 26 miles S.E.byS. of Brisbane. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 225, p. 22 (1910).

1783. ——. Ball's Sel. (71), Flagstone Cr., 2 miles S.W. of Tambourine, about 12 miles S. of Logan Village Rail. Stn. (Beaudesert Br. line). *Co.* Ward (*ante*). *Analysis: See* Coal Table, No. 1. *Ref.* G.S.Q. Pub. 51, p. 3 (1889).

1784. —— (8-in. seam). Por. 7, Par. Logan, at Gleneagle Rail. Stn., Beaudesert br. line, 44 miles S. of Brisbane. *Co.* Ward (*ante*). *Ref.* O.M.

1785. ——. Por. 60, Logan R., Par. of Mackenzie. $1\frac{1}{2}$ mile N.W. of Logan Village Rail. Stn. (Beaudesert Br. line). *Co.* Ward (*ante*). *Ref.* O.M.

1786. ——. Por. (388), Logan Village, Par. of Boyd-Moffatt, 27 miles (by rail) S.S.E. of Brisbane (Beaudesert Br. line). *Co.* Ward (*ante*). *Ref.* O.M.

1787. ——. Watt's Sel. (11), 3 miles S.E. of Logan Village Rail. Stn., 30 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Analyses: See* Coal Table, Nos. 8, 9. (*Ref.* G.S.Q. Pubs. 36 (1881), and 51, pp. 2, 3 (1889).

1788. —— (reported). Pors. 23 and 24, Par. of Mundoolan, 9 miles S. of Logan Village Rail. Stn. (Beaudesert line), 36 miles (by rail and road) S.byE. of Brisbane. *Co.* Ward (*ante*). *Ref.* O.M.

1789. ——. In small bands, in brown and yellow sandstone. Por. 66, Par. of Tambournie, 6 miles S. of Logan Village Rail. Stn. (Beaudesert br. line). *Co.* Ward (*ante*). *Ref.* O.M.

1790. ——. Por. 11, Par. of Wickham, $3\frac{1}{2}$ miles S.E. of Logan Village Rail. Stn. (Beaudesert br. line), and 30 miles (road and rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* O.M.

1790A.——. In well, Johnson's Sel. (20v.) *Par.* Palen; *Co.* Ward (*ante*).; 5 miles S.W. Rathdowney Station, Beaudesert tramline. *See* analyses *under* Table of Coal Analyses, Nos. 4C, 4D, p. 262. Sample 4C: 1 ft. thick; depth, 24 ft. Sample 4D: 3 ft. thick; depth, 27 ft.; 2 ft. below 3C. Coal bands also occur at 40 ft., ash contents being 29 per cent. *Ref.* B.D.

1791. ——. Boyne R., 55 miles S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* O.M.

1791A.——. Littabella Cr., 3 miles N. of Yandaran, 20 miles N. of Bundaberg. *Co.* Flinders; *Dist.* Port Curtis. *Ref.* Q.G.M.J., p. 448 (1911).

1792. —— (lignite). As small seam, in well, Duncan's Sel., nr. Lilymere Lagoon, Jamie Hill, Alton Downs, nr. Rockhampton. *Co.* Livingstone (*ante*). *Ref.* B.D.

1793. ——. In well in Jenkins's Paddock, Alton Downs (*ante*). *Ref.* B.D.

1794. ——. Friend's Sel. (26v), Bushley Rail. Stn. (Central line), 25 miles (by rail S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Analyses: See* Coal Table, Nos. 351, 352. *Ref.* G.S.Q. Pub. 131, p. 11 (1898), and 175, p. 8 (1902).

1795. —— (lignite). In Tertiary (?) clays with myrtaceous plant. Agricultural Reserve, Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

1796. —— (lignite). Native Cat Cr., 6 miles W. of Stanwell Rail. Stn (Central line), 22 miles (by rail and road) W.S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

1797. —— (lignite). Petersen's Sel. (2098, Quarry Cr., $3\frac{1}{4}$ miles S.byE. of Stanwell Rail. Stn. (Central line), 19 miles (by rail and road) S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 10 (1898).

1798. ——. Brussel's Cr., Broadsound, 96 miles N.W.byN. of Rockhampton. *Co.* Murchison (*ante*). *Ref.* A.R.D.M., p. 552 (1896).

1799. ——. Cattle Cr., Broadsound, about 11 miles N. of St. Lawrence. *Co.* Murchison (*ante*). *Ref.* O.M.

1800. ——. Styx R. Coalfield, 12 miles S.E. of St. Lawrence, 52 miles N.W.byN. of Rockhampton. *Co.* Murchison (*ante*). *Analyses: See* Coal Table, Nos. 355-369. Ref. G.S.Q. Pubs. 84, pp. 3-8 (1892), 92, p. 308 (1892), and 194, p. 11 (1904).

1801. —— (lignite). Shaft, Valentine Cr., at junction of Waterpark Cr., 44 miles N.N.E. of Rockhampton. *Co.* Palmerston; *Dist.* Port Curtis. *Analysis: See* Coal Table, No. 404. *Ref.* G.S.Q. Pub. 174, pp. 1-3 (1902).

1802. ——. Waterpark Cr. (outcrop), 44 miles N.N.E. of Rockhampton (*ante*). *Analysis: See* Coal Table, No. 405. *Ref.* G.S.Q. Pub. 174, p. 3 (1902).

1803. ——. Callide Cr. Coalfield, 52 miles S.W.byW. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Analyses: See* Coal Table, Nos. 68-72, 414. *Ref.* G.S.Q. Pubs. 80, p. 3 (1891), 148, p. 12 (1900). *Note.*—Recent developments (1912) show that one seam of coal exists which is 54 feet thick.

1804. —— (inferior). S. of South Peak, Moonmera Rail. Stn. (Mt. Morgan line), 20 miles S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195, p. 16 (1904).

1804A.——. About 30 miles S.W. of Charleville. *Co.* Burrandilla; *Dist.* **Warrego.** *Ref.* A.R., p. 376 (1911).

1804B.—— (lignite). Band at 200 ft., in Cretaceous beds. *Loc.* Charlotte Plains (Cunnamulla) Artesian Bore, No. 206, about 30 miles E. of Cunnamulla Rail. Stn. (Western line). *Co.* Noorama; *Dist.* Warrego. *Ref.* A.R.H.E. (1911).

1805. ——. Queensland Co.'s Burrum Colliery, Howard, 14 miles (by rail) N. of Maryborough, Burrum Coalfield. *Co.* Cook; *Dist.* **Wide Bay.** *Analyses: See* Coal Table, Nos. 56-59, 64, 413. *Ref.* G.S.Q. Pubs. 24, p. 11 (1886), 147, p. 21 (1889), 125, p. 59 (1897), and 170, pp. 13-15, 19 (1901), and A.R., 1910, p. 236.

1806. ——. Clyde Colliery (Beaufort Seam), Beaufort Shaft, Howard (*ante*). *Analysis: See* Coal Table, No. 51. *Ref.* G.S.Q. Pubs. 24, p. 11 (1886), 170, p. 16 (1901).

1806A.——. Dundee (Dudley) Colliery, Howard (*ante*). *Analyses: See* Coal Table, Nos. 53A and 53B. *Ref.* A.R., p. 207 (1910).

1806B.——. Glenesk Colliery, Howard (*ante*). *Ref.* O.R.

1810. ——. Agnes Vale, Broom's Cr., trib. of Isis R., 25 miles N.N.W. of Maryborough, Burrum Coalfield. *Co.* Cook; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 24 (1886).

1811. ——. Cherwell Cr., trib. of Isis R., 4 miles N.W. of Howard, 18 miles (by rail and road) N.W. of Maryborough, Burrum Coalfield (*ante*). *Ref.* G.S.Q. Pub. 24 (1886).

1812. ——. Gregory R., 2 miles S.W.byW. of Goodwood Rail. Stn. (North Coast line), 16 miles N.W.byW. of Howard, Burrum Coalfield (*ante*). *Ref.* G.S.Q. Pub. 24, p. 9 (1886).

1813. ——. Isis R., about 28 miles W.N.W. of Maryborough, Burrum Coalfield (*ante*). *Ref.* G.S.Q. Pub. 24 (1886).

1814. ——. Isis Scrub, Bundaberg Road, nr. Childers Rail. Stn. (Isis br. line), 40 miles (by rail) N.W.byW. of Maryborough, Burrum Coalfield (*ante*). *Ref.* G.S.Q. Pub. 24, p. 10 (1886).

1815. ——. Oaky Cr., trib. of Isis R., about 28 miles N.W.byW. of Maryborough, Burrum Coalfield (*ante*). *Ref.* G.S.Q. Pub. 24, p. 9 (1886).

1816. —— (inferior). Pine Cr., Burnett R., 3 miles above Bingera Rail. Stn. (Mt. Perry line), 14 miles (by rail and road) W. of Bundaberg. *Co.* Cook; *Dist.* Wide Bay. *Analysis: See* Coal Table, No. 48. *Ref.* G.S.Q. Pubs. 92, p. 307 (1892), 150, p. 10 (1900).

1817. ——. Miva Seam, Sel. 1767, 2½ miles up Munna Cr., 2½ miles N. of Miva Rail. Stn. (Kilkivan line), and 28 miles (by rail and road) N.W. of Gympie (North Coast line). *Co.* Lennox; *Dist.* Wide Bay. *Analyses: See* Coal Table, Nos. 390-392. *Ref.* G.S.Q. Pubs. 59, p. 2 (1890), and 92, p. 305 (1892).

1818. ——. Por. (1966), Par. of Miva, 26 miles N.W. of Gympie. *Co.* Lennox (*ante*). *Ref.* O.M.

1818A. Coal (18 in. seam). Crew's Prospecting Area, 2 miles W. of Aldershot Rail. Stn. *Co.* Lennox (*ante*). *Ref.* B.D.

1818B.—— (one-foot seam). *Loc.* Templeton's No. 2 Shaft, Templeton's Sel., about 1½ miles W. from Aldershot Rail. Stn. *Co.* Lennox (*ante*). *Ref.* B.D.

1819. ——. Redbank Cr., 3 miles W. of Tiaro Rail. Stn. (North Coast line). *Co.* Lennox (*ante*). *Analysis: See* Coal Table, No. 393. *Ref.* G.S.Q. Pub. 59, p. 5 (1890).

1820. ——. Jones's Sel. (1311), Tanyalba Cr., about 6 miles W.byS. of Gundiah Rail. Stn. (North Coast line). *Co.* Lennox (*ante*). *Analyses: See* Coal Table, Nos. 386-390. *Ref.* G.S.Q. Pub. 59, p. 3 (1890).

1821. ——. Thomas's Colliery, Tanyalba Cr. (*ante*). *Analyses: See* Coal Table, Nos. 395-398. *Ref.* A.R., pp. 51, 75 (1906).

1822. —— (anthracitic). Bull's Sel. (1357), nr. Gunalda, 17 miles S.byE. of Tiaro Rail. Stn. (North Coast line). *Co.* March; *Dist.* Wide Bay. *Analysis: See* Coal Table, No. 384. *Ref.* G.S.Q. Pub. 59, p. 2 (1890).

1822A.—— (bituminous). In 5-ft. seam, dipping 1-2½. Thomas Shaft, *Sel.* 1180, ½-mile east of Gunalda Rail. Stn. (*ante*). *Ref.* B.D.

1823. ——. Gunalda Run, Gunalda Rail. Stn. (North Coast line), 18 miles (by rail) N. of Gympie. *Co.* March (*ante*). *Analysis: See* Coal Table, No. 385. *Ref.* A.R., p. 25 (1905).

1824. —— (anthracite). *Assoc.with* Iron Pyrites, in slate, in crosscut at 1,300-ft. level, in 6-in. seam. *Loc.* Australasian Shaft, Australasian E.M. Co.'s Mine, Gympie, 106 miles (by rail) N.W. of Brisbane (North Coast line). *Co.* March (*ante*). *Ref.* B.D.

1825. ——. Nr. Lake Weyba, Laguna Bay, about 2 miles N. of Noosa. *Co.* March; *Dist.* Wide Bay (*ante*). *Ref.* G.S.Q. Pub. 49, p. 6 (1889).

1826. —— (anthracitic). *Assoc.with* Graphite, in sandstone and shale. No. 2 Workings, Bull's Mine, Mt. Bopple, 3 miles S.E. of Netherby Rail. Stn. (North Coast line). *Co.* March (*ante*). *Analysis: See* Coal Table, No. 383. *Ref.* G.S.Q. Pub. 203, pp. 5, 8, 10 (1906).

1827. ——. Eastern Slope, Mt. Bopple (*ante*). *Ref.* G.S.Q. Pub. 59, p. 4 (1890).

1828. ——. Nr. Canning's Sel. (1176), 11 miles N.W. of Noosa, 5 miles N.E. of Cooran Rail. Stn. (North Coast line). *Co.* March; *Dist.* Wide Bay. *Analyses: See* Coal Table, Nos. 341, 342. *Ref.* G.S.Q. Pub. 64, pp. 1, 2 (1890), and O.M.

1829. ——. Sorensen's Sel. (1737), Mary R., 9 miles S.S.W. of Tiaro Rail. Stn. (North Coast line). *Co.* March (*ante*). *Analysis: See* Coal Table, No. 394. *Ref.* G.S.Q. Pub. 59, p. 4 (1890).

1829A.——. In 1-ft. seam, 9 miles from Tewantin, and 3 or 4 miles from Pomona Rail. Stn. (North Coast line), on Tewantin-Gympie Road, about 25 miles (by rail and road) S.E. of Gympie. *Co.* March (*ante*). *Ref.* B.D.

1830. ——. On Tinana Cr., 12 miles S. of Maryborough. *Co.* March (*ante*). *Ref.* O.M.

1830A.——. Bellert's Shaft, 3 miles N.E. of Torbanlea, 14 miles (by rail and road) N.W. of Maryborough. *Co.* March (*ante*). *Analysis: See* Coal Table, No. 51A. *Ref.* A.R., p. 214 (1910).

1830B.——. Colton (Maryborough-Burrum Colliery Co.'s) Bores, 2 miles N.W. of Colton Rail. San. (Maryborough-Bundaberg line). *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 170, pp. 18, 25 (1901).

1830C.——. Saltwater Bores, Aldershot, 2 miles (by rail) N.W.byN. of Maryborough. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 170, pp. 18, 25 (1901).

1831. —— (lignite). Daru Is., mouth of Oriom (Tate) R., 270 miles W. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 85, p. 32 (1892).

1832. —— (lignite). Fly R., 304 miles W.byN. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 85, p. 32 (1892).

1833. —— (lignite). Strickland R., trib. of Fly R., 410 miles W.N.W. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 185, p. 32 (1892).

1834. —— (fragments and boulders). Abukiru Is., Purari R., 176 miles N.W.byW. of Port Moresby, Brit. New Guinea. *Analysis: See* Coal Table, No. 46. *Ref.* A.R., B.N.G., 1893-4, p. 93.

1834A.——. Two seams in Cretaceous beds. Depth (?). Malula Artesian Bore, No. 321. *Co.* (?); *Dist.* (?). *Ref.* A.R.H.E. (1911).

* NOTE.—Calories and British Thermal Unit values, given in the preceding Table of Proximate Analyses are based on Goutal's Formula:—$P = \frac{8150\,C + AM}{100}$; P = Calories, C = Percentage of fixed carbon; M = Percentage of Hydrocarbons; A = Coefficient depending on M; thus, if M = 2 to 15, then A = 13000; if M = 15 to 30 then A = 10000; if M = 30 to 35 then A = 9500; if M = 35 to 40 then A = 9000. It is found, however, that these theoretical results, in many cases, exceed the results obtained by practical experiments. *British Thermal Unit* (B.T.U.) = 1·8 Calories. *Evaporative Power* (Evap. Pow.) = $\frac{\text{B.T.U.}}{965{\cdot}7} = \frac{\text{Calories}}{557}$.

COAL.—SUMMARY TABLE OF PROXIMATE ANALYSES.

* Analyses calculated on coal dried at 100 degs. Cent.

† Iucluding oxygen.

Coal Areas at Bribie Island. *See under* Government Mining Journal, Report No. 86.

Coal Bores. References very incomplete—

Aldershot Bore. At Aldershot Works, nr. Rail. Stn. *Co.* March; *Dist.* Wide Bay. Coal seams are known in the neighbourhood, but only coal bands were met with in the bore, one band at 650 ft., another at 801 ft. *Ref.* B.D. (1912). Other bores mentioned under Saltwater.

Archerfield Bores—

(1) On *Por.* 364, *Par.* Oxley, *Co.* Stanley, *Dist.* Moreton. About 2¾ miles S.S.E. of Darra Rail. Station.

(2) On *Por.* 47, *Par.* Woogaroo, *Co.* Stanley, *Dist.* Moreton. About 6 miles S.S.E. of Darra Rail. Station. Other bores were sunk, but records are not obtainable. *Ref.* G.S.Q. Pub. 225, pp. 37, 38 (1910).

Beaudesert Bores. Gould and Waters' Sels. Parish of Logan; 1½ miles N. of Beaudesert. Depth 450 and 400 ft. respectively. No. 1 Bore (Gould's) cut three seams at 130, 170, and 220 ft. of 1 ft. 5 in., 2 ft. 8 in., and 5 ft. 2 in. thick, respectively. No. 2 Bore (Waters') cut three seams of coaly shale between 333 and 359 ft. *Min.Ref.* Coal, *see* 1779A, 1781. *Ref.* A.R.D.M., p. 210 (1912).

Bellert's Bore. About 330 ft. S. of Bellert's Shaft, and about 3 miles N.E. of Torbanlea Rail. Stn., Burrum Coalfield. *Por.* 3, *Par.* Vernon, *Co.* March, *Dist.* Wide Bay. Coal was found at 109 ft. Seam averages 3 ft. thick. *Min.Ref.* Coal, *see* 1830A. *Ref.* Q.G.M. Jour., p. 342 (1900).

Bimerah Bore. *See under* Artesian Bores and Notes. No. 167 (2).

Black Rock Creek Coal Syndicate's Bores. East of Black Rock Creek and about 35 miles W.N.W. of Mackay. *Par.* St. Helens, *Co.* Carlisle, *Dist.* South Kennedy. Bores 1 to 3 are on *Por.* 1450, and Nos. 4 and 5 bores are about ½-mile E. of *Por.* 1450. Depths, 100 ft. to 350 ft. 3-ft. seam of coal met in No. 2 Bore. *Ref.* G.S.Q. Pub. 229, p. 43 (1910).

Blantyre Bore. *See under* Warreah Bore.

Bowen River Bore. Sixty miles S.W. of Bowen. Depth 340 ft. Struck Daintree coal seam. *See also* Pelican Bore. *Ref.* G.S.Q. Pub. 22, *also* C.A. Paper "Boring Operations at Coalfields, Bowen," 24th Nov., 1886.

Bribie View Bore (508 ft.). On mainland W. of Bribie Island. *Por.* 28, *Par.* of Toorbul, *Co.* Canning, *Dist.* Moreton. Coal seams were not found, although bore sunk in Coal Measures. Sandstones with one or two thin seams of hard black sandy shales and pebbly conglomerates occur near the bottom. *Ref.* A.R.D.M., p. 172 (1908).

Broadwater Bridge Bore, ½-mile S.W. of. *Por.* 352, *Par.* Bulimba, *Co.* Stanley, *Dist.* Moreton. No depth stated. *Ref.* G.S.Q. Pub. 225, p. 25 (1910).

Bundamba (including Blackstone) Bores (5). *Por.* 174, *Par.* Goodna, and *Pors.* 149, 150, 226, and 229, *Par.* Ipswich, *Co.* Stanley, *Dist.* Moreton. *See Note* Ipswich Coalfield *under* Coal Bores. *Ref.* G.S.Q. Pub. 108, pp. 19 and 22 (1895).

Burncluith Bore No. 1, 6½ miles N. of Chinchilla. *Por.* 93, *Par.* Colamba, *Co.* Lytton, *Dist.* Darling Downs. At 152 ft. there is good coal; at 180 ft., 14 ft. of bright coal; bottom of bore at 214 ft. *Min.Ref.* Coal, *see* 1627. *Ref.* O.R.

Burpengary (Helensburgh) Bore. 20 yds. from J. Bancroft's House, *Por.* 95, *Par.* Burpengary, *Co.* Stanley, *Dist.* Moreton. Sunk for coal in 1886. Depth and results unobtainable. *Ref.* B.D.

Burrum Bores. *See* Bellert's, Colton, Goodwood, Howard, Queensland Collieries Co.'s, Riverbank, Saltwater, and Torbanlea Bores.

Coal Bores—*continued:*

Bushley Bore (Friend's Sel. 26v), Bushley Rail. Stn., 6 miles S.W. of Stanwell Rail. Stn. *Co.* Livingstone; *Dist.* Pt. Curtis. *Min.Ref.* Coal, *see* 1794. *Ref.* G.S.Q. Pubs. 131, p. 11 (1898), and 175, p. 8 (1902).

Canobie Bore. *See under* Artesian Bores and Notes. No. 200.

Charlotte Plains (Cunnamulla) Bore. *See under* Artesian Bores and Notes. No. 206.

—— —— (Richmond) Bore. *See under* Artesian Bores and Notes. No. 207 (8).

Colton (Maryborough and Burrum Co.'s) Bores (27 hand bores and 2 diamond-drill bores). Burrum Coalfield, in *Par.* of Ferguson, *Co.* Lennox; *Par.* Walsh, *Co.* Cook; *Par.* Vernon, *Co.* March; *Dist.* Wide Bay. *Min.Ref.* Coal, *see* 1830B. *Ref.* G.S.Q. Pub. 170, pp. 18, 25 (1901), which gives details of all the bores sunk.

Couldery Bore (Ageston). Sel. (2) (W. H. Couldery), 3 miles E. of Alberton, 8 miles E. of Bethania Junction (South Coast line). *Co.* Ward; *Dist.* Moreton. *Min.Ref.* Coal, *see* 1777E. *Ref.* G.S.Q. Pub. 51, p. 2 (1889).

Dalby Bore (300 ft. deep), at Railway Cattle Yards, ¾-mile W. of Dalby Railway Station. *Par.* Dalby, *Co.* Aubigny, *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 143, p. 20 (1898). *See also under* Artesian Bores and Notes. No. 73.

Darr River Downs Bore. *See under* Artesian Bores and Notes. No. 245.

Dawson R. Bores. *See* Dawson R. Anthracite Coal Co.'s Bores (7), and Dunstan Coal Co.'s Bores (7). (Several bores have been sunk of which no records are available.)

Dawson R. Anthracite Co.'s Bores (7), Dawson R. 6 bores in *Co.* Ferguson, *Dist.* Leichhardt; 1 bore in *Co.* Kimberley, *Dist.* Leichhardt. *Min.Ref.* Coal, *see* 1691, 1692. *Ref.* Q.G.M. Jour., vol. 6, p. 15 (1905).

Dinmore Bores. *See* New Chum and Whitwood Bores.

Downman's (Mona Park) Bores, about 1½ mile N. of Logan Village Rail. Stn. Bore (1887), *Por.* 68 (?) [63], *Par.* Mackenzie, depth 291 ft. (Calyx), and Bore (1909), *Por.* 67, *Par.* Mackenzie, *Co.* Stanley, *Dist.* Moreton, depth 450 ft. (Diamond-drill). *See also* Mona Park Bores. *Min.Ref.* Coal, *see* 1763. *Ref.* G.S.Q. Pub. 36, p. 3 (1887), and G.S.Q. Pub. 225, pp. 14, 15, 19, 20 (1910).

Duaringa Bore. *Co.* Kimberley; *Dist.* Leichhardt. *Min.Ref.* Coal, *see* 1693. *Ref.* G.S.Q. Pubs. 155, p. 20 (1901), 159, p. 16 (1901.)

Dunstan Coal Co.'s Bores (7), Dawson R., 35 miles S. of Boolburra Rail. Stn. (Central line). *Co.* Ferguson; *Dist.* Leichhardt. *Min.Ref.* Coal, *see* 1692. *Ref.* Q.G.M. Jour., vol. vi., pp. 14, 15 (1905).

Eagle Farm Racecourse Bore, near Brisbane. *Par.* Toombul, *Co.* Stanley, *Dist.* Moreton. (Bore was sunk for artesian water to a depth of 1,781 ft. 6 in., and a 5-ft. seam of coal was struck at 791 ft.). *Min.Ref.* Coal, *see* 1762. *Ref.* G.S.Q. Pub. 225, pp. 32-34 (1910).

Eshelby's Bore. *Por.* 212, *Par.* Mackenzie, *Co.* Stanley, *Dist.* Moreton. Depth, 450 ft. (Jumper. *Ref.* G.S.Q. Pub. 225, p. 14 (1910).

Glenalvon Coal and Gas Bore, nr. Rosewood. *See* Glenalvon Bore *under* Gas Bores for position and note.

Goodwood Bore, Burrum Coalfield. *Par.* Isis, *Co.* Cook, *Dist.* Wide Bay. *Min.Ref.* Coal, *see* 1812. *Ref.* G.S.Q. Pub. 170, pp. 17, 20 (1901).

Heussler's Shaft and Bore, about 1 mile S.E. of Mt. Petrie. *Por.* 357, *Par.* Tingalpa, *Co.* Stanley; *Dist.* Moreton. *Min.Ref.* Coal, *see* 1773B. *Ref.* G.S.Q. Pub. 225, p. 26 (1910).

Howard Bores, Burrum Coalfield. *Par.* Burrum, *Co.* Cook, *Dist.* Wide Bay. *Min.Ref.* Coal, *see* 1809. *Ref.* G.S.Q. Pub. 170, pp. 17, 20, 21 (1901). *Also* Geol. Surv. Office Letter-book 12 (1910), p. 658, for bore on Q'land

Coal Bores—*continued:*

Colliery's Property. Depth 1,500 ft. Another bore, 800 ft. deep, was sunk afterwards at the S.E. corner of Por. 23 by the Queensland Coal Co., Ltd., who have the records. The last bore was sunk by the Howard Coal Syndicate in the middle of por. 32, and close to a shaft, the positions being 2¾ miles N.N.W. of Howard Rail. Stn. Depth 369 ft., with 1 ft. of coal at 172 ft. (1912.) *Ref.* B.D.

Ipswich Coalfield Bores. *See* Bundamba Bores (including Blackstone), New Chum Colliery Bore (Dinmore), Whitwood Colliery Bore (Dinmore). There has been a large number of bores sunk in this district, other than those mentioned above, but no records are available. The district comprises Blackstone, Bundamba, Dinmore, Goodna, Moggil, North Ipswich, Purga, Redbank Plains, Rosewood, Tivoli, Walloon, Waterstown, and Yahmahnto.

Isis River Bores, Burrum Coalfield. (1) On Sel. 1091, depth 500 ft.; no coal. (2) On Sel. 1090, depth greater than 225 ft.; seam of coal (10 in.) at 140 feet. *Min.Ref.* Coal, *see* 1813. *Ref.* G.S.Q. Pub. No. 32, p. 67 (1886).

Kelly's Bores, about ¾-mile S.E. of Murarrie Rail. Stn. *Por.* 50, *Par.* Tingalpa (no record of depth), and *Por.* 51, *Par.* Tingalpa, *Co.* Stanley, *Dist.* Moreton. Depth, 200 ft. (?). *Ref.* G.S.Q. Pub. 225, pp. 28, 29 (1910).

Kynuna Bore. *See under* Artesian Bores and Notes. No. 306 (5).

Laidley Bore, S. of Laidley Rail. Stn. *Co.* Churchill; *Dist.* Moreton. In sinking for water a 6-ft. seam of coal was met with at 1,700 ft. depth. *Min.Ref.* Coal, *see* 1723A. *Ref.* G.S.Q. Pub. 92, p. 323 (1892).

Lindum Mere Bore, about ½-mile S.E. of Lindum Rail. Stn. *Por.* 129, *Par.* Tingalpa, *Co.* Stanley, *Dist.* Moreton. Depth, 1,060 ft. *Ref.* G.S.Q. Pubs. 143, p. 8 (1897), and 225, p. 32 (1910). *See also under* Artesian Bores and Notes. No. 182.

Logan Village Bore, 3½ miles S. of Logan Village. *Por.* 356, *Par.* of Moffatt, *Co.* Ward, *Dist.* Moreton. Depth, 250 ft. *Ref.* G.S.Q. Pub. 225, p. 23 (1910). *See also under* Downman's, Mona Park, and Timber Reserve.

Malula Bore. *See under* Artesian Bores and Notes. No. 321.

Maria Cr. Bore, 4 miles W. of Tolmie's Rail. Stn. *Co.* Humboldt; *Dist.* Leichhardt. *Ref.* G.S.Q. Pubs. 155, pp. 17, 18 (1901), 159, p. 19 (1901). *See also under* Artesian Bores and Notes. No. 66.

Mitchell Bore. *See under* Artesian Bores and Notes. No. 37.

Mona Park Bores, about 1½ mile N. of Logan Village Rail. Stn. *Pors.* 63 and 64, *Par.* of Mackenzie, *Co.* Stanley, *Dist.* Moreton. Depth, 500 ft. and 363 ft. respectively (1908). *See also* Downman's Bores. *Min.Ref.* Coal, *see* 1777B. *Ref.* G.S.Q. Pub. 225, pp. 15-18 (1910).

Mt. Morgan Co.'s Bores (2), on branch of Stony Creek, 2½ miles S. of Stanwell. *Par.* Stanwell, *Co.* Livingstone, *Dist.* Pt. Curtis. *Ref.* G.S.Q. Pub. 131, p. 11 (1898).

Mt. Petrie (about 2 miles E. of). *Pors.* 344 and 345, *Par.* Tingalpa, *Co.* Stanley, *Dist.* Moreton. No record of depth. *Ref.* G.S.Q. Pub. 225, p. 26 (1910).

Muttaburra Bore, 65 miles N.N.E. of Longreach Rail. Stn. (Central line). *Co.* Cumberland; *Dist.* Mitchell. Bore is artesian. Lignite was struck at depth of 2,700 ft. *Ref.* B.D.

New Chum Colliery Bore (from bottom of No. 3 Shaft), about 1 mile S.W. of Dinmore Rail. Stn. *Por.* 266, *Par.* Goodna, *Co.* Stanley, *Dist.* Moreton. *Min.Ref.* Coal, *see* 1736. *Ref.* G.S.Q. Pub. No. 204, p. 19 (1907).

Coal Bores—*continued:*

New Marathon Bore (Bradbury's), near Hughenden Rail. Stn. *Co.* Douglas; *Dist.* Burke. (Bore sunk for water, and coal struck somewhere between 1,500 and 1,600 feet. *Ref.* L.B. 4, p. 938.

North Queensland Collieries Co.'s Bores. Bores No. 1 and No. 2 (Stewart's Creek), about 7 miles S.E. of Townsville. *Por.* 150, *Par.* Stuart, *Co.* Elphinstone, *Dist.* North Kennedy. Depth, 259 ft. and 233 ft. 6 in. respectively. Bore No. 3 (Antill Plains), about 13 miles S.E. of Townsville. *Par.* Beor, *Co.* Elphinstone, *Dist.* North Kennedy. Depth (?). *Min.Ref.* Coal, *see* 1642A. *Ref.* G.S.Q. Pub. 196, pp. 18-21 (1905).

Nundah Bores. No. 1 Bore in Sports Reserve, near Nundah Rail. Stn. Depth, 223 ft. No. 2 Bore. *Por.* 353, about ½-mile W.S.W. of Nundah Rail. Stn. Depth, 377 ft. *Par.* Toombul, *Co.* Stanley, *Dist.* Moreton. *Min.Ref.* Coal, *see* 1770, 1771. *Ref.* A.R.D.M., 1910, p. 191.

Pelican Creek Bore, Bowen River, 60 miles S.W. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. Depth, 400 ft. Struck Garrick 5-ft. seam at 70 ft., but coal damaged by intrusion of volcanic rock. Other seams were penetrated, but are also burnt. *Ref.* G.S.Q. Pubs. 22, p. 55 (1885), 31, p. 46 (1886).

Petersen's Bore, Quarry Cr., 2 miles S. of Stanwell Rail. Stn. *Por.* Stanwell, *Co.* Livingstone, *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131, p. 10 (1898).

Quarry Cr. (Syndicate) Bore, junction with Neerkol Cr., Stanwell. *Par.* Stanwell, *Co.* Livingstone, *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131, p. 10 (1898).

Queensland Anthracite Co.'s Bore, 1½ mile W.S.W. of Wallaroo Rail. Stn., 74½ miles (by rail and road) W. of Rockhampton. *Co.* Kimberley; *Dist.* Leichhardt. Depth, 1,083 ft. *Ref.* Q.G.M. Jour., vol. vi., p. 15 (1905).

Queensland Collieries Co.'s Bore, 1 chain N.E. of the Company's B Pit (No. 14), Burrum Coalfield. *Par.* Burrum, *Co.* Cook, *Dist.* Wide Bay. Depth, 1,500 ft. *Ref.* L.B. 12, pp. 658, 659.

Queensport Meatworks Bore. *Por.* 17, *Par.* Bulimba, *Co.* Stanley, *Dist.* Moreton. Depth, 50 ft. *Ref.* G.S.Q. Pub. 225, p. 30 (1910).

Racecourse (Eagle Farm) Bore. *See under* Artesian Bores and Notes. No. 9.

Riverbank Bores, Burrum River. Walsh's No. 1 10 chains E. of Burrum Rail. Stn. *Depth* 727 ft. Several small coal seams passed through (1913). Walsh's No. 2, 20 (?) chains S.E. of Burrum Rail. Stn. *Depth* 427 ft. Small coal seams passed through 1913. *Ref.* B.D.

Roma No. 2 Bore. *See under* Artesian Bores and Notes. No. 46.

Rosedale Bore. *See under* Artesian Bores and Notes. No. 318 (2).

Saltwater Bores, Aldershot, Burrum Coalfield. Eleven bores. *Par.* Maryborough, *Co.* March, *Dist.* Wide Bay. Five bores. *Par.* Walliebum, *Co.* March, *Dist.* Wide Bay. *Min.Ref.* Coal, *see* 1830C. *Ref.* G.S.Q. Pub. 170, pp. 18, 25, 26 (1901).

Sanderson's Bore, Stony Cr. (Sel. 14A), 2 miles S.S.W. of Stanwell. *Par.* Stanwell, *Co.* Livingstone, *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131, pp. 10, 11 (1898).

Scrubby Creek (Kingston) Bores, nr. Kingston Rail. Stn. Ten bore holes. Depths varying from 15 ft. to 48 ft. *Pors.* 266, 257, 252, *Par.* Mackenzie. *Por.* 227A, *Par.* Yeerongpilly, *Co.* Stanley, *Dist.* Moreton. *Ref.* G.S.Q. Pub. 225, pp. 12, 13 (1910).

Shallow Bore (nr. Townley Bores, Stewart's Creek), about 5 miles S.E. of Townsville. *Por.* 122V, *Par.* Stuart, *Co.* Elphinstone, *Dist.* North Kennedy. Depth, 10 ft. (?). *Min.Ref.* Coal, *see* 1642A. *Ref.* G.S.Q. Pub. 196, pp. 18-21 (1905).

Coal Bores—*continued:*

Simpson and Rodger's Bore, Stewart's Cr., about 5 miles S.E. of Townsville. *Por.* 99, *Par.* Stuart; *Co.* Elphinstone; *Dist.* North Kennedy. Depth, 50 ft. (abandoned). *Ref.* G.S.Q. Pub. 196, pp. 18-21 (1905).

Stanwell Bores (1) Sanderson's and other bores, *see* G.S.Q.P. No. 131 and diagrams. *See also under* Artesian Bores and Notes, No. 65 (2). On Sel. 5A, near old farm house, Glen Lamond, Stanwell. *Depth* 818 ft. Several bands of coal of the Walloon type (gassy) were passed through, but none sufficiently thick to pay for working. *Ref.* B.D. *See also under* Bushley *and* Wood End.

Stewart's Creek Bores, about 6 miles S.E. of Townsville. *See* North Queensland Collieries Co. Bores, Townley Coal Co. Bores, Twaddles Bores, Shallow Bore near Townley's, Simpson and Rodger's Bore. *Also* North Queensland Collieries Co. Bore (Antill Plains).

Timber Reserve Bore, ½-mile N. of Buccan Rail. Stn., and 2 miles N.E. of Logan Village Rail. Stn. *Par.* Moffatt, *Co.* Ward, *Dist.* Moreton. Depth, 347 ft. *Min.Ref.* Coal, *see* 1782. *Ref.* G.S.Q. Pubs. 51, p. 3 (1889), and 225, pp. 20-22 (1910).

Tingalpa. *See under* Heussler's and Mt. Petrie Bores.

Tolmie's Bore. Tolmie's Rail. Stn., 129 miles (by rail) W.byS. of Rockhampton. *Co.* Humbolt; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, pp. 18-20 (1901).

Torbanlea Bores. Burrum Coalfield. *Par.* Walsh, *Co.* Cook, *Dist.* Wide Bay. *Min.Ref.* Coal, *see* 1809. *Ref.* G.S.Q. Pub. 170, pp. 18, 22-24 (1901), and B.D.

Torbanlea Government Bore. Burrum Coalfield, 2 miles E. of Torbanlea Rail. Stn., *Par.* Vernon, *Co.* March, *Dist.* Wide Bay. *Ref.* B.D. *See also* Bellert's Bore.

Townley Coal Company's Bores. Bores Nos. 1 and 2 (Stewart's Cr.), about 6 miles S.E. of Townsville, on Reserve south of *Por.* 100, *Par.* Stuart, *Co.* Elphinstone, *Dist.* North Kennedy. Depth, 74 ft. and 100 ft. (abandoned) respectively. *Min.Ref.* Coal, *see* 1642A. *Ref.* G.S.Q. Pub. 196, pp. 18-21 (1905).

Twaddle's Bores. Stewart's Creek, about 5 miles S.E. of Townsville. *Par.* Stuart, *Co.* Elphinstone, *Dist.* North Kennedy. No. 1 Bore, *Por.* 99. Depth, 89 ft. (abandoned). No. 2 Bore, *Por.* 100. Depth, 101 ft. (abandoned). No. 3 Bore, *Por.* 100. Depth, 59 ft. (abandoned). No. 4 Bore, *Por.* 100. Depth, 148 ft. 7 in. *Min.Ref.* Coal, *see* 1642A. *Ref.* G.S.Q. Pub. 196, pp. 18-21 (1905).

Tygum (Waterford) Bores. On *Pors.* 22 and 25, about ¾-miles S.W. of Waterford. *Par.* Mackenzie, *Co.* Stanley, *Dist.* Moreton. Bore on *Por.* 22 discontinued at 50 ft.; that on *Por.* 25 is 230 ft. deep with 6-in. band of very hard coal at 37 ft. (These bores were put down by Hon. Henry Jordan.) *Ref.* G.S.Q. Pub. 225, p. 14 (1910).

Wallaroo Bores, 4½ miles W.S.W. of Wallaroo Rail. Stn. (Central line), 77½ miles (by rail and road) W. of Rockhampton. *Co.* Kimberley; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 175, p. 8 (1902), and Q.G.M. Jour., vol. 6, pp. 14-16 (1905). Other bores have been sunk in this neighbourhood probably during 1909, of which there are no records available.

Warreah Bore, close to line on Northern Railway. *Co.* Woura; *Dist.* Mitchell. Depth, 494 ft. Put down by Railway Department in 1896-7, penetrated sandstone, shales, and bands of coal. *Ref.* G.S.Q. Pub. No. 121, p. 6 (1898).

Warreah Bore (8 miles N.W. of), at Blantyre Coal Area (Gt. Northern line), 530 ft. to white sandstone, 562 ft. to coal bands, 587 ft. to white sandstone (water-bearing), 596 ft. to coal seam (4 ft. 9 in.), 615 ft. to coal seam (9 ft.), and 200 ft. of white sandstone and clay to bottom of bore (815 ft.). *See under* Artesian Bores and Notes. No. 63.

Coal Bores—*continued:*

Warren Bore. Half-mile S. of Warren Rail. Stn. (Central line). *Par.* Stanwell; *Co.* Livingstone; *Dist.* Port Curtis. Depth, 494 feet, no coal, struck fault. *Ref.* B.D.

Whitwood Colliery Bore. Josey's Paddock, 1½ mile S.S.E. from Dinmore. *Par.* Goodna, *Co.* Stanley, *Dist.* Moreton. The Whitwood 3-ft. coal seam was found at 300 ft. An inferior 6-ft. seam with several bands occurs at 288 ft. *Min.Ref.* Coal, *see* 1757. *Ref.* "Observer," 20th Feb., 1909.

Winton. Depth 750. Several small seams were met with between surface and 600 ft. *Min.Ref.* Coal, *see* 1641A.

Woodend Bore. At Rail. Stn., near Neerkol Cr. (Central line). Depth, 420 ft., no coal. *Par.* Stanwell; *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* B.D. *See* further note under Stanwell.

Coal Boring, Notes on. *See* list *under* Supplementary Reports, Nos. 3, 72, 100, 126, 132, 139, 144, 145.

Coalpit Gully. Farm Cr., nr. Tannymorel Rail. Stn. *Min.Ref.* Coal, *see* 1631.

Coalstoun Lakes (about 5 miles S. of), 16 miles S.W. of Biggenden Rail. Stn. *Min.Ref.* Anglesite, *see* 12C; Azurite, 180A; Cerussite, 1188C; Galena, 2730B; Limonite, 5832A; Malachite, 6204A; Massicot, 6523A.

GEOLOGICAL NOTE: The two Coalstoun lakes are formed in the craters of lava cones, at an elevation of several hundred feet above the surrounding country.

Cobalt (Co). *Atom. Wt.* = 58·97. *Sp.gr.* = 8·50. *Colour*, Bluish-grey-metallic. Very tenacious. Magnetic. USES: The metal is used in some electroplating processes, but nickel is more commonly employed for this purpose. Smalt is the principal product of cobaltiferous ores, being used to give a blue colour to paper, linen, glass, enamels, etc., and in making pigments. Asbolite is a source of the metal, but the arsenide is the mineral from which most of the cobalt compounds are made.

MINERALS: *See* Asbolane, Cobalt oxide, Erythrine.

ASSOCIATED MINERALS: Iron Pyrites, Mispickel, Iron ores, Copper ores, Manganese ores, Gold, Bismuth ores, etc., etc.

MINERAL NOTE: Found in serpentine and quartz, and in nodules of bog manganese. Kilkivan may be considered to offer the best prospects in the State for the exploitation of cobalt deposits.

1834A.——. *Assoc. with* Iron Pyrites and Mispickel, in quartz lode. *Loc.* Asmus Claim, Mt. Hartley, 26 miles S.S.E. of Cooktown. *Co.* Banks; *Dist.* **Cook.** *Ref.* A.R., p. 199 (1909).

1835. ——. *Assoc. with* Copper Ore. *Loc.* Blue Mt., Funnel Cr., nr. Nebo, 40 miles S.byW. of Mackay. *Co.* Wodehouse; *Dist.* **Leichhardt.** *Ref.* L.B. 2, p. 231 (1889).

Cockson's Claim, Black Ridge, Clermont. *Min. Ref.* Gold (alluvial), *see* 3313; Marcasite, 6511.

Cocoa Cr., trib. of McIvor R., N.N.W. of Cooktown. Antimony was discovered here about 1891. *Min. Ref.* Cervantite, *see* 1302, 1303; Gold (alluvial) 3201, (reef) 3662, 3663; Stibnite, 7613-7615.

GEOLOGICAL NOTE: The rocks about Cocoa Creek are sedimentary, and form a series of slates and sandstones. In these rocks there are vertical quartz lodes, striking north and south, carrying a high percentage of antimony, and about one ounce of gold to the ton. *See* G.S.Q. Pub. No. 209 for general notes on Cocoa Cr.

Coen Co.; Cook Dist. *See map*, Pl. 8.

Coen Goldfield—

Situation: *See maps*, Pls. 8, 9. The Township is situated on the Coen R., 45 miles (by road) W.N.W. of Port Stewart, and 189 miles N.W. of Cooktown. *Cos.* Coen and Sidmouth; *Dist.* Cook. Centre about *Lat.* 13° 35′ S.; *Long.* 143° 23′ E.

Discovery: Alluvial gold was discovered on this field in Feb., 1876, but the deposits were worked out in about five months. Several reefs which were found at the time continued to be worked after the alluvial deposits were exhausted.

Proclamation of Field: First gazetted 16th Aug., 1892; last alteration, 16th June, 1898, as follows: The whole catchment area of the South Coen River from the first crossing of the road from Rokeby to Lallah Rookh, about seven miles south-westerly from Coen township, to the south-eastern watershed of the Archer River and all its tributaries, and also the northern watershed of the Stewart River, from the confluence of the Little Stuart River with same westerly.

Area: 119,680 acres (187 square miles).

Population: 198 (in 1910).

Leases: Gold-mining leases in force, 1; area, 23 acres; Miners' Homesteads in force, 35; area, 162 acres (1910).

Principal Mining Centres: Coen, The Springs, and Klondyke, *which see.*

Mineral Statistics: Gold, *see tables and diagram*, Pls. 36, 46, 46a, and 47.

Statistical Note: The greatest recorded annual gold yield (1905) was 6,894 fine oz.; valued at £29,284. Smallest gold yield (1912) was 855 fine oz.; valued at £3,632.

The first gold return (1893) was a little over 2,000 oz.; in the next five years the gold yield averaged 3,400 oz., but in subsequent years the returns fluctuated considerably.

Total yield of gold to end of 1912 was 50,242 fine oz. This is valued at £213,413, and is equal to 0·28 per cent. of the whole gold production of the State.

Mineral References: Gold (alluvial), *see* 3208, 3209, (reef) 3692-3699; Iron, (Iron Pyrites) 5028-5029, (Mispickel) 6676-6678; Other Minerals: Calcite, 486; Fluorspar, 2655; Garnet, 3153; Pinite, 7066.

Geological Note: The rocks consist of granite, greywacke, slate, mica schist, quartzite, etc. Most of the reefs are of quartz, but sometimes calcite and fluorspar form the lode matter. *See* G.S.Q. Pub. 163, p. 24, for details.

Geological Publications: Reports—Nos. 163 (1901), 209 (1907). *See under* Geol. Surv. Pub. List for titles; *also under* Govt. Min. Jour., Reports Nos. 3, 8.

Warden: Stationed at Cooktown. Inspector of Mines: Stationed at Croydon.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

General Information: Consult *Pugh's Almanac, Queensland Post Office Directory, Post and Telegraph Guide.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Coen R. (Lower Crossing), 45 miles (by road) N.N.W. of Port Stewart. *Min.Ref.* Garnet, *var.* Almadine, *see* 3153; Gold (alluvial), 3209.

Cook District—

Situation: (*See maps*, Pls. 8 and 9.) *Lats.*, 9° and 20°; *Longs.*, 141° and 147°. The most northerly district of the State, and comprising the whole of Cape York Peninsula and the islands of Torres Strait. It is bounded on the west by Gulf of Carpentaria, on the north by Torres Strait, on the east by Pacific Ocean, and on the south by the Burke and North Kennedy Districts. The principal western rivers, with their branches, are—Batavia, Archer or Peach (br. Coen R.), Holroyd or Lukin, Coleman (trib. King R.), Mitchell (tribs. Alice, Palmer, Walsh, Lynd, Tate, Hodgkinson, St. George, and Dry Rivers), Staaten, Gilbert (tribs. Etheridge, Einasleigh, Robinson, Percy, and Copperfield Rivers). The rivers on the eastern coast are the Pascoe, North Kennedy (trib. Morehead or Hann), Normanby (tribs. Kennedy, Mossman, Deighton, and Laura), Endeavour, Annan, Barron, Russell (trib. Mulgrave R.), and Johnstone.

Area: 99,775 sq. miles (including 397 sq. miles of islands).

Principal Mining Centres: *Goldfields*—Alice River, Coen, Etheridge Green Hills, Hamilton, Hayes Creek (Prov.), Hodgkinson, Jordan, Lochinvar (Prov.), Mulgrave, Palmer, Potallah (Prov.), Rocky River, Russell, and Starcke. *Mineral Fields*—Bowden (Wolfram); Chillagoe, including Arbouin (Copper, Tin), Bamford (Wolfram), Chillagoe (Copper), Koorboora (Tin, Copper), Mt. Mulligan (Coal), Muldiva (Silver-Lead, Copper), Mungana (Copper), O.K. (Copper), Tate (Tin), Wolfram Camp (Wolfram); Cooktown, including Annan R. and Bloomfield R. Tin Mines; Herberton, including California Creek (Tin), Clohesy (Gold), Coolgarra (Tin), Emuford (Wolfram), Herberton (Tin), Irvinebank (Tin), Mareeba (Gold), Montalbion (Tin), Mt. Carbine (Wolfram), Mt. Fraser (Tin), Mt. Garnet (Copper), Mt. Lewis (Tin), Mt. Molloy (Copper), Mt. Spurgeon (Tin), Nymbool (Tin), Ord (Tin), Stannary Hills (Tin), Watsonville (Tin). *Other Localities*—Angor (Tin), Archer River (Tin), Batavia River (Gold), Einasleigh (Copper), Fossilbrook (Wolfram, Tin), Granite Creek (Tin), Lancewood (Tin), Noble Island (Wolfram, Copper), Truxillo (Tin), Little River (Coal), Deighton R., etc. (Coal).

HARBOURAGE: The Endeavour River is available for vessels of large tonnage, but the entrance to the harbour is very narrow. Tides vary from 4 ft. to 10 ft. Depth of water at principal wharves vary from 15 ft. to 17 ft. at L.W.S.

POPULATION (of Cook District), 3,361 (1911).

RAINFALL: *See under* separate heading.

MINERAL STATISTICS: *See under* Cooktown Mineral Field.

MINERAL REFERENCE: Hornblende, 4826; Olivine, 6922; Picotite, 7583.

GEOLOGICAL NOTE: The rocks about the town comprise quartzites, slates, etc., of Gympie Formation, belonging to the Permo-Carboniferous System. *See* G.S.Q Pub. 87, p. 20, for details.

GEOLOGICAL PUBLICATIONS (Cooktown and District): Reports—Nos. 11, 66, 70, 91, 123, 144, 180, 210. Maps, Nos. 109, 110, 111. *See under* Geol. Sur. Pub. List for titles. *See also under* Supplementary Report List, Nos. 12, 35.

GENERAL INFORMATION: Consult *Pugh's Almanac, Queensland Post Office Directory, Post and Telegraph Guide.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

NEWSPAPERS: *Cooktown Independent, New Endeavour Beacon.*

Cooktown Coalfields—

See Little River Coalfield, Deighton R., Welcome Cr., Oakey Cr., Guppy's Tableland. *Min.Ref.* Coal, *see* 1602-1610A, 1613-1617. *Note.*—No coal produced from these localities up to 1912.

Cooktown Mineral Field—

Situation: *See maps*, Pls. 8, 9. The Field extends from about 4 miles to 40 miles S. of Cooktown. *Co.* Banks. *Dist.* Cook. Centre about *Lat.* 16° 45′ S.; *Long.* 145° 15′ E.

Population: 361 (estimated 1910). Area: 468,480 acres (732 sq. miles).

Proclamation of Field: First (and only one) gazetted, 13th February, 1889, as follows:—Commencing at the mouth of the Annan River, and bounded thence by that river upwards to the junction of Oakey Creek, by the southern watershed of Oakey Creek and its tributaries, and by the northern watershed of King's Creek or New Year's Day Lagoons, and of the East Normanby River, south-westerly to the confluence of the East Normanby River and the Normanby River, by the watershed between the East Normanby and West Normanby Rivers south-easterly, and a line southerly to the range forming the northern watershed of the Daintree River and its tributaries, by that range forming the southern boundary of the parish of Tribulation easterly to Cape Tribulation, on the shore of the Pacific Ocean, by the sea-coast northerly to the point of commencement;—exclusive of all reserved or freehold lands, the leased halves of Kingslake, Kingsdale, and Avoca Runs, grazing farms, and any other authorised holdings.

Leases: Mineral Leases in force, 26; area, 607 acres. Miners' Homesteads, 15; area 67 acres (1912).

Principal Mining Centres: Annan River Tinfield and Bloomfield River Tin Workings, *which see.*

Mineral Statistics: Silver, *see tables*, Pls. 37, 46, 46a, Tin, Pls. 38, 46, 46a. Antimony, Pls. 40, 46, 46a. Wolfram, Pls. 42, 46, 46a.

Mineral References: *See under* Annan R. Tinfield and Bloomfield R. Tin Workings.

Geological Note: In the district there are three divisions of rocks, viz.—slates and quartzites, of Gympie Formation (Permo-Carboniferous), sandstones, grits, and conglomerates of Desert Sandstone Formation (Upper Cretaceous), and granite. Tin occurs at the Annan Tinfield in a quartz matrix associated with tourmaline in granite country, and at the Bloomfield Mines in lodes in the old sedimentary rocks. Alluvial tin-bearing deposits occur at both places.

Geological Publications: *See under* Cooktown.

Warden: Stationed at Cooktown. Inspector of Mines: Stationed at Croydon.

Coolabunia Sub-artesian Bore. *See under* Artesian Bores. No. 359.

Coolgarra Tin Mines—

Situation: *See maps*, Pls. 16, 17, 22: The township is 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell. *Dist.* Kennedy North. Centre about *Lat.* 17° 38′ S., *Long.* 145° 13′ E. Tin was discovered at Nettles Creek in 1881. The first recorded leases were taken up in 1898. The "Alhambra" was taken up by Jas. Funnie, on 1st January, 1900.

Area: Included in Herberton Gold and Mineral Field.

Population: 107 (estimated 1910). Now included in the Herberton Gold and Mineral Fields.

Mineral Statistics: Tin, *included in* Herberton, in *stat. tables*, Pls. 38, 46, 46a. Wolfram, *included in* Herberton, in *stat. tables*, Pls. 42, 46, 46a.

Mineral References: Silver, *see* 7478; Lead (Anglesite), 40, 41; (Galena), 2844-2848; (Minium), 6594, 6595; (Pyromorphite), 7145. Prosopite, 7077a.

Coolgarra Tin Mines—*continued:*

GEOLOGICAL NOTE: The country rocks consist of quartzites, shales, etc., of probably Gympie Formation, in contact with granite. Altered basic rocks form tin-bearing dykes in the sedimentary rocks and also, occasionally, in the granite. Wolfram occurs in irregular masses of quartz in slate near granite. *See* G.S.Q. Pub. 72 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 72 (1891), 77 (1891), 134 (1898), and 165 (1901). Maps No. 220 (1909). *See* Geol. Surv. Pub. List for title.

Coorooman, on Emu Park Rail. Line, N.E. of Rockhampton. *Min.Ref.* Manganese-dioxide, *see* 6476.

Cootah Co., Cook Dist. *See map,* Pl. 8.

Cootharaba and Noosa Waters (Six-mile Cr.), 24 miles E. of Gympie. *Lat.* 26° 15′ S. *Long.* 153° 4′ E. *Min.Ref.* Hyalite, *see* 7022.

Cooyar, 84 miles W.N.W. of Brisbane. *Min.Ref.* Coal, *see* 1717, 1720A; Ilmenite, 4905.

GEOLOGICAL NOTE: The rocks in this locality include granite, porphyry, and coal measures. The porphyry forms numerous dykes in the granite, and the coal measures contain inferior coal seams. *See* G.S.Q.P. No. 169 for details.

Copai. Gypsum is known by this name in Western Queensland.

Copper (Cu.) *Atom. Wt.* 63·57. *Sp.gr.* 8·945.

Minerals: *See* Atacamite, Bornite, Bournonite, Chalcolite, Chalcanthite, Chalcostibite, Chalcotrichite, Chrysocolla, Copper Pyrites, Covelline, Cuprite, Dioptase, Linarite, Olivenite, Redruthite, Tenorite, Tetrahedrite.

Associated Minerals: Ores of Antimony, Gold, Lead, Manganese, Silver, Tin, Zinc, etc.; Iron Pyrites, Mispickel, Molybdenite, Scheelite, Wolfram, Barytes, Calcite, Chlorite, Epidote, Felspar, Garnet, Gypsum, Jasper, Kaolin, Quartz, Wollastonite, etc., etc.

Gangues: Calcite, Chlorite, Diorite, Felspar, Garnet, Ironstone, Kaolin, Limestone.

Country Rocks: Diorite, Felsite, Greywacke, Greisen, Granite, Porphyry, Quartzite, Sandstone, Shale, Slate, Tuff.

Mineral Note: Copper is often associated with Iron Pyrites, Mispickel, and Zinc-Blende. When Iron Pyrites or Mispickel is associated with the copper ore, gold is generally the important accessory metal present. With Galena, silver predominates; whilst with Zinc-Blende the gold and silver values are found to vary considerably. The occurrence of copper with tin and wolfram is common, but with antimony rare. Of the non-metallic minerals Calcite, Kaolin, and Quartz are common associates, whilst Wollastonite and Epidote are present occasionally. Some of these minerals easily decompose near the surface, and only at water-level are they found to be unaltered.

Geological Note: A large number of copper deposits are found where granite comes in contact with limestone, the alteration rock, garnet, being always present. Deposits of copper are also common where diorites intrude sedimentary rocks, also where quartzite and other secondary rocks are found in zones or regions of alteration, as at Mt. Morgan. Sometimes copper is found in well-defined lodes, with and without quartz, in granite, greywacke, tuff, slate, and sandstone. All copper deposits are of Gympie (Permo-Carboniferous) or older Formations those occurring in association with limestone being Permo-Carboniferous, Devonian, or Silurian, and those in diorite principally Permo-Carboniferous. Geological data very incomplete.

Geographical Note: Copper is distributed over many parts of the eastern half of Queensland between Cape York Peninsula and the southern border, and also over a large area on the western part of the State. The principal mining localities are Chillagoe, Cloncurry, Mt. Morgan, Mt. Perry, and Mt. Chalmers. Other important places include Mackay District, Gladstone District, Kilkivan, Peak Downs, (Clermont), Charleston (Forsythe), and Texas. *See maps*, Pls. 3, 5, 7, 9, 11, 13, 15, 17, 21.

COPPER VALUES: *See* Table under Metal Values in London for maximum and minimum prices since the year 1892.

DISCOVERIES: Copper was first discovered in 1862 at Peak Downs, at Cloncurry in 1867, Mt. Perry in 1869, Mt. Flora and Mt. Orange in 1871, Glassford Creek in 1893, and Mt. Chalmers in 1896. For other localities, *see under* Discoveries, separate heading.

STATISTICAL NOTES: The world's production of copper from the years 1881 to 1910 amounted, approximately, to 12,839,697 tons. The world's yield of copper for the year 1910 was estimated to be 852,947 tons, of which amount Australia produced 40,314 tons, a percentage of 4·80. The yield of copper in Queensland for the same year was 16,387 tons, this being equal to 40·65 per cent. of the output of Australasia, and 1·92 per cent. of the world's production for that year.

The Mt. Morgan Mine now produces large quantities of copper ore from an irregular deposit of great extent. The yield for 1912 amounted to 7058·50 tons, valued at £516,000. This is only 1,855 tons short of being half of that year's production of the State, and is equal to 30·53 per cent. of the total yield for that year. As seen in the statistical tables, Peak Downs (Clermont) has produced the largest amount of copper in Queensland (the copper ore being the output of the celebrated Peak Downs Copper Mine), the field having yielded during the years 1860 to 1912, inclusive, approximately 47,012 tons of copper, which is equivaelnt to 23·97 per cent. of the whole copper yield of the State to end of 1912. Next comes the Herberton and Chillagoe districts, which yielded 34,708 tons of copper during the years 1888 to 1912, equal to 17·68 per cent. of the State's yield to end of 1912.

The output of copper from the different mining centres in Queensland increased from 3,061 tons in the year 1901 to 23,120 tons in the year 1912, the latter yield being valued at £1,698,280. The percentage of copper produced in the year 1912 (which yielded the largest amount for one year), when compared with the whole quantity of copper produced in Queensland, is 11·78 per cent.

The whole State's output of copper to the end of the year 1912 is valued, approximately, at £10,948,399, and as the total value of all minerals in Queensland is £104,009,087, the value of the copper yield equals 10·52 per cent. of the total value. *See statistical tables and diagrams*, Pls. 37, 45, 46, 46A, 51.

1860. ——. In lodes, in micaceous and talcose schists. Duffer Diggings, Gobango Cr., Black Snake Goldfield, 16 miles S.E. of Kilkivan. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 28, p. 4 (1886).

1861. ——. In lode. Mt. Clara Mine, Black Snake, 10 miles S. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

1862. ——. *Assoc.with* Chrysotile, in altered basalt. *Loc.* Mt. Coora, Black Snake, 8 miles S.S.E. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, pp. 4 and 7 (1886).

1863. ——. In lode. Peak Lode, Black Snake, 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

1864. ——. In lode, in limestone. Sel. 1199, Mt. Allen, Gigoomgan Run, 35 miles W.S.W. of Maryborough. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

1865. ——. Munro Cr., Goomgan, 20 miles S.W. of Tiaro Rail. Stn. (North Coast line). *Co.* Lennox (*ante*). *Ref.* O.M.

1866. ——. Nr. Spring Cr., Par. of Gigoomgan, 35 miles W.S.W. of Maryborough. *Co.* Lennox (*ante*). *Ref.* O.M.

——. - antimony ores. *See* Bournonite, Chalcostibite, Tetrahedrite.

——. arsenates. *See* Olivenite.

——. (arsenical). *See* Tetrahedite.

Copper (black ore). *See* Tenorite.

Copper "Carbonates." *See also* Aurichalcite, Azurite, Malachite.

1867. —— ——. *Assoc.with* Redruthite, in lode. *Loc.* Argylla Copper Freehold, Argylla Cr., 40 miles W. of Cloncurry. *Co.* Argylla; *Dist* **Burke.** *Assays:* Northern Cutting—Copper = 15·95 per cent.; Silver = 2 dwt. 22 gr. per ton; Gold = trace. Southern Cutting—Copper = 35·2 per cent.; Silver = 9 dwt. 2 gr. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 153, p. 8 (1900).

1868. —— ——. *Assoc.with* Silver, Copper (native), Cuprite, Massicot, Antimony, and Graphite (traces), in calcite lode, in siliceous and talcose shales. Dugald Mine, Dugald R., 45 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 10, p. 3 (1885).

1869. —— ——. In quartz. Lease (21), 2 miles W. of Dugald R., 47 miles N. of Cloncurry. *Co.* Argylla (*ante*). *Assay:* Copper = 15 per cent.; Silver = 16 oz. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 153, p. 7 (1900).

1870. —— ——. In quartz. Yamamilla Copper Freehold, Hamilton Group, Yamamilla Cr., trib. of Prospectors' Cr., 43 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Assay:* Copper = 9·9 per cent.; Silver = 3 oz. per ton; Gold = trace. *Ref.* G.S.Q. Pubs 153, p. 8 (1900), and 215, p. (1908).

1871. —— ——. *Assoc.with* Calcite. *Loc.* Contra Lode, ¼-mile S. of Gt. Australian Copper Mine, Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

1872. —— ——. *Assoc.with* Redruthite, Cuprite, Bornite, Chrysocolla, and Ironstone. *Loc.* Mary Douglas (Pumpkin) Gully Copper Leases, Mt. Douglas, 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 153, pp. 6 and 7 (1900).

1873. —— ——. *Assoc.with* Gold and Tehahedrite. *Loc.* Flying Dutchman Mine, Pumpkin Gully, 12 miles S. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

1874. —— ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Victoria 1 N. Claim, Bowerbird Goldfield, 70 miles N.W. of Cloncurry. *Co.* Brahe or Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 2 (1898).

1875. —— ——. *Assoc.with* Cuprite, in chlorite, slate, and quartz. *Loc.* Reef on Cone Cr., trib. of Duck Cr., about 23½ miles S.W.byW. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 5 (1885).

1876. —— ——. *Assoc.with* Hematite and Tetrahedrite (?), in chloritic slate. *Loc.* Sel. (2458), nr. Chinaman Group, Duck Cr., 23½ miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 10, p. 5 (1885).

1877. —— ——. *Assoc.with* Cuprite and Ironstone, in quartz, in schist country. *Loc.* Mt. Cuthbert, 19 miles S.W. of Coolullah, Leichhardt R., 63 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 153, p. 9 (1900).

For further Cloncurry references, *see* Nos. 1907 to 1909.

1878. —— ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Lady Francis Mine, Gebangle, 3 miles up Yarrabil Cr., 12 miles N.W. of Degilbo Rail. Stn. (Gayndah line), 70 miles (by rail and road) W. of Maryborough. *Co.* Bowen; *Dist.* **Burnett.** *Yield:* Gold = 2 oz. per ton. *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

1879. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz vein. *Loc.* Victoria Claim, Gebangle (*ante*). *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

1880. —— ——. *Assoc.with* Gold and Silver. *Loc.* Harper's Hill, Mt. Drain, nr. Mt. Perry. *Co.* Bowen; *Dist.* Burnett. *Yield:* Silver, 44 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 27 (1897).

1881. —— ——. *Assoc.with* Magnetite and Calcite, in gossany lode. *Loc.* W. of Granite Ridge, nr. Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn (Gayndah br. line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 60, p. (1890).

1882. —— ——. *Assoc.with* Gold and Bismite, in quartz. *Loc.* Tunnel Reef, Maid of Erin Claim, Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pubs 43, p. 3 (1887), and 125, p. 37 (1897).

1883. —— ——. *Assoc.with* Scorodite, in siliceous and ferruginous ore. *Loc.* Arbouin Copper Lodes, 18 miles W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* A.R.D.M., 1898, pp. 94, 95.

1883A.—— ——. *Assoc.with* Gold and Limonite, in quartz. *Loc.* Trafalgar Reef, 3½ miles S.E. of Ebagoolah, Hamilton Goldfield. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, pp. 13, 14 (1901).

1884. —— ——. *Assoc.with* Magnetite and Cerussite, in schistose rock. *Loc.* Lynd Copper Mine, Einasleigh R., junction with Copperfield R., 32 miles E.N.E. of Charleston, Etheridge Goldfield. *Co.* Copperfield; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 21 (1898).

1885. —— ——. *Assoc.with* Galena, in lode. *Loc.* Einasleigh R., 10 miles from Einasleigh Rail. Stn. (Etheridge line), 110 miles (by rail and road) S.S.W. of Almaden Rail. Stn. (Chillagoe line). *Co.* Gilbert; *Dist.* Cook. *Ref.* O.R.

1886. —— ——. *Assoc.with* Gold, Copper Pyrites, and Chalcanthite. *Loc.* Elektron Silver Mine, Caledonia Cr., Goldsmith Cr., 24 miles S.S.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

1887. —— ——. *Assoc.with* Cassiterite. *Loc.* Eureka Cr., nr. Stannary Hills Rail. Stn (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 39 (1897).

1888. —— ——. *Assoc.with* Gold, Galena, and Calcite, in quartz. *Loc.* Black Ball Reef, Hodgkinson Goldfield, 19 miles (by coach) from Dimbulah Rail. Stn. (Cairns line), 92 miles (by rail and road) W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson (*ante*). *Ref.* G.S.Q. Pub. 16, p. 6 (1884).

1889. —— ——. *Assoc.with* Native Copper, Cassiterite, and Wolfram, in lode. *Loc.* Argyll Tin Mine, Watsonville, head of James Cr., br. of Walsh R., 7 miles E.S.E. of Stannary Hills Rail. Stn., 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

1890. —— ——. *Assoc.with* Cassiterite, Mispickel, Wolfram, Scheelite, and Iron Pyrites, in lode. *Loc.* Chance Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 119, p. 18 (1897).

1891. —— ——. *Assoc.with* Copper Pyrites, Chalcanthite, Iron Pyrites, Mispickel, Marcasite, Cassiterite, Wolfram, Limonite, Red and Yellow Ochre. *Loc.* Try Again and Chance Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883), and P.R.S.Q., vol. 4, p. 52 (1887).

1892. —— ——. Roseberry Mine, Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

1893. —— ——. *Assoc.with* Minium and Cerussite, in lode. *Loc.* Johnson and Smith's Mine, Dargalong, 7 miles S. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

1894. —— ——. *Assoc.with* Minium, Anglesite, Massicot, Cerussite, and Galena, in gossan. *Loc.* Pandora Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

1895. —— ——. *Assoc.with* Hematite. *Loc.* W. of Boomerang Mine, Marble Cr., 1 mile W. of Calcifer Rail. Stn. (Chillagoe line), 133 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 8 (1891).

1896. Copper "Carbonates." *Assoc.with* Galena and Anglesite, in lode. *Loc.* New Moon Mine, Muldiva, 8 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd (*ante*). *Assay:* Silver = 269 oz. per ton. *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

1897. —— ——. *Assoc.with* Tenorite and Hematite, in lode. *Loc.* Oruba Mine, 2 miles E. of Zillmanton Rail. Stn. (Chillagoe line), 142 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd (*ante*). *Ref.* G.S.Q. Pub. 134, p. 9 (1898).

1898. —— ——. *Assoc.with* Redruthite, in ferruginous quartz. *Loc.* P.P. Area No. 2 Otho Camp, 4 miles N.W. of Calcifer Rail. Stn. (Chillagoe line), 137 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd (*ante*). *Ref.* G.S.Q. Pub. 134, p. 10 (1898).

1889. —— ——. *Assoc.with* Redruthite and Cerussite, in gneiss and basalt. *Loc.* Between Brooklands No. 2 and No. 3, Junction Cr., br. of Einasleigh R., 30 miles S. of Fossilbrook. *Co.* Tate; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 20 (1898).

1900. —— ——. *Assoc.with* Gold, Redruthite, and Cuprite, in lode. *Loc.* Percy R., 5 miles above junction of Gilbert R., Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Assays:* Copper = 59 and 54 per cent. *Ref.* G.S.Q. Pub. 151, p. 13 (1900).

1901. —— ——. *Assoc.with* Minium, Cerussite, and Limonite, in lode, in slate, greywacke, and quartzite. *Loc.* Monte Video Mine, Ashton and Bowler Crs., 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Wrotham; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 15 (1898).

1902. —— ——. *Assoc.with* Cassiterite and Mispickel, in lode. *Loc.* Nundubbermere Run, 13 miles S.W. of Stanthorpe. *Co.* Bentinck. *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 40, p. 4 (1887).

1903. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Galena, Ironstone, Manganese-dioxide, and Zinc-Blende, in lode. *Loc.* Pikedale Silver Mine, Woolshed Gully, Pikedale Head Stn., 20 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 87 (1898).

1904. —— ——. Block 826 and 827, 2 miles N.W. of Pikedale Head Stn., 21 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

1905. —— ——. *Assoc.with* Gold, Silver, and Iron Pyrites, in quartz reef. *Loc.* Sel. 24, nr. Sundown Cr., Severn R., 11 miles W.S.W. of Ballandean Rail Stn. (Main line), 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay:* Gold, 18 dwt. per ton; Silver, 16 oz. per ton. *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

1906. —— ——. *Assoc.with* Redruthite, Galena, Cerussite, and Anglesite, in gossan. *Loc.* Silver King Mine, 3 miles N. of Silver Spur Mine, nr. Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Contents:* Silver = 26 oz. per ton. *Ref.* G.S.Q. Pub. 120, p. 94 (1898).

1907. —— ——. *Assoc.with* Redruthite, in quartz lode. *Loc.* Lease 54, Pilgrim's Cr., trib. of Burke R., 60 to 70 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Assay:* Copper = 47·57 per cent; Silver = 7 oz. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 153 (1900).

1908. —— ——. In limestone. *Loc.* Lease 55, Pilgrim's Cr. (*ante*). *Assay:* Copper = 38 per cent. *Ref.* G.S.Q. Pub. 153, p. 6 (1900).

1909. —— ——. *Assoc.with* Redruthite, in siliceous lode. *Loc.* Lease 98, Pilgrim Cr. (*ante*). *Assay:* Copper = 27·1 per cent.; Silver = 6 oz. 15 dwt. 22 gr. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 153, p. 6 (1900).
For other Cloncurry references, *see* Nos. 1867-1877.

1910. —— ——. *Assoc.with* Galena, in ferruginous gossan, in slate country. *Loc.* Dunn's Tunnel Claim, Dry R., br. of Wild R. (Upper Herbert), 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

1911. —— ——. *Assoc.with* Galena, Cerussite, Massicot, and Ironstone, in gossan and quartz. *Loc.* Silver Streak Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

1912. —— ——. O'Loan and Party's Lease, Mt. Garnet, Return Cr., 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 125, p. 33 (1901).

1913. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, and Zinc-Blende, in lode. *Loc.* Comstock (Stockholm) Reef, Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 49 (1887), and G.S.M.

1914. —— ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Mt. Leyshon Mine, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* W.C.T.

1915. —— ——. *Assoc.with* Gold, Silver, Redruthite, Galena, and Iron Pyrites, in quartz. *Loc.* Main's Reef, Old Homestead Diggings, 46 miles (by rail) W.S.W. of Charters Towers (Gt. Northern line). *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 11 (1891), and G.S.M.

1916. —— ——. *Assoc.with* Gold. *Loc.* Manchester Reef, Marengo Goldfield, 20 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 5, p. 12 (1879).

1917. —— ——. *Assoc.with* Selenite. *Loc.* Manchester Reef, Marengo Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

1918. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Yellow Ochre, in quartz. *Loc.* Seymour's Reef, Marengo Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

1919. —— ——. Mt. Greentop, 15 miles W.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4, p. 4 (1879).

1920. —— ——. *Assoc.with* Cerussite, in kaolin. *Loc.* Stockyard Cr. Silver Mine, Basalt R., 18 miles N.W. of Hillgrove Head Stn., 70 miles N.N.W of Charters Towers. *Co.* O'Connell; *Dist.* Kennedy North. *Assays:* Silver = from 3 oz. to 966 oz.; Copper = from 8 per cent. to 31 per cent. *Ref.* G.S.Q. Pub. 94, p. 12 (1893).

1921. —— ——. *Assoc.with* Prehnite. *Loc.* Pelican Cr., br. of Bowen R., Bowen R. Coalfield, 50 miles S.W. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1922. —— ——. *Assoc.with* Prehnite, in cavities of amygdaloidal trap rock. *Loc.* Strathmore Cr., Bowen R. Coalfield (*ante*). *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1923. —— ——. *Assoc.with* Galena, Cerussite, Chrysocolla, Manganese-dioxide, and Garnet, in quartz. *Loc.* Black Star Lease (116), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

1924. —— ——. *Assoc.with* Bornite, Cerussite, and Galena, in lode. *Loc.* Blue Bell Lease (226), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1903).

1925. —— ——. *Assoc.with* Galena, Cerussite, and Manganese-dioxide, in kaolin. *Loc.* Bonnybrook Lease (178), Ewan, Running R., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), and 82, p. 4 (1892).

1926. —— ——. *Assoc.with* Cuprite and Redruthite, in garnet, quartz, kaolin, and gossan. *Loc.* Day Dawn Lease (170), Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 265 oz. per ton; Copper = 21·6 per ent.; Gold = trace. (2) Silver = 8 oz. per ton; Copper = 33 per cent. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

1927. —— ——. *Assoc.with* Chrysocolla, Bornite, and Mispickel, in chloritic matrix. Ingola Lease (177), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

1928. —— ——. *Assoc.with* Cerussite and Ironstone, in gossan and kaolin lode. *Loc.* Junction Lease (181), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

1929. —— ——. *Assoc.with* Cerussite and Ironstone, in garnet, kaolin, and gossan. *Loc.* Junction South Lease (180), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

1930. —— ——. *Assoc.with* Cassiterite, Bismuth Ore, and Ironstone, in quartz. *Loc.* Achilles Lease (252), Mt. Brown, Butterfly Gully, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 9 (1892), and G.S.M.

1931. —— ——. *Assoc.with* Galena, Cerussite, Hematite, and Limonite, in gossan. *Loc.* Mt. Brown Lease (183), Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Reported Assays:* Bulk Silver = 10 oz. per ton; Concentrates Silver = 183 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1932. —— ——. *Assoc.with* Galena, Minium, Cerussite, Chrysocolla, Hematite, and Zinc-Blende, in gossan. *Loc.* White Wings P.A., Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1933. —— ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Linarite, Cerussite, Manganese-dioxide, Zinc-Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet, in lode. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field ((*ante*). *Ref.* G.S.Q. Pub. 82 (1892).

1934. Copper " Carbonates." *Assoc.with* Copper Pyrites, Bornite, Cuprite, Tenorite, Iron Pyrites, Ironstone, Galena, and Zinc-Blende, in lode. *Loc.* Mt. Thekla Copper and Silver-Lead Mines, 4 miles N. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Assay Averages:* Silver = 26 oz. per ton; Copper = 22 per cent. *Ref.* G.S.Q. Pub. 167, p. 7 (1892).

1935. —— ——. *Assoc.with* Galena, in quartz. *Loc.* Pinnacles Extended Lease (220), 3 miles S.W. of Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1936. —— ——. *Assoc.with* Calcite, Chlorite, and Garnet, in lode. *Loc.* Running R. N. Lease (164), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

1937. —— ——. *Assoc.with* Ironstone and Cerussite, in lode. *Loc.* Running R. South Lease (163), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 4 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

1938. —— ——. *Assoc.with* Copper Pyrites, Bornite, Cuprite, Native Silver, and Galena, in lode. *Loc.* True Blue Lease (161), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

1939. —— ——. *Assoc.with* Cerussite, Manganese-dioxide, and Ironstone, in schist. *Loc.* White Star Lease (160), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

1940. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Eureka Reef, Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 5, p. 10 (1879), and 88, p. 4 (1893).

1941. —— ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* Faith (Just-in-Time) Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 8 (1879).

1942. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz. Marquis Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 3 (1879).

1943. —— ——. *Assoc.with* Gold, in quartz. New Zealand Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 4 (1879).

1944. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* S.W. of Just-in-Time Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 8 (1879).

1945. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Mispickel, in quartz. *Loc.* Welcome Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 5 (1879).

1946. —— ——. *Assoc.with* Gypsum. *Loc.* Jack's Cr., Bowen R., 55 miles S.byW. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 4, p. 24 (1879).

1947. —— ——. *Assoc.with* Gypsum. *Loc.* Low ridge E. side of Jack's Cr., Bowen R. (*ante*). *Ref.* G.S.Q. Pub. 4, p. 24 (1879).

1948. —— ——. *Assoc.with* Calcite. *Loc.* McDougall's Head Station, Bowen R., 60 miles S.W. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

1949. —— ——. *Assoc.with* Copper oxide, Hematite, and Manganese-dioxide, in lode. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* (and *Assay*): G.S.Q. Pub. 27, p. 7 (1886).

1950. —— ——. *Assoc.with* Copper Pyrites, in lode. *Loc.* Mt. Flora, Bee Cr., 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 181, p. 11 (1903).

1951. —— ——. *Assoc.with* Redruthite and Tenorite, in slate country. *Loc.* Balcomba Range, nr. Mackenzie R., 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 159, p. 20 (1901).

1952. —— ——. *Assoc.with* Gold (traces), Silver, Tile Ore, Minium, and Steatite, in ferruginous quartz lode. *Loc.* 4 miles N.W. of junction of Tierawoomba and Boothill Creeks, 53 miles S.S.W. of Mackay. *Assay: See* No. 1952. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref* G.S.Q. Pub. 39, p. 7 (1887).

1953. —— ——. *Assoc.with* Copper Pyrites, in lode. *Loc.* North Star Copper Area, Cressbrook Cr., 12 miles N. of Esk Rail. Stn. (Brisbane-Valley line), 79 miles (by rail and road) W.N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

1954. —— ——. *Assoc.with* Copper oxide, in felspar porphyry. *Loc.* Pinnacle Copper Workings, 17 miles W. of Bompa, 48 miles S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* (and *Assay*): G.S.Q. Pub. 159, p. 8 (1901).

1955. —— ——. Threadenham's Sel., Marblestone, nr. Boyne R., 20 miles S. of Gladstone. *Co.* Clinton (*ante*). *Assay:* Copper = 3·5 per cent. *Ref.* A.R., p. 54 (1906).

1956. —— ——. *Assoc.with* Gold, Garnet, Rock Crystal, and Calcite. *Loc.* Mt. Grim, 3½ miles W.S.W. of Mt. Alma Stn., 31 miles W.S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 24 (1904).

1957. —— ——. *Assoc.with* Gold, Iron Pyrites, and Galena. *Loc.* Lamona Claim, Busby's Gully, Ulam Goldfield, 3 miles S. of Toonda Rail. Stn. (North Coast line), 44 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 99, p. 9 (1894).

1958. —— ——. *Assoc.with* Chrysocolla, in lode. *Loc.* On hill, nr. beach, 3 miles N. of Marion Cr., 39 miles S. of Mackay. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 39, p. 10 (1887).

1959. —— ——. In iron gossan. Bushnell's Mine, Limestone Cr., Dee R., 4 miles E. of Mt. Morgan Rail. Stn. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 132, p. 14 (1898).

1960. —— ——. *Assoc.with* Copper Pyrites, Mispickel, Ironstone, and Mica (black), in quartz lode. *Loc.* Copper Mine, Dee R., above Dundee, 20 miles S.S.W. of Mt. Morgan, 44 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 155, p. 8 (1901).

1961. —— ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Manganese-dioxide, Magnetite, and Hematite, in lode. *Loc.* Callide or 5-Mile Creek Copper Mines, Kroombit, 50 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 194 (1904), and G.S.M.

1962. —— ——. *Assoc.with* Gold, Iron Pyrites, and Ironstone, in serpentine and quartz. *Loc.* Mt. Morgan N. Mine, Mt. Morgan (late Crocodile Cr.) Goldfield, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 8 (1898).

1963. —— ——. *Assoc.with* Magnetite, in lodes, in serpentinous rock. *Loc.* King's Copper Sel., Rainbow Cr., Callide Cr., 52 miles S.W.byW. of Gladstone. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 80, p. 1 (1891).

1964. —— ——. *Assoc.with* Hematite, in gossan. *Loc.* Mt. Coora S. Lode, Black Snake, 8 miles S. of Kilkivan. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

1965. —— ——. *Assoc.with* Gold, Silver, Native Copper, and Galena, in lode. *Loc.* Mt. Terrible Lode, Black Snake (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

1966. —— ——. *Assoc.with* Gold, Magnetite, and Hematite, in quartz reef. *Loc.* Rose, Shamrock, and Thistle, Black Snake (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

1967. —— ——. *Assoc.with* Cinnabar, in calcite and quartz, in granite dyke. *Loc.* Commotion Lode, Sel. 2447, 5 miles W. of Kilkivan, 53 miles (by rail and road) W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 79, p. 2 (1892).

1968. —— ——. *Assoc.with* Cuprite, in quartz reef. *Loc.* S. of Mackay's Store, Kilkivan, 48 miles (by rail) W. of Gympie (North Coast line). *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 4 (1886).

1969. —— ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Limonite, and Zinc-Blende, in gossan veins. *Loc.* Mt. Ruby, ½-mile W.N.W. of Glenbar Head Stn., 20 miles W. of Tiaro Rail. Stn. (North Coast line). *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

1970. —— ——. *Assoc.with* Copper Oxide. *Loc.* St. Aignan (Misima) Island, Louisiade Archipelago, 379 miles E.byS. of Port Moresby, **Brit. New Guinea.**

Copper Deposits. Clairview, St. Lawrence. *Min.Ref.* Azurite, *see* 251A; Copper (native), 2011; Cuprite, 2478; Malachite, 6368.

Copper Smelting Works: *See under* separate heading "Smelting Works in Queensland."

Copper Glance. *See* Redruthite.

Copper (grey) Ores. *See* Bournonite, Redruthite, Tetrahedrite.

—— King Mine, 41½ miles S. of Bowen. *Min.Ref.* Cuprite, *see* 2458; Gold, 4073; Hematite, 4740; Malachite, 6289.

—— lead Ores. *See* Bournonite.

—— Lode. Pumpkin Gully, Cloncurry. *Min.Ref.* Chalcostibite, *see* 1408; Cuprite, 2390; Malachite, 6087; Tetrahedrite, 7753.

Copper (native). *Compo.*, pure copper. *Colour*, copper-red. Metallic. Commonly arborescent. *H.* = 2·5. *Sp.gr.* = 8·8.

1971. —— ——. *Assoc.with* Cuprite, Tenorite, and Calcite. *Loc.* Dugald Mine, Dugald R., 45 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* **Burke**. *Ref.* P.R.S.Q. vol. 4., p. 73 (1887).

1972. —— ——. *Assoc.with* Silver, Cuprite, Tenorite, Copper carbonate, Massicot, Antimony, and Graphite, in calcite lode in siliceous and talcose shales. *Loc.* Dugald Mine, Dugald R. (*ante*). One specimen of native copper weighed 7½ cwt. *Ref.* G.S.Q. Pub. 10, p. 3 (1885).

1973. —— ——. *Assoc.with* Cuprite, Malachite, and Limonite, in schistose slate and gossan. *Loc.* Two Sports M.F. (2874), Longamundi Group, Dugald R., between 34 and 39 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 288 and 289 (1908).

1974. —— —— Slugs. *Assoc.with* Cuprite. *Loc.* Mt. Godkin, nr. Cameron R., 34 miles W. of Cloncurry. *Co.* Argylla (*ante*). Weight of 4 slugs, 18 cwt., 13 cwt., 6¾ cwt., and 5 cwt. *Ref. see* Pl., Q.G.M. Jour., vol. 9, p. 127 (1908).

1975. —— ——. *Assoc.with* Cuprite, in quartz. *Loc.* Oliver Twist M.C., Native Companion Group, Palm Tree Cr., 26½ miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 276 (1908).

1976. —— ——. *Assoc.with* Cuprite, Tenorite, Tetrahedrite, Malachite, and Iron Pyrites, in lode. *Loc.* Gt. Australian Copper M.F., Cloncurry Township. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 10, p. 14 (1885); 153, p. 3 (1900); 215, pp. 242-250 (1908).

1977. —— ——. *Assoc.with* Cuprite, Malachite, and Limonite, in quartzite, schist, and gossan. *Loc.* M.F. 14, Gt. Australian Group, Cloncurry Township (*ante*). *Ref.* G.S.Q. Pub, 215, pp. 251, 252 (1908).

1978. —— ——. *Assoc.with* Gold, Cuprite, Azurite, and Malachite. *Loc.* Homeward Bound Extd. M.C. 331, Homeward Bound Group, 12 miles E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 10, p. 4 (1885), and 215, pp. 233, 234 (1908).

1979. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Chrysocolla, Iron Pyrites, Limonite, Turgite, Calcite, and Ferro-Calcite, in quartzite, schist, and limestone. *Loc.* Florence R. Copper Leases, ½-mile W. of Hampden Road, 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

1980. —— ——. *Assoc.with* Redruthite, Cuprite, Malachite, Cyanochalcite (?), Limonite, Calcite, and Ferro-calcite, in granular limestone. *Loc.* Dandy P.A. (297), McPhail Group, 2 miles S. of Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 76 and 77 (1908).

1980A. —— ——. *Assoc.with* Gold, Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

1980B. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, and Molybdenite, in lode formation. *Loc.* May Graham P.A. (Mt. Wheeler Group), 4 miles W. of Soldier's Cap, about 33 miles (by road) S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 225 (1908).

1981. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Iron Pyrites, and Limonite, in slate. *Loc.* Pioneer Chief M.L. (231), Pioneer Chief Group, Cone Cr., ½-mile N. of Mt. Start, 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 123-125 (1908).

1982. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Chrysocolla, Iron Pyrites, and Limonite, in schist, slate, quartzite, and quartz. *Loc.* Banjo M.L. (590), Tambourine Group, Duck Cr., 3 miles N. of Corella Road, 26 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 167, 168 (1908).

1983. —— ——. *Assoc.with* Gold, in quartz leaders traversing graphitic granite. *Loc.* Lady Isabelle Reef, True Blue Mining Centre, 1¾ miles N.W.byN. of Croydon Rail. Stn. (Croydon-Normanton line). *Co.* Surrey; *Dist* Burke. *Ref.* B.D.

1984. —— ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Chrysocolla, and Limonite, in gossany quartz and calcareous sinter. *Loc.* Boundary M.L. (582), Bull Cr. Group, Coollullah Run, 74 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 345, 347 (1908).

1985. —— ——. *Assoc.with* Cuprite, Tetrahedrite, Redruthite, Malachite, Iron Pyrites, Hematite, Magnetite, and Limonite, in schist and quartz. *Loc.* Crusader M.F. (2549), Crusader Group, Coollullah Run, E. of Coppermine Cr., 68½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Assay:* Copper = 5·3 per cent. *Ref.* G.S.Q. Pub. 215, pp. 334, 335 (1908).

1985A. —— ——. *Assoc.with* Cuprite, in siliceous ironstone. *Loc.* Jessie's Dream M.L. (397), Jessie's Dream Group, 6-Mile Cr., Leichhardt R., 39½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, p. 314 (1908).

1986. —— ——. *Assoc.with* Cuprite, Chrysocolla, and Limonite, in schist and quartzite. *Loc.* Little Wonder M.L. (258), Mighty Atom Group, 6-Mile Cr., 60 miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 310 and 311 (1908).

1987. —— ——. *Assoc.with* Copper Pyrites, Cuprite, Tile Ore, Malachite, and Limonite, in schist, slate, and gossan. *Loc.* Mt. Cuthbert M.L. (107), Mt. Cuthbert Group, 6-Mile Cr., Leichhardt, 19 miles S.W. of Coollullah H.S., 63 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 315-318 (1908).

1988. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, Tenorite, Malachite, Iron Pyrites, and Limonite, in slate and gossan. *Loc.* Mt. Metallic R.C. (310), Mt. Metallic Group, Prospector Cr., trib. of Leichhardt R., 52 miles W.N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Assay:* Copper = 39.8 per cent.; Gold = trace; Silver = 1 oz. 16 dwt. per ton. *Ref.* G.S.Q. Pub. 215, pp. 295-297 (1908).

For further Cloncurry references, *see* Nos. 1996-1998.

1989. —— ——. *Assoc.with* Cuprite and Malachite. *Loc.* Caledonia Mine, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg (Bundaberg—Mt. Perry line). *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M.

1990. —— ——. *Assoc.with* Gold, Silver, Cuprite, Tenorite, Malachite, and Azurite. *Loc.* Mt. Cannindah Mine, nr. head of Cabbage Tree Cr., Dawes Range, 13 miles S.W.byS. of Many Peaks Rail. Stn., 71 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Ref.* (and *assays*): G.S.Q. Pubs. 113, p. 7 (1896), and 143, p. 4 (1899).

1991. —— ——. *Assoc.with* Copper carbonate, Cassiterite, and Wolfram, in lode. *Loc.* Argylla Mine, Watsonville, head of James Cr., br. of Walsh R., 7 miles S.S.E. of Stannary Hills Rail. Stn. (Chillagoe line), 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

1992. —— ——. *Assoc.with* Cuprite, Tetrahedrite, Malachite, Azurite, Manganese-dioxide, Hematite, and Selenite, in lode. *Loc.* Griffith Mine, 2 miles S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 5 (1891), and 134, p. 11 (1898), and G.S.M.

1993. —— —— in dendritic forms. Paisley Shaft, Lappa Lappa Rail. Junction (Chillagoe and Mt. Garnet lines), 102 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

1994. —— ——. Rosebery Mine, Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

1995. —— ——. *Assoc.with* Gold and Native Silver, in small strings and leaders, in black clay. *Loc.* Noble Is., 74 miles N.W.byW. of Cooktown. *Co.* Melville; *Dist.* Cook. *Ref.* Q.G.M. Jour., p. 263 (1908).

1996. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, and Limonite, in kaolinised rock, schist, and quartz. *Loc.* Italian Copper Lease (689), Lady Fanny Group, 60 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 34 and 35 (1908).

1997. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, Atacamite, Limonite, and Calcite, in quartz and chloritic schist. *Loc.* Blue Jacket M.L. (632), Mt. Hope Group, 53½ miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 43, 44 (1908).

1998. —— ——. *Assoc.with* Copper Pyrites and Selenite. *Loc.* Mt. Elliott R.C., No. 3, etc., Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.M.

For other Cloncurry references, *see* Nos. 1971-1988 (minus 1983).

1999. Copper (Native). *Assoc.with* Cassiterite, in serpentine and quartz. *Loc.* Cottaes's Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 5 (1883).

2000. —— ——. *Assoc.with* Cassiterite. *Loc.* Newellton (Silver Valley), 9 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 54 (1900).

2001. —— ——. *Assoc.with* Prehnite. *Loc.* Sonoma Station, 4 miles from Coral Cr., 50 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* B.D.

2002. —— ——. *Assoc.with* Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Zinc Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

2003. —— ——. *Assoc.with* Chrysocolla and Malachite. *Loc.* E. side of Townsville Road, nr. Dalrymple, 21 miles N.W.byN. of Charters Towers. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* P.R.S.Q. vol. 4, p. 68 (1887).

2004. —— ——. *Assoc.with* Malachite, Azurite, and Chrysocolla. *Loc.* Keelbottom Copper Mine, Mt. Keelbottom, 2 miles N.N.E. of Dalrymple, 21 miles N.W.byN. of Charters Towers. *Co.* Wilkie Gray (*ante*). *Ref.* G.S.M. and P.R.S.V. vol. 4, p. 43 (1887).

2005. —— ——. *Assoc.with* Tenorite, in quartz. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont Rail. Stn. (Clermont-Blair Atholl br. line). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* Q.M.

2006. —— ——. *Assoc.with* Malachite and Azurite, in epidote rock. *Loc.* on hill, W. br. of Murray Cr., Collaroy, 25 miles N.W. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Assay:* Copper = 2·4 per cent. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

2007. —— ——. In tuffaceous shales, Balcomba Stn., 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* B.D.

2008. —— ——. *Assoc.with* Native Silver and Malachite, in lode. *Loc.* Red Queen Mine, nr. Taromeo, 68 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 159, p. 25 (1901).

2009. —— ——. *Assoc.with* Copper Pyrites, Cuprite, Tile Ore, Malachite, Azurite, Iron Pyrites, Magnetite, Hematite, Limonite, and Calcite, in lode. *Loc.* Many Peaks Copper Mines, Deception Cr., 58 miles (by rail) S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pubs. 150, p. 8 (1900), and 194, p. 28 (1904).

2010. —— ——. *Assoc.with* Gold, and with Copper ores, in quartz reef. *Loc.* Alliance Mine, Morinish Goldfield, 25 miles N.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* Q.M.

2011. —— ——. *Assoc.with* Cuprite, Malachite, and Azurite, in epidote. *Loc.* Copper Deposits, Clairview Cr., 12 miles N. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

2011a. —— ——. *Assoc.with* Cuprite, Telluride ore, and Ironstone, in schist. *Loc.* Stanage Point, nr. Broadsound, 37 miles E.N.E. of St Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* B.D.

2012. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Redruthite, Cuprite, Malachite, Azurite, Molybdite, Galena, Iron Pyrites, and Ironstone, in breccia, granite rock, and sandstone. *Loc.* Moonmera Copper Mines, Razorback Ranges, nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist* Port Curtis. *Ref.* G.S.Q. Pubs. 143, p. 27 (1899), and 195, pp. 18-20 (1904).

2013. —— ——. Old Dee Copper Mine, 3 miles N.E. of Mt. Morgan. *Co.* Raglan (*ante*). *Ref.* Q.M.

2014. —— ——. *Assoc.with* Copper Carbonate, and Galena. *Loc.* Mt. Terrible Lode, Black Snake, 10 miles S. of Kilkivan. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

2015. —— ——. *Assoc.with* Ironstone, in chloritic rock. *Loc.* Lady Flora Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane (North Coast line). *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 52, p. 445 (1889).

2015a. **Copper Ore.** Roberts Group of Copper Mines, N.E. of Soldier's Cap, 24 miles S.E. of Cloncurry. *Co.* Allison; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, p. 226 (1908).

2016. —— ——. In slate. Cloncurry Hills, between McKinlay and Cloncurry, about 20 miles S. of Cloncurry. *Co.* Allison (*ante*). *Assay:* Gold = 13 oz. per ton; Copper = 6.2 per cent. *Ref.* A.R. p. 100 (1907).

2016A. —— —— in quartz and gossan. Enquiry M.L. (265). Enquiry Group, Green's Cr., Corella R., 33 miles W.S.W. of Cloncurry. *Co.* Argylla. *Dist.* Burke. *Ref.* G.S.O. Pub. 215, p. 216 (1908).

2016B. —— ——. Jubilee M.L. (460), Jubilee Group, Corella R. (*ante.*). *Ref.* G.S.Q. Pub. 215, p. 213 (1908).

2016C. —— ——. *Assoc.with* Iron Pyrites in lode. *Loc.* Rosebud Group of Copper Mines, Corella R. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 212 and 213 (1908).

2016D. —— ——. In gossan. Mt. Lidster Group of Copper Mines, Corella R., 34 miles W. of Cloncurry. *Co.* Argylla. *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 217 (1908).

2016E. —— ——. Cabbage-Tree, M.F. (3072), Cabbage-Tree Group, 44½ miles N.N.W. of Cloncurry. *Co.* Granada. *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 290 (1908).

2017. —— ——. In lode. Sels. 2457 and 2456, Duck Cr., 25 miles S.S.W. of Cloncurry. *Co.* Selwyn. *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 6 (1885).

2017A. —— ——. In quartz. Elder M.L. (415), and Three Jokers M.L. (463), Elder Group, Elder Cr., 12 miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 231 (1908).

2018. —— ——. *Assoc.with* impure Graphite, in shale. *Loc.* Hampden Mine, 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* (and assay), G.S.Q. Pub. 203, p. 11 (1906), and A.R., p. 44 (1906).

2018A. —— ——. Lady South M.L. (297), Lady South Group, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 209 (1908).

2018B. —— ——. Leases (383, 384, 385, and 412), Leviathan Group, Martin Cr., 18 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 228 (1908).

2019. —— ——. *Loc.* Sel. 3 and 4, Malbon R., 30 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref* (?)

2019A. —— ——. In chloritic schist. Mt. McCabe Group, Martin Cr., 24 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 227 (1908).

2019B. —— ——. in lode. Surprise Group of Copper Mines, between Pinnacles and Prospector Creeks, 31 to 33½ miles N.W. of Cloncurry. *Co.* Tewinga. *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 303 (1908).

2020. —— ——. New Moonta Mine, Boolboonda, 12 miles N.E. of Mt. Perry. *Co.* Bowen. *Dist.* **Burnett.** Analysis of Bulk Sample covering a month's production: Copper = 9·6, Silica = 40·6, Iron = 23·2, Sulphur = 17·8, Alumina = 7·2, Zinc = 1·36, Lead = 0·80 per cent.; Silver = 15 oz., Gold = 6 dwt. 4 gr. per ton.

2021. —— ——. Mt. Perry Copper Mine, Mt. Perry, 67 miles (by rail), S.W.byW. of Bundaberg. *Co.* Bowen (*ante*). Analysis of Bulk Sample covering a month's production: Copper = 12·5, Silica = 47·2, Iron = 19·0, Sulphur = 18·7, Alumina = 2·0, Zinc = 0·38 per cent., Lead = *nil*; Silver = 4 oz. 14 dwt., Gold = 2 gr. per ton.

2022. —— ——. Virgin's Refuge Mine, nr. Harper's Hill, Mt. Perry (*ante*). *Ref.* G.S.Q. Pub. 125, p. 53 (1897).

2023. —— ——. Normanby Copper Mine, Mt. Perry (*ante*). Analysis of Bulk Samples covering a month's production: Copper = 9·8, Silica = 40·2, Iron 24·7, Sulphur = 24·7, Alumina = 0·7, Zinc = 0·34 per cent.; Silver = 5 oz., Gold = 4 dwt. 6 gr. per ton.

2024. —— ——. Caledonia Copper Lode, Paradise Goldfield, 2 miles below mouth of Yarrabil Cr., 8 miles N.W. of Degilbo Rail. Stn. (Gayndah Br. line). *Co.* Cook. *Dist.* Burnett. *Ref.* G.S.Q. Pub. 68, p. 5 (1891).

2024A. —— ——. *Assoc.with* Gold and Silver Ores. *Loc.* Rawbelle Copper Mines, 30 miles N.N. W.of Eidsvold. *Co.* Rawbelle. *Dist.* Burnett. *Ref.* B.D.

2024B. —— ——. A1 lode, 4 miles N. of Einasleigh Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Copperfield. *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 234, p. 28 (1911).

2025. —— ——. *Assoc.with* Gold and Marcasite. *Loc.* Havelock Mine, 5 miles S. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert. *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, pp. 12 and 13 (1909), and G.S.M.

2025A. Copper Ore. Teesdale, 10 miles (by rail) S.W. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 234, pp. 26, 27 (1911).

2025B. —— ——. *Assoc.with* Galena. *Loc.* Dorothy Copper Mine, Macmillan Cr., about 24 miles E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 234, p. 28 (1911).

2025C. —— ——. Kaiser Bill Lode, 6 miles S.W. of Einasleigh Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 234, p. 28 (1911).

2025D. —— ——. Newcastle Range, Stockman's Cr., about 8 miles N.W. of Teesdale Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 234, p. 28 (1911).

2026. —— ——. *Assoc.with* Cassiterite, in granite. *Loc.* Caledonia Tin Mine, Watsonville, head of James Cr., br. of Walsh R., 7 miles E.S.E. of Stannary Hills Rail Stn. (Chillagoe line), 6 miles W. of Herberton. *Co.* Hodgkinson. *Dist.* Cook. *Ref.* G.S.Q. Pubs. 13, p. 28 (1883), 119, p. 18 (1897), and 125 (1897).

2027. —— ——. Easter Monday Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 125, p. 51 (1897).

2027A. —— ——. Little River, br. of Gilbert R., 30 miles E. of Croydon. *Co.* Lang; *Dist.* Cook.

2027B. —— ——. Hobson Mine, ½-mile N.W. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd. *Dist.* Cook. *Ref.* B.D.

2028. —— ——. Calumet Copper Mine, Chillagoe, 139 miles (by rail), W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 33 (1897).

2029. —— ——. Christmas Shaft, Chillagoe (*ante*). *Ref.* G.S.Q. Pub. 125, p 33 (1897).

2029A. —— ——. *Assoc.with* Silver (native). *Loc.* Nelly Mine, Chillagoe (*ante*). *Ref.* G.S.Q. Pub. 125; p. 34 (1897).

2030. —— ——. Hensey Mine, 3½ miles S.S.E. of Chillagoe Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Lynd. *Dist.* Cook. *Ref.* B.D.

2031. —— ——. *Assoc.with* Silver. *Loc.* Combination Copper Mine, Halpin's Cr., br. of California Cr., S. of Lappa Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 49 (1900).

2032. —— ——. *Assoc.with* Silver. *Loc.* McIlwraith Lease, Redcap Cr., 142 miles (by rail), W.S.W. of Cairns, Walsh and Tinaroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 125, p. 33 (1897).

2033. —— ——. *Assoc.with* Silver and Galena. *Loc.* Penzance Mine, Redcap Cr., about 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 125, p. 51 (1897).

2033A. —— ——. Gt. Eastern Copper Mine, 14 miles N.E.byN. of Percyville, Etheridge Goldfield. *Co.* Percy. *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 30 (1911).

2033B. —— ——. *Assoc.with* Iron Pyrites and Galena, in porphyry. *Loc.* Mt. Jardine, 12 miles N. of Einasleigh Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Tate. *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 28 (1911).

2033C. —— ——. O.K. Mine, 40 miles N. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Field. *Co.* Wrotham. *Dist.* Cook.

2034. —— ——. *Assoc.with* Cassiterite and Wolfram, in quartz lodes. *Loc.* Severn R., 7 miles W. of Ballandean Rail. Stn., 21 miles (by rail and road) S.S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* B.D.

2034A. —— ——. *Assoc.with* Gold. *Loc.* Glenlyon Run, about 2 miles N. of the homestead, about 45 (by road) S.W.byW. of Stanthorpe. *Co.* Clive. *Dist.* Darling Downs. *Ref.* Q.G.M. Jour., vol. 11, p. 258 (1910).

2035. —— ——. *Assoc.with* Lead Ore. *Loc.* Schlumacher's Mine, Newellton (Silver Valley), 9 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell. *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

2036. —— ——. *Assoc.with* Scheelite. *Loc.* Tierney and McQueen's Wolfram Camp, 8 miles from Nymbool (Smith's Cr.) Rail Stn., 36 miles (by rail and road) N.W.byN. of Lappa Junction (Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*).

2037. —— ——. Cardigan Block No. 2, 16 miles W.S.W. of Ravenswood. *Co.* Murray. *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

2038. —— ——. Star R. Copper Mines, head of Big R., 50 miles W. of Townsville. *Co.* Wilkie Gray. *Dist.* Kennedy North. *Ref.* O.M.

2039. —— ——. *Assoc.with* Silver. *Loc.* Emu Plains Silver Field, Bowen R., 60 miles S. of Bowen. *Co.* Carlisle. *Dist.* **Kennedy South.** *Ref.* L.B. 2, p. 231 (1889).

2040. —— ——. *Assoc.with* Native Silver and Galena. *Loc.* Sunbeam Silver Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim. *Dist.* Kennedy South. *Ref.* W.E.C.

2041. —— ——. In quartz reef. Ranne's Hill, Gogango Ranges, 30 miles S. of Gogango Rail. Stn. (Central line). *Co.* Pakington. *Dist.* **Leichhardt.**

2042. —— ——. *Assoc.with* Cobalt. *Loc.* Blue Mountain, Funnel Cr., nr. Nebo, 40 miles S.byW. of Mackay. *Co.* Wodehouse. *Dist.* Leichhardt. *Ref.* L.B. 2, p. 231 (1889).

2043. —— ——. In slate. Mt. Gotthard Copper Mines, 8 miles N.E. of Lake Elphinstone Stn., 40 miles W.S.W. of Mirani Rail. Stn. (Mackay line). *Co.* Wodehouse (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 4 (1887), and 228, p. 50 (1910), and O.M.

2044. —— ——. Min. Sels. 1165, 1213, 1751, and 1714, Cressbrook Cr., near Mt. Deongwar, 58 miles N.N.W. of Ipswich. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* O.M.

2045. —— ——. Por. 38, Par. of Dixon, 13 miles E. of Esk Rail. Stn. (Brisbane-Valley line), 70 miles (by rail and road) N.W.byN. of Brisbane. *Co.* Stanley. *Dist.* Moreton. *Ref.* A.R., p. 163 (1908).

2046. —— ——. *Por.* 19, *Par.* of St. John, about 13 miles E. of Esk Rail. Stn. (*ante*). *Ref.* A.R., p. 163 (1908).

2046a. —— ——. *Assoc.with* Gold and Silver. *Loc.* Kilkivan Gold Mine, Black Snake, 10 miles S. of Kilkivan Rail. Stn. (Kilkivan br. line). *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

2046b. **Copper Oxides.** *Assoc.with* Gold and Copper Pyrites. *Loc.* Wonbah Hill, 12 miles (by rail) N.byW. of Mt. Perry Rail. Stn. (Bundaberg-Mt. Perry line). *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M.

2047. —— ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, and Cassiterite, in gossan lode, in greywacke and shale. Crucible Tin and Copper Mine, Watsonville, head of James Cr., br. of Walsh R., 7 miles E.S.E. of Stannary Hills Rail. Stn., 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 13, pp. 21 and 22 (1883).

2048. —— ——. Rosebery Mine, Chillagoe, 139 miles (by rail) W.S.W of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

2049. —— ——. *Assoc.with* Gold, Copper carbonate, Manganese-dioxide, and Hematite. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 27, p. 7 (1886).

2050. —— ——. *Por.* 49, N. side of Mt. Mee, Woodford, 46 miles N.byW. of Brisbane. *Co.* Canning; *Dist.* **Moreton.** *Ref.* L.C.B.

2051. —— ——. *Assoc.with* Malachite and Ironstone, in quartz. *Loc.* Black Diamond Mine, Taromeo, 6 miles N.N.W. of Benarkin Rail. Stn. (Brisbane-Valley br. line), 117 miles (by rail and road) N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* (and *Assay*): G.S.Q. Pub. 159 (1901).

2052. —— ——. In ironstone lode. *Por.* 1768, *Par.* of Taromeo, 14 miles S. of Nanango, on Nanango Road. *Co.* Cavendish (*ante*). *Average of 4 Assays:* Gold = traces; Silver = 70 oz. 12 dwt. per ton; Copper = 20·6 per cent. *Ref.* A.R., p. 59 (1906).

2053. —— ——. *Assoc.with* Copper carbonate, in porphyry. *Loc.* Pinnacle Copper Workings, 7 miles W. of Bompa Old Stn., 48 miles S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Assay:* Silver = 16 dwt. 8 gr. per ton; Copper = 3·4 per cent. *Ref.* G.S.Q. Pub. 159, p. 8 (1901).

2054. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz and gossan. *Loc.* Gt. Northern Copper Mine, Rosewood, 23 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* G.S.M.

2055. —— ——. *Assoc.with* Manganese-dioxide, Nickel, Cobalt, Rhodonite, Rhodochrosite, in lode. *Loc.* Mt. Coora, Black Snake, 8 miles S.S.E. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Assays: See* No. 1837. *Ref.* G.S.Q. Pubs. 28 (1886), 38, p. 1 (1887), 48, p. 59 (1888), and 169, pp. 16-19 (1901).

2056. Copper Oxides. Sel. 1217, Gigoomgan Run, 35 miles W.S.W. of Maryborough. *Co.* Lennox (*ante*). *Ref.* L.C.B.

2057. —— ——. *Assoc.with* Copper carbonate. *Loc.* St. Aignan (Misima) Is., Louisdale Archipelago, 379 miles E.byS. of Port Moresby, **Brit. New Guinea.**

—— ——. *See also* Cuprite and Tenorite.

——. Oxy-chloride. *See* Atacamite.

2058. **Copper Phosphate.** Arbouin, 18 miles W. of Mungana Rail. Stn. (Chillagoe line), nr. Walsh R., Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

2059. —— ——. Queenslander Lease, Mt. Redcap, 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

—— ——. *See also* Chalcolite.

——. Purple Ore. *See* Bornite.

Copper Pyrites. *Syn.* Chalcopyrite. *Compo.* Sulphide of copper and iron. *Colour,* brass-yellow, often with an iridescent tarnish. *Streak,* greenish-black. *Lustre,* metallic. Brittle. *H.* = 3·5-4; *Sp.gr.* = 4·1-4·3. *Contents* (*max.*), Copper 34 per cent.

2060. —— ——. *Assoc.with* Redruthite and Limonite. Four miles N.W. of Blackeye Spring, McKinlay, and 68 miles S.E.byE. of **Cloncurry.** *Co.* Allison; *Dist.* **Burke.** *Assay:* Gold = trace; Silver = 1 oz. 5 dwt. per ton; Copper = 26·8 per cent. *Ref.* A.R., p. 107 (1907).

2060A.—— ——. *Assoc.with* Chrysocolla, Malachite, and Limonite, in quartz and slate. *Loc.* Cameronian M.C. (196), Euston Group, Cameron R., 27 miles W.N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p 267 (1908).

2060B.—— ——. *Assoc.with* Malachite, Azurite, Limonite, in quartz and quartzite. *Loc.* Federal R.C. (52), Federal Group, Cameron R., 20 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 267 and 268 (1908).

2061. —— ——. *Assoc.with* Tile Ore, Azurite, Malachite, and Limonite, in mica-schist, quartzite, and gossan. *Loc.* Magnet M.L. (450), Longamundi Group, Dugald R., between 34 and 39 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 284-286 (1908).

2061A.—— ——. *Assoc.with* Redruthite, Malachite, Limonite, and Actinolite, in gossan and schist. *Loc.* Melba M.L. (319), Melba Group, Corella R., 39 miles W.S.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 210 (1908).

2062. —— ——. *Assoc.with* Redruthite and Chrysocolla, in schist, slate, and quartz. *Loc.* Native Companion R.C. (19), Native Companion Group, Palm Tree Cr., 26½ miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 273 and 274 (1908)

2062A.—— ——. *Assoc.with* Iron Pyrites. *Loc.* Secret Group Copper Leases, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 212 (1908).

2063. —— ——. *Assoc.with* Cuprite and Malachite. *Loc.* Contra Copper Lode, ¼-mile S.W. of Australia Copper Mine, Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

2064. —— ——. *Assoc.with* Gold, Siderite, and Tourmaline, in quartz. Pumpkin Gully, S. of Fisher's Cr., 12 miles S. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 104, p. 4 (1895).

2065. —— ——. *Assoc.with* Gold, Iron Pyrites, and Copper carbonate, in quartz. Victoria No. 1 N. Mine, Bowerbird (Leichhardt) Goldfield, 70 miles N.W. of Cloncurry. *Co.* Brahe or Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 2 (1898).

2066. —— ——. *Assoc.with* Gold, Iron Pyrites, and Malachite, in quartz. Victoria P.C. Mine, Victoria Reef, Bowerbird Goldfield (*ante*). *Ref.* G.S.Q. Pub. 104, p. 2 (1895).

For further Cloncurry references, *see* Nos. 2069 to 2120.

2067. —— ——. *Assoc.with* Iron Pyrites, Cassiterite, Galena, and Zinc-Blende, in chlorite, quartz, and greisen. Brilliant P.C. Mine, Stanhills Tinfield, between 12 and 32 miles S.E. of Croydon. *Co.* Esmeralda; *Dist.* Burke. *Ref.* G.S.Q. Pub. 211, p. 6 (1907).

2068. —— ——. *Assoc.with* Azurite, Malachite, Cassiterite, Zinc-blende, and Galena, in chlorite. *Loc.* Comet Mines, N. of Ten-mile Cr., nr. Esmeralda Rd., Stanhills Tinfield (*ante*). *Ref.* G.S.Q. Pub. 211, p. 9 (1907).

2069. —— ——. *Assoc.with* Redruthite, Tile Ore, and Limonite, in slate (?). Eclipse M.L. (571), Eclipse Group, E. of Dromedary Range, N.W. of Donaldson, 68 miles N.byW. of Cloncurry. *Co.* Granada; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 355 and 356 (1908).

2070. —— ——. *Assoc.with* Malachite, Limonite, and Calcite, in gossan and quartz. Iron Duke M.L., Alice Group, 4 miles S.E. of Mt. Start, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 165, 166 (1905).

2071. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, Chrysocolla, Hematite, Limonite, Turgite, in quartz, calcite, and gossan. *Loc.* Belfast Copper M.L. (303), Belfast Group, 10 ch. S.E. of Cloncurry Rd., 2 miles N.N.E. of Mt. Start, 21 miles S.S.W. of Cloncurry *Co.* Selwyn (*ante*). *Assay:* Copper = 14·8 per cent.; Gold = 1 dwt. per ton; Silver = 1 dwt. per ton. *Ref.* G.S.Q. Pub. 215, pp. 120-122 (1908).

2072. —— ——. *Assoc.with* Redruthite, Tile Ore, Chrysocolla, Hematite, and Limonite, in quartz and ferro-calcite. Policeman Copper M.C. (206), Boomerang Group, Cone Cr., 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 100 and 101 (1908).

2073. —— ——. *Assoc.with* Tile Ore, Malachite, and Azurite, in schist, gossan, and quartz, etc. Celestial Extd. M.C. (195), 2 miles S.S.W. of Mt. Start, Chinaman Group, 23½ miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 148, 149 (1908).

2074. —— ——. *Assoc.with* Cuprite, Tetrahedrite, Malachite, and Antimony. Rainbow Copper Lode, Cone Cr., trib. of Duck Cr., 24 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 56 (1887).

2075. —— ——. *Assoc.with* Tenorite, in quartz and ironstone. Daisy Mine, Daisy Group, Duck Cr., 1½ mile N.N.W. of Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* A.R., p. 117 (1907).

2076. —— ——. *Assoc.with* Gold, Iron Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, Limonite, Calcite, Actinolite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group, Duck Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

2077. —— ——. *Assoc.with* Gold, Redruthite, Tile Ore, Azurite, Malachite, and Limonite, in chloritic schist. *Loc.* Pioneer Copper M.L. (229), Diagonal Group, Duck Cr., 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Assay:* Copper = 18·9 per cent.; Gold = 1 dwt. 4 gr. per ton; Silver = 11 dwt. per ton. *Ref.* G.S.Q. Pub. 215, pp. 132-135 (1908).

2078. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Limonite, in schist and quartz. *Loc.* Prospector M.C. (182), Diagonal Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 136-138 (1908).

2079. —— ——. *Assoc.with* Redruthite, Tile Ore, Azurite, Malachite, and Chrysocolla, in gossan, quartz, and quartzite. *Loc.* Chaplain M.L. (—), Eva Group, Duck Cr., 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 158, 159 (1908).

2080. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Chrysocolla, in quartz and calcite. *Loc.* Commonwealth M.C. (330), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 158 (1908).

2081. —— ——. *Assoc.with* Redruthite, Tile Ore, Azurite, Iron Pyrites, Limonite, and Calcite, in schist, slate, and quartz. *Loc.* Eva M.L. (250), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 152-154 (1908).

2082. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, Calcite, and Chlorite, in chloritic schist, gossan, and quartzite. *Loc.* Eva Extd. M.L. (283), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 155 (1908).

2083. —— ——. *Assoc.with* Native Copper, Redruthite, Malachite, Chrysocolla, Iron Pyrites, Limonite, Turgite, Calcite, and Ferro-Calcite, in quartzite, schist, and limestone. *Loc.* Florence River Copper Leases, ½-mile W. of Hampden rd., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

2084. —— ——. *Assoc.with* Redruthite, Cuprite, Tenorite, Malachite, Chrysocolla, Iron Pyrites, and Kaolin, in gossan, slates, and diorite. *Loc.* Hampden M.Ls. (244, 245, etc.), Hampden Group, 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 49-60 (1908).

2085. —— ——. *Assoc.with* Tile Ore, Malachite, Azurite, and Limonite, in schist and quartz. *Loc.* Comet M.L. (243), Hilda Group, Slaty Cr., ½-mile W. of Boulia rd., 20 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 182, 183 (1908).

2085A. Copper Pyrites. *Assoc.with* Redruthite, Malachite, Limonite, Manganese-dioxide, and Calcite, in limestone, quartz, and schist. *Loc.* Hilda M.L. (242), Hilda Group (*ante*). *Ref.* G.S.Q. Pub. 215 (1908).

2086. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Calcite, in schist and limestone. *Loc.* Mascotte M.C. (319), Hilda Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 184 (1908).

2087. —— ——. *Assoc.with* Cuprite and Ironstone. *Loc.* Mascotte M.C. (319), Hilda Group (*ante*). *Assay:* Gold = 1 dwt. 19 gr.; Silver = 11 dwt. per ton; Copper = 18·6 per cent. *Ref.* A.R., p. 118 (1907).

2087A. —— ——. *Assoc.with* Redruthite, Malachite, and Limonite, in quartz and schist. *Loc.* Just-in-Time 1 E. M.L., 473 (Just-in-Time Group), 1 miles S. of Malbon R., 30 miles S.S.W. of Cloncurry. *Co.* Sewlyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 82 (1908).

2088. —— ——. *Assoc.with* Redruthite, Malachite, Azurite, and Limonite. *Loc.* Erin go-bragh Extd. M.C. (372), 2 miles N. of Florence R., 31 miles S. of Cloncurry, McPhail Group. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 77 (1908).

2089. —— ——. *Assoc.with* Redruthite, Malachite, Chrysocolla, and Limonite, in gossan, quartzite, and schist. *Loc.* McPhail M.L. (474), Florence R., 33 miles S. of Cloncurry, McPhail Group (*ante*).

2090. —— ——. *Assoc.with* Cuprite, Azurite, and Malachite, in lode, in porphyry. *Loc.* Mt. Devoncourt M.L. (550), Cloncurry R., 44 miles S. of Cloncurry, Monitor Group. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 66-68 (1908).

2090A. —— ——. *Assoc.with* Native Copper, Redruthite, Cuprite, and Molybdenite, in lode formation. *Loc.* May Graham P.A., 4 miles W. of Soldier's Cap, about 33 miles (by road) S.E. of Cloncurry, Mt. Wheeler Group. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 225 (1908).

2090A1. —— ——. *Assoc.with* Gold, Copper (native), Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.) (Mt. Wheeler Group), Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp 219-224 (1908).

2090B. —— ——. *Assoc.with* Iron Pyrites, Calcite, and Tourmaline, in quartz. *Loc.* Shamrock M.C. (184) (Mt. Wheeler Group), Soldier's Cap, 29½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 224 (1908).

2090C. —— ——. *Assoc.with* Redruthite, Tile Ore, Chrysocolla, Hematite, and Hypersthene, in slate and gossan. *Loc.* Springs Peak M.L. (562), Pearl Group, Corella R., 30 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 189 (1908).

2091. —— ——. *Assoc.with* Tile Ore, Malachite, Azurite, Chrysocolla, Hematite, and Limonite, in slate. *Loc.* Easter Gift M.L. (290), 1 mile E. of Mt. Start, W. of Marabah Township, Pioneer Chief Group, 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 127-129 (1908).

2092. —— ——. *Assoc.with* Malachite and Limonite, in schist and quartz. *Loc.* Primrose Extd. M.C. (267), W.N.W. of Mt. Finish, nr. Mt. Start, Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 126, 127 (1908).

2093. —— ——. *Assoc.with* Native Copper, Redruthite, Tile Ore, Malachite, Iron Pyrites, and Limonite, in slate. *Loc.* Pioneer Chief M.L. (231), Cone Cr., ½-mile N. of Mt. Start, Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 123-125 (1908).

2094. —— ——. *Assoc.with* Redruthite, Malachite, Chrysocolla, Limonite, and Turgite, in slate and quartz. *Loc.* Highland Mary M.L. (531), Ready Rhino Group, Duck Cr., 23½ miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 91-93 (1908).

2095. —— ——. *Assoc.with* Native Copper, Redruthite, Tile Ore, Malachite, Chrysocolla, Iron Pyrites, and Limonite, in schist, slate, quartzite, and quartz. *Loc.* Banjo Copper M.L. (590), Tambourine Group, Duck Cr., 26 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 167, 168 (1908).

2096. —— ——. *Assoc.with* Redruthite, Azurite, Malachite, Chrysocolla, Iron Pyrites, Limonite, and Tourmaline, in schist, slate, and quartz. *Loc.* Tambourine Copper R.C. (286), Tambourine Group, Duck Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 166, 167 (1908).

2097. —— ——. *Assoc.with* Redruthite, Malachite, Chrysocolla, Limonite, and Turgite, in schist and quartz. *Loc.* Brilliant M.L. (588), Tharsis Group, 1½ mile N.W. of Mt. Start, 20 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 114, 115 (1908).

2098. —— ——. *Assoc.with* Tile Ore, Malachite, Limonite, and Göthite, in schist. *Loc.* Brilliant M.C. (159), Timberoo Group, Slaty Cr., 18 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 178-181 (1908).

2099. —— ——. *Assoc.with* Limonite, Calcite, and Ferro-Calcite, in clay schist. *Loc.* Ida Copper M.C. (179), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 178, 179 (1908).

2099A.—— ——. *Assoc.with* Cuprite, Malachite, and Limonite, in chloritic schist. *Loc.* Mt. Minde M.F. (2658), Friedman's Cr., br. of Slaty Cr., Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 170-172 (1908).

2100. —— ——. *Assoc.with* Redruthite and Limonite, in chloritic schist. *Loc.* Resurgam M.L. (399), Slaty Cr., Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 175-177 (1908).

2101. —— ——. *Assoc.with* Redruthite, Bornite, Tile Ore, Malachite, Iron Pyrites, Hematite, Limonite, Muscovite, and Calcite, in schist, slate, and quartz. *Loc.* Timberoo M.L. (716), Friedman's Cr., br. of Slaty Cr., Timberoo Group (*ante*). *Ref.* G.S Q. Pub. 215, pp. 172-175 (1908).

2102. —— ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, and Galena, in granite. *Loc.* Golden Gate Reef, 4 miles N.W. of Croydon Rail. Stn., Normanton-Croydon line. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 202, p. 10 (1905).

2103. —— ——. *Assoc.with* Native Copper, Cuprite, Malachite, Chrysocolla, and Limonite, in gossany quartz and calcareous sinter. *Loc.* Boundary M.L. (582), Bull Cr. Group, Coolullah Run, 74 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 345-347 (1908).

2104. —— ——. *Assoc.with* Bornite, Malachite, and Limonite, in limestone. *Loc.* Centipede M.L. (375), Centipede Group, 53 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 301, 302 (1908).

2105. —— ——. *Assoc.with* Redruthite, Malachite, and Limonite, in quartz. *Loc.* Bauhinia M.C. (347), Dobbyn Group, 3½ miles W.N.W. of Crusader Freeholds, Coolullah Run, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 341, 342 (1908).

2106. —— ——. *Assoc.with* Redruthite, Malachite, and Limonite, in schist. *Loc.* Dobbyn 1 S. M.L. (662), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 341 (1908).

2107. —— ——. *Assoc.with* Redruthite, Malachite, Limonite, Calcite, and Ferro-Calcite, in quartz. *Loc.* Glenferrie P.A. (300), nr. Old Man Cr., Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 344 (1908).

2108. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, Azurite, Chrysocolla, and Limonite, in schist, slate, and gossan. *Loc.* Mighty Atom M.L. (274), Mighty Atom Group, Six-mile Cr., Leichhardt R., 42 miles N.W.byW. of Cloncurry. *Co.* Tewinga. *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 304-306 (1908).

2109. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Limonite, in gossan and quartz. *Loc.* Mt. Bornite, M.L. (376), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 309, 310 (1908).

2110. —— ——. *Assoc.with* Redruthite, Cuprite, Tile Ore, Malachite, and Limonite, in slate, schist, and gossan. *Loc.* Mt. Millicent, M.L. (663), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 307, 308 (1908).

2111. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Limonite, in slate and kaolin. *Loc.* Mt. Millicent S. M.L. (664), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 308-310 (1908).

2112. —— ——. *Assoc.with* Native Copper, Cuprite, Tile Ore, Malachite, and Limonite, in schist, slate, and gossan. *Loc.* Mt. Cuthbert M.L. (107), Mt. Cuthbert Group, Six-mile Cr., Leichhardt R., 19 miles S.W. of Coolullah H.S., 63 miles N.W. of Cloncurry. *Co.* Tewinga. *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 315-318 (1908).

2113. —— ——. *Assoc.with* Redruthite, Cuprite, Tile Ore, Malachite, Chrysocolla, and Limonite, in schist, gossan, and quartz. *Loc.* Mt. Cuthbert 1 N. M.L. (381), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 318-321 (1908).

2114. —— ——. *Assoc.with* Malachite, Chrysocolla, Iron Pyrites, Limonite, Ironstone, and Magnetite, in kaolinised schist. *Loc.* Mt. Cuthbert 1 and 2 S. M. Leases (257 and 294), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 321, 322 (1908).

2115. —— ——. *Assoc.with* Native Copper, Redruthite, Cuprite, Tile Ore, Tenorite, Malachite, Iron Pyrites, and Limonite, in slate and gossan. *Loc.* Mt. Metallic R.C. (310), Mt. Metallic Group, Prospector Cr., trib. of Leichhardt R., 52 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Assay:* Copper = 39·8 per cent.; Silver = 1 oz. 16 dwt. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 215, pp. 295-297 (1908).

2116. Copper Pyrites. *Assoc.with* Redruthite, Malachite, Calcite, and Jasper, in slate, gossan, and quartz. *Loc.* Queenslander M.L. (436), Mt. Metallic Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 297-299 (1908).

2117. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Limonite, in schist, gossan, and quartz. *Loc.* Chance P.A. (283), St. Paul's Cr. Group, Leichhardt R., Coolullah, 78 miles N.N.W. of Cloncurry. *Co.* Tewinga. *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 352-354 (1908).

2118. —— ——. *Assoc.with* Redruthite and Limonite, in kaolin. *Loc.* Queen Bee M.C. (278), St. Paul's Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 354 (1908).

2119. —— ——. *Assoc.with* Redruthite, Limonite, and Calcite, in schist and quartz. *Loc.* Hare's Excelsior M.L., Von Bremen's Group, St. Paul's Cr., Leichhardt R., 70 miles N.W.byN. of Cloncurry. *Co.* Tewinga. *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 327, 328 (1908).

2120. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Limonite, in schist, gossan, and quartz. *Loc.* Isabella M.C. (360), Von. Bremen's Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 325, 326 (1908).

For further Cloncurry references, *see* Nos. 2199 to 2209.

2121. —— ——. *Assoc.with* Gold. *Loc.* Boolboonda Copper Lode, Boolboonda, 12 miles N.E. of Mt. Perry Rail. Stn. (Mt. Perry line). *Co.* Bowen. *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 21, p. 13 (1886), and G.S.M.

2122. —— ——. *Assoc.with* Gold. *Loc.* New Moonta Mine, Boolboonda (*ante*). *Ref.* G.S.M.

2123. —— ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel. *Loc.* Mt. Ophir Mine, Mt. Ophir, Chowey Cr. Goldfield, 62 miles (by rail) W. of Maryborough (Gayndah br. line). *Co.* Bowen. *Dist.* Burnett. *Ref.* A.R., p. 158 (1908).

2123A. —— ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in felsite. *Loc.* Achillea Mine, Gebangle, 3 miles up Yarrabil Cr., 11 miles N.W. of Degilbo Rail. Stn. (Gayndah br. line). *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890), and G.S.M.

2123B. —— ——. *Assoc.with* Gold and Iron Pyrites, in lode. *Loc.* Canterbury Copper Mine, nr. Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg (Bundaberg-Mt. Perry line). *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

2124. —— ——. *Assoc.with* Cinnabar, in lode in granite. *Loc.* Between Elizabeth and St. George's Shaft at Mt. Perry (*ante*). *Ref.* B.D.

2125. —— ——, in quartz and calcite. Fortunatus Copper Mine, Mt. Perry (*ante*). *Contents:* Copper = 30 per cent. *Ref.* G.S.Q. Pub. 21, p. 18 (1885).

2126. —— ——. *Assoc.with* Bornite and Tenorite, in quartz lode. *Loc.* Mt. Perry Copper Mines, Mt. Perry (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 57 (1887).

2127. —— ——. *Assoc.with* Gold, Cuprite, Chalcotrichite, Tile Ore, Iron Pyrites, Zinc-Blende, and Calcite, in lode. *Loc.* Mt. Perry Mine, Mt. Perry (*ante*). *Ref.* G.S.M.

2128. —— ——. *Assoc.with* Tenorite and Iron Pyrites. *Loc.* Normanby Copper Mine, Mt. Perry (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and G.S.M.

2129 —— ——. *Assoc.with* Iron Pyrites, Galena, Zinc-Blende, and Barytes, in quartz. *Loc.* Potosi Copper Lode, 3 miles E. of Mungai, 6 miles W. of Mt. Perry, 78 miles (by rail and road) S.W.byW. of Bundaberg (Mt. Perry line). *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and G.S.M.

2130. —— ——. *Assoc.with* Gold, Silver, and Molybdenite, in quartz veins in granite country. *Loc.* Globe Copper Mine, Wolca, 6 miles N. of Mt. Perry, 73 miles (by rail and road) S.W.byW. of Bundaberg (Mt. Perry line). *Co.* Bowen (*ante*). *Analysis:* Gold = 1 oz. 13 dwt. per ton; Silver = 3 oz. 2 dwt. per ton; Copper = 21·1 per cent. *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

2130A. —— ——. *Assoc.with* Iron Pyrites. *Loc.* Wolca Copper Lodes, 6 miles N.N.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

2131. —— ——. *Assoc.with* Oxidised Copper Ores. *Loc.* Wonbah Hill, 12 miles (by rail) N.byW. of Mt. Perry Rail. line (Bundaberg—Mt. Perry line). *Co.* Bowen (*ante*). *Ref.* G.S.M.

2131A. —— ——. *Assoc.with* Gold, Malachite, and Limonite, in lode. *Loc.* nr. Wonbah Hill Mine, 2 miles N.byW. Wonbah Siding, 60 miles (by rail and road) S.W.byW., of Bundaberg. *Co.* Bowen (*ante*). *Ref.* A.R., p. 264 (1910).

2132. —— ——. *Assoc.with* Mispickel, Bismutite, and Calcite, in lode. *Loc.* 1 mile N.N.E. of Mt. Biggenden Bismuth Mine, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 60, p. 3 (1890).

2133. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Cuprite, Tenorite, Malachite, Pyrrhotite, Mispickel, Zinc-Blende, Bismuthinite, Hematite, and Calcite, in quartz lode. *Loc.* Commonwealth Mine, Mt. Havilah, 2¾ miles W. of Degilbo Rail Stn. (Gayndah br. line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 185, p. 6 (1903), and 207, pp. 14 (1907).

2134. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Native Bismuth, Bismuthinite, Mispickel, Magnetite, and Ironstone, in lode. *Loc.* Don Jon (Unique) Bismuth Mine, ¼-mile S. of Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), and 207, pp. 13, 14 (1907).

2135. —— ——. *Assoc.with* Malachite and Azurite, in ironstone. *Loc.* Don Jon (Unique) Bismuth Mine, ¼-mile S. of Mt. Havilah (*ante*). *Ref.* A.R., 1906, p. 44, and B.D.

2136. —— ——. *Assoc.with* Gold, Telluride of Gold, Malachite, Native Bismuth, Bismuthinite, Joseite, Molybdenite, Mispickel, Zinc-Blende, and Calcite. *Loc.* Mt. Shamrock Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah Br. line), 63 miles (by rail or road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 60, p. 6 (1890), 125 (1897), and 168 (1901), and B.D.

2137. —— ——. *Assoc.with* Malachite, Azurite, Iron Pyrites, and Galena, in quartz. *Loc.* Black Watch Reef, Gympie Copper Mines (Scrub Paddock Diggings), Gooroomjam Cr., 23 miles N.N.E. of Nanango, 30 miles S. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Yield:* Gold = 1 oz. 9 dwt. per ton; Silver = 1 oz. 16 dwt. per ton. *Assays:* (1) Gold = 4 oz. 3 dwt. per ton; Silver = 7 oz. 17 dwt. per ton. (2) Gold = 4 oz. 3 dwt. per ton; Silver = 7 oz. 17 dwt. per ton. *Ref.* G.S.Q. Pub. 29, p. 3 (1886).

2138. —— ——. *Assoc.with* Iron Pyrites and Magnetite, in diorite. *Loc.* M.L. (25), Gympie Copper Mines or Scrub Paddock Diggings (*ante*). *Ref.* G.S.Q. Pub. 169, pp. 7-9 (1901).

2139. —— ——. *Assoc.with* Tenorite, Iron Pyrites, Mispickel, and Galena. *Loc.* P.A. (2), Gympie Copper Mines (*ante*). *Assays:* (1) Gold = 11 dwt. 16 gr.; Silver = 6 oz.; Copper = 9 per cent. (2) Gold = 2 dwt. 6 gr. per ton; Silver = 11 dwt. 16 gr. per ton; Copper = 0·6 per cent. *Ref.* G.S.Q. Pub. 169, p. 9 (1901).

2139A. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc-Blende, and Calcite, in ironstone lode. *Loc.* Ban Ban Station, 12 miles S.E.byE. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Ref.* A.R., p. 179 (1909).

2140. —— ——. *Assoc.with* Malachite, Azurite, and Iron Pyrites, in chlorite lode. *Loc.* Robina (or Mt. Hawick) Copper Mine, 12 miles W.S.W. of Degilbo Rail. Stn. (Gayndah line. *Co.* Mackenzie (*ante*). *Assay:* Gold = trace; Silver = 2 oz. 1 dwt. 3 gr. per ton; Copper = 1·38 per cent. *Ref.* G.S.Q. Pub. 150, p. 4 (1900).

2141. —— ——. *Assoc.with* Iron Pyrites and Magnetite. *Loc.* Nr. Cannindah Stn., head of Cabbage Tree Cr., br. of Splinter Cr., 22 miles S.E.byS. of Many Peaks Rail. Stn. (Boyne Valley line), 80 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Ref.* A.R., 1907, p. 99.

2141A. —— ——. *Assoc.with* Malachite, Azurite, Limonite, in quartz. *Loc.* Malpas' Claim, Pinnacle Cr., br. of Lynd R., 16 miles W. of Fossilbrook, **Walsh and Tinaroo Mineral Fields.** *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* A.R., p. 223 (1910).

2141B. —— ——. *Assoc.with* Cuprite, Malachite, and Azurite, in lode. *Loc.* Daintree Copper Mine, 38 miles S.E. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Copperfield; *Dist.* Cook. *Ref.* E.O.M. and G.S.Q. Pub. 234, p. 28 (1911).

2142. —— —— *Assoc.with* Gold, Iron Pyrites, Galena, in quartz. *Loc.* Victory Reef, McLeodsville, 6 miles N.N.W. of Thornborough, 25 miles N. of Dimbulah Rail. Stn. (Chillagoe line), Hodgkinson Goldfield. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 27 (1884).

2143. —— ——. *Assoc.with* Iron Pyrites. *Loc.* Mt. Molloy, 17 miles S.S.W. of Port Douglas, 20 miles (by rail) N.N.W. of Biboohra Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Dagmar (*ante*). *Assays:* (1) Gold = 3 dwt. 4 gr., Silver = 6 oz. 18 dwt. per ton, Copper = 16·6 per cent.; (2) Gold = trace, Silver = 8 oz. per ton, Copper = 14 per cent.; (3) Gold = trace, Silver = 3 oz. per ton, Copper = 32·8 per cent. *Ref.* A.R., p. 115 (1907).

2144. —— ——. *Assoc.with* Gold, Silver, Chalcanthite, and Copper carbonate. *Loc.* Elektron Silver Mine, Caledonia Cr., Goldsmith Cr., 24 miles S.S.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

2145. Copper Pyrites. *Assoc.with* Gold, Iron Pyrites, Galena, and Mispickel, in quartz and calcite. *Loc.* Balmoral Reef, 1½ mile W. of Castleton, 20 miles S.byE. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), and 151, p. 12 (1900).

2146. —— ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Sir Henry Havelock Reef, 2½ miles N.W. of Castleton, 5 miles S.S.E. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, p. 12 (1900).

2146A. —— ——. *Assoc.with* Silver, Cerussite, Galena, and Limonite, in lode. *Loc.* Mt. Dee Vale Mine, Charleston, 144 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* O.R. (1909).

2147. —— ——. *Assoc.with* Gold, Redruthite, Iron Pyrites, Mispickel, Galena, and Zinc-Blende, in quartz-lode. *Loc.* Nil Desperandum Mine, Charleston (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), and 219, p. 14 (1909).

2148. —— ——. *Assoc.with* Iron Pyrites and Pyrrhotite, in quartz. *Loc.* Havelock Mine, 5 miles S. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, p. 12 (1909).

2149. —— ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Galena, and Zinc-Blende, in quartz. *Loc.* Papa Reef, Georgetown, 20 miles N. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 3 (1887).

2150. —— ——. *Assoc.with* Gold and Iron Pyrites, in ferruginous quartz. *Loc.* St. George Mine, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 6 (1900).

2151. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende, in quartz. *Loc.* International Reef, Rocky, Sandy Cr., 7 miles S.W.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 151, p. 10 (1900), and 219, p. 9 (1909).

2151A. —— ——. *Assoc.with* Malachite, Pyrrhotite, etc. *Loc.* Einasleigh Copper Mine, 4 miles E.N.E. of Charleston Rail. Stn., 102 miles (by rail) S.S.W. of Almaden Rail. Stn. (Etheridge line). *Co.* Gilbert (*ante*). *Ref.* G.S.M. and G.S.Q. Pubs. 219, p. 19 (1909), and 234, pp. 21-26 (1911).

2151B. —— ——. *Assoc.with* Magnetite, in quartzite. *Loc.* Teesdale, about 10 miles (by rail) S.W. of Einasleigh. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 234, pp. 26, 27 (1911).

2151C. —— ——. *Assoc.with* Iron Pyrites and Galena, in granite. *Loc.* Stockman's Cr., 6 miles N.W. of Teesdale Rail. Stn., Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 234, p. 27 (1911).

2152. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Monarch Reef, Northcote, 12 miles W. of Mareeba Rail. Stn. (Cairns line), Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 28 (1884).

2153. —— ——. *Assoc.with* Cassiterite, Mispickel, and Zinc Blende, in quartz lode. *Loc.* Consolidated Mine, Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe Br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson (*ante*). *Ref.* G.S.M.

2154. —— ——. *Assoc.with* Galena and Anglesite, in pipe veins. *Loc.* Montalbion Silver Mine, Montalbion (*ante*). *Ref.* G.S.Q. Pub. 119, p. 29 (1897).

2155. —— ——. *Assoc.with* Silver, Iron Pyrites, Mispickel, Galena, and Zinc-Blende. *Loc.* Tornado Claim, Silverfield, 1 mile S. of Montalbion, 8 miles S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Analysis*: *See* No. 2780. *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

2156. —— ——. *Assoc.with* Chalcanthite and Marcasite. *Loc.* Chance Mine, Watsonville, head of James Cr., trib. of Walsh R., 7 miles E.S.E. of Stannary Hills, 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

2157. —— ——. *Assoc.with* Malachite, Azurite, Copper oxide, and Cassiterite. *Loc.* Crucible Tin Mine, Watsonville (*ante*). *Yield:* Tin Oxide = 58 per cent. *Ref.* G.S.M., G.S.Q. Pub. 13, pp. 21, 22 (1883).

2158. —— ——. *Assoc.with* Cassiterite, Mispickel, and Orthoclase, in elvan dyke. *Loc.* Gt. Western Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 27 (1883).

2159. —— ——. *Assoc.with* Stannite (?). *Loc.* Herbertina Mine, Watsonville (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

2160. —— ——. *Assoc.with* Mispickel, in diorite. *Loc.* King-of-the-North Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

2160A. —— ——. *Assoc.with* Cassiterite, Mispickel, Galena, Wolfram, Garnet, and Chlorite, in greywacke. *Loc.* King-of-the-Ranges Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 222, pp. 41-50 (1910).

2161. —— ——. *Assoc.with* Cuprite, Malachite, Azurite, Iron Pyrites, Mispickel, Cassiterite and Stannite, Wolfram, Ironstone, Fluorspar, and Chlorite, in diorite. *Loc.* Stewart's T Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 26 (1883), and 119, p. 15 (1897).

2162. —— ——. *Assoc.with* Chalcanthite. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

2163. —— ——. *Assoc.with* Marcasite. *Loc.* St. Patrick's Day Mine, Watsonville (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

2164. —— ——. *Assoc.with* Copper carbonate, Chalcanthite, Iron Pyrites, Mispickel, Marcasite, Cassiterite, Wolfram, Limonite, Red and Yellow Ochre. *Loc.* Try Again and Chance Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883), and P.R.S.Q., vol. 4, p. 52 (1887).

2165. —— ——. *Assoc.with* Tile Ore, Malachite, Azurite, and Chalcanthite. *Loc.* Wyatt's Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

2166. —— ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Bamford, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay:* Gold = 19 gr., Silver = 18 oz. per ton, Copper = 5·3, Lead = 4·6 per cent. *Ref.* A.R., p. 46 (1906).

2167. —— ——. *Assoc.with* Iron Pyrites, Galena, Zinc-Blende, and Molybdenite. Bamford (*ante*). *Assay:* Gold = 19 gr., Silver = 37 oz. per ton, Copper = 3·4 per cent. *Ref.* A.R., p. 101 (1907).

2168. —— ——. *Assoc.with* Galena, Mispickel, and Zinc-Blende, in quartz. *Loc.* Boomerang Mine, 1 mile W. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

2168A. —— ——. *Assoc.with* Galena. *Loc.* Fortunatus Mine, Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 50 (1897).

2169. —— ——. *Assoc.with* Bornite, Cuprite, Tile Ore, Tetrahedrite, Tenorite, Malachite, Iron Pyrites, Hematite, and Atacamite, in lode in felspar and quartz. *Loc.* Ruddygore Mine, 2 miles N.E. of Chillagoe, 141 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 10, 11 (1898).

2170. —— ——. *Assoc.with* Cassiterite, Iron Pyrites, Mispickel, and Galena. *Loc.* Iolanthe Tin Mine, Koorboora, 108 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

2171. —— ——. *Assoc.with* Cassiterite, Iron Pyrites, Mispickel, Galena, and Mica, in lode. *Loc.* Shakespeare Tin Lease, Koorboora (*ante*). *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

2172. —— ——. *Loc.* Mt. Cardwell Mine, 5 miles S. of Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 51 (1900).

2173. —— ——. *Assoc.with* Azurite and Malachite. *Loc.* Mungana Mines, 149 miles (by rail) W.S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

2174. —— ——. *Assoc.with* Redruthite, Cuprite, Malachite, Azurite, Chrysocolla, Garnet Rock, and Fluorspar. *Loc.* Dorothy Mine, 1¼ mile S.E. of Mungana, 150 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69 (1891).

2175. —— ——. *Assoc.with* Malachite, Azurite, and Cerussite, in ferruginous lode. *Loc.* Queenslander Copper Mine, 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), 152 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, p. 11 (1898).

2176. —— ——. *Assoc.with* Cuprite, Malachite, Azurite, Galena, Minium, Cerussite, Hematite, Zinc-Blende, and Garnet, in felspathic lode and gossan. *Loc.* Penzance Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), 134, p. 11 (1898).

—— ——. *See further* Walsh and Tinaroo references *under* District Kennedy North, Nos. 2209A to 2215A.

2177. —— ——. *Assoc.with* Cinnabar, Bornite, Redruthite, Malachite, Azurite, Hematite, Limonite, and Jasper, in quartz and calcite. *Loc.* St. George Copper and Coal Mines, Little R., 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mosman; *Dist.* Cook. *Ref.* G.S.Q. Pub. 222, pp. 21-32 (1910).

2178. —— ——. *Assoc.with* Gold, Silver, and Iron Pyrites, in quartz reef. *Loc.* Wise's Shaft, Wise's Knob, Oaks Goldfield, 45 miles E.S.E. of Charleston Rail. Stn. (Etheridge line). *Co.* Percy; *Dist.* Cook. *Ref.* A.R., p. 164 (1908).

2179. Copper Pyrites. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc-Blende, in quartz. *Loc.* Eclipse Mine, Horn Is. Goldfield, 3 miles S.E. of Thursday Is., Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.Q. Pub. 112, p. 6 (1896), and G.S.M.

2180. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende. *Loc.* Pioneer Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

2181. —— ——. *Assoc.with* Mispickel, Galena, and Zinc-Blende, in chlorite and quartz. *Loc.* Doctor's Lode, Sel. 39, Jibbinbar, 20½ miles S.byW. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* (and *Assay*)*:* G.S.Q. Pub. 67, p. 2 (1890).

2182. —— ——. *Assoc.with* Gold, Silver, and Mispickel, in quartz. *Loc.* Fletcher's Sel. (29), Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

2183. —— ——. *Assoc.with* Malachite and Mispickel, in lode. *Loc.* M.A. 26, Jibbinbar (*ante*). *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 87, p. 11 (1892).

2184. —— ——. *Assoc.with* Cassiterite, Molybdenite, and Wolfram, in quartz vein in greisen. *Loc.* Kettle Swamp, trib. of Quart Pot Cr., close to Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 125, p. 29 (1897), and G.S.M.

2185. —— ——. *Assoc.with* Garnet and Calcite. *Loc.* Malone's Mine, S. of Pikedale Hotel, 11 miles W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* (?)

2186. —— ——. *Assoc.with* Redruthite, Copper carbonate, Galena, Zinc Blende, Manganese-dioxide, and Ironstone. *Loc.* Pikedale Silver Mine, Woolshed Gully, Pikedale Head Stn., 20 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 87 (1898).

2187. —— ——. *Assoc.with* Iron Pyrites, Mispickel, Azurite, Zinc-Blende, and Cassiterite, in quartz, greisen, and slate. *Loc.* Ballandean Tin Mine, Severn R., 14 miles (by rail) S. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M., B.D., and L.C.B.

2188. —— ——. *Assoc.with* Iron Pyrites, Mispickel, Galena, and Zinc-Blende, in lode. *Loc.* Silver Queen Silver Mine, Severn R., 6 miles W. of Ballandean Rail. Stn., 21 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay: See* No. 2834. *Ref.* G.S.Q. Pub. 191, p. 39 (1904).

2189. —— ——. *Assoc.with* Zinc-Blende, Cassiterite, and Galena, in chlorite, quartz, and fluorspar lodes. *Loc.* in bank of Severn River, 7 miles W. of Ballandean Rail. Stn., 21 miles (by rail and road) S.S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

2190. —— ——. *Assoc.with* Cassiterite, Wolfram, Mispickel, and Chrysocolla, in quartz lode. *Loc.* Red Rock Cr., Severn R., 11 miles W.S.W. of Ballandean Rail. Stn. (Main line), 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 49 (1898).

2191. —— ——. *Assoc.with* Iron Pyrites and Galena, in chlorite and quartz. *Loc.* Mrs. Allison's Mine, Sugarloaf, 7 miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* (and *Assays*)*:* G.S.Q. Pub. 120, p. 87 (1898).

2192. —— ——. *Assoc.with* Mispickel, Cassiterite, Wolfram, Zinc-Blende, Calcite, Chlorite, and Orthoclase, in quartz. *Loc.* Sundown Copper Mine, Sundown Cr., Severn R., 12 miles S.W.byW. of Ballandean Rail. Stn., 26 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay:* Gold = 16 gr. per ton; Silver = 16 oz. per ton; Copper = 11·8 per cent. *Ref.* G.S.Q. Pub. 191, p. 22 (1904), and G.S.M.

2193. —— ——. *Assoc.with* Cuprite, Azurite, Malachite, and Zinc-Blende, in quartz. *Loc.* Sel. 24, nr. Sundown Cr., Severn (*ante*). *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

2194. —— ——. *Assoc.with* Galena. *Loc.* Silver Crown Silver-Copper Mine, 4 miles E. of Silver Spur, Texas, 40 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 191, p. 37 (1904).

2195. —— ——. *Assoc.with* Gold, Iron Pyrites, Pyrargyrite, Galena, Cerussite, Cuprite, Tile Ore, Malachite, Azurite, Zinc-Blende, Smithsonite, Ironstone, and Calcite, in lode. Silver Spur Mine, 8 miles E. of Texas, and 43 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* G.S.Q. Pubs. 120 (1898), and 191 (1904).

2196. —— ——. *Assoc.with* Malachite. *Loc.* Texas Copper Mine, 2 miles N.W. of Silver Spur Mine, 10 miles S. of Texas, 45 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

2197. —— ——. *Assoc.with* Gold, Iron Pyrites, and Talc, in quartz. *Loc.* Von Molke Mine, Leyburn Goldfield, 28 miles W.byN. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Assays:* (1) Gold = 16 dwt. 9 gr. per ton; Silver = 6 dwt. per ton. (2) Gold = 5 oz. 8 dwt. per ton; Silver = 1 oz. 5 dwt. per ton. *Ref.* G.S.Q. Pubs. 120, p. 71 (1898), and 87, p. 8 (1892).

2197A.—— ——. *Assoc.with* Silver, Galena, and Zinc-Blende, in lode. *Loc.* Claim on Lucky Valley Goldfield, 12 miles S.S.E. of Warwick. *Co.* Merivale (*ante*). *Ref.* A.R., p. 223 (1910).

2198. —— ——. *Assoc.with* Iron Pyrites, Galena, and Ferro-Calcite. *Loc.* Louisa Mine, Talgai Goldfield, 3 miles W. of Pratten, 21 miles W.N.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pubs. 120, p. 55 (1898), 159, p. 1 (1900), and 156, pp. 17, 18 (1903).

2199. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite, Limonite, Calcite, and Epsomite, in quartz lode in schist and quartzite. *Loc.* Duchess Copper M.L. (275), Duchess Group, Jack's Cr., Burke R., 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 18-22 (1908).

2200. —— ——. *Assoc.with* Bornite, Tetrahedrite, and Malachite. *Loc.* Duches M.L. (275), Duchess Group ((*ante*). *Ref.* G.S.M.

2201. —— ——. *Assoc.with* Native Copper, Redruthite, Tile Ore, Malachite, an Limonite, in kaolinised rock, schist, and quartz. *Loc.* Italian Lease (689 Lady Fanny Group, 60 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 34, 35 (1908).

2202. —— ——. *Assoc.with* Tile Ore and Malachite, in slates, porphyry and gossan. *Loc.* Lady Fanny M.L. (178), Lady Fanny Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 30-33 (1908).

2203. —— ——. *Assoc.with* Iron Pyrites, Redruthite, Cuprite, Limonite, Malachite, and Chrysocolla, in lodes in hornblende schist. *Loc.* Mt. Birnie M.L. (686, etc.), Mt. Birnie Group, Burke R., 74½ miles S.S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, p. 367 (1908).

2204. —— ——. *Assoc.with* Malachite, Chrysocolla, Covelline, and Iron Pyrites, in quartz, quartzite, and schist. *Loc.* Ardath M.L. (656), Green's Cr., Will's R., Mt. Hope Group, 53 to 56 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 47, 48 (1908).

2205. —— ——. *Assoc.with* Native Copper, Redruthite, Cuprite, Tile Ore, Malachite, Atacamite, Limonite, and Calcite, in quartz and chloritic schist. *Loc.* Blue Jacket M.L. (632), Mt. Hope Group ((*ante*). *Ref.* G.S.Q. Pub. 215, pp. 43 44 (1908).

2206. —— ——. *Assoc.with* Redruthite, Malachite, and Limonite, in gossan, quartz and slate. *Loc.* Little Beauty M.L. (568), nr. Mt. Hope Group, Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 44-47 (1908).

2207. —— ——. *Assoc.with* Redruthite, Covelline (?), Tile Ore, Malachite, Iron Pyrites, Limonite, and Calcite, in chloritic schist. *Loc.* Monarch Senior M.C. (352), Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 42, 43 (1908).

2208. —— ——. *Assoc.with* Redruthite, Malachite, Chrysocolla, and Limonite, in quartz and kaolin. *Loc.* Trikelana M.L. (522), Trikelana Group, Pilgrim Cr., 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, p. 26 (1908).

2209. —— ——. *Assoc.with* Native Copper and Gypsum. *Loc.* Mt. Elliott R.C. (3, etc.), Mt. Elliott Group, Maggie's Cr., 58 miles S. of Cloncurry. *C* Merlin; *Dist.* Gregory North. *Ref.* G.S.M.

For other Cloncurry references, *see* Nos. 2060 to 2120 (minus Nos. 206 2068, 2102).

2209A.—— ——. *Assoc.with* Cassiterite and Fluorspar, in chloritic lode. *Loc.* Lotti Mine, Coolgarra, 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn. (Chillagoe br. line). *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* O.R. (1909).

2210. —— ——. *Assoc.with* Marcasite, Galena, and Zinc-Blende, in quartz lode. *Loc.* Try-no-More Silver Mine, Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2211. —— ——. *Assoc.with* Cassiterite, Mispickel, and Chalcanthite, in elvan dyke and quartz. *Loc.* Ironclad Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell (*ante*). *Ref.* G.S.Q. Pub. 13, p. 8 (1888).

2212. —— ——. *Assoc.with* Cassiterite, Penninite, and Talc. *Loc.* Wheal Vohr Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 16 (1883), and P.R.S.Q., vol. 15, p. 64 (1900).

2213. —— ——. *Assoc.with* Gold, Silver, Bornite, Azurite, Malachite, Chalcanthite, Mispickel, Zinc-Blende, Iron Pyrites, Hematite, Magnetite, Cerussite, and Minium, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mines, Return Cr., 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

2214. Copper Pyrites. *Assoc.with* Iron Pyrites, Galena, Cerussite, and Zinc-Blende, in slate and volcanic tuffs. *Loc.* Lancelot Mines, Newellton (Silver Valley), 9 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* L.B. 1, p. 479 (1883).

2215. —— ——. *Assoc.with* Cassiterite and Zinc-Blende. *Loc.* Smith's Cr. Proprietary Tin Mines, Nynbool (Smith's Cr.), 28 miles (by rail) S.E.byS. of Lappa Junction (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 192, p. 29 (1904).

2215a. —— ——. *Assoc.with* Iron Pyrites and Rhodochrosite. *Loc.* In br. of Return Cr., between Mt. Garnet and Coolgarra, 6 miles N.byE. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

—— ——. *See further* Walsh and Tinaroo references *under* District Cook. Nos. 2141a-2176.

2216. —— ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz reef. *Loc.* Alexandra Hill G.M. Co.'s Mine, Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville (Gt. Northern line). *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

2217. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende, in quartz and calcite. *Loc.* Carrington Lion 1 and 2 E. Lease, Lion Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2218. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc-Blende, and Barytes, in quartz and calcite. *Loc.* Carrington's United Mines, Ltd., Lease, Lion Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2219. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper carbonate, Galena, and Zinc Blende, in quartz. *Loc.* Comstock (Stockholm) Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

2220. —— ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Livingstone Reef, 1 mile S.S.E. of Bluff Stn., nr Mt. Leyshon, 19 miles S.S.E. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

2221. —— ——. *Assoc.with* Gold, Iron Pyrites, and Copper carbonates, in quartz. *Loc.* Mt. Leyshon Mine, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* W.C.T.

2222. —— ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in quartz. *Loc.* Good Luck United, Lancashire Lass 1 W. Mine, Far Fanning, 39 miles N.W. of Ravenswood. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 133, p. 7 (1898).

2222a. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Wey Reef, Hillsborough (8-Mile), 3¾ miles N.N.E. of Ravenswood, Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

2223. —— ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende. *Loc.* New England No. 1 S. Mine, N. of Elphinstone Cr., Ravenswood Goldfield, 78 miles (by rail) S. of Townsville. *Co.* Gladstone (*ante*). *Assay:* Gold = 2·5 oz. to 5·65 oz. per ton. *Ref.* A.R.D.M., 1894, p. 34.

2224. —— ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende. *Loc.* New England Reef, N. of Elphinstone Cr., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 134 (1900).

2225. —— ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* Shellmalier Reef, Elphinstone Cr., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 8 (1900), and G.S.M.

2226. —— ——. *Assoc.with* Gold and Zinc-Blende, in quartz. *Loc.* Wild Irish Girl Mine, New England Reef, Elphinstone Cr., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

2227. —— ——. *Assoc.with* Silver, Iron Pyrites, Galena, Stibnite, and Zinc-Blende, in lode. *Loc.* King's Silver Lode, One Mine, Ravenswood Goldfield (*ante*). *Percentages:* Copper, 16·25; Antimony, 26·30; Silver, 15·35 (5,013 oz. per ton); Iron, 8·49; Zinc, 8·75; Sulphur, 17·02; Siliceous matter, 7·31. *Ref.* G.S.Q. Pub. 152, p. 11 (1900).

2228. —— ——. *Assoc.with* Chalcanthite. *Loc.* Black Jack Mine, Ravenswood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

2229. —— ——. *Assoc.with* Gold, Tenorite, Malachite, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* Buck Reef, ¾-mile S.E. of Ravenswood, Ravenswood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

2229a. —— ——. *Assoc.with* Gold, in quartz. *Loc.* New Idea Reef, Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

2230. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende, in quartz. *Loc.* Sunset and General Grant Reef, about ½-mile S. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 183, pp. 2-6 (1903).

2231. —— ——. *Assoc.with* Gold, Galena, and Zinc-Blende, in quartz. *Loc.* Sunset Reef, ½-mile S. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

2232. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende, in quartz. *Loc.* Cousin Jack Reef, Sandy Cr., 2¼ miles S.E.byE. of Ravenswood, Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

2233. —— ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc-Blende, in quartz and steatite. *Loc.* Politician Mine, Sandy Cr., Ravenswood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 47 (1887).

2234. —— ——. In quartz. Villers Copper Syndicate's Mine, Sodawater Cr., Ravenswood Goldfield (*ante*). *Ref.* A.R., 1907, p. 115.

2235. —— ——. *Assoc.with* Chalcanthite. *Loc.* Bonnet Reef, Strathalbyn Goldfield, 30 miles E.byS. of Ravenswood. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

2236. —— ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Bell-Gay Reef, Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn., Gt. Northern line, Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

2237. —— ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Agnes Howson Reef, New Homestead Diggings, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith (*ante*). *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

2238. —— ——. *Assoc.with* Galena and Anglesite, in lode. *Loc.* Don (Dawn) R., 35 miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Assay:* Silver, 9 oz. per ton; Lead, 78 per cent.; Copper and Bismuth, trace. *Ref.* A.R., p. 61 (1906).

2239. —— ——. *Assoc.with* Iron Pyrites and Hematite. *Loc.* Lamington Mine, head of Lah-di-dah Cr., Happy Valley, about 40 miles S. of Bowen. *Co.* Herbert (*ante*). *Ref.* B.D.

2239A. —— ——. *Assoc.with* Redruthite, Tile Ore, Malachite and Limonite. *Loc.* Mare's Nest Cr., Andromache R., 44 miles S.S.E. of Bowen. *Co.* Herbert (*ante*). *Ref.* A.R., p. 271 (1910).

2240. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper carbonate, and Yellow Ochre, in quartz. *Loc.* Seymour's Reef, Marengo Goldfield, 24 miles S.S.W. of Bowen. *Co.* Herbert (*ante*). *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

2240A. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Malachite, and Azurite, in quartz reef. *Loc.* Venture Reef, Marengo Goldfield (*ante*). *Assay: See* No. 7490. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

2240B. —— ——. *Assoc.with* Gold, Iron Pyrites, and Limonite, in quartz. *Loc.* Lady Augusta P.A. (129), Moss Vale Stn., nr. Euri Cr., about 7 miles S.W. of Bowen. *Co.* Herbert (*ante*). *Ref.* A.R., p. 269 (1910).

2241. —— ——. *Assoc.with* Gold and Malachite, in quartz. *Loc.* Overland Reef, between Dreghorn and Burdekin R., 14 miles S. of Ravenswood. *Co.* Murray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

2242. —— ——. *Assoc.with* Gold, Azurite, Malachite, and Chalcanthite, in quartz reef, in granite. *Loc.* Continong Mine, Burdekin R., 70 miles W. of Townsville. *Co.* O'Connell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 35, p. 12 (1887), and G.S.M.

2242A. —— ——. *Assoc.with* Galena. *Loc.* Jack's Cr., 56 miles N.W. of Charters Towers. *Co.* O'Connell (*ante*). *Ref.* A.R., p. 96 (1907).

2243. —— ——. *Assoc.with* Malachite and Cerussite. *Loc.* Alice Shaft, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.M.

2244. —— ——. *Assoc.with* Iron Pyrites and Zinc-Blende, in quartz leader. *Loc.* Comstock Lease (187), Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Gold = trace; Silver = 25 oz. per ton. (2) Gold = 4 dwt. 21 gr.; Silver = 41 oz. per ton; Copper = 3·5 per cent. (3) Gold = 1 dwt. 15 gr.; Silver = 31 oz. per ton; Copper = 14·4 per cent. *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

2245. —— ——. *Assoc.with* Cassiterite and Galena. *Loc.* Kangaroo Hills Tin Freeholds (166 and 198), N. of Oakey Cr., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 167, p. 5 (1901).

2246. —— ——. *Assoc.with* Native Copper, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Zinc Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

2247. Copper Pyrites. *Assoc.with* Bornite, Tenorite, Cuprite, Copper carbonate, Galena, Zinc-Blende, Iron Pyrites, and Ironstone, in lode. *Loc.* Mt. Thekla Copper Mine, 4 miles N. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Assays:* Sulphide Ore—Silver, 87 oz. per ton; Lead, 8·65; Copper, 21·37; Zinc, 4 to 5 per cent. Carbonate Ore—Silver = 23 oz. per ton; Copper = 15·75; Zinc = 4 per cent. *Ref.* G.S.Q. Pub. 167, p. 7 (1901).

2248. —— ——. *Assoc.with* Native Silver, Bornite, Cuprite, Copper carbonate, and Galena, in lode. *Loc.* True Blue Lease (161), Kangaroo Hills Mineral Field (*ante*). *Assays:* (1) Silver = 60 oz. per ton; Copper = 27·5 per cent. (2) Silver = 56 oz. per ton; Copper = 41·4 per cent. *Ref.* G.S.Q. Pub. 82, p. 8 (1893).

2249. —— ——. *Assoc.with* Bornite, Tile Ore, Galena, Cerussite, Hematite, and Mispickel, in lode. *Loc.* Wallaroo Lease (162), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 3 oz. 13 dwt. 12 gr. per ton; Copper = 1·7 per cent. *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

2250. —— ——. *Assoc.with* Malachite, Galena, Minium, Cerussite, Mispickel, Ironstone, Iron Ochre, and Manganese-dioxide. *Loc.* Colorado Silver Mine, Star R. (Argentine) Silver Field, 50 miles N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Assays:* (1) Lead = 16 per cent.; Silver = 16 oz. per ton. (2) Lead = 48 per cent.; Silver = 42 oz. per ton.

2251. —— ——. *Assoc.with* Malachite, Galena, and Zinc-Blende, in quartz. *Loc.* Mackay's Mine, Blue Mountains, 9 miles S.W. of Eton Rail. Stn. (Mackay line), 32 miles (by rail and road) S.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 53, p. 10 (1889).

2252. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* 1 mile E. of Eungella Stn., Broken R., 30 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

2252A. —— ——. *Assoc.with* Gold, Iron Pyrites, Limonite, Turgite, Ironstone, and Galena, in quartz. *Loc.* Broken R. Gold and Silver Mine, Bee Cr. Diggings, Eungella Goldfield, 10 miles W. of Finch Hatton Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 30 (1910).

2252B. —— ——. *Assoc.with* Gold, Iron Pyrites, Limonite, Siderite, Malachite, Galena, and Zinc-Blende, in quartz. *Loc.* Highland Mary P.C., Bee Cr. Diggings, Eungella Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 30 (1910).

2252C. —— ——. On eastern slope of Eungella Range, about 2 miles from Eungella R. Stn. Large lode is said to exist here. *Co.* Carlisle (*ante*).

2253. —— ——. *Assoc.with* Tile Ore and Malachite, in lode. *Loc.* Shaft near Orchid No. 1 N. Claim, Eungella Goldfield (*ante*). *Ref.* A.R., p. 155 (1908).

2253A. —— ——. *Assoc.with* Bornite, in quartz. *Loc.* Christie's Copper Lode, Por. 83v., Mia Mia, Cattle Cr., 5 miles W. of Finch Hatton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 229, p. 36 (1910).

2253B. —— ——. *Assoc.with* Malachite and Azurite, in quartz. *Loc.* Mountain Bull Lode, Por. 7v., Mia Mia, Cattle Cr. (*ante*). *Ref.* G.S.Q. Pub. 229, p. 36 (1910).

2254. —— ——. *Assoc.with* Malachite, Azurite, Galena, Cerussite, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz lode. *Loc.* Mt. Barker Silver-Lead Mine, 3 miles N.W. of Eungella Stn., 33 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pubs. 54, p. 3 (1889), and 181, pp. 12-17 (1903), and 229, pp. 34, 35 (1910).

2254A. —— ——. Said to be in large well-defined lode. *Loc.* Eastern slope of Eungella Range, 1½ miles above the foot of the Range, and about 3 miles from Eungella Rail. Stn. *Co.* Carlisle (*ante*).

2255. —— ——. *Assoc.with* Gold, Tetrahedrite, Tenorite, Malachite, Azurite, Galena, and Ironstone, in quartz lode. *Loc.* Pine Vale Copper Mine, Pine Vale Cr., Mt. Spencer Goldfield, 9 miles S.byE. of Eton Rail. Stn. (Mackay line), 32 miles W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), and 229, pp. 12-17 (1910).

2255A. —— ——. *Assoc.with* Galena and Zinc-Blende, in quartz. *Loc.* Ben Mohr M.L. (8), Mt. Spencer Goldfield (*ante*). *Ref.* G.S.Q. Pub. 229, p. 19 (1910).

2256. —— ——. *Assoc.with* Gold, Iron Pyrites, in quartz. *Loc.* Enterprise Reef, Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 5, p. 8 (1879).

2257. —— ——. *Assoc.with* Gold, Siderite, and Mispickel, in quartz vein. *Loc.* Faith (Just-in-Time) Reef, Normanby Goldfield (*ante*). *Assay:* Gold = 9 oz. 6 dwt. per ton. *Ref.* G.S.Q. Pub. 88, p. 5 (1893).

2258. —— ——. *Assoc.with* Gold, Marcasite, and Mispickel, in quartz. *Loc.* Frederick I. Reef, nr. Peter's Cr., Normanby Goldfield (*ante*). *Assay:* Gold = 2 oz. 11 dwt. 11 gr. per ton. *Ref.* G.S.Q. Pub. 88, p. 1 (1893).

2259. —— ——. *Assoc.with* Gold, Iron Pyrites, Tetrahedrite, Siderite, Mispickel, Ironstone, and Yellow Ochre, in quartz reef. *Loc.* Grace Darling Lease (11), Normanby Goldfield (*ante*). *Assay:* Gold = 16 oz. 6 dwt. 16 gr. per ton. *Ref.* G.S.Q. Pubs. 5, p. 6 (1879), and 88, p. 3 (1893).

2260. —— ——. *Assoc.with* Gold and Copper carbonate, in quartz. *Loc.* Marquis Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 3 (1879).

2261. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Star of Hope P.C., Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 4 (1879), and G.S.M.

2262. —— ——. *Assoc.with* Gold and Azurite, in white quartz. *Loc.* True Blue Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 88, p. 4 (1893).

2263. —— ——. *Assoc.with* Gold, Iron Pyrites, Marcasite, and Mispickel, in quartz and steatite. *Loc.* Victor Tunnel, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 88, p. 5 (1893), and G.S.M.

2264. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper carbonate, and Mispickel, in quartz lode. *Loc.* Welcome Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 5, p. 5 (1879), and 88, p. 2 (1893).

2264A. —— ——. *Assoc.with* Galena and Zinc-Blende, in quartz. *Loc.* nr. Coolan's P.A., Mt. Wyatt Goldfield, about 60 miles S.S.E. of Ravenswood. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.M.

2265. —— ——. *Assoc.with* Malachite and Azurite, in lode, 3 ft. wide, in granite country. *Loc.* Lady Mary Mine, Mt. Wyatt Goldfield, 60 miles S.S.E. of Ravenswood. *Co.* Sellheim (*ante*). *Assays:* (1) Gold = 2 dwt., Silver = 2 oz. 1 dwt. 1 gr. per ton; Copper = 12·5 per cent. (2) Gold = 14 gr., Silver = 1 oz. 16 dwt. per ton; Copper = 19·9 per cent. *Ref.* A.R., p. 74 (1906).

2266. —— ——. *Assoc.with* Gold, Cuprite, Malachite, Azurite, Bismuth (native), Bismuthinite, Bismutite, Bismite, Galena, Manganese-dioxide, Hematite, and Ironstone. *Loc.* Daisy Bismuth Mine, Eukalunda, Sellheim Silver Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 57, pp. 7 and 8 (1889), and G.S.M.

2267. —— ——. *Assoc.with* Bismuth ores, Hematite, and Manganese-dioxide, in lode. *Loc.* Eukalunda Bismuth Mine, Eukalunda, Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, p. 8 (1889).

2268. —— ——. *Assoc.with* Iron Pyrites, Galena, Minium, Cerussite, Zinc-Blende, and Clay, in lode. *Loc.* General Gordon Mine, Sellheim Mineral Field (*ante*). *Assays:* (1) Lead = 41·90 per cent.; Silver = 43 oz. per ton. (2) Lead = 54·96 per cent.; Silver = 45 oz. per ton. *Ref.* G.S.Q. Pub. 57, p. 6 (1889).

2268A. —— ——. *Assoc.with* Gold, Bornite, Chalcanthite, and Copperas, in diorite. *Loc.* Mt. Clifford Mine, nr. Retreat and Ruby Creeks, 9½ miles (by road) N.W. of Anakie Rail. Stn. (Central line). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 127, p. 2 (1898).

2269. —— ——. *Assoc.with* Iron Pyrites, in quartz reef in serpentine country. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont, 229 miles (by rail and road) W.byN. of Rockhampton. *Co.* Clermont (*ante*). *Assay:* Copper = 6·88 per cent. *Ref.* G.S.Q. Pubs. 27, p. 7 (1886), and 150, pp. 2-4 (1900).

2269A. —— ——. *Assoc.with* Tenorite and Iron Pyrites, in granite. *Loc.* Flora Copper Lode (in MacFadzen's M.F., 1749), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 228, p. 34 (1910).

2269B. —— ——. *Assoc.with* Iron Pyrites, Malachite, Azurite, and Ironstone, in slate. *Loc.* Isen's M.F. (2642), Mt. Flora Gold and Mineral Field (*ante*). *Assay:* Copper = 11·1 per cent.; Gold = 1 dwt. 5 gr., and Silver = 5 dwt. 5 gr. per ton. *Ref.* G.S.Q. Pub. 228, pp. 27-29 (1910).

2269C. —— ——. *Assoc.with* Iron Pyrites, Malachite, Azurite, and Hematite, in granite. *Loc.* Iron Duke M.C. (42), and Painted Peak M.F. (1807), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 27, 39 (1910).

2269D. —— ——. *Assoc.with* Iron Pyrites, Azurite, and Malachite in gossan, in slate. *Loc.* Keeley M.F. (2382), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 29, 30 (1910).

2269E. —— ——. *Assoc.with* Iron Pyrites, Malachite, Azurite, and Hematite, in gossan in slate. *Loc.* Laird of the Hills M.L. (32), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 30, 31 (1910).

2269F. —— ——. *Assoc.with* Tile Ore, Malachite, Azurite, Iron Pyrites, Chlorite, and Calcite, in slate and granite. *Loc.* MacFadzen's M.F. (1749), includes Donchang, Flora, Essie, Dozzler, Green Outcrops, etc., lodes; Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 31-35 (1910).

2269G. Copper Pyrites. *Assoc.with* Malachite, Azurite, Iron Pyrites, Pyrrhotite, Hematite, Limonite, and Magnetite, in granite and slate. *Loc.* Rodger's Back Sel. M.F. (1430), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

2269H. —— ——. *Assoc.with* Malachite, Azurite, Hematite, in quartz. *Loc.* Ballyhooley Claim, 5 miles from Mt. Flora Freehold, Mt. Flora Gold and Mineral Field (*ante*). *Assay:* Copper = 31·4 per cent.; Silver = 1 oz. 9 dwt. 9 gr. per ton. *Ref.* A.R., p. 243 (1910).

2270. —— ——. *Assoc.with* Gold, Chalcanthite, Orthoclase, and Calcite, in quartz. *Loc.* Red Streak Reef, Yatton Goldfield, 21 miles S.W.byS. of Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

2271. —— ——. *Assoc.with* Gold, Silver, Mispickel, Bismuthite, and Hematite. *Loc.* Mine Cr. Gold Workings, Black Waterhole Cr., Mt. Spencer Goldfield, 2 miles N.byE. of Hazledean, 37 miles (by rail and road) S. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 164, pp. 10-12 (1901).

2271A. —— ——. *Assoc.with* Silver, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Tally Ho Claim, Mt. Spencer Run, about 10 miles S. of Eton Rail. Stn. Mackay line). *Co.* Wodehouse (*ante*). *Ref.* A.R., p. 284 (1910), and p. 317 (1911).

2272. —— ——. *Assoc.with* Tenorite, Azurite, Malachite, and Hematite. *Loc.* Mt. Orange Copper Mine, nr. Annandale Stn., 75 miles S.W. of Mackay. *Co.* Wodehouse (*ante*). *Ref.* P.R.S.Q., vol. 4, pp. 52, 77 (1887).

2272A. —— ——. *Assoc.with* Zinc-Blende, in chloritic slate. *Loc.* Ashington Copper Syn. Mine, Blackbutt, 25 miles S. of Nanango, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.M.

2273. —— ——. *Assoc.with* Bornite, in quartzite. *Loc.* Crow's Nest (Ravensbourne), 34 miles (by rail) N. of Toowoomba. *Co.* Cavendish (*ante*).

2274. —— ——. *Assoc.with* Tenorite, Iron Pyrites, Galena, and Zinc-Blende. *Loc.* Gt. Pyramid Mine (Saxon Shaft), Cressbrook Cr., 12 miles N. of Esk Rail. Stn., 79 miles (by rail and road) W.N.W. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

2275. —— ——. *Assoc.with* Copper carbonate, in lode. *Loc.* North Star Copper Mine, Cressbrook Cr. (*ante*). *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

2276. —— ——. *Assoc.with* Iron Pyrites, Zinc-Blende, and Galena. *Loc.* Rising Star Copper Area, Cressbrook Cr. (*ante*). *Assay*: Copper, 3·75 per cent.; Silver, 1 oz. 13 dwt. 23 gr. per ton; Gold, trace. *Ref.* G.S.Q. Pub. 169, p. 4 (1901).

2277. —— ——. *Assoc.with* Gold, Iron Pyrites, Massicot, Anglesite, Galena, Mispickel, and Limonite, in gossan and slate. *Loc.* Silver Knob P.A., Mt. Langan, Emu Cr., 14½ miles W.N.W. of Kannangur Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish.; *Dist.* Moreton. *Assay*: *See* No. 3033. *Ref.* Q.G.M.J., vol. 7, p. 467 (1906).

2278. —— ——. *Assoc.with* Galena, in altered tuffs. *Loc.* Moller and Bennett's Copper Workings, Por. 52v, Par. of Murphy, 4½ miles N. of Murphy's Cr. Rail. Stn., 62 miles (by rail and road) W.byN. of Ipswich. *Co.* Cavendish (*ante*). *Ref.* A.R., p. 258 (1910).

2278A. —— ——. *Assoc.with* Galena and Zinc-Blende, in slate and quartzite. *Loc.* Deep Rocky Gorge, between Murphy's Cr. and Perseverance, 4½ miles N.byE. of Murphy's Cr. Rail. Stn. (Main line). *Co.* Cavendish (*ante*). *Ref.* O.R. (1910).

2279. —— ——. *Assoc.with* Gold, Mispickel, and Garnet, in quartz and chlorite. *Loc.* P.A., head of Ithaca Cr., Mt. Coot-tha, 5 miles W.byS. of Brisbane. *Co.* Stanley.; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 98, p. 2 (1894).

2280. —— ——. *Assoc.with* Iron Pyrites, Malachite, and Azurite. *Loc.* Por. 140, Par. of Dixon, 13 miles E. of Esk Rail. Stn., 70 miles (by rail and road) N.W.byW. of Brisbane. *Co.* Stanley (*ante*). *Assay*: Copper = 18·2 per cent. *Ref.* A.R., 1908, pp. 156, 157.

2280A. —— ——. *Assoc.with* Tenorite and Malachite. *Loc.* Mt. Lindsay, 32 miles S.S.W. of Beaudesert. *Co.* Ward; *Dist.* Moreton. *Ref.* B.D.

2281. —— ——. *Assoc.with* Iron Pyrites, Galena, and Zinc-Blende, in quartz reef. *Loc.* Friend's Claim, Barmundoo (Tableland) Goldfield, 28 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Assay*: Gold, 14 dwt. 16 gr.; Silver, 2 oz. 2 dwt. 11 gr. per ton. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

2282. —— ——. *Assoc.with* Azurite and Malachite, in garnet rock and limestone *Loc.* P.A. Diglun Cr., nr. Barmundoo Out Stn., 21 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 162, p. 9 (1901).

2283. —— ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, and Zinc-Blende in quartz reef. *Loc.* Rogers's Claim, Bompa Goldfield, 44½ miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Assay*: Gold, 16 dwt. 8 gr.; Silver, 1 oz. 9 dwt. 9 gr. per ton. *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

2284. —— ——. *Assoc.with* Gold, Iron Pyrites, Zinc-Blende, and Galena, in quartz and calcite. *Loc.* Mt. Jacob Claim, Stand-by Reef, Bompa Goldfield (*ante*). *Assay*: Gold = 9 dwt. 19 gr.; Silver = 1 oz. 15 dwt. per ton. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

2285. —— ——. *Assoc.with* Magnetite, Actinolite, and Epidote, in garnet rock. *Loc.* Shaft above Blue Bag, Glassford Cr. Copper Mines, Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne Valley line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.M.

2286. —— ——. *Assoc.with* Bornite, Cuprite, Tenorite, Malachite, Azurite, Hematite, Magnetite, Galena, Garnet, Zinc-Blende, Chlorite, and Calcite. *Loc.* Glassford Cr. Copper Mines, Glassford Cr. (*ante*). *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), and 194, p. 28 (1904).

2287. —— ——. *Assoc.with* Native Copper, Cuprite, Tile Ore, Malachite, Azurite, Iron Pyrites, Magnetite, Hematite, Limonite, and Calcite. *Loc.* Many Peaks Copper Mines, Deception Cr., 2 miles W. of Nevertire, 58 miles (by rail) S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 150, p. 8 (1900), and 194, p. 28 (1904).

2287A. —— ——. *Assoc.with* Pyrrhotite. *Loc.* Many Peaks Copper Mine, Deception Cr. (*ante*). *Ref.* B.D.

2287B. —— ——. *Assoc.with* Gold, Iron Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, and Ironstone, in crystalline limestone, etc. *Loc.* Mt. Hector Copper Mine, E. side of Dawe's Range, about 12 miles W.N.W. of Many Peaks Rail. Stn., Boyne Valley line, about 70 miles (by rail and road) S. of Gladstone, Monal Goldfield. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* Q.G.M.J., vol. 4, pp. 174-177 (1903).

2288. —— ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Zinc-Blende, and Galena, in quartz and calcite. *Loc.* Advance Reef, Norton Goldfield, 33 miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), and 208, p. 11 (1907), and G.S.M.

2289. —— ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Scorodite, in quartz. *Loc.* Bald Hills Reef, Norton (Milton) Goldfield (*ante*). *Assays*: *See* No. 4266. *Ref.* G.S.Q. Pub. 208, pp. 13, 14 (1907).

2290. —— ——. *Assoc.with* Gold, Silver, Redruthite, Azurite, Malachite, Iron Pyrites, Mispickel, Zinc-Blende, and Scorodite, in quartz. *Loc.* Chandler's Reef, Norton Goldfield (*ante*). *Assay*: *See* No. 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

2291. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, and Zinc-Blende, in quartz. *Loc.* Galena Reef, Norton Goldfield (*ante*). *Assay*: *See* No. 3048. *Ref.* G.S.Q. Pub. 208, pp. 22-24 (1907).

2292. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* Little Wonder Reef, Norton Goldfield (*ante*). *Assay*: *See* No. 4280. *Ref.* G.S.Q. Pub. 208, p. 29 (1907).

2293. —— ——. *Assoc.with* Iron Pyrites. *Loc.* Long Tunnel, Norton Goldfield (*ante*). *Ref.* L.C.B.

2294. —— ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* Sulphide Reef, Norton Goldfield (*ante*). *Assay*: *See* No. 4292. *Ref.* G.S.Q. Pub. 208, p. 38 (1907).

2295. —— ——. *Assoc.with* Malachite, in small vein. *Loc.* near Arthur Reef, Targinie Goldfield, 4 miles N.N.W. of Yarwun Rail. Stn., North Coast line, 15 miles (by rail and road) N.W.byW. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* B.D.

2295A. —— ——. *Assoc.with* Gold, Silver, Galena, and Zinc-Blende, in quartz reef in diorite country. *Loc.* Britannia Mine, north of Lake Learmouth, Canoona Goldfield, 35 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Assay*: *See* Gold. *Ref.* B.D.

2296. —— ——. *Assoc.with* Gold and Silver. *Loc.* about ¼ mile from Baree Rail. Stn. (Mt. Morgan line), 23 miles (by rail) S.S.W of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Assays*: (1) Gold = trace, Silver = 5 dwt. per ton, Copper = 6·8 per cent.; (2) Gold = trace, Silver = 11 dwt. per ton, Copper = 3·9 per cent. *Ref.* A.R., p. 47 (1906).

2296A. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Jubilee Reef, Morinish Goldfield, 29 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* Q.M.

2297. Copper Pyrites. *Assoc.with* Iron Pyrites, Galena, and Zinc-Blende, in quartz reef. *Loc.* Mary Florence Mine, Blackfellow's Gully, Morinish Goldfield (*ante*). *Ref.* A.R.D.M., 1885, p. 60, and G.S.M.

2298. —— ——. *Assoc.with* Gold, Silver, and Iron Pyrites, and with traces of Malachite, Azurite, Galena, Witherite, Earthy Hematite, Barytes, and Red Jasper, in massive lode of quartzite, ironstone, and shale. *Loc.* Great Fitzroy Copper Mine, Mt. Chalmers, 19 miles (by rail) N.E. of Rockhampton (Emu Park line), Cawarral Goldfield. *Co.* Livingstone; *Dist.* Port Curtis. *Mean Analysis*: Gold = 2 dwt. 19 gr., Silver = 16 dwt. 10 gr. per ton, Copper = 3·8 per cent. *Ref.* G.S.Q. Pub. 216 (1907).

2299. —— ——. *Assoc.with* Gold, Iron Pyrites, and Pyrrhotite, in quartz reef. *Loc.* Hector Mine, on Crocodile Cr. Rd., 6 miles S. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 125, p. 27 (1897), and G.S.M.

2300. —— ——. *Assoc.with* Malachite and Azurite. *Loc.* Conachan's Sel., W. of Quarry Cr., 3 miles E. of Stanwell Rail. Stn., 19 miles by rail and road S.W.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub 131, p. 21 (1898).

2301. —— ——. *Assoc.with* Gold and Copper oxides. *Loc.* Gt. Northern Copper Mine, Rosewood Goldfield, 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* G.S.M.

2302. —— ——. *Assoc.with* Magnetite and Hematite. *Loc.* Iron Knob, Stanage Point, 37 miles E.N.E. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Assay*: Iron = 60 per cent., Phosphorus *nil*. *Ref.* G.S.Q. Pub. 194, p. 12 (1904).

2303. —— ——. *Assoc.with* Mispickel and Zinc-Blende. *Loc.* Mine near Cania, Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Assay:* Gold = 7 oz. per ton. *Ref.* A.R.D.M., 1894, p. 34.

2304. —— ——. *Assoc.with* Gold, Molybdenite, and Calcite. *Loc.* Mt. Rose Reef, Cania Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 9 (1885).

2305. —— ——. *Assoc.with* Cuprite, Azurite, and Iron Pyrites. *Loc.* Stevens' Copper Lode, Cania Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 69 (1885).

2306. —— ——. *Assoc.with* Copper carbonate, Iron Pyrites, Manganese-dioxide, Magnetite, and Hematite. *Loc.* Callide or Five-mile Copper Mine, Kroombit, 50 miles S.S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.M.

2306A. —— ——. *Assoc.with* Cuprite, Malachite, Azurite, Iron Pyrites, Hematite, Magnetite, and Limonite, in gossan lodes. *Loc.* M.L. (262), Kroombit Copper Mines, 4¼ miles E.S.E. of Kroombit Hd. Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

2307. —— ——. *Assoc.with* Gold, Silver, Native Copper, Redruthite, Cuprite, Malachite, Azurite, Galena, Molybdenite, Iron Pyrites, and Ironstone, in granite and sandstone. *Loc.* Moonmera Copper Mines, nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195, pp. 18-20 (1904).

2308. —— ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* Champion Lease (190), head of Champion Gully, 1 mile S.E. of Mt. Morgan Rail Stn., Mt. Morgan (Crocodile Cr.) Goldfield. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 12 (1893).

2309. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Clanricarde Mine, 4 miles S.S.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Average of Assays*: Gold = 5 oz. 11 dwt. 18 gr. per ton. *Ref.* G.S.Q. Pub. 103, p. 30 (1895).

2309A. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Crow's Nest Mine, 3 miles W.N.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 9 (1898), and G.S.M.

2310. —— ——. *Assoc.with* Copper carbonate, Mispickel, Ironstone, and Biotite, in quartz lode. *Loc.* Dee R. Copper Mines, above Dundee, 20 miles S.S.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 155, p. 8 (1901).

2310A. —— ——. *Assoc.with* Epidote and Calcite, in quartz lode. *Loc.* 1½ miles S. of Dee Alluvial Gold Mine, 6 miles N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* B.D.

2311. —— ——. *Assoc.with* Iron Pyrites, in slate. *Loc.* Mt. Alexander Mine, 8 miles E.S.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 143, p. 26 (1899).

2312. —— ——. *Assoc.with* Magnetite. *Loc.* Mohawk Mine, nr. Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* O.R.

2313. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Hematite, Magnetite, Limonite, Gothite, Satin-Spar, and Pyrolusite, in vesicular quartz, quartzite, kaolin, and ironstone. *Loc.* Mt. Morgan Gold Mine, Mt. Morgan (Crocodile) Goldfield (*ante*). *Ref.* (and *Assays*), G.S.Q. Pub. 17 (1884), Pub. 47 (1888), Pub. 83 (1892), and Pub. 132 (1898).

2313A. —— ——. *Assoc.with* Iron Pyrites and Selenite, in veins. *Loc.* Mt. Morgan Gold Mine, Mt. Morgan Goldfield (*ante*). *Ref.* B.D.

2314. —— ——*Assoc.with* Malachite, in quartzose rock. *Loc.* Old Dee Copper Mine, 3 miles N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* A.R., p. 85 (1907).

2314A. —— ——. *Assoc.with* Epidote. *Loc.* Old Dundee Copper Mines, below Mt. Morgan, Dee R., 22 miles S.S.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* B.D.

2315. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Queen of the Valley Mine, between Dee R. and Crocodile Cr., 4 miles N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 13 (1898).

2316. —— ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende. *Loc.* Roxburgh Mine, between Dee R. and Gavial Cr., 6 miles N.E.byE. of Mt. Morgan Rail. Stn., Mount Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 14 (1898).

2316A. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz and calcite. *Loc.* Struck Oil Lease (186), 5 miles E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 103, p. 29 (1895), and 132, p. 14 (1898), and G.S.M.

2317. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Welcome Mine, Champion Gully, 1¼ miles N.E. of Mt. Morgan Rail. Stn., Mount Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 13 (1898).

2318. —— ——. *Assoc.with* Gold, Silver, Redruthite, Pyrrhotite, Mispickel, Galena, and Stibnite, in quartz. *Loc.* Mariner's Reef, Black Snake Goldfield, 10 miles S. of Kilkivan. *Co.* Lennox; *Dist.* **Wide Bay.** *Analysis of Ore:* Iron, 31·0; Copper, 18·5; Sulphur, 23·0; Arsenic, 14·2; Antimony, 1·1; Lead, 11.3 per cent. *Assays*: Silver, 23 oz.; Gold, 1 oz. 2 dwt. per ton, etc. *Ref.* G.S.Q. Pub. 28, p. 6 (1886).

2319. —— ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in quartz. *Loc.* Rose, Shamrock, and Thistle Mine, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

2320. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Galena, and Zinc-Blende, in quartz and schorl. *Loc.* Victoria Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

2320A. —— ——. *Assoc.with* Gold and Silver. *Loc.* Blue Bell P.A., 32 miles from Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* B.D.

2321. —— ——. *Assoc.with* Redruthite, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, Hematite, and Limonite, in lodes in syenitic granite. *Loc.* Calgoa Copper Mines, Thunder Cr., 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 207, pp. 5-11 (1907).

2322. —— ——. *Assoc.with* Azurite, Malachite, Galena, and Mispickel, in granitic lode. *Loc.* West Calgoa Lode, Sel. 1393, 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

2323. —— ——. *Assoc.with* Felspar, Olivine, and Orthoclase, in quartz. *Loc.* Sel. (1822), Filly Flat, Gigoomgan Run, 35 miles W.S.W. of Maryborough. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

2324. —— ——. *Assoc.with* Redruthite. *Loc.* Marari Cr., br. of Eel Cr., 10½ miles S.S.W. of Gympie. *Co.* Lennox (*ante*). *Ref.* O.R.

2325. —— ——. *Assoc.with* Iron Pyrites, Galena, and Zinc-Blende. *Loc.* Mellor and Elworthy's Stn., Imbell, 8 miles from Kandanga, 15 miles S. of Gympie. *Co.* Lennox (*ante*). *Ref.* A.R., 1907, p. 93.

2326. —— ——. *Assoc.with* Gold, Cuprite, Redruthite, Malachite, Iron Pyrites, Bismuthinite, Magnetite, and Limonite. *Loc.* Kabonga Mine, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

2327. —— ——. *Assoc.with* Tourmaline. *Loc.* United Reef, Kilkivan Goldfield (*ante*).

2328. —— ——. Mt. Coora, 8 miles S.S.E.of Kilkivan. *Co* Lennox; *Dist.* Wide Bay. *Ref.* G.S.M.

2329. —— ——. *Assoc.with* Redruthite, Cuprite, Tile Ore, and Malachite, in quartz. *Loc.* Teebar Copper Lode, Munna Cr., nr. Clifton Stn., 2 miles S. of Boompa Rail. Stn. (Gayndah Br. line). *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 7 (1890), and G.S.M.

2330. —— ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Zinc-Blende, in quartz. *Loc.* Ortt's Mine, Yorkey's Goldfield, 9 miles N. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 8 (1902).

2331. Copper Pyrites. *Assoc.with* Galena and Zinc-Blende. In well-defined quartz formation, 4 ft. wide, in granite country. E. and W. lodes crossing it. *Loc.* Mt. Widgee, 14 miles W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* A.R., p. 163 (1908).

2332. —— ——. *Assoc.with* Tetrahedrite, Azurite, Malachite, Iron Pyrites, Galena, Zinc-Blende, and Calcite, in slate, diorite, andesite, syenite, and quartzite. *Loc.* Blue Bell Copper Mine, Amamoor Cr., 19 miles S.S.E. of Gympie. *Co.* March (*ante*). *Ref.* Q.G.M.J., vol. 8, pp. 524-6 (1907).

2333. —— ——. *Assoc.with* Galena, in lode. *Loc.* St. Aignan (Misima) Is., Louiscada Archipelago, 379 miles E.byS. of Port Moresby, **Brit. New Guinea.**

Corundum. *Compo.*, Pure alumina. *H.* = $8\frac{1}{2}$-$9\frac{1}{4}$ (Anakie Sapphires). *Sp.gr.* = 3·9-4·1.

MINERAL AND GEOLOGICAL NOTE: Anakie is the only field in the State where corundum is obtained in commercial quantities, but there are other places where the mineral is found which have some prospective value. At Anakie the corundum occurs associated with sapphires and other gemstones in old alluvial deposits spread over an area of about twenty square miles. The stones are usually less than an inch in diameter, and all are distinct crystals, although more or less corroded by the basalt magma which once contained them. Crystals of coarse corundum have been found which contain sapphires in the centre, and sometimes perfect gemstones are obtained in this way. *See* G.S.Q. Pub. No. 172 (1902) for details.

USES: The corundum and sapphires found at Anakie have been proved to be valuable for mechanical purposes principally on account of their freedom from fractures, impurities, and granulation. They are chiefly made into small bearings and pivots for parts of machines and engines running at very high speeds.

DISCOVERY: Sapphires were discovered at Anakie in 1870.

SAPPHIRE FIELDS: Anakie (Withersfield); Centres—Retreat Cr. (Sapphiretown), Policeman and Tomahawk Creeks, *which see.*

Corundum—*continued:*

Statistical Tables and Diagrams: *See* Pls. 44, 45, 46, 46a, 56.

Geological Publications: G.S.Q. Pub. No. 172 (1902), and Gov. Ming. Jour., vol. 6, pp. 112-117 (1905).

Statistical Note: The most productive year in yield of Sapphires (1907), £40,500; second ditto, (1906), £18,110; third, (1908), £15,200; fourth, (1904), £10,575. The lowest productive year in yield of Sapphires (1900), £900; second ditto, (1892), £4,437; third, (1893), £4,500; fourth, (1902), £5,000. Total value of production of Sapphires (1890 to 1912), £226,302. Percentage of total value of Sapphires to total value of mineral production, 0.22.

Croydon Goldfield—

SITUATION: *See maps*, Pls. 20, 21, 26. The town is 94 miles (by rail) E.S.E. of the port of Normanton. *Cos.* Esmeralda, Etheridge, Glenora, Strathmore, Surrey, and Woolgar; *Dists.* Burke and Cook. Centre about *Lat.* 18° 12′ S.; *Long.* 142° 16′ E.

DISCOVERY: In 1885, by W. C. Brown, Manager of Croydon Downs Station. Payable gold found in 1886, by Messrs. Brown and Aldridge, who, in consequence, received £1,000 reward from the Queensland Government.

RAILWAY BASE: Croydon Rail. Stn. is the base for the Croydon Goldfield and for the Stanhills Tinfield.

POPULATION: 2,319 (Census, 1911).

AREA: 2,544,640 acres (3,976 sq. miles).

PROCLAMATION OF FIELD: First gazetted, 18th Jan., 1886. Last alteration, 2nd June, 1910, as follows:—Commencing on the Carron River where it intersects the east boundary of Oakland Park Block, near Creen Creek Telegraph Station, and bounded thence by part of the east boundary of that block, the east boundaries of Emma Vale and Ella Vale Blocks, part of the north and the east boundaries of Violet Block, part of the east boundary of Waterloo No. 2 Block, the north boundary of Birkenhead No. 1 Block, and part of the north boundary of Liverpool No. 1 Block East, in all fourteen miles; thence by a line south-easterly to a point on Esmeralda Creek seven chains above a bloodwood tree marked broad-arrow over W. over XXVI; thence by another line south-westerly to the boundary of the Woolgar Gold Field at a point about two and a-quarter miles north-easterly from the north-west corner of Merton Ponds Block; thence by the north-western watershed of the Woolgar River north-easterly to the Gregory Range, by that range north-westerly to a point south from the south-east corner of Bangall Block, by a line north to that corner; thence by the south and part of the west boundaries of Bangall Block, the south, west, and north boundaries of Bangall No. 1 Block, the north boundary of a camping reserve, proclaimed in *Government Gazette*, 1906, part I., page 424, by part of the west boundary of Rocky Vale Block, by part of the south-east, the south-west, and part of the north-west boundaries of Strathmore Block, part of the south-west boundary of Oswald Block, the south and south-west boundaries of Jena Block, to a point south of the confluence of the Gilbert and Einasleigh Rivers; thence by a line south three miles; and thence by a line south-west to the point of commencement.

LEASES: Gold-mining Leases and applications for Leases in force, 15; area, 249 acres. Miners' Homesteads and applications, 259; area, 485 acres (1912).

PRINCIPAL MINING CENTRES: Golden Gate, Content, True Blue, Iguana Hill, Highland Mary, Croydon King, Mountain Maid, Twelve-mile, Table Top, Golden Valley, and Stanhills Tinfield.

MINERAL STATISTICS: **Gold,** *see tables and diagrams,* Pls. 36, 46, 46A, 47; **Tin,** *see* Pls. 38, 46, 46A.

Croydon Goldfield—*continued:*

STATISTICAL NOTES:

Greatest recorded annual gold yield (1900), 48,045 fine oz., value £204,082.

Smallest recorded annual gold yield (1886), 1,514 fine oz., value £6,416.

The yields of gold from 1887 to 1896 gradually increased from 20,000 oz. to 43,000 oz., after which, for a number of years, they averaged about 32,000 oz. From 1901 to 1912 there was a gradual decline, the yield for the latter year being only 8,363 fine oz.

Total yield to end of 1912, 744,703 fine oz., value £3,163,297, equal to 4·21 per cent. of the whole gold production of the State.

MINERAL REFERENCES: **Gold** (alluvial), *see* 3183; (reef), 3476-3560; Silver, 7425, 7426; (Native), 7545-7548; Cerargyrite (1177); Lead (Cerussite), 1187-1188A; (Galena), 2698-2712; (Massicot), 6517-6521; (Minium), 6576, 6577; (Pyromorphite), 7135-7139; Copper (Chalcanthite), 1317; (Chalcotrichite), 2488; (Copper Pyrites), 2102; (Redruthite), 7254; Zinc-Blende, 8054-8061; Manganese-dioxide, 6393; Iron (Copperas), 2334; (Hematite), 4674, 4690-4693; (Iron Pyrites), 4933-4966A; (Ironstone), 5493-5504; (Limonite), 5799-5802; (Magnetite), 5968; (Marcasite), 6499; (Mispickel), 6644, 6645; (Siderite), 7403; (Vivianite), 7920; Coal, 1596, 1597; Graphite, 4573-4587; Scheelite, 7338C. *Other Minerals:* Alunogen, 4; Calcite varieties, 563-565; Chlorite, 1425, 1426; Epsomite, 2611; Felspar, 2624, 2625; Fluorspar, 2652-2654; Heulandite, 4819; Lithomarge, 5707; Mica, 6552; Rock Crystal, 7183; Serpentine, 7378; Stilbite, 7662.

GEOLOGICAL NOTE: The prevailing rocks of the district are felsite and granite, the two forming distinct belts of country, their line of contact being close to the township of Croydon. The felsites carry reefs from which a large amount of gold has been won, but it is in the granite where the richest reefs have been found, more particularly where this rock is graphitic. The gold is sometimes worth only 15s. per ounce, but its value is usually about three times this amount.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 31, 35, 48, 61, 108, 202, 212. *See under* Geol. Surv. Pub. list for titles of reports. *See also under* Govt. Min. Jour., Reports 67, 70, 89, 122. *See also* List of Maps *under* Department of Mines Publications.

Railway Base for Yowah and Karoit Opal Mines in the Cunnamulla Mineral Field; and Duck Cr., Sheep Station Cr., Emu Cr., and Fiery Cross Opal Mines, in the Paroo Mineral Field.

Geological Note: The rocks of Cunnamulla are Rolling Downs Formation (Lower Cretaceous) and Desert Sandstone (Upper Cretaceous), the latter containing the opal deposits, and resting unconformably in isolated patches on the former.

Cunnamulla Bores. *See under* Artesian Bores. Nos. 18, 189, 235, 237.

Cunnamulla Mineral Field.

Situation: *See maps,* Pls. 18, 19. About 35 miles N.N.W. and 65 miles W.byN. of Cunnamulla Rail. Stn. (Western line). *Cos.* Humeburn, Palmer, Bando, and Wellington. *Dist.* **Warrego.** Centre about *Lats.* 27° and 28° S.; *Longs.* 144° and 146° E.

Area: 2,165,760 acres (3,384 sq. miles).

Population: 2,971 (Census 1911).

Proclamation of Field: First (and only one) gazetted, 20th August, 1897, as follows:—Commencing on Yowah Creek at the intersection of the Cunnamulla and Thargomindah road, and bounded thence by that road W. to the W. boundary of Bingara North Block, by the west boundary of same northerly by the S. and W. boundaries of Back Dundoo, by the W. boundary of Back Dundee, by the S. and W. boundaries of Mulga South, by part of the S. and W. boundary of Mulga North, by part of the E. boundary of Bundilla; by the S. boundary of Cecil Downs easterly, by the W. and S. boundaries of Retrac, the S. and E. boundaries of Dundoo northerly, and the E. boundary of Marathon East, by the S. boundaries of Chevy and Tirga easterly, by the E. boundaries of Tirga and Boneberry northerly, by the S. boundaries of Beechel West and Beechel East easterly, and by the E. boundary of Beechel East northerly to Taroura Cr.; thence by the track from Beechel Cr. to the Paroo and Warrego Rivers easterly to the W. boundary of Tyson Block, by the W. and S. boundaries of Tyson southerly and easterly, by the W. boundary of Barbara Plains southerly, and a line continuing S. from the S.W. corner of Por. 1v, Grazing Farm 229, to the N.W. corner of Por. 1v, Bando; thence by a road running S., by the W. boundaries of Pors. 1v, Grazing Farm 106, 2v, Grazing Farm 111, and 3v, Grazing Farm 102, Par. of Bando, by the same road E. along the S. boundary of the lastnamed por.; thence by the same road S. along the W. boundaries of Por. 27v, Grazing Farm 16, to the road running west along the northern boundaries of Pors. 26v, 38v, and 39v, Tinnenburra Resumption; thence by a road running S. along the western boundaries of Pors. 39v and 25v, and along the northern boundaries of Pors. 24v and 29v, and the western boundary of Por. 29v, by the same road continuing along the western boundaries of Pors. 4v and 5v, Par. of Bowra, by the same road continuing along part of the W. and S. boundaries of the leased part of Bowra Run, along part of the W. boundary of Por. 15v, Tinnenburra Resumption, to the Cunnamulla and Thargomindah road; and thence by that road in a westerly direction to the point of commencement.

Principal Mining Centres: Koroit, Southern Cross, and Yowah Opal Fields, *which see.*

Mineral Statistics: Opal, *see tables,* Pls. 44, 46, 46a.

Statistical Note: Total value of the yield of Opal to end of 1912 is —£14,450. This is equal to 8·38 per cent. of the State's total production.

Mineral References: Opal (precious), 6954, 6963-6966.

Geological Publications: Report No. 177 (1902). *See under* Govt. Sur. Pub. List for title.

Geological Note: The rocks comprise "Desert Sandstone" (Upper Cretaceous) and Rolling Downs (Lower Cretaceous) Formations. The Opal deposits occur throughout the district, but exclusively in the Desert Sandstone. *See* G.S.Q. Pub. No. 177 *for details and map.*

Warden (acting): Stationed at Cunnamulla. Inspector of Mines: Stationed at Gympie.

2381. ——. *Assoc.with* Malachite and Limonite. *Loc.* Una M.L. 280, Una Group, Dugald R., 33 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Assay:* Copper = 40·2 per cent.; Silver, 1 oz. 19 dwt. per ton; Gold = trace. *Ref.* A.R., p. 116 (1907), and G.S.Q. Pub. 215, p. 277 (1908).

2382. ——. *Assoc.with* Almandine Garnet, Malachite, Asbolane, and Ironstone. *Loc.* Valley, W. of Mt. Eurie, nr. head of Dugald R., 40 miles N.byW. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 66 (1887).

2383. ——. *Assoc.with* Native Copper slugs. *Loc.* Mt. Godkin, nr. Cameron R., 34 miles W. of Cloncurry. *Co.* Argylla (*ante*). Weight of 4 slugs: 18 cwt., 13 cwt., 6¾ cwt., respectively. *See* Pl. Q.G.M.J., vol. 9, p. 127 (1908).

2384. ——. *Assoc.with* Native Copper, in quartz. Oliver Twist M.C., Native Companion Group, Palm Tree Cr., 26½ miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 276 (1908).

2384A. ——. *Assoc.with* Malachite. *Loc.* Broken Hill Mine, Cloncurry, about 480 miles (by rail) W.byS. of Townsville. *Co.* Beaconsfield; *Dist.* Burke.

2384B. ——. *Assoc.with* Malachite, in quartz. *Loc.* Cammie M.L. (477), Eagle Hawk Group, Mt. Douglas or Pumpkin Gully, 12 miles E.N.E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 153, p. 7 (1900), and P. 215, p. 238 (1908).

2385. ——. *Assoc.with* Copper Pyrites, Azurite, and Malachite. *Loc.* Contra Copper Lode, ¼-mile S.W. of Gt. Australia Mine, 1 mile S.E. of Cloncurry Township. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 10, p. 4 (1885)

2386. ——. *Assoc.with* Native Copper, Copper Pyrites, Tetrahedrite, Malachite, and Iron Pyrites, in brown quartzite, etc. *Loc.* Gt. Australia M.F., 1 mile S.E. of Cloncurry Township (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 34 (1885), 153, p. 3 (1900), and 215, pp. 242-250 (1908).

2387. ——. *Assoc.with* Native Copper, Malachite, and Limonite, in quartzite, schist, and gossan. *Loc.* M.F. (14), 1½ miles N.N.E. of Cloncurry, Gt. Australian Group. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 251, 252 (1908).

2388. ——. *Assoc.with* Tenorite, Malachite, and Azurite, in ferruginous quartzite. *Loc.* Ma Foi, M.L. (508), 1½ mile N.E. of Cloncurry, Gt. Australian Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 253 (1908)

2389. ——. *Assoc.with* Garnet, Asbolane, Manganese-dioxide, and Malachite. *Loc.* Mountain Home Mine, Mt. Norma, 17 miles S.E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 15 (1885).

2390. ——. *Assoc.with* Tetrahedrite, Malachite, and Chalcostibite, in hematite. *Loc.* Copper Lode, Pumpkin Gully, 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 10, p. 4 (1885), and P.R.S.Q., vol. 4, p. 54 (1887).

2391. ——. *Assoc.with* Gold, Native Copper, Malachite, and Azurite. *Loc.* Homeward Bound M.C. (331), Homeward Bound Group, Pumpkin Gully (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 4 (1883), and 215, pp. 233, 234 1908).

2392. ——. *Assoc.with* Redruthite, Bornite, Copper carbonate, Chrysocolla, and Iron stone. *Loc.* Mt. Douglas Copper Leases, Pumpkin Gully (*ante*). *Ref.* G.S.Q. Pub. 153, pp. 6, 7 (1900).

2392A. ——. *Assoc.with* Redruthite, Tile Ore, Malachite, Chrysocolla, and Limonite, in quartz and quartzite. *Loc.* Rocklands Group, between Butcher and Morris Crs., 9 miles W. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 258-265 (1908).

2392B. ——. *Assoc.with* Tile Ore, Redruthite, Malachite, and Limonite, in gossan and quartzite. Chum M.C. (329), Serpent Hill Group, Morris Cr., 4½ to 5½ miles W.S.W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 256 (1908).

2392C. ——. *Assoc.with* Tile Ore, Malachite, and Limonite, in lode. *Loc.* Carlton Hills Run, about 78 miles N.W.byW. of Cloncurry. *Co.* Brahe; *Dist.* Burke. *Ref.* A.R., p. 269 (1910).

2393. ——. *Assoc.with* Malachite. *Loc.* Cloncurry Hills, between Mackinlay and Cloncurry Rs., about 20 miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Assay:* Gold = 1 dwt. 14 gr. per ton; Copper = 39·1 per cent. *Ref.* A.R., p. 100 (1907).

2394. ——. *Assoc.with* Tetrahedrite, Malachite, and Stibnite, in quartz. Rainbow M.L. (2454), Boomerang Group, Cone Cr., trib. of Duck Cr., 2½ miles N.byE. of Mt. Start, 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 10, p. 5 (1885), and P. 215, p. 102 (1908).

2395. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, Malachite, and Antimony. *Loc.* Rainbow Copper Lode, Cone Cr., trib. of Duck Cr., 24 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 56 (1887).

2396. ——. *Assoc.with* Copper carbonate, in quartz lode in chloritic slate. *Loc.* Cone Cr., trib. of Duck Cr. (*ante*). *Ref.* G.S.Q. Pub. 10, p. 5 (1885).

2397. ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Limonite, in quartz and schist. *Loc.* Butterfly M.L. (496), Daisy Group, 1½ mile N.N.W. of Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 109, 110 (1908).

2398. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Tile Ore, Malachite, Limonite, Calcite, Actinolite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

2399. ——. *Assoc.with* Redruthite, Malachite, and Limonite, in slate and gossan. *Loc.* Block (15), (M.Ls. 246 and 409), Hampden Group, 40 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 60, 61 (1908).

2400. ——. *Assoc.with* Copper Pyrites, Tenorite, Redruthite, Malachite, Chrysocolla. Iron Pyrites, and Kaolin, in slates, gossan, and diorite. *Loc.* Hampden M.Ls. (244, 245, etc.), Hampden Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 49-60 (1908).

2401. ——. *Assoc.with* Redruthite, in kaolin lode. *Loc.* Hampden Copper Mine, Hampden Group (*ante*). *Copper Yield:* First grade = 40 per cent.; second = 13 per cent.; third = 6½ per cent. of Copper. *Ref.* G.S.Q. Pub. 153, p. 4, (1900).

2401A.——. *Assoc.with* Malachite. *Loc.* Mt. Babunga, Hampden-Cloncurry Copper Mines Co., 5 miles S.W. of Hampden Mine, 45 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke.

2402. ——. *Assoc.with* Copper Pyrites and Ironstone. *Loc.* Mascotte M.C. (319), Hilda Group, Slaty Cr., 20 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Assay: See* No. 2087. *Ref.* A.R., p. 118 (1907).

2403. ——. *Assoc.with* Tile Ore, Malachite, and Limonite, in quartz. *Loc.* Adelaide M.L. (549), Just-in-Time Group, 1¼ mile S. of Malbon R., 30 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 85, 86 (1908).

2404. ——. *Assoc.with* Malachite, Tetrahedrite, in ironstone. *Loc.* Malbon M.F. 2548, Just-in-Time Group (*ante*). *Ref.* A.R., 1907, p 117.

2405. ——. *Assoc.with* Redruthite, Tile Ore, Malachite, and Limonite, in quartzite and slate. *Loc.* Malbon M.F. (2548), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 79-81 (1908).

2406. ——. *Assoc.with* Native Copper, Redruthite, Malachite, Cyanochalcite (?), Limonite, Calcite, and Ferro-calcite, in granular limestone. *Loc.* Dandy P.A. (297), McPhail Group, 2 miles S. of Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 76, 77 (1908).

2407. ——. *Assoc.with* Copper Pyrites, Azurite, and Malachite, in lode in porphyry. *Loc.* Mt. Devoncourt M.L. (550), Monitor Group, Cloncurry R., 44 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 66-68 (1908).

2407A.——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, and Molybdenite, in lode formation. *Loc.* May Graham P.A., 4 miles W. of Soldier's Cap, about 33 miles (by road) S.E. of Cloncurry, Mt. Wheeler Group. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 225 (1908).

2408. ——. *Assoc.with* Redruthite, Malachite, and Limonite, in schist and quartz. *Loc.* Ready Rhino Copper M. Lease (320), Ready Rhino Group, Mt. Start, nr. Cone and Duck Crs., 23½ miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 93-95 (1908).

2409. ——. *Assoc.with* Copper Pyrites, Malachite, and Limonite, in chloritic schist. *Loc.* Mt. Minde Copper M.F. (2658), Timberoo Group, Friedman Cr., br. of Slaty Cr., 18 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 170-172 (1908).

2410. Cuprite. *Assoc.with* Native Copper, Copper Pyrites, Malachite, Chrysocolla, and Limonite, in gossany quartz and calcareous sinter. *Loc.* Boundary M.L. (582), Bull Cr. Group, Coolullah Run, 74 miles N.N.W.. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 345-347 (1908).

2411. ——. *Assoc.with* Native Copper, Tetrahedrite, Redruthite, Malachite, Iron Pyrites, Magnetite, Hematite, and Limonite, in quartz and schist. *Loc.* Crusader M.F. (2549), Crusader Group, Coolullah Run, E. of Coppermine Cr., 68½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 8 (1885), and 215, pp. 334, 335 (1908).

2411A. ——. *Assoc.with* Malachite, in kaolin. Widow M.C., W. bank of Soda Cr., Dobbyn Group, Coolullah, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, p. 342 (1908).

2411B. ——. *Assoc.with* Native Copper, in siliceous ironstone. *Loc.* Jessie's Dream M.L. (397), Jessie's Dream Group, Six-mile Cr., Leichhardt R., 60 miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, p. 314 (1908).

2412. ——. *Assoc.with* Native Copper, Chrysocolla, and Limonite, in schist and quartzite. *Loc.* Little Wonder M.L. (258), (Mighty Atom Group), Six-mile Cr., Leichhardt R., 63 miles N.W.byN. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 310, 311 (1908).

2412A. —— *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, and Limonite, in slate, schist, and gossan. *Loc.* Mt. Millicent M.L. (663), (Mighty Atom Group), Six-mile Cr., Leichhardt R., 60 miles N.W.byN. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 310, 311 (1908).

2413. ——. *Assoc.with* Native Copper, Copper Pyrites, Tile Ore, Malachite, and Limonite, in schist, slate, and gossan. *Loc.* Mt. Cuthbert M.L. (107), Mt. Cuthbert Group, Six-mile Cr., Leichhardt R., 19 miles S.W. of Coolullah H.S., 63 miles N.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 315-318 (1908).

2414. ——. *Assoc.with* Copper carbonate and Ironstone, in quartz lode in schist. *Loc.* Mt. Cuthbert, Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 153, p. 9 (1900).

2415. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Chrysocolla, and Limonite, in schist, gossan, and quartz. *Loc.* Mt. Cuthbert No. 1 N. M.L. (381), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 318-321 (1908).

2416. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, Tenorite, Malachite, Iron Pyrites, and Limonite, in slate and gossan. *Loc.* Mt. Metallic R.C. (310), Mt. Metallic Group, Prospector Cr., Leichhardt R., 52 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Assay: See* No. 2115. *Ref.* G.S.Q. Pub. 215, pp. 295-297 (1908).

For further Cloncurry references, *see* Nos. 2447-2454.

2417. ——. *Assoc.with* Native Copper and Malachite. *Loc.* Caledonia Mine, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M.

2418. ——. *Assoc.with* Tetrahedrite, in lode. *Loc.* Mt. Perry Copper Lode, Mt. Perry (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

2419. ——. *Assoc.with* Gold, Copper Pyrites, Chalcotrichite, Tile Ore, Iron Pyrites, Zinc-Blende, and Calcite. *Loc.* Mt. Perry Mine, Mt. Perry (*ante*). *Ref.* G.S.M.

2420. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Tenorite, Malachite, Iron Pyrites, Pyrrhotite, Mispickel, Hematite, Bismuthinite, Zinc-Blende, and Calcite, in quartz reef. *Loc.* Commonwealth Mine, nr. Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah br. line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), and 207, pp. 14-19 (1907).

2421. ——. *Assoc.with* Gold, Stibnite, and Hematite, in quartz. *Loc.* Lady Augusta Mine, Eidsvold Goldfield, 37 miles W.S.W. of Mt. Perry, 80 miles W.S.W. of Bundaberg. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 102, p. 3, (1895), and 160, p. 10 (1901).

2422. ——. *Assoc.with* Azurite and Malachite, in felspathic rock. *Loc.* Marshall Block Lease, Mt. Cannindah, Cabbage Tree Cr., nr. head of Splinter Cr., 13 miles S.W.byS. of Many Peaks Rail. Stn. (Boyne Valley line), 71 miles (by rail and road) S. of Gladstone. *Co.* Yarrol (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 113, p. 7 (1896).

2423. ——. *Assoc.with* Tenorite, Azurite, and Malachite, in dyke rock. *Loc.* Monument Block Lease, Mt. Cannindah (*ante*). *Ref.* G.S.Q. Pub. 113, p. 8 (1896).

2424. ——. *Assoc.with* Gold, Silver, Native Copper, Tenorite, Malachite, and Azurite, in dyke rock. *Loc.* Mt. Cannindah Mine, Mt. Cannindah (*ante*). *Ref.* (and *Assays*) G.S.Q. Pubs. 113, pp. 6, 7 (1896), 143, p. 4 (1899), and G.S.M.

2425. ——. *Assoc.with* Gold, Tetrahedrite, Malachite, Azurite, Chalcanthite, and Ironstone, in lodes in gneiss and schist. *Loc.* Arbouin Mines, between Nondah Cr. and Walsh R., 18 miles W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 134, pp. 13, 14 (1898).

2426. ——. *Assoc.with* Tile Ore and Malachite, in lode stuff. *Loc.* The Granite, Maytown, 36 miles S. of Laura Rail. Stn. (Cooktown line), 103 miles (by rail and road) S.byW. of Cooktown. *Co.* Chelmsford; *Dist.* Cook. *Ref.* O.R.

2427. ——. *Assoc.with* Malachite, in lode. *Loc.* 3 miles N. of Palmerville, 40 miles S.W.byS. of Laura Rail. Stn. (Cooktown line), 107 miles (by rail and road) S.W.byW. of Cooktown. *Co.* Chelmsford (*ante*).

2427A.——. *Assoc.with* Copper Pyrites, Malachite, and Azurite, in lode. *Loc.* Daintree Copper Mine, 38 miles S.E. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Copperfield; *Dist.* Cook. *Ref.* E.O.M.

2428. ——. *Assoc.with* Wolfram, Scheelite, Azurite, and Malachite, in defined quartz lodes in slates. *Loc.* Parada Mine, 1 mile N. of Parada Rail. Stn. (Chillagoe line), 65 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

2429. ——. *Assoc.with* Tile Ore, Malachite, Azurite, and Red Ochre, in quartzites, greywackes, and micaceous shales. *Loc.* Shaughran Copper Mine, Watsonville, 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

2430. ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, Iron Pyrites, Mispickel, Cassiterite, Stannine, Wolfram, Ironstone, Fluorspar, and Chlorite. *Loc.* Stewart's T Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 26 (1883), and P. 119, p. 15 (1897).

2431. ——. *Assoc.with* Copper Pyrites, Bornite, Tile Ore, Tetrahedrite, Tenorite, Atacamite, Malachite, Iron Pyrites, and Hematite, in lode of felspar and quartz. *Loc.* Ruddygore Copper Mine, Arbinjoe Cr., 2 miles N.E. of Chillagoe, 141 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 7 (1891), and 134, pp. 10, 11 (1898).

2432. ——. *Assoc.with* Malachite. *Loc.* Atherton Copper Lease (34), Otho Camp, between Cathedral Range and Arbinjoe Cr., 4 miles N.W. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 8 (1891), and 134, p. 9 (1898).

2433. ——. *Assoc.with* Malachite. *Loc.* Emuford, Emu Cr., br. of Walsh R., 11 miles S.E. of Petford Rail Stn. (Chillagoe line), Walsh and Tinaroo Mineral Field (*ante*). *Ref.* B.D.

2434. ——. *Assoc.with* Tenorite, Tile Ore, Azurite, Malachite, Chrysocolla, Hematite, and Magnetite, in garnet rock. *Loc.* Boomerang Copper Mine, Marble Cr., 1 mile W. of Calcifer Rail Stn. (Chillagoe line), 133 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 8 (1891), and 119, p. 36 (1897), and G.S.M.

2435. ——. *Assoc.with* Tetrahedrite, Malachite, Minium, and Hematite, in lode. *Loc.* Mollie Lease, Marble Cr., Calcifer Rail. Stn. (Chillagoe line) (*ante*). *Assays:* (1) Copper = 30 per cent.; Silver = 20 to 30 oz. per ton. (2) Copper = 10 to 15 per cent.; Silver = 20 to 40 oz. per ton. *Ref.* G.S.Q. Pub. 69, p. 8 (1891).

2436. ——. Paisley Mine, Muldiva, 7 miles W.S.W. of Almaden Rail Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 51 (1900).

2437. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Azurite, Chrysocolla, Fluorspar, and Garnet. *Loc.* Dorothy Copper Mine, Mungana, 149 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 2 (1891), and P.R.S.Q., vol. 15, p. 51 (1900).

2438. ——. *Assoc.with* Galena, Cerussite, Malachite, and Ironstone, in clay and quartz. *Loc.* Girofla Mine, Opera Cr., Mungana (*ante*). *Ref.* G.S.Q. Pub. 69, p. 3 (1891), and B.D.

2439. Cuprite. *Assoc.with* Native Copper, Tetrahedrite, Malachite, Azurite, Manganese-dioxide, Hematite, and Selenite, in lode. *Loc.* Griffith Mine, Julia Cr., 2 miles S.E. of Mungana (*ante*). *Ref.* G.S.M., G.S.Q., Pubs. 69, p. 5 (1891), and 134, p. 11 (1898).

2440. ——. In brecciated lode. *Loc.* Lady Jane Mine, Mungana (*ante*). *Ref.* G.S.M.

2441. ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, Galena, Cerussite, Minium, Zinc-Blende, Hematite, and Garnet. *Loc.* Penzance Lease, Redcap Cr., 3 miles N.E. of Mungana Rail Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.P.Q. Pubs. 69, p. 6 (1891), and 134, p. 11 (1898).

2442. ——. *Assoc.with* Gold, Redruthite, and Copper carbonate, in lode. *Loc.* Percy R., 5 miles above junction with Gilbert R., 41 miles S. of Charleston Rail. Stn., Etheridge line. *Co.* Victor; *Dist.* Cook. *Assays*: Copper = 59 and 54 per cent. *Ref.* G.S.Q. Pub. 151, p. 13 (1900).

2443. ——. *Assoc.with* Malachite, in slate. *Loc.* Mitchell R., 20 miles from O.K. Copper Mine, 60 miles N.N.W. of Mungana, Walsh and Tinaroo Mineral Fields. *Co.* Wrotham; *Dist.* Cook. *Ref.* O.R.

2443A. ——. *Assoc.with* Tetrahedrite, Azurite, Malachite, Cerussite, and Ironstone, in lodes. *Loc.* Tartana Hill, Bowler Cr., Ashtonville, 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 15, 16 (1898).

——. *See further* Walsh and Tinaroo references *under* District Kennedy North. Nos. 2455-2457.

2444. ——. *Assoc.with* Copper Pyrites, Azurite, Malachite, and Zinc-Blende, in quartz lode. *Loc.* Sel. 24, nr. Sundown Cr., Severn R., 11 miles W.S.W. of Ballandean, 25 miles (by rail and road) S.W. of Stanthorpe (on main line). *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

2445. ——. Inglewood, 73 miles (by rail) W.byS. of Warwick. *Co.* Bentinck (*ante*). *Ref.* O.R.

2446. ——. *Assoc.with* Gold, Pyrargyrite, Iron Pyrites, Copper Pyrites, Tile Ore, Azurite, Malachite, Galena, Cerussite, Zinc-Blende, Smithsonite, Ironstone, and Calcite. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Refs.* G.S.Q. Pub. 120 (1898), and P. 191 (1904).

2447. ——. *Assoc.with* Malachite, in quartz. *Loc.* Duchess M.L. (275), Duchess Group, Burke R., 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Assay*: Gold = trace; Silver = 1 oz. 2 dwt. per ton; Copper = 31·2 per cent. *Ref.* A.R., p. 116 (1907).

2448. ——. *Assoc.with* Malachite, Azurite, and Limonite, in quartz. *Loc.* Ivanhoe M.L. (277), Duchess Group, Burke R. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 23, 24 (1908).

2449. ——. *Assoc.with* Malachite and Azurite. *Loc.* Monastery M.L. (467), 79 miles S.W. of Cloncurry, Mt. Birnie Group, Burke R. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* A.R., p. 117 (1907).

2450. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Chrysocolla, Iron Pyrites, and Limonite, in hornblende schist. *Loc.* Mt. Birnie M.L. (686, etc.,), 74½ miles S.S.W. of Cloncurry, Mt. Birnie Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 367 (1908).

2451. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, Malachite, Atacamite, Limonite, and Calcite, in quartz and chloritic schist. *Loc.* Blue Jacket M.L. (632), Mt. Hope Group, Wills R., 53½ miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 43, 44 (1908).

2451A. ——. *Assoc.with* Malachite and Limonite, in quartz and quartzite. *Loc.* Mt. Hope M.L. (366), Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 38 (1908).

2452. ——. *Assoc.with* Malachite and Azurite, in schist, quartz, and kaolin. *Loc.* Horse Cr. M.L. (220, etc.), Horse Cr. Group, 50 miles S.byW. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North; *Ref.* G.S.Q. Pub. 215, pp. 15, 16 (1908).

2453. ——. *Assoc.with* Gold, Tile Ore, Tenorite, Malachite, Atacamite, Chalcanthite, Iron Pyrites, Limonite, Calcite, and Chalcedony, in kaolinised slate and gossan. *Loc.* Mt. Elliott Copper R.C. (No. 3), Mt. Elliott Group, Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 3-12 (1908).

2454. ——. *Assoc.with* Tenorite and Malachite, in quartz. *Loc.* Mt. Elliott, Maggie's Cr. (*ante*). *Assay*: Copper, 28·82 per cent.; Gold, 1 dwt. 5 gr.; and Silver, 13 dwt. per ton. *Ref.* A.R., p. 118 (1907).

For other Cloncurry references, *see* Nos. 2377-2416.

2455. ——. *Assoc.with* Cassiterite, in argillaceous chlorite. *Loc.* Gt. Eastern Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Field. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 11 (1883).

2456. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Bornite, Tenorite, Azurite, Malachite, Chalcanthite, Mispickel, Zinc-Blende, Iron Pyrites, Hematite, Magnetite, Cerussite, and Minium, in quartz lodes, in quartzite and porphyry. *Loc.* Mt. Garnet Mines, Return Cr., 136 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

2457. ——. *Assoc.with* Malachite, Azurite, and Wolfram, in quartz lode. *Loc.* Round Mt., W. of Coolgarra, 9 miles N.N.E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

——. *See further* Walsh and Tinaroo references *under* District Cook. Nos. 2428-2443A.

2457A. ——. *Assoc.with* Malachite, in quartz. *Loc.* Haydin Show, Wyandotte, 48 miles S.E. of Mt. Surprise Rail. Stn. (Etheridge line). *Co.* Gunnawarra; *Dist.* Kennedy North. *Ref.* A.R., p. 178 (1909).

2458. ——. *Assoc.with* Gold, Malachite and Hematite. *Loc.* Copper King Mine, 1½ mile from Lamington Mine, 41¼ miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* A.R., 1906, p. 62.

2459. ——. *Assoc.with* Malachite and Hematite. *Loc.* Mt. Cavanagh, Mare's Nest Cr., Normanby Road, 44 miles S.S.E. of Bowen. *Co.* Herbert (*ante*). *Assays*: (1) Gold = 19 gr. per ton; Silver = 5 dwt. per ton; Copper = 11·8 per cent. (2) Gold = trace; Silver = 2 oz. 11 dwt. per ton; Copper = 11·6 per cent. *Ref.* A.R., 1906, p. 60.

2460. ——. *Assoc.with* Redruthite and Copper carbonate, in garnet, quartz, and kaolin. *Loc.* Day Dawn Lease (170), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Assay*: Gold, trace; Silver, 265 oz. per ton; Copper, 21·6 per cent. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

2461. ——. *Assoc.with* Azurite, Malachite, and Limonite. *Loc.* Kallanda, Kangaroo Hills Mineral Field (*ante*). *Assay*: Gold = 19 gr.; Silver = 4 dwt. 19 gr. per ton; Copper = 26·5 per cent. *Ref.* A.R., p. 106 (1907).

2462. ——. *Assoc.with* Copper (native), Copper Pyrites, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Zinc-Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

2463. ——. *Assoc.with* Copper Pyrites, Bornite, Tenorite, Copper carbonate, Iron Pyrites, Ironstone, Galena, and Zinc-Blende, in lode. *Loc.* Mt. Thekla Copper and Silver Mines, Kangaroo Hills Mineral Field (*ante*). *Assay*: Silver = 26 oz. 12 dwt. per ton; Copper = 22 per cent. *Ref.* G.S.Q. Pub. 167, p. 7 (1901).

2464. ——. *Assoc.with* Copper Pyrites, Bornite, Native Silver, Galena, and Copper carbonate, in lode. *Loc.* True Blue Lease (161), Kangaroo Hills Mineral Field (*ante*). *Assays*: *See* No. 7557. *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

2465. ——. *Assoc.with* Malachite and Azurite. *Loc.* Kennedy Copper Mine, Sandy Cr., br. of Burdekin R., 50 miles W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* O.R.

2466. ——. *Assoc.with* Tenorite and Azurite, in ferruginous lode. *Loc.* Kennedy Copper Mine, Sandy Cr., trib. of Burdekin R. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 57 (1887).

2467. ——. *Assoc.with* Malachite. *Loc.* Lady Mary Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* O.R.

2468. ——. *Assoc.with* Gold, Copper Pyrites, Galena, Bismuth, Bismuthinite, Bismite, Manganese-dioxide, Hematite, and Ironstone, in lode. *Loc.* Daisy Bismuth Mine, 3 miles E. of Eukalunda, Sellheim Mineral Field (*ante*). *Assay*: 33·76 per cent. *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

2469. Cuprite. *Assoc.with* Azurite and Malachite, in serpentinous slate. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* P.R.S.Q., vol. 4, p. 77 (1887).

2470. ——. *Assoc.with* Malachite and Azurite, in quartz lode. *Loc.* Seven-mile Diggings, 7 miles S.E. of Nanango, 40 miles N.N.W. of Kannangur Rail. Stn. (Brisbane-Valley line), 123 miles (by rail and road) N.W.byN. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 29, p. 2 (1886).

2471. ——. Moreton Is., 41 miles N.N.E. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* P.R.S.Q., vol. 4, p. 56 (1887).

2472. ——. *Assoc. with* Native Copper, Copper Pyrites, Tile Ore, Malachite, Azurite, Iron Pyrites, Hematite, Limonite, Magnetite, and Calcite, in serpentine. *Loc.* Many Peaks Copper Mine, 58 miles (by rail) S. of Gladstone (Boyne-Valley line). *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pubs. 150, p. 8 (1900), and 194, p. 28 (1904).

2473. ——. *Assoc.with* Copper Pyrites, Tenorite, Bornite, Azurite, Malachite, Galena, Zinc-Blende, Hematite, Magnetite, Garnet, Chlorite, and Calcite. *Loc.* Glassford Cr. Copper Mines, Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (N. Coast line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), and 194, p. 28 (1904).

2473A.——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Bornite, Tenorite, Azurite, Malachite, and Ironstone, in crystalline limestone. *Loc.* Mt. Hector Copper Mine, E. side of Dawes Range, about 12 miles W.N.W. of Many Peaks Rail. Stn., 70 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* Q.G.M.J., vol. 4, pp. 174-177 (1903).

2474. ——. *Assoc.with* Azurite and Malachite, in quartz lode. *Loc.* 2 miles W. of Old Diggings, Raglan Goldfield, 6 miles S. of Raglan Rail. Stn. (North Coast line), 40 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

2475. ——. *Assoc.with* Azurite and Malachite. *Loc.* Iveragh Copper Lode, Iveragh Cr., trib. of Boyne R., 20 miles of Gladstone. *Co.* Flinders; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

2476. ——. *Assoc.with* Chrysocolla and Asbestos, in decomposed rock. *Loc.* Cabbage Tree Cr., Princhester Run, 12 miles from Maryborough, 44 miles N.W. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Assay:* Gold = trace, Silver = 1 oz. per ton, Copper = 6·6 per cent. *Ref.* A.R., 1907, p. 85.

2477. ——. *Assoc.with* Silver, Cerussite, Tenorite, Iron Pyrites, Zinc-Blende, and Barytes, in serpentinous shales. *Loc.* Mt. Warminster, about 3 miles W.byN. of Tungamull Rail. Stn., 21 miles (by rail and road) N.N.E. of Rockhampton (Emu Park line), Cawarral Goldfield. *Co.* Livingstone. *Dist.* Port Curtis. *Ref.* B.D.

2478. ——. *Assoc.with* Native Copper, Malachite, and Azurite, in epidote rock. *Loc.* Copper Deposits, Clairview, 12 miles N. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

2478A.——. *Assoc.with* Native Copper, Telluride ore, and Ironstone, in schist. *Loc.* Stannage Point, 37 miles E.N.E. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* B.D.

2479. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Azurite. *Loc.* Stevens Copper Lode, Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 9 (1885).

2479A.——. *Assoc.with* Copper Pyrites, Malachite, Azurite, Iron Pyrites, Hematite, Magnetite, and Limonite, in gossan lodes. *Loc.* M.L. (262), Kroombit Copper Mines, 4¼ miles E.S.E. of Kroombit Head Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

2480. ——. *Assoc.with* Gold, Silver, Native Copper, Copper Pyrites, Redruthite, Iron Pyrites, Molybdenite, Azurite, Malachite, Ironstone, and Galena, in granite, breccia, and sandstone. *Loc.* Moonmera Mines, nr. Moonmera Rail. Stn. (Mt. Morgan Br. line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195, p. 22 (1904).

2481. ——. *Assoc.with* Copper Pyrites, Redruthite, Tenorite, Azurite, Malachite, Iron Pyrites, Hematite, and Limonite, in lodes in syenitic granite. *Loc.* Calgoa Copper Lodes, Calgoa Cr., Thunder Cr., 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 207, pp. 5-11 (1907), and G.S.M.

2482. ——. *Assoc.with* Azurite and Malachite. *Loc.* Luge-e-nor Lode, Calgoa Copper Mines, Thunder Cr., Calgoa Cr. (*ante*). *Ref.* B.D.

2483. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Malachite, Bismuthinite, Magnetite, and Limonite, in lode outcrop. *Loc.* Kaboonga Mine, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

2484. —— *Assoc.with* Copper carbonate, in quartz reef. *Loc.* S. of Mackay's Store, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 4 (1886).

2485. ——. *Assoc.with* Tetrahedrite, Malachite, Azurite, and Hematite. *Loc.* White Rocks Copper Lease, Marodian Goldfield, 8 miles N. of Kilkivan Rail. Stn., 56 miles (by rail and road) N.W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 179, p. 11 (1902).

2486. ——. *Assoc.with* Copper Pyrites, Tile Ore, Redruthite, Malachite, and Azurite, in quartz. *Loc.* Teebar Copper Lode, Munna Cr., nr. Clifton Stn., 2 miles S. of Boompa Rail. Stn. (Gayndah Br. line). *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 7 (1890), and G.S.M.

2487. ——. *Assoc.with* Redruthite. *Loc.* Warirata Road, 20 miles E.N.E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.M.

——. *See also under* Copper Oxides.

2488. —— **Chalcotrichite** (*var.*). *Assoc.with* Gold, Iron Pyrites, Redruthite, Galena, Cerussite, in cavities in ironstone and quartz. *Loc.* Mountain Maid Reef, 2¾ miles N.N.E. of Croydon Rail. Stn., 94 miles (by rail and road) S.E. of Normanton. *Co.* Surrey; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 32, p. 10 (1887).

2489. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Tile Ore, Zinc-Blende, and Calcite. *Loc.* Mt. Perry Copper Mine, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M.

2490. —— ——. In dolerite. *Loc.* Mt. Warminster Mine, nr. Warwinster Rail. Stn. (Cawarral Br.), 21 miles (by rail and road) N.N.E. of Rockhampton. *Co.* Livingstone; *Dist.*. **Port Curtis.** *Ref.* B.D.

2491. —— ——. *Loc.* Rosewood Goldfield, 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* Q.M.

2492. —— **Tile Ore** (*var.*). *Assoc.with* Malachite and Limonite, in slate, gossan, and quartz. *Loc.* Lady Clayre M.L. (279), Lady Clayre Group, Dugald R., 36½ miles N.W. of **Cloncurry.** *Co.* Argylla; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, pp. 279-281 (1908).

2493. —— —— ——. *Assoc.with* Copper Pyrites, Azurite, Malachite, and Limonite, in mica-schist, quartzite, and gossan. *Loc.* Magnet M.L. (450), Longamundi Group, Dugald R., between 34 and 39 miles N.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 284-286 (1908).

2493A. —— —— ——. *Assoc.with* Redruthite, Cuprite, Chrysocolla, Malachite, and Limonite, in quartz and quartzite. *Loc.* Rocklands Group of Copper Mines, between Butcher and Morris Crs., 9 miles W. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 258-265 (1908).

2493B. —— —— ——. *Assoc.with* Redruthite, Cuprite, Malachite, and Limonite, in gossan and quartzite. *Loc.* Chum M.C. (329), Serpent Hill Group, Morris Cr., 4½ to 5½ miles W.S.W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 256 (1908).

2493C. —— —— ——. *Assoc.with* Bornite, Redruthite, and Iron Pyrites, in quartz. *Loc.* Monakoff M.F. (15), Monakoff Group, Pumpkin Gully, 13½ miles E.N.E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 239 (1908).

2493D. —— —— ——. *Assoc.with* Cuprite, Malachite, and Limonite, in lode. *Loc.* Carlton Hills Run, 78 miles N.W.byW. of Cloncurry. *Co.* Brahe; *Dist.* Burke. *Ref.* A.R., p. 269 (1910).

2494. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, and Limonite, in slate (?). *Loc.* Eclipse M.L. (571), Eclipse Group, E. of Dromedary Range, N.W. of Donaldson, 68 miles N.byW. of Cloncurry. *Co.* Granada; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 355, 356 (1908).

2495. —— —— ——. *Assoc.with* Redruthite, Malachite, and Actinolite, in ironstone. *Loc.* Wanderer M.L. (622), Eclipse Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 357 (1908).

2496. —— —— ——. *Assoc.with* Malachite and Chrysocolla, in gossan, schist, and quartz. *Loc.* Alice M.L. (717), Alice Group, Duck Cr., 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 162-164 (1908).

2497. —— —— ——. *Assoc.with* Malachite, in schist and quartz. *Loc.* Deadlock M.L. (542), Alice Group, Duck Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 164, 165 (1908).

2498. Cuprite (Tile Ore). *Assoc.with* Copper Pyrites, Redruthite, Malachite, Chrysocolla, Hematite, Limonite, and Turgite, in quartz, calcite, and gossan. *Loc.* Belfast M.L. (303), Belfast Group, 2 miles N.N.E. of Mt. Start, 21 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Assay: See* No. 2071. *Ref.* G.S.Q. Pub. 215, pp. 120-122 (1908).

2499. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Chrysocolla, Hematite, and Limonite, in quartz and ferro-calcite. *Loc.* Policeman M.C. (206), Boomerang Group, Cone Cr., 23 miles S.S.W of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 100, 101 (1908).

2500. —— —— ——. *Assoc.with* Copper Pyrites, Malachite, and Azurite, in gossan, quartz, and schist. *Loc.* Celestial Extd. M.C. (195), 2 miles S.S.W. of Mt. Start, Chinaman Group, 23½ miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 148, 149 (1908).

2501. —— —— ——. *Assoc.with* Malachite and Chrysocolla, in quartz and schist. *Loc.* Speculation M.C. (198), nr. Mt. Start, Chinaman Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 150-152 (1908).

2502. —— —— ——. *Assoc.with* Redruthite and Malachite, in ferruginous quartz and quartzite. *Loc.* Columbiad M.L. (500), Columbiad Group, Duck Cr., 1¼ mile S.W. of Mt. Start, 24½ miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 141, 142 (1908).

2502A. —— —— ——. *Assoc.with* Redruthite and Malachite, in ferruginous quartz and quartzite. *Loc.* Columbiad M.L. (500), Columbiad Group, Duck Cr., 1¼ mile S.W. of Mt. Start, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 141, 142 (1908).

2503. —— —— ——. *Assoc.with* Redruthite, Cuprite, Malachite, and Limonite, in quartz and schist. *Loc.* Butterfly M.L. (496), Daisy Group, Duck Cr., nr. Mt. Start, 22 miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 109, 110 (1908).

2504. —— —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Cuprite, Malachite, Limonite, Calcite, Actinolite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group, Duck Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

2505. —— —— ——. *Assoc.with* Redruthite, Malachite, and Limonite, in chloritic schist and quartz. *Loc.* Balfour Extd. M.C. (257), Diagonal Group, Duck Cr., 22½ miles S.S.W. of Cloncurry (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 215, pp. 138, 139 (1908).

2506. —— —— ——. *Assoc.with* Redruthite and Malachite, in chloritic schist and quartz. *Loc.* Diagonal M.F. (2457), Diagonal Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 135, 136 (1908).

2507. —— —— ——. *Assoc.with* Gold, Copper Pyrites, Redruthite, Azurite, Malachite, and Limonite, in chloritic schist. *Loc.* Pioneer Copper Lease (229), Diagonal Group (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 215, pp. 132-135 (1908).

2508. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in schist and quartz. *Loc.* Prospector M.C. (182), Diagonal Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 136-138 (1908).

2509. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Azurite, and Chrysocolla, in gossan, quartz, and quartzite. *Loc.* Captain M.L. (—), Eva Group, Duck Cr., 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 158, 159 (1908).

2510. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Chrysocolla, in quartz and calcite. *Loc.* Commonwealth M.C. (330), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 158 (1908).

2511. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Azurite, Iron Pyrites, Limonite, and Calcite, in schist, slate, and quartz. *Loc.* Eva M.L. (250), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 152-154 (1908).

2512. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Calcite, and Chlorite, in chloritic schist, gossan, and quartzite. *Loc.* Eva Extd. M.L. (283), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 155 (1908).

2513. —— —— ——. *Assoc.with* Redruthite and Malachite, in chloritic schist. *Loc.* Phœnix M.C. (340), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 157 (1908).

2514. —— —— ——. *Assoc.with* Copper Pyrites, Azurite, Malachite, and Limonite, in schist and quartz. *Loc.* Comet M.L. (243), Hilda Group, S. br. of Slaty Cr., 20 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 182, 183 (1908).

2515. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Calcite, in schist and limestone. *Loc.* Mascotte M.C. (319), Hilda Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 184, 185 (1908).

2516. —— —— ——. *Assoc.with* Cuprite, Malachite, and Limonite, in quartz. *Loc.* Adelaide M.L. (549), Just-in-Time Group, Malbon R., 30 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 85, 86 1908).

2517. —— —— ——. *Assoc.with* Redruthite, Malachite, and Limonite, in ferruginous quartzite and schist. *Loc.* Just-in-Time M.L. (237), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 82, 83 (1908).

2518. —— —— ——. *Assoc.with* Cuprite, Redruthite, Malachite, and Limonite, in slate, quartzite, and quartz. *Loc.* Malbon M.F. (2548), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 79-81 (1908).

2518A.—— —— ——. *Assoc.with* Redruthite, Malachite, Azurite, and Limonite, in quartz and schist. *Loc.* Morning Star M.L. (306), Lady Group, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 199 (1908).

2519. —— —— ——. *Assoc.with* Redruthite, Malachite, Azurite, and Limonite, in schist, quartzite, and slate. *Loc.* Monitor M.L. (419), Monitor Group, Hampden, 44 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub 215. p. 65 (1908).

2519A.—— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Chrysocolla, Hematite, and Hypersthene, in slate and gossan. *Loc.* Springs Peak M.L. (562), Pearl Group, Corella R., 30 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 189 (1908).

2520.—— —— ——. *Assoc.with* Redruthite, in schist and quartz. *Loc.* Blue Bell M.L. (609), 5 ch. N. of Noontide Lease, Pioneer Chief Group, 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 131, 132 (1908).

2521. —— —— ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, Chrysocolla, Hematite, and Limonite, in slate. *Loc.* Easter Gift M.L. (290), 1 mile E. of Mt. Start, W. of Marabah Township, Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 127-129 (1908).

2522. —— —— ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Malachite, Iron Pyrites, and Limonite, in slate. *Loc.* Pioneer Chief M.L. (231), Cone Cr., ½-mile N. of Mt. Start, Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 123-125 (1908).

2523. —— —— ——. *Assoc.with* Malachite and Limonite, in chloritic schist. *Loc.* Coronet M.C. (241), Cone Cr., 2¾ miles N. of Mt. Start, Ready Rhino Group, Duck Cr., 23½ miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 96, 97 (1908).

2524. —— —— ——. *Assoc.with* Malachite and Limonite, in ferruginous quartz and schist. *Loc.* White Rose M.L. (330), nr. Cone and Duck Crs., Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 97 and 98 (1908).

2525. —— —— ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Malachite, Chrysocolla, Iron Pyrites, and Limonite, in schist, slate, and quartzite. *Loc.* Banjo Copper M.L. (590), Tambourine Group of Copper Mines, Duck Cr., 26 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 167-168 (1908).

2526. —— —— ——. *Assoc.with* Redruthite, Malachite, and Iron Pyrites, in schist and quartz. *Loc.* Tharsis M.L. (240), Cone Cr., 1¼ mile N. of Mt. Start, Tharsis Group, Duck Cr., 20 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Assay*: Copper = 3·3 per cent., Gold = 20 gr. per ton, Silver = 2 dwt. per ton. *Ref.* G.S.Q. Pub. 215, pp. 117-120 (1908).

2527. —— —— ——. *Assoc.with* Malachite, in schist and quartz. *Loc.* Waratah M.L. (127), 1 mile N.W. of Mt. Start, Tharsis Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 115, 116 (1908).

2527A. —— —— ——. *Assoc.with* Copper Pyrites, Malachite, Limonite, and Gothite in schist. *Loc.* Brilliant M.C. (159), Slaty Cr., Timberoo Group, 18 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 179-181 (1908).

2528. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Bornite, Malachite, Iron Pyrites, Hematite, Limonite, Hydro-Mica, and Calcite, in schist, slate, and quartz. *Loc.* Timberoo M.L. (716), Friedman's Cr., br. of Slaty Cr., Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 172-175 (1908).

2529. —— —— ——. *Assoc.with* Redruthite, Malachite, Azurite, and Limonite, in gossany quartz and schist. *Loc.* Wallaroo (M.L. 392), Wee MacGregor Group, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 202-205 (1908).

2529a. Cuprite (Tile Ore). *Assoc.with* with Malachite, in quartz. *Loc.* White Oxide M.C. (282), White Oxide Group, Duck Cr.. 24 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 160-161 (1908).

2529b. —— —— ——. *Assoc.with* Gold, Malachite, and Limonite in lode. *Loc.* Soldier's Cap Diggings, 24 miles S.E.byS. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* A.R. p. 278 (1910).

2530. —— —— ——. *Assoc.with* Redruthite, Malachite, and Limonite, in gossany quartz. *Loc.* Flaneur M.L. (655), Dobbyn Group, Coolullah, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215 pp. 344 and 345 (1908).

2531. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Azurite, Malachite, Chrysocolla, and Limonite, in schist, slate, and gossan. *Loc.* Mighty Atom M.L. (274), between 6-Mile and Coppermine Crs., Mighty Atom Group, Leichhardt R., 60 to 63 miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 304-306 (1908).

2532. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in gossan and quartz. *Loc.* Mt. Bornite M.L. (376), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 309 and 310 (1908).

2533. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Malachite, and Limonite, in slate, schist, and gossan. *Loc.* Mt. Millicent M.L. (663), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 307, 308 (1908).

2534. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in slate and kaolin. *Loc.* Mt. Millicent South M.L. (664), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 308, 309 (1908).

2535. —— —— ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Malachite, and Limonite, in schist, slate, and gossan. *Loc.* Mt. Cuthbert M.L. (107), Six-mile Cr., 19 miles S.W. of Coolullah Head Stn., Mt. Cuthbert Group, Leichhardt R., 63 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 315-318 (1908).

2536. —— —— ——. *Assoc.with* Malachite. *Loc.* Mt. Cuthbert M.L. (107), Mt. Cuthbert Group (*ante*). *Average of 5 Assays:* Copper = 42·4 per cent., Gold = 10 gr. per ton, Silver = 14 dwt. 3 gr. per ton. *Ref.* A.R., 1906, p. 46.

2537. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Malachite, Chrysocolla, and Limonite, in schist, gossan, and quartz. *Loc.* Mt. Cuthbert No. 1 Nth. M.L. (381), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 318-321 (1908).

2538. —— —— ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Cuprite, Tenorite, Malachite, Iron Pyrites, and Limonite, in slate and gossan. *Loc.* Mt. Metallic R.C. (310), Mt. Metallic Group, Prospector Cr., trib. of Leichhardt R., 52 miles W.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* (and *assay*) G.S.Q. Pub. 215, pp. 295-297 (1908).

2539. —— —— ——. *Assoc.with* Malachite and Atacamite, in schist and slate. *Loc.* Mt. Oxide M.L. (282), Mt. Oxide Group, between Torpedo Cr. and Myally Cr., 109 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Assay:* Copper = 38·6 per cent.; Gold = 19 gr. per ton; Silver = 1 oz. 18 dwt. per ton. *Ref.* G.S.Q. Pub. 215, pp. 362-364 (1908).

2540. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in schist, gossan, and quartz. *Loc.* Chance P.A. (283), St. Paul's Group, Leichhardt R., Coolullah, 78 miles N.N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 352-354 (1908).

2541. —— —— ——. *Assoc.with* Redruthite and Malachite, in chloritic schist. *Loc.* Rosetta M.L. (638), St. Paul's Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 351, 352 (1908).

2542. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in schist, gossan, and quartz. *Loc.* Isabella M.C. (360), Von Bremen's Group, St. Paul's Cr., Leichhardt R., 70 miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 325, 326 (1908).

2543. —— —— ——. *Assoc.with* Malachite, in quartzite. *Loc.* Warwick Castle M.L. (314), head of St. Paul's Cr., Warwick Castle Group, Coolullah, 69 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, p. 323 (1908).

2568B. —— —— ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Malachite, Azurite, Chlorite, and Calcite, in slate and granite. *Loc.* MacFadzen's M.F. (1749), includes Douchang, Flora, Essie, Dozzler, and Green Outcrop Lodes, Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 31-35 (1910).

2569. —— —— ——. *Assoc.with* Gold (trace), Silver, Minium, Copper carbonate, and Steatite, in ferruginous quartz reef. *Loc.* 4 miles N.W. of junction of Tierawoomba and Boothill Crs., about 50 miles S.S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

2570. —— —— ——. *Assoc.with* Copper Pyrites, Native Copper, Cuprite, Malachite, Azurite, Iron Pyrites, Hematite, Magnetite, Limonite, and Calcite. *Loc.* Many Peaks Copper Mines, 58 miles (by rail) S. of Gladstone (Boyne Valley line). *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pubs. 150, p. 8 (1900), and 194, p. 28 (1904).

2571. —— —— ——. *Assoc.with* Azurite and Malachite, in ferruginous quartz. *Loc.* Mt. Alice, Bullock Cr., Gigoomgan Stn., 25 miles W.S.W. of Maryborough. *Co.* Lennox; *Dist.* **Wide Bay.** *Assay:* *See* No. 259. *Ref.* A.R., p. 112 (1907).

2572. —— —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Malachite, and Azurite. *Loc.* Teebar Copper Mine, Munna Cr., 2 miles S. of Boompa Rail. Stn. (Gayndah Br. line). *Co.* Lennox (*ante*). *Ref.* G.S.M.

Curra. Great George Mine. *Min.Ref.* Gold, *see* 4544.

Curra Rail. Stn. Two miles from North Coast line. *Min.Ref.* Limestone, *see* 697.

Curra Diggings. Old name for Gympie Goldfield.

Currajong Bore. *See under* Artesian Bores. No. 351.

Curralle Co.; Gregory South Dist. *See map*, Pl. 18.

Currandotta Co.; Gregory North Dist. *See map*, Pl. 20.

Currawilla Co.; Gregory North Dist. *See map*, Pl. 20.

Currawinya (Yuleemya) Bores. *See under* Artesian Bores. No. 177.

Currency Reef. Dreghorn Diggings. *Min.Ref.* Galena, *see* 2955; Gold, 4082; Iron Pyrites, 5277.

Currumbin Beach. One mile N. of Pt. Danger, Tweed Heads. *Min.Ref.* Cassiterite, *see* 1174; Gold, 3370, 3371; Magnetite, 6033; Monazite, 6881; Platinum, 7073; Silver, 7511.

Geological Note: The beach sands between Point Danger and Currumbin Creek, a distance of 5 miles, contain traces of Tin, Gold, Platinum, and Monazite, together with Zircon, Topaz, Magnetite, Ilmenite, and Tourmaline. Deposits containing the heavier minerals are formed along the beach during southerly and south-easterly gales. *See* G.S.Q. Pub. No. 198 for details.

Curry's Bores. *See under* Artesian Bores. No. 156.

Curtis Island. Five miles N. of Gladstone, between Port Curtis and Keppel Bay, 30 miles in length, 5 to 15 miles in width. Centre—about *Lat.* 23° 35′ S., *Long.* 151° 13′ E. *See maps*, Pls. 2, 3. *Min.Ref.* Apatite, *see* 79; Native Sulphur, 7668.

Geological Note: The rocks of Curtis Is. comprise Devonian slates, quartzites, and fine-grained sandstones, and form a continuation of the same series of rocks occurring at Cawarral to the north-east, and on the islands of Keppel Bay. They are phosphate-bearing, containing turquoise and apatite, but no deposits have been found of commercial value. *See* G.S.Q. Pubs. 143, 190, and 194 for details.

Cusack (W. G. Kelly), Warden. Report on Ollera Cr. Wolfram Field. Q.G.M.J., vol. 5, pp. 517-519 (1904).

Cushnie Parish Bores. *See under* Artesian Bores. No. 19.

Customs Duties (Commonwealth). Those specially referring to *minerals, metals, mining* and *metallurgy*. Preferential duties are those which are imposed only on manufactures of the United Kingdom.

Acids (hydrochloric, nitric, sulphuric), *ad val.* 15 per cent.
Aluminium and alloys. Free.
Antimony and antimonial lead compounds, *ad val.* 20 per cent. general, 15 per cent. preferential.
Asbestos (millboards, yarn, cloth), free; (packing, coverings), *ad val.*, 20 per cent.; (cement), *ad val.*, 30 per cent. general; 25 per cent. pref.
Assaying appliances. Free.
Barytes—per cwt., 2s.
Bricks (fire and glazed), *ad val.* 15 per cent.
Bronzing powders. Free.
Bullion and coin. Free.
Calcium carbide. Free.
China (Parian and porcelain ware), *ad val.* 25 per cent. general, 20 per cent. pref.
Coal-cutting machines, *ad val.* 5 per cent. general, free pref.
Coke. 4s. per ton.
Copper (metallic). Free.
Crucibles. Free.
Cyanide of potash. Free.
Dredging machinery, *ad val.* 25 per cent. general, 15 per cent. pref.
Earthenware, stoneware, brownware, *ad val.* 25 per cent. general, 20 per cent. pref.
Emery stones. Free.
Excavating machinery, *ad val.* 25 per cent. general, 15 per cent. pref.
Filter presses. Free.
Firebricks, glazed bricks, *ad val.* 15 per cent.
Fireclay manufactures, *ad val.* 15 per cent.
Gemstones. *See* Precious stones.
Graphite (plumbago, black lead), *ad val.* 20 per cent.
Incandescent mantles, *ad val.* 25 per cent. general, 15 per cent. pref.
Iron. Varies from 10s. to 30s. per ton.
Kerosene. Free.
Lead (sheet). Free. Antimonial lead, *see under* Antimony.
Lithographic stones. Free.

Customs Duties—*continued:*

Manganese, *ad val.* 5 per cent.
Marble (rough), *ad val.* 10 per cent.
Metal powders. Free.
Metallurgical appliances, *ad val.* 25 per cent. general, 15 per cent. pref.
Mineral oils. Per gal. ¾d. general, ½d. pref.
Mineral waters, *ad val.* 25 per cent.
Mineralogical cabinets. Free.
Natural History specimens. Free.
Oil stones. Free.
Ore-dressing machinery, *ad val.* 25 per cent. general, 20 per cent. pref.
Petroleum (crude). Free.
Pigments (dry colours)—per cwt., 4s. 6d. general; 4s. pref. (dry); (dry white lead, putty)—per cwt., 2s. peneral; 1s. 6d. pref.
Plaster of Paris—per cwt., 1s. general; 9d. pref.
Platinum (metallic). Free.
Porcelain. *See under* China.
Portland Cement—per cwt., 1s. general; 9d. pref.
Precious stones, free; (imitation stones), *ad val.*, 40 per cent. general; 35 per cent. pref. *See* notes on the imposition of this duty *under* Import Duties on Gems.
Rock-boring machines, *ad val.* 25 per cent. general, 20 per cent. pref.
Rock drills, *ad val.* 3 per cent.
Surveying instruments. Free.
Tiles (flooring, roofing, cement), *ad val.* 30 per cent. general, 25 per cent. pref.; (asphalt), 15 per cent.
Vermillions (cinnabar), *ad val.* 5 per cent.
Whetstones. Free.
White lead. *See under* Pigments.
Whiting—per cwt., 6d.
Zinc (metallic). Free.

Cut Log Cr. Flows into Running Cr. nr. its junction with Munna Cr., 25 miles N.W. of Gympie. *Min.Ref.* Barytes, *see* 284.

Cuze's Silver Lease, Silverfield. *Min.Ref.* Anglesite, *see* 18; Galena, 2776.

Cyanite. *Syn.* Kyanite, *which see.*

Cyanochalcite, *var.* of Chrysocolla, *which see.*

Cypress Downs Bores. *See under* Artesian Bores. No. 90.

Dagmar Co.; Cook Dist. *See map,* Pl. 8.

Dagworth Reef, Woodville, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3764.

—— Run Bores. *See under* Artesian Bores. Nos. 238, 239.

Dahra Sub-artesian Bore. *See under* Artesian Bores. No. 318.

Daintree (Richard), was Geologist of S. Queensland in 1868 and 1869; afterwards Agent-General for Queensland.

Publications (Official and Otherwise):

Notes on the Geol. of the Col. of Queensland, etc. Quart. Jour. Geol. Soc. (1872).

Notes on Certain Modes of Occurrence of Gold in Australia. Q.J.G.S.

Iron in Queensland. Min. Jour. (London), 1874, p. 447. (1878).

Tin in Queensland. Min. Jour. (Lond.), 1872, p. 689.
[On the Desert Sandstone.] Proc. Roy. Geogr. Soc., 1875, p. 489.

Darby Point Sub-artesian Bore. *See under* Artesian Bores. No. 42.

Dareel Bore. *See under* Artesian Bores. No. 362.

Dargalong, 7 miles S. of Zillmanton Rail. Stn. (Chillagoe line). *Min.Ref.* Anglesite, *see* 30-35; Argentite, 95; Arsenic, 99; Asbestos, 106; Barytes, 267; Cerussite, 1195-1201; Cinnabar, 1543; Copper carbonate, 1893, 1894; Fluorspar, 2663; Galena, 2793-2796; Hematite, 4714; Ironstone, 5528; Massicot, 6527-6529; Minium, 6582-6588; Oligoclase, 6917; Prase, 1398; Talc, 7675.

Geological Note: The whole of the mines are situated in mica schist country, the lodes containing silver, lead, and copper. *See* G.S.Q. Pub. 69 *for details.*

Darkey Flat, Talgai Goldfield. *Min.Ref.* Gold (alluvial), *see* 3253, (reef) 3855; Manganese-dioxide, 6425.

Darling Downs District—

Situation, etc.: *See maps,* Pls. 12 and 13. *Lat.*, 26° and 29°; *Long.*, 149° and 153°. It is bounded on the N. by the Districts of Leichhardt and Burnett, on the E. by the District of Moreton, on the S. by the State of New South Wales, and on the W. by the District of Maranoa. Rivers in the District are Condamine, Moonie, Weir, Barwon or Macintyre (tribs. Dumaresq (or Severn) and Macintyre Brook).

Area: 25,390 sq. miles.

Principal Mining Centres: *Gold and Mineral Fields*—Stanthorpe, MacDonald, Pikedale, Canal Cr., Talgai, Thanes Cr., Leyburn, Palgrave, and Lucky Valley, *which see.* *Coal Fields*—Clifton, Kingsthorpe, Oakey, and Tannymorel, *which see.*

Counties:

Aubigny Co.—

Bowenville, Cambooya, Clifton (Coal), Dalby, Emu Vale, Kingsthorpe (Coal), Harlaxton, Jimbour, Jondaryan, Oakey (Coal), Pittsworth (Beauraba), Toowoomba, Westbrook.

Auburn Co.

Bentinck Co. Stanthorpe Mineral Field (in part—*See also* Clive, Marsh, Merivale Cos.). Bodumba, Broadwater, Glenelg, Jibbinbar (in part—*See also* Clive Co.). Macintyre Brook, Nundubbermere, Pikedale Goldfield, Pike's Cr., Treverton, Thulimbah.

Bulwer Co—Miles.

Carnarvon Co.

Clive Co.—Stanthorpe Mineral Field (in part—*See also under* Bentinck Co.). Texas, Silver Crown Mine (silver, copper), Silver King Mine (silver, lead), Silver Spur Mine (silver, lead, copper, gold), Glenlyon, Jibbinbar, Macdonald Prov. Goldfield.

Derby Co.

Lytton Co.—Chinchilla, Jandowie, Jingi Jingi, Warra, Macalister (coal).

Marsh Co.—Goondiwindi, Stanthorpe Mineral Field (*in part—See also under* Bentinck Co.

Merivale Co.—Stanthorpe Mineral Field (in part—*See also under* Bentinck Co.). Allora, Canal Cr. Goldfield, Dalveen, Hendon, Killarney, Leyburn Goldfield, Palgrave Goldfield, Talgai Goldfield, Tannymorel (Coal), Thanes Cr. Goldfield, Warwick.

Pring Co.

Rogers Co.

Mineral References and Statistics: *See under* names of Principal Mining Centres.

Geological Note: To the north, south, east, and west of Toowoomba there are Coal Measures of Walloon Formation (Trias-Jura), covered or partly covered, by an old basalt flow. To the west of Toowoomba, beyond the Condamine River, the Coal Measures are covered by "Desert Sandstone" (Upper Cretaceous) and Rolling Downs (Lower Cretaceous), and in old watercourses there are Tertiary drifts containing the fossil remains of animals. *See* G.S.Q. Pub. No. 217 for map.

Collieries.—*King's Siding*—Gowrie Colliery, and several abandoned mines; *Kingsthorpe*—Sugarloaf, Kingsthorpe, Sunrise, and Enterprise Collieries; *Oakey*—Federal Colliery; *which see.*

Darlington Reserve, nr. Beaudesert Rail. Stn. *Min.Ref.* Amethyst, *see* 7172; Opal (common), 6994.

Dawson Coal Mines, W. side of Dawson R., 75 miles S.W. of Rockhampton. Dunstan Seam of Coal discovered in 1898. *Min.Ref.* Coal, *see* 1691.

—— Co.; Leichhardt Dist. *See map*, Pl. 10.

Dawson River, S.S.W. of Rockhampton. *See* Pls. 10, 34. *Min.Ref.* Coal, *see* 1691, 1692; Copper ore, 1850; Kerosene Shale, 5713; Opal (common and wood), 6985. *See also* Supplementary Report List, No. 139.

Geological Note: Permo-Carboniferous rocks prevail throughout the district. The older series (Gympie Formation) contain small irregular copper deposits, while in the later-formed series (Dawson-Mackenzie Coal Measures) there are several anthracitic coal seams of fine quality. Over the coal measures "Desert Sandstone" has been deposited, and remnants of this formation now exist as ranges and isolated peaks. *See* G.S.Q. Pub. No. 155 for details and map.

—— —— Bores (Dunstan Co. and Dawson R. Co.). *See under* Coal Bores. Several bores have been sunk, of which there are no records available.

Decorative Stones. *See* Ornamental Minerals.

Dee River. Rises 8 miles E. of Mt. Morgan and flows S.W. and N.W. into the Dawson R. 65 miles S.W. of Rockhampton. Length, about 65 miles. *Min. Ref.* Biotite, *see* 309A; Copper carbonate, 1960; Copper Pyrites, 2310; Epidote, 2606, 2607; Gold (alluvial) 3395, 3402, (nugget) 3446; Ironstone, 5627; Limestone, 692; Limonite, 5918; Mispickel, 6804. *See also under* Gov. Mining Jour., Report No. 26.

—— —— Gold Nuggets. First nuggets discovered 1st Sept., 1903. *Ref.* A.R.D.M., p. 152 (1903). These nuggets were obtained in alluvial deposits, and it was commonly supposed that they were formed where they were found. An examination of some of the specimens revealed the fact that they had crystallized between and around quartz prisms, and evidently in a reef. Their surfaces were always etched, an effect caused by the leaching action of mineral solutions after they were deposited in the alluvium. They are remarkable for the quality of gold they contain, this being so much higher than the gold from the reefs in the vicinity, yet corresponding with that at Mt. Morgan, many miles away. *See* G.S.Q. Pub. No. 190 for notes. *See* Min.Ref. 3446 for list of nuggets.

—— —— Alluvial Gold Mines, Mt. Morgan Goldfield. *Min.Ref.* Calcite, *see* 547A; Copper Pyrites, 2310A; Epidote, 2605; Gold (alluvial) 3395, (nuggets) 3446.

—— —— Copper Mines, above Dundee, 20 miles S.S.W. of Mt. Morgan. *Min. Ref.* Biotite, *see* 309A; Chalcedony, 1363A; Copper carbonate, 1960; Copper Pyrites, 2310; Ironstone, 5627; Mispickel, 6804.

—— —— and Dawson (junction of), S.S.W. of Rockhampton. *Min.Ref.* Halloysite, *see* 4662.

Deep Bore. *See under* Artesian Bore. No. 264.

—— Cr., Gympie Goldfield. *Min.Ref.* Gold (alluvial), *see* 3416.

—— —— Leads, Clermont. *Includes* Bald Hills, Chinaman's Gully, Deep Cr., Long Gully, Nuggety Gully, Prince of Wales Gully, Puddler's Gully, Red Hill, Scotchman's Gully Leads. *Min.Ref.* Gold (alluvial), *see* 3321.

—— Ground, Black Ridge, Clermont. *Min.Ref.* Coal Bands, *see* 1660-1664; Epsomite, 2616; Gold (alluvial), 3300-3306; Halloysite, 4661; Hematite, 4765.

Deep Tin Lead. Herberton. Discovered in May, 1883, by J. Macdonald. *Min. Ref.* Cassiterite, *see* 1123; Gold, 3255; Ilmenite, 4899; Natrolite, 6898; Olivine, 6926; Opal (wood), 7007; Topaz, 7800; Wolfram, 8015. *See also under* Gov. Mining Jour., Report No. 121.

Geological Note: This important tin lead has been recognized as an old river course connected, although not identical, with the Wild River. It is covered in places by basalt, and the portions of it not denuded away occupy positions on the hills much above the present level of the river. *See* G.S.Q. Pub. No. 115 for details and maps.

Deep Lead, Pentland, Cape R. Goldfield. *See maps*, Pls. 16, 17. *Min.Ref.* Gold (alluvial), *see* 3272.

Geological Note: The drift above the wash is composed of pebbles of quartz, schist, granite, and quartzite. The "wash" is made up of quartz pebbles in a cement, and rests on a bedrock of decomposed schist. *See* G.S.Q. 96 for details and map.

—— —— Gold Bores, Gympie. *See* Gympie Goldfield, *under* Gold Bores.

—— Levels Mines, Charters Towers Goldfield. *Min.Ref.* Gold, *see* 3903; Iron Pyrites, 5167.

—— Mines, Saratoga Leases (406 and 537), Ravenswood Goldfield. *Min.Ref.* Gold, *see* 4033.

—— Rocky Gorge, N.byE. of Murphy's Cr. Rail. Stn. *Min.Ref.* Copper Pyrites, *see* Galena, 3033A; Zinc-Blende, 8175A.

Deep Sinking Vote. Up to June, 1912, the sum of £80,702 has been spent by the Government in assisting mining in this way. *See* details *under* Subsidies.

—— Water Bore. *See under* Artesian Bores. No. 207.

Deer Park Sub-artesian Bore. *See under* Artesian Bores. No. 157.

Defiance Reef, Golden Valley, Croydon Goldfield. *Min.Ref.* Gold, *see* 3523; Iron Pyrites, 4954.

—— Tin Claim, Herberton. *Min.Ref.* Cassiterite, *see* 1079; Fluorspar, 2670; Serpentine, 7385; Wolfram, 8016.

Degalgil Cr., S. of Gladstone. *Min.Ref.* Limonite, *see* 5905.

Degilbo. 58 miles (by rail) W. of Maryborough, on Maryborough-Gayndah line. *Co.* Cook; *Dist.* Burnett. *Lat.*, 25° 29′ S.; *Long.*, 152° 00′ E.

RAILWAY BASE for Paradise, Stanton-Harcourt, Gebangle, and Mt. Shamrock Gold and Mineral Fields; Havilah Gold Mine, Commonwealth Gold and Bismuth Mine, and Don Jon Bismuth Mine at Mt. Havilah; Robina Copper Mines at Mt. Hawick; and Mt. Hastings Gold Mine.

GEOLOGICAL NOTE: The country about Degilbo is made up of altered sedimentary rocks of probably Gympie Formation (Permo-Carboniferous). Slates occur about the township, and extend easterly towards Biggenden. Limestone quarries have been worked 1½ mile to the east of Degilbo, but are now idle. Mineral deposits of iron, bismuth, gold, and copper are found in association with the altered sedimentary rocks near the granite, but are not being exploited. The district is well worth further prospecting for bismuth, copper, zinc, and gold deposits. *See* G.S.Q. Pubs. Nos. 168 and 207 for details.

—— (Par. of) (Pors. 52v. and 54v.). *Min.Ref.* Manganese-dioxide, *see* 6398.

—— and Kilkivan (between). *Min.Ref.* Limestone, *see* 628.

—— and Stanton-Harcourt Runs (between). *Min.Ref.* Gold (alluvial), *see* 3192; Massicot, 6523.

Deighton (Edward). Once Under Secretary of Mines. Term of office—1880 to 1887.

Deighton R., 12 miles S. of Welcome Rail. Stn. (Cooktown line). *Min.Ref.* Coal, *see* 1603.

Delaney R., Charleston, Etheridge Goldfield. *Lat.*, 18° 30′ S.; *Long.*, 143° 23′ E. *Min.Ref.* Fluorspar, *see* 2656; Gold, 3723A.

Delena (Hall Sound), Brit. New Guinea. *Min.Ref.* Limestone (coralline), *see* 727.

Department of Mines—

HEAD OFFICE: Treasury Buildings, Brisbane.

Minister: Hon. J. Geo. Appel, Secretary for Mines.
Permanent Head: A. R. Macdonald, Under-Secretary for Mines.

SUB-DEPARTMENTS *(for which see separate heading).*
Geological Survey of Queensland.
Inspectors of Mines.
School of Mines, Charters Towers.
Wardens.
Government Mining Journal.
Board of Examiners for Mining Managers.

FORMER MINISTERS: *See* Secretaries for Mines (List of).

FORMER UNDER-SECRETARIES: *See* Under-Secretaries for Mines (List of).

PUBLICATIONS—

Annual Reports of the Under-Secretary for Mines. From 1878 to 1912. Contain Reports of Under-Secretary, Wardens, State Mining Engineer, Inspectors of Mines for Southern, Central, and Northern Divisions; Director, Charters Towers School of Mines; Geological Survey of Queensland; Editor of "Queensland Government Mining Journal," also containing Statistical Tables referring to output and value of minerals, etc., etc.

Pamphlets—
Mining Acts and Regulations.
General Report on Mining Industry for 1895 (P. F. Sellheim).
The Establishment of Smelting Works in Queensland (C. F. V. Jackson).
Resourceful Queensland (H. E. Poole).

Special Reports in Annual Reports—
Charters Towers Goldfield (History of), (1887), pp. 23-27.
Ravenswood Goldfield (History of), F. Vaughan (1887), pp. 35-38.
Rockhampton Goldfields (History of), G. L. Lukin (1887), pp. 45-49.
Eidsvold Goldfields (History of), E. F. Craven (1887), pp. 66-68.
Stanthorpe Tinfields (History of), P. Cardew (1887), pp. 77-79.
Chillagoe Caves (Description of), W. Thompson (1891), pp. 135-8.
Mt. Morgan G.M. Coy. (Modus operandi at) G. H. Irvine (1895), pp. 50-52.
Western Queensland Opal Mining. J. B. Hickie (1895), p. 54.
Queensland Coal Mining Industry and Coal Resources (Report on), W. Fryar (1899), pp. 156-195.
Conditions and Modes of Working on the Goldfields of Queensland (Report on). W. Blane (1900), pp. 37-42.
Notes on the Copper Deposits of the Mt. Perry District. A. Gibb (1901), pp. 109-113.
Ventilation in Shaft of West of Scotland Mine, Gympie. W. Fryar (1902), p. 68.
Hamilton and Coen Fields. W. M. Lee-Bryce (1902), pp. 110-111.
Mines of the Central District. M. Russell (1902), pp. 105-108.

GEOLOGICAL NOTE: The river flows through the Rolling Downs Formation (Lower Cretaceous). Desert Sandstone (Upper Cretaceous), in which opal is found, occurs in the vicinity. *See* G.S.Q. Pub. 217 (Map).

Diamond. *Compo.*, pure carbon. Colourless. *H.* = 10. *Sp.gr.* = 3·5. *See map,* Pls. 11, 13.

NOTE: Diamonds may be considered to be of rare occurrence in Queensland, occasionally being found in the gold drifts of Gilberton, the sapphire drifts of Anakie, and the tin drifts of Stanthorpe. Some clear stones from Stanthorpe have been cut into perfect gems, but others have been returned from the lapidaries only partly faceted, the crystals being too hard to work in the ordinary way. Stones found at Anakie and Gilberton have not been sent to the lapidaries, and so their adaptability for gem-making has not been determined. The Stanthorpe, Gilberton, and Anakie diamonds are nearly all well crystallised in modifications of the octohedron and triakis octohedron, and make good cabinet specimens.

DISCOVERIES: *See under* Discoveries, separate heading.

2573. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Gilbert River, about 50 miles S.E. of Charleston, Etheridge Goldfield. *Co.* Victor; *Dist.* **Cook.** *Ref.* B.D.

Dioptase. *Compo.*, Silicate of copper. *Colour*, Emerald green. *Streak*, Green. *H.* = 5. *Sp.gr.* = 3·2-3·3.

2581. —— (?). *Assoc.with* Malachite, Atacamite, Chrysocolla, and Tourmaline, in schist. *Loc.* Weka M.C., Eva Group, 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, pp. 159 and 160 (1908).

2582. ——. *Assoc.with* Redruthite, Malachite, Chrysocolla, Iron Pyrites, and Limonite, in gossan, turgite, and schist. *Loc.* Trump Extd. M.C. (368), McPhail Group, Florence R., 34 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 73-76 (1908).

2582A. ——. *Assoc.with* Gold, Native Copper, Copper Pyrites, Malachite, Atacamite, Chrysocolla, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

2583. ——. Muldiva, 8 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

2584. ——. Mungana Rail. Stn. (Chillagoe line), 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

Diorite Reef, Gympie Goldfield. *Min.Ref.* Gold, *see* 4502.

Discoveries.—*See* other Notes under name of locality.

Artesian Water. First successful bore, Barcaldine, 1888.

Anthracite—In 1898 at Dawson R., Central Q'land; 1901 at Hampden, nr. Mackay; 1904 at Pascoe R., N. of Cooktown.

Antimony—In 1872 at Neardie; 1877 at Northcote; 1891 at Cocoa Creek.

Bismuth—In 1888 at Oakey Cr., Biggenden.

Coal—In 1827 at Ipswich; 1843 at Redbank; 1845 at Mackenzie R., near Burngrove Cr.; before 1854 at Moggill; 1854 at Bulimba and Caloundra; 1862 at Bedford's Crossing, Mackenzie R.; 1864 at Blair Athol, Clermont; 1864 at Burrum; 1867 at Howard; 1868 at Jellinbah (Mammoth Seam); 1872 at Little River, near Cooktown; 1876 at Clifton; 1880 at Torbanlea; 1885 at Jimbour (first output); 1882 at Tannymorel; 1887 at Kingsthorpe, Darling Downs; at Stewart's Cr., Townsville; and at Styx River, near St. Lawrence; 1898 at Dawson River (Dunstan Seam); 1904 at Bluff Mine, Central Rail.; 1905 at Pascoe R., N. of Cooktown.

Cobalt—About 1886 at Mt. Cora and Mt. Clara Hills.

Copper—In 1862 at Peak Downs, Clermont; 1867 at Cloncurry and Einasleigh River, Argylla Cr., and Duck Cr., nr. Cloncurry; 1869 at Mt. Perry; 1870 at Mt. Warminster; 1871 at Leichhardt R., Cloncurry; about 1871 at Mt. Flora and Mt. Orange; 1881 at Mt. Oxide, Cloncurry; 1888 at Sundown, Ballandean; 1890 at Silver Spur, Texas; 1893 at Glassford Cr., but first lease was only applied for in 1899; 1895 at New Cannindah; 1896 (?) at Mt. Chalmers; 1898 at Many Peaks; 1902 at O.K.; 1903 at Mt. Hector.

Diamond—In 1872 at Spring Cr., Stanthorpe; 1901 at Policeman Cr., Anakie.

Gold—

1852 at Black Snake G.F. and Lord John's Swamp (gold spec. found). Lucky Valley G.F.

1853 at Calliope G.F. and near Port Curtis.

1856 at Canning Downs (traces of gold).

1857 at Canoona G.F.

1858 at Eidsvold G.F. (?).

1861 at Peak Downs G.F. (Clermont).

1862 Calliope G.F. (opened).

1863 at Canal Cr. G.F., Cawarral G.F., Expedition Cr. nr. Clermont, and Talgai G.F.

1864 at Hurley's, Clermont.

1865 at Crocodile Cr. G.F., Daisy Cr. (trib. of Dee R.), Gabriel's Gully, Gavial Cr., and Springs Lead nr. Clermont.

1866 at McDonald's Flat nr. Clermont, Morinish G.F., and Ridgelands G.F.

1867 at Blackfellow's Gully, Cloncurry G.F., Gympie G.F., Herbert's Cr., Gogango, Langmorn G.F., Marodian G.F., Raglan G.F., and Rosewood G.F.

1868 at Cape River G.F., Enoggera G.F., Mt. Wheeler, Mt. Wyatt G.F., New Zealand Gully, Ravenswood G.F., and Thane's Cr. G.F.

1869 at Gilbert R.

1870 at Cania and Kroombit G.F., Chowey G.F., Bishop's Cr., Cloncurry G.F., Garibaldi Diggings, Mt. Chalmers, and Mt. Warminster.

1871 at Etheridge G.F., Marengo Diggings, and Milton (Norton) G.F.

1872 at Charters Towers and Normanby (Bowen) G.F.; Palmer G.F. (first discovery).

Discoveries—*continued:*

Gold—*continued:*

1873 at Fisher's Cr. at Cloncurry, Miclere at Clermont, and Palmer G.F. (payable gold and first rush).
1874. Further discoveries at Palmer G.F. (second rush).
1875 at Hodgkinson G.F.
1876 at Coen G.F.
1877 at Mt. Shamrock Mine, Pikedale G.F. (reef found), and Yatton G.F.
1879 at Mulgrave G.F., Reid's Cr. G.F., and Thane's Cr. (reef found).
1880 at Boolboonda G.F
1881 at Nebo (Mt. Britton) G.F.
1882 at Mt. Morgan Mine and Leyburn G.F.
1885 at Croydon G.F., Stanton-Harcourt G.F., and Taranganba G.F.
1886 at Brovinia G.F., Grass-tree G.F., Glastonbury G.F., Rannes G.F. (Kaufman Diggings), and Mt. Shamrock.
1887 at Barmundoo (Tableland) G.F. and Russell G.F.
1888 at Bompa G.F., Gebangle Gold Mines, and Woodlark Is.
1889 at Paradise G.F.
1890 at Starcke G.F.
1891 at Agate Downs G.F.
1892 at Yorkey's G.F.
1893 at Ulam G.F. and Mareeba G.F.
1894 at Horn Is. G.F. and Windsor G.F.
1895 at Balcooma G.F. and Mt. Success.
1896 at Green Hills G.F.
1898 at Jordan Cr. G.F. and Gaeta G.F.
1899 at Hamilton G.F.
1900 at Targinnie.
1902 at Percy G.F.
1903 at Dee R.
1904 at Alice R. G.F.
1905 at Carrington G.F. and Macdonald Prov. G.F.
1907 at Oaks G.F.
1909 at Hayes Cr. Prov. G.F.
1911 at Gold Top Prov. G.F.

Manganese—In 1895 at Mt. Miller; 1908 at Pie Cr., nr Gympie.

Mercury—About 1872 at Mt. Perry; about 1876 at Kilkivan.

Meteorites—*See under* separate heading.

Molybdenite—1892 at Bamford; 1894 at Wolfram Camp.

Monazite—In 1904 in alluvial tin deposits at Emu Cr., nr. Fossilbrook, and in wolfram lodes at Bamford, Nettles Creek, and Emuford.

Opal—In 1872 at Listowell Downs, Springsure; 1873 at Bulloo R.; 1885 at Bull's Cr.; 1888 at Cunnavalla, Horse Cr., and Opalton; 1893 at Lushington (Paroo Opal Field); 1894 at Kynuna; 1897 at Koroit.

Platinum—In 1869 at Brickfield Gully, Gympie; 1888 (?), Russell River.

Ruby—About 1878 at Anakie.

Sapphire—In 1870 at Anakie.

Silver—In 1879 at Ravenswood; 1881 at Argentine (Star R.), and Newelton; 1884 at Montalbion; 1888 at Ballandean; 1890 at Silver Spur Mine, Texas.

Tin—

1854 at Stanthorpe.
1872, opening up of Stanthorpe Mineral Field.
1875 at Running Cr., Kangaroo Hills.
1879 at Cannibal Cr., Palmer G.F., and Herbert R., Herberton.
1880 at Dry R., Prospector's Gully, Herberton.
1881 at Nettle's Cr., Coolgarra.
1883 at Deep Lead, Herberton.
1885 at Annan R. Tinfield, Bloomfield R.
1886 at Mt. Spurgeon.
1887 at Pascoe R., Bowden M.F.
1888 at Koorboora Tin Lode, Chillagoe Mineral Field.
1895 at Newelton, in Lancelot Tin Mine.
1901 at Smith's Cr., Herberton M.F.

Wolfram—In 1892 at Bamford and at Pascoe River (Bowden Mineral Field); 1894 at Wolfram Camp, Hodgkinson G.F.; 1899 at Ollera Cr., Seaview Range; 1900 at Rosedale by Joseph Taylor.

Discovery of New Goldfields. *See under* Rewards for, etc.

Dismal Cr. Rises 50 miles N.byW. of Cloncurry, and flows into the Cloncurry R., 110 miles N.byE. of Cloncurry. Length about 65 miles. *Min.Ref.* Chalcedony, *see* 1336A; Garnet (Andradite), 3156; Porcellanite, 5660A.

Dispute M.L. (696), Cloncurry. *Min.Ref.* Limonite, *see* 5741; Malachite, 6070.

District Boundaries. *See* General State Map, Pl. 1.

District Maps. *See maps,* Pls. 2 to 21.

Districts of the State. The State is divided into the following fifteen districts, the areas being given in square miles:—

Burke	102,161	Leichhardt ...	48,354
Burnett	12,457	Maranoa	39,235
Cook	99,378	Mitchell	55,362
Darling Downs ...	25,390	Moreton	8,828
Gregory North ...	84,791	Port Curtis ...	14,054
Gregory South ...	49,403	Warrego	58,334
Kennedy North ...	34,114	Wide Bay ...	8,128
Kennedy South ...	30,514		

Islands make up additional areas. There are 503 sq. miles attached to Burke, 397 sq. miles to Cook, 349 sq. miles to Kennedy North, 315 sq. miles to Kennedy South, 274 sq. miles to Moreton, 316 sq. miles to Port Curtis, and 666 sq. miles to Wide Bay, the area of the whole of the islands being 2,540 sq. miles.

The total area of the State, exclusive of islands, is 670,500 sq. miles (429,120,000 acres). With the islands included, the area is 673,040 sq. miles (430,745,600 acres).

The Districts embrace 319 counties, for details of which *see under* names of Districts. *See also* Plates 1, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20.

Many references are given in *official* reports to "districts" which have no connection whatever with the official classification above, and may be taken to be synonymous with "environments"—Gladstone "District" and Rockhampton "District" are examples of this irregularity.

Divided Is., Keppel Bay. *Min.Ref.* Turquoise, *see* 7911.
GEOLOGICAL NOTE: *See under* Keppel Bay Islands.

Dixon, Par. of (Por. 38), 13 miles E. of Esk Rail. Stn. *Min.Ref.* Copper ore, *see* 2045.

—— —— (Por. 140), 13 miles E. of Esk. *Min.Ref.* Azurite, *see* 243; Copper Pyrites, 2280; Hematite, 4777; Iron Pyrites, 5345; Malachite, 6348; Serpentine, 7390.

Dixon (Russell).

GEOLOGICAL SURVEY PUBLICATIONS—

(*See* list under "Geol. Survey" for details.)

135. Index to Names of Places, Mines, Reefs, etc., occurring in Geological Survey Reports, from No. 1 to No. 134, inclusive, 1901.
178. Index No. 2 to Names of Places, Mines, Reefs, etc., occurring in Geological Survey Reports, from No. 136 to No. 177, inclusive, 1902.
197. Index (No. 3) to Publications Nos. 177 to 196, inclusive, being Vol. I. of New Series, 1905.
214. Index (No. 4) to Publications Nos. 198 to 213, inclusive, being Vol. II. of New Series, 1908.
227. Index (No. 5) to Publications Nos. 215 to 226, inclusive, being Vol. III. of New Series (in preparation).

Dolomite. *Syn.* Bitter Spar. Magnesian Limestone. *Compo.*, Carbonate of lime and magnesia. *Colour*, usually white. *H.* = 3·5-4. *Sp.gr.* = 2·8-2·9. *Contents* (*max.*), Lime 30 per cent., Magnesia 21 per cent.

Geological Note: Deposits of dolomite occur at Flinders and Antony on the Fassifern Railway line, about 40 miles from Brisbane. They form irregular masses where basalt dykes have penetrated coal measures, appear to be of great extent, and are normal in their proportion of magnesia and lime.

2584A.——. In irregular masses. *Assoc.with* basalt. *Loc.* Between $\frac{1}{2}$ and 4 miles S. of Flinders Rail. Stn., Fassifern Rail. Line, 39 miles from Brisbane. *Co.* Churchill; *Dist.* Moreton. *Ref.* B.D. *Analyses:* Selection 102—Moisture, ·2; loss on ignition, 43·9; silica, 4·2; iron, 0·8, alumina, 2·1; lime, 28·6; magnesia, 19·9 = 99·7 per cent. Selection 100—Moisture, ·4; loss on ignition, 42·5; silica, 6·5; iron, 0·9; alumina, 4·5; lime, 28·4; magnesia, 16·7 = 99·9 per cent. Selection 100 (in hole)—Moisture, ·8; loss on ignition, 40; silica, 11·7; iron, 1·2; alumina, 3·8; lime, 26·1; magnesia, 16·1 = 99·7 per cent. Selection 17—Moisture, 1·2; loss on ignition, 38·8; silica, 14·8; iron, 1·3; alumina, 1·3; lime, 24; magnesia, 18·4 = 99·8 per cent.

2585. ——. Biggenden Mine, nr. Biggenden, $4\frac{1}{2}$ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* **Burnett.** *Ref.* B.D.

2586 ——. *Assoc.with* Ankerite, in breccia. *Loc.* Mt. Shamrock Mine, $5\frac{1}{2}$ miles W.N.W. of Degilbo, 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 168, p. 6 (1901).

Downfall Bore. *See under* Artesian Bores. No. 313.

—— Cr. Flows S.W. into Cooranga Cr., 30 miles N.N.W. of Dalby. *Min.Ref.* Travertine, *see* 748.

Downman's Bores. *See under* Coal Bores.

—— Sel. 68 [63], ½ mile E. of Logan Village Rail. Stn. *Min.Ref.* Coal, *see* 1763.

Downpatrick Reef, Jessop's Hill, Palmer Goldfield. *Min.Ref.* Gold, *see* 3672.

—— ——, Northcote, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3761.

Doyle's Sub-artesian Bore. *See under* Artesian Bores. No. 349.

Dozzler Copper Lode. *See under* MacFadzen's M.F., 1749.

Drafting Yard Bore. *See under* Artesian Bores. No. 432.

Drake Co. Kennedy South Dist. *See map*, Pl. 14.

Dreadnought M.L. (452), Cloncurry. *Min.Ref.* Chalcedony, *see* 1338; Iron Pyrites, 4969; Jasper, 5635; Limonite, 5821.

—— Tin Mine, Watsonville. *Min.Ref.* Cassiterite, *see* 894; Felspar, 2634; Garnet, 3103; Wolfram, 7950.

Dream Extended Gold Mine, Bompa Goldfield. *Min.Ref.* Gold, *see* 4246.

Dredges (mining) in Queensland (1912).
Cania Gold Dredge.
Clermont Gold Dredge (dismantled).
Crocodile Cr. (nr. Rockhampton) Gold Dredge (removed to Cania).
Dalcoath (Stanthorpe) Tin Dredging Co.
Rover, or Four-mile Cr. (Stanthorpe), Tin Dredge.
Beverley Tin Dredge, Stanthorpe.
Horse Shoe Tin Dredge, Spring Cr., Stanthorpe.
Lode Creek Tin Dredge, on trib. of Sugarloaf Cr., Stanthorpe.
Red Hill Tin Dredge, Lode Creek, nr. N.S.W. border, Stanthorpe.
Stanthorpe Co.'s Tin Dredge, Blue Mt. Creek, Stanthorpe.

NOTE.—For further references to Stanthorpe Dredges, *see under* Stanthorpe.

Dreghorn Diggings, Ravenswood Goldfield. *Min.Ref.* Copper Pyrites, *see* 2241; Galena, 2955; Gold, 4081-4084; Hematite, 4743; Iron Pyrites, 5277, 5278.

Drinan's Gorge. *See under* Artesian Bores. No. 395.

Drummond Co. Kennedy South Dist. *See map*, Pl. 14.

—— Cr., E. of Copperfield, nr. Clermont. *Min.Ref.* Gold (alluvial), *see* 3329.

Drummond Range, N.W. of Clermont. About *Lat.* 23° 59′ S.; *Long.* 147° 10′ E. *See maps*, Pls. 14, 15. *Min.Ref.* Gold (alluvial), *see* 3291.

GEOLOGICAL NOTE: The rocks on the Range are made up of sandstones belonging to the Star Formation (Permo-Carboniferous), some of the peaks of the Range being capped with basalt.

——, Douglas, and Clermont Crs. (in gullies between), Clermont Goldfield. *Min.Ref.* Gold (alluvial), *see* 3330.

—— and Douglas Crs. (3 miles below junction of), 4 miles S.E. of Copperfield, nr. Clermont. *Min.Ref.* Limestone, *see* 661.

Drury Co. Kennedy South Dist. *See map*, Pl. 14.

Dry Creek Sub-artesian Bore. *See under* Artesian Bores. No. 131.

Dry R. Mining Centre. *See also under* Newellton.

Situation: *See maps*, Pls. 16, 17, 22. Branch of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton. *Co.* Cardwell; *Dist.* Kennedy North. Centre about *Lat.* 17° 30′ S.; *Long.* 145° 20′E.

Population: 79 (estimated 1910).

Mineral References: Silver (Argentite), 98. Lead (Anglesite), 39; (Cerussite), 1219-1223; (Galena), 2849-2861; (Linarite), 5937, 5938; (Massicot), 6533-6537; (Minium), 6596, 6597. Copper (Azurite), 211; Chalcanthite), 1328; (Copper Carbonate), 1910, 1911; (Copper Pyrites), 2210; (Malachite), 6280, 6281; (Tile Ore), 2562. Tin (Cassiterite), 1063, 1063A. Antimony (Stibnite), 7639, 7640. Zinc (Calamine), 442; (Zinc-Blende), 8109, 8110. Iron (Iron Pyrites), 5138; (Ironstone), 5546; (Marcasite), 6506; (Siderite), 7408. Other Minerals—Fluorspar, 2668; Topaz, 7799.

Geological Note: The country about the Dry River consists principally of altered sedimentary rocks. They contain numerous deposits of tin, silver, copper, and lead. *See* G.S.Q. Pubs. Nos. 13, 48, 119 for details.

Geological Publications: Reports—Nos. 13 (1883), 31 (1886), 48 (1888), 119 (1897). Map No. 220 (1909). *See* Geol. Surv. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Herberton.

Dry and Wild Rivers (junction of), 13 miles S.S.W. of Herberton. *Min.Ref.* Stibnite, *see* 7640.

Dryfesdale, Glastonbury. *Min.Ref.* Pyrolusite, *see* 7133.

Duan (Normanby) Is., D'Entrecasteaux Group, Brit. New Guinea. *Min.Ref.* Cinnabar, *see* 1564; Gold (alluvial), 3421; Iron Pyrites, 5473.

Duaringa, 65 miles (by rail) W.S.W. of Rockhampton. *See* Pl. 34. *Lat.*, 28° 38′ S.; *Long.*, 149° 39′ E. *Min.Ref.* Coal, *see* 1693; Oil-bearing Shale, 6914; Jasper, 5651; Kaolin, 5693.

Geological Note: The rocks in the immediate vicinity are sandstones and clays belonging to the "Desert Sandstone" (Upper Cretaceous). To the west there are exposures of Dawson-Mackenzie coal measures (Permo-carboniferous), and a continuation of these rocks probably exists below the "Desert Sandstone" about Duaringa. *See* G.S.Q. Pub. No. 155 for details and map.

—— Bore, nr. Duaringa Rail. Stn. *Min.Ref.* Coal (lignite), *see* 1693; Oil-bearing Shale, 6914. *See also under* Coal Bores.

Dublin Co., Maranoa Dist. *See map*, Pl. 12. *See also under* Artesian Bores, No. 252.

Duchess Gold and Mineral Field—

Situation. *See map*, Pls. 20, 21, 23. On Burke River, about 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. Embraces the town of Mairindi.

Proclamation of Field: First and only one, July, 20th, 1912. Now included, by proclamation of 9th January, 1913, in the Cloncurry Gold and Mineral Field, *which see*.

Area: 9 square miles (5,760 acres).

Mineral References: *See under* Duchess Group of Copper Mines.

Duchess Group of Copper Mines, Cloncurry. *Includes* Duchess, Ivanhoe, Wild MacGregor, Maude A, and Revenue M. Leases. *Min.Ref.* Azurite, *see* 205; Bornite, 420; Calcite, 492; Copper Pyrites, 2199, 2200; Cuprite, 2447, 2448; Epsomite, 2614; Limonite, 5860, 5861; Malachite, 6255A-6258; Redruthite, 7285; Tetrahedrite, 7769; Tile Ore, 2552.

—— M.L. (275), Cloncurry. *Min.Ref.* Bornite, *see* 420; Calcite, 492; Cuprite, 2447; Copper Pyrites, 2199, 2200; Epsomite, 2612; Limonite, 5860; Malachite, 6255A-6257; Redruthite, 7285; Tetrahedrite, 7769; Tile Ore, 2552.

—— Reef, Mt. Remarkable, Cape R. Goldfield. *Min.Ref.* Gold, *see* 4051.

—— ——, Flanagan's, Croydon Goldfield. *Min.Ref.* Galena, *see* 2710; Gold, 3502; Iron Pyrites, 4946.

Duck Cr., trib. of Cloncurry R., rises about 29 miles S.W. of Cloncurry, flows S.E. into the Cloncurry R., 27 miles S.byW. of Cloncurry. About *Lat.* 20° 56′ S.; *Long.* 140° 12′ E. *Includes* Ready Rhino, Boomerang, Daisy, Tharsis, Belfast, Pioneer Chief, Diagonal, Columbiad, Chinaman, Eva, White Oxide, Alice, and Tambourine Groups of Copper Mines, *which see*. *Min.Ref.* Azurite, *see* 161; Chlorite, 1421; Chrysocolla, 1497; Copper carbonate, 1876; Copper (native), 1982; Copper ore, 2017; Copper Pyrites, 2094-2096; Epidote, 2591; Gold, 3470; Göthite, 4562; Hematite, 4688; Iron Pyrites, 4929; Limonite, 5750-5764, 5784-5787, 5789-5791; Malachite, 6093-6121, 6141-6153, 6158A; Redruthite, 7211-7227, 7242-7252; Siderite, 7402; Stibnite, 7604; Tenorite, 7710; Tetrahedrite, 7756; Tile Ore, 2496-2513, 2520-2527, 2529A; Tourmaline, 7814, 7815; Turgite, 7782-7784.

Smelting Works: *See under* Smelting Works in Queensland.

Duck Creek Opal Field—

Situation: *See maps*, Pls. 18, 19, on Yowah Cr., 77 miles N.W.byW. of Cunnamulla Rail. Stn. (Western line), in the Paroo Mineral Field. *Co.* Humeburn; *Dist.* Warrego. Centre about *Lat.* 17° 25′ S.; *Long.* 144° 28′ E.

Principal Mining Centres: New and Old Fields, and Sheep Station Creek, *which see*.

Mineral Statistics: Opal. *See tables*, Pls. 44, 46, 46A, given *under* Paroo Mineral Field.

Mineral Reference: Opal (precious), *see* 6955.

Geological Note: *See under* Paroo Mineral Field.

Geological Publication: Report—No. 177 (1902). *See under* Geol. Sur. Pub. List for title.

Warden (acting) stationed at Cunnamulla. Inspector of Mines stationed at Gympie.

Duck and Chinaman's Crs. (between), Cloncurry. *Min.Ref.* Psilomelane, *see* 7079.

—— Holes. *See under* Artesian Bores. No. 162.

Eidsvold Goldfield—

Situation : *See maps*, Pls. 4, 5. The township is 35 miles N.W. of Gayndah Rail. Stn., on the Burnett River. *Co.* Yarrol; *Dist.* Burnett. Centre about *Lat.* 25° 23′ S.; *Long.* 151° 18′ E.

Discovery : Gold was discovered in 1858 by a shepherd known as Loddon Bill, but nothing was done until the year 1862. The first gold escort left Eidsvold on April 27th, 1888, with 1,121 oz. of gold.

~~History : *See* History of Eidsvold, by E. F. Craven, in A.R.D.M. (1891).~~

Population : No information available, probably under 30.

Proclamation of Field : First and only one, Nov. 17th, 1887, as follows :—Commencing at the junction of the Harkness Boundary Creek with the Burnett River, and bounded thence by the right bank of that creek upwards to a point about thirty-six chains north of a box-tree marked broad arrow over HK over VI in a triangle, and east of an apple-tree marked broad arrow over XCVI over BT in a triangle on the left bank of the Burnett River; and on the north by a line west to the Burnett River at a point opposite the last-named tree, and by the right bank southerly to the point of commencement.

Area : 7040 acres (11 sq. miles).

Leases : Gold-mining Leases, nil. Miners' Homestead Leases 327; area, 2,599 acres. (1912.)

Mineral Statistics : Gold, *see tables and diagram*, Pls. 36, 46, 46a, 47; Silver, Pls. 37, 46, 46a; Limestone, Pls. 41, 46, 46a.

Statistical Note : Greatest recorded annual gold yield (1890) was 13,597 fine oz.; value, £414,298. Since 1907 the yields have been very small.

The first return (1888) was nearly 6,000 oz., those in 1889 and 1890 averaging 13,450 oz. In 1891 the yield was a little over 9,000 oz., and in 1892 it increased to 12,639 oz., after which the yields gradually decreased to 253 oz. (1907), no yield being recorded for 1908. The total yield of gold to end of 1912 equalled 97,626 fine oz., the value being £414,688, which is equal to 0·55 per cent. of the whole gold production of the State.

Mineral References : **Gold,** *see* 3636-3656; Lead (Anglesite) 13, (Galena) 2733-2736; Copper (Copper carbonate) 1882, (Cuprite) 2421, (Redruthite) 7277; Tin (Cassiterite), 774; Bismuth (Bismite), 313; Antimony (Stibnite), 7610-7612; Molybdenite, 6824; Zinc Blende, 8072-8074; Iron (Hematite) 4702, (Iron Pyrites) 5015-5020, (Ironstone) 5516, (Limonite) 5835-5836, (Mispickel) 6663-6665. Other Minerals—Biotite, 302; Halite, 4651; Hornblende, 4825; Kaolin, 5674; Orthoclase, 7034; Tourmaline, 7826.

Geological Note : The country rocks consist of granite, felsite, and diorite. The felsite and diorite are of later age than the granite, the diorite forming intrusive masses in the latter rock. Gold-bearing reefs occur in the granite, and have been worked to some extent. *See* G.S.Q. Pubs. 102, 124, for details.

Geological Publications : *Reports*—Nos. 48 (1888), 102 (1895), 124 (43) (1887), 160 (1901). *See under* "Geol. Surv. Pub. List" for titles.

Warden : Stationed at Eidsvold. Inspector of Mines : Stationed at Rockhampton.

Reports : Inspector's and Warden's monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Crushing Mills : 3 Batteries = 39 stamps.

General Information : Consult *Pugh's Almanac; Queensland Post Office Directory; Post and Telegraph Guide.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Eidsvold (6 miles from). *Min.Ref.* Hematite, *see* 4702a; Limonite, 5836.

Eidsvold Extended Goldfield. *See maps*, Pls. 4, 5. Very little, if any, mining is being carried on here at the present time.

PROCLAMATION: First and only one, Nov. 29th, 1889, as follows:—Commencing on the left bank of Harkness Boundary Creek at the north-west corner of Malmoe Run, and bounded thence on the south by that run bearing east to McCord's, Middle Creek; on the east by that creek upwards to a point east from the north-east corner of the Eidsvold Goldfield; on the north by a line west to that corner; and on the west by Harkness Boundary Creek downwards to the point of commencement.

AREA: 3,840 acres (6 sq. miles).

MINERAL STATISTICS: *See* Eidsvold Goldfield.

—— (3 miles E. of) (Mt. Perry Road). *Min.Ref.* Topaz, *see* 7785.

—— (between Mt. Perry and). Coal, *see* 1609B.

Einasleigh Co. Cook Dist. *See map*, Plate 8.

Einasleigh Copper Mines and Smelting Works, 102 miles (by rail) S.S.W. of Almaden Rail. Stn. (Etheridge line). *Lat.*, 180° 30′ S.; *Long.*, 144° 5′ E. Einasleigh Copper Lode discovered in 1867 by Richard Daintree. Taken up in 1898 as lease by A. T. Linedale. *Min.Ref.* Copper Pyrites, *see* 2151A; Malachite, 6217; Pyrrhotite, 7154A. *See also under* Govt. Mining Jour., Report No. 96. Smelting Works: *See* separate heading.

Einasleigh Hot Springs, 42 miles E.N.E. of Charleston. *Min.Ref.* Mineral Water, *see* 6567; Sinter (calcareous), 747.

GEOLOGICAL NOTE: The rocks about the Springs comprise gneiss, granite, and schist, and a discoloured calcareous sinter. The water has a temperature of about 180° F., and the sinter deposits are in the form of basins and terraces. The sinter has accumulated within an area of about an acre, the height of the terraces varying up to fifteen feet above the surrounding plain. The springs appear to be drying up, as many of the basins are empty and much of the sinter is crumbling away. For analyses *see* 6567.

Einasleigh R. Heads in the country about 50 miles E. of Gilberton, flows N.W. to join the Gilbert R. 100 miles N.W. of Georgetown and 50 miles N. of Croydon. *Lat.*, about 17° 30′-19° 30′ S.; *Long.*, about 142° 20′-144° 30′ E. Tributaries—Etheridge and Copperfield Rivers, Elizabeth and Junction Creeks. *Min.Ref.* Bismuth, *see* 320; Cerussite, 1190C, 1215; Copper carbonate, 1884, 1885; Galena, 2743; Hematite, 4707; Magnetite, 5985, 5986; Muscovite, 6889A; Redruthite, 7281; Wolfram, 7981.

GEOLOGICAL NOTE: The rocks associated with the Einasleigh Copper deposits are basalt, gneiss, schist, and slate. The copper lode occurs in the altered sedimentary rocks in the bed of the river, and is partly covered by basalt. *See* G.S.Q. Pub. No. 134, p. 8, etc., for details.

Enoggera Goldfield—

SITUATION: *See maps,* Pls. 6, 7. 6½ miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. Centre about *Lat.* 27° 26′ S.; *Long.* 152° 55′ E.

DISCOVERY: Gold was found here in 1868. The Mountain Rise Mine was opened by J. Perry in 1868; abandoned the same year. Parish and party opened the mine again in 1870. Other developments have taken place at intervals since then.

POPULATION: Less than 20.

PROCLAMATION: First and only one, 17th Feb., 1904, as follows:—Commencing at a point on the right bank of Kedron Brook, being the N.W. corner of portion 478, parish of Enoggera, and bounded thence on the E. by a timber reserve bearing N. about sixty-five chains; thence by the S. boundary of portion 78 bearing W. seventy-one chains and fifty-five links; thence by a road and portions 110 and 111, parish of Samford, bearing S. one hundred and thirty-nine chains; thence by portions 111 and 100 bearing W. eighty-five chains to portion 101, by that portion bearing S. twenty-five chains and nine links; thence by portions 101, 103A, and 109 bearing S.W. one hundred and eight chains and twenty-eight links; thence again by portion 109 bearing W. sixty chains and twenty-three links; thence by portion 108 bearing S. about twenty-seven chains to the N. boundary of the Enoggera Water Reserve, by that northern boundary E. and S. to the N.W. corner of portion 844, parish of Enoggera; thence by portions 844 and 863 bearing E. about forty chains and sixty-two links; thence by portion 863 bearing S. thirty-eight chains and five links; thence by the N. boundary of the Enoggera Water Reserve easterly to the S.W. corner of portion 854, by portion 854 bearing N. ninety-three chains, and by the S. boundaries of portions 84, 821, and 83 bearing E. about seventy-seven chains and nineteen links, and by the W. boundaries of portions 507, 492A, 492, 479, and 478 bearing north to the point of commencement;—exclusive of all selected and alienated lands.

AREA: 2,600 acres (4 1/16 sq. miles).

MINERAL STATISTICS: Included in "Other Goldfields." *See* Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: **Gold,** 4213-4215; Lead (Galena), 3035A; (Minium), 6642; Copper (Malachite), 6349; Bismuth (Bismuthinite), 375; (Bismutite), 410; Zinc-Blende, 8177-8178; Iron Pyrites, 5343, 5344; Chiastolite, 1417; Heulandite, 4820; Hornblende, 4842.

GEOLOGICAL NOTE: The prevailing rocks are granite and schists, which form conspicuous ranges in the district. Gold-bearing reefs, more or less irregular, are exposed in numerous places, but up to the present have not proved payable.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 143 (1899), 159 (1901). *See* Geol. Sur. Pub. List for titles. *See also* Supplementary Reports List, No. 63.

WARDEN: Stationed at Brisbane. INSPECTOR OF MINE: Stationed at Gympie.

Situation: The town of Georgetown is 160 miles (by rail and road) S.W. of Almaden Rail. Stn. (Etheridge line). *Co.* Gilbert; *Dist.* Cook. Centre about *Lat.* 18° 19′ S.; *Long.*, 143° 32′ E.

Discovery: In 1871. First Gold Escort from the field took place on April 20th, 1872.

Population: 3,052 (Census 1911).

Rainfall: Yearly aver., 1902 to 1907, 28·64 inches. Wet days, 62.

Proclamation of Field: First gazetted, 18th Jan., 1872; last alteration, 2nd June, 1910, as follows:—Commencing at the confluence of the Einasleigh and Gilbert Rivers, and bounded thence by the Einasleigh River upwards to its confluence with the Etheridge River; thence by a line south-easterly to the northern watershed of the Etheridge River and Fiery Creek, by that watershed south-easterly to a point south from the south-west corner of Eveleigh No. 5 Block on the Einasleigh River; thence by a line north to that corner; thence by the west, north, and part of the east boundaries of that block, by the north and east boundaries of Eveleigh No. 4 Block; thence easterly by the northern boundaries of Brooklands No. 1, Fixby, Fixby No. 2, Springfield, and Fossilbrook Blocks, by part of the west, the northern, and eastern boundaries of St. Ronan's Block, the east boundary of St. George Block, and by a line south to the Great Dividing Range near the south-west corner of Ellanboro Block, by part of the west boundary of that block, the west boundaries of Lawn Spring and Wyandotte Blocks, part of the north and west boundaries of Ringwood Park No. 2 Block to the Great Dividing Range, by that range southerly to the north-west boundary of Lucky Downs Block, by part of the south-west boundary of that block to the south-east corner of West Downs Block; thence by the south boundary of that block, part of the east and south boundaries of Salcey Forest, the south boundaries of Quinton, Lyndhurst, Sunnyside, and Lochaber Blocks, to the Copperfield River, by that river upwards to the north-east corner of Oak Park Block, by the north boundary of that block, and by a line west to the Newcastle Range, by that Range southerly to the Gregory Range, by that range north-westerly to a point south from the south-east corner of Bangall Block, by a line north to

Etheridge Goldfield—*continued:*

that corner; thence by the south and part of the west boundaries of Bangall Block, the south, west, and north boundaries of Bangall No. 1 Block, the north and east boundaries of a camping reserve, proclaimed in *Government Gazette,* 1906, part I., page 424, the south boundaries of Rocky Vale and Highlands Blocks, the east boundary of Highland, part of the south-west boundary of Tinker Bell Block, the south-west and part of the east boundaries of Langlo Vale No. 9 Block, the south boundary of Box Hill No. 3 Block, part of the west, the south, and part of the east boundaries of Langlo Vale No. 1 Block, the south boundaries of Box Hill No. 1 and Box Hill No. 5 Blocks, part of the south-west and the south-east boundaries of Box Hill No. 4 Block to the Gilbert River; thence by a line north and by the east and north boundaries of Green Hills No. 6 Block, parts of the east and the north boundaries of Green Hills No. 5, Green Hills No. 4, Box Hill, and Box Hill No. 2 Blocks, the north-east and north-west boundaries of Bumba Block to the Gilbert River, by that river downwards to the east corner of Strathmore Block, by the south-east, south-west, and part of the north-west boundaries of that block, part of the south-west boundary of Oswald Block, the south and south-west boundaries of Jena Block to a point south of the starting point; and thence by a line north to the point of commencement;—exclusive of Green Hills and Oaks Gold Fields.

AREA: 7,398,120 acres (11,558 sq. miles).

LEASES: Gold-mining Leases in force, 82, area 734 acres; Miners' Homesteads, 397, area 1,388 acres; Mineral Leases, 37, area 498 acres (1912).

PRINCIPAL MINING CENTRES: Georgetown, Durham, Cumberland, Castleton, Donnybrook, Charleston, Percyville, Gilberton, Lane's Cr., Mt. Hogan, *which see.*

MINERAL STATISTICS:—

Gold,	*see tables and diagrams,*	Pls. 36, 46, 46A, 47.
Silver,	,,	Pls. 37, 46, 46A.
Tin,	,,	Pls. 38, 46, 46A.
Copper,	,,	Pls. 39, 46, 46A.
Bismuth,	,,	Pls. 40, 46, 46A.
Lead,	,,	Pls. 38, 46, 46A.
Wolfram,	,,	Pls. 42, 46, 46A.
Limestone,	,,	Pls. 41, 46, 46A.

STATISTICAL NOTE: Greatest annual recorded gold yield (1885) is 19,584 fine oz.; value £84,331. Smallest annual recorded gold yield (1878) is 5,006 fine oz.; value £21,264.

Previous to year 1878 the returns were not separated from other fields. In 1878 the return was 5,006 oz.; the following three years the yield averaged 14,000 oz. From 1882 to 1884 the returns were over 13,000 oz., and in the next two years the yields rose to 19,854 oz. and 18,000 oz. respectively. From 1887 to 1897 the yields fluctuated between 12,000 oz. and 16,000 oz., subsequent years showing a gradual decrease to 8,102 oz. in 1907, when a revival in the following year, 1908, produced 17,664 oz. Total yield of gold to end of 1912 was 569,248 fine oz., having a value of £2,418,010—equal to 3·21 per cent. of the whole gold production of the State.

—— Vale Bores. *See under* Artesian Bores. Nos. 261, 395.

Eukalunda. *See maps,* Pls. 14, 15. Sellheim Mineral Field. *Lat.*, 20° 52′ S. ; *Long.*, 147° 6′ E. *Min.Ref.* Azurite, *see* 232 ; Bismite, 314 ; Bismuth (native), 350 ; Bismuth (ores), 356 ; Copper (ore), 2040 ; Copper Pyrites, 2266, 2267 ; Cuprite, 2467 ; Galena, 3012-3022 ; Gold, 4146 ; Gypsum, 4627 ; Hematite, 4762, 4763 ; Ironstone, 5591-5593 ; Limonite, 5888 ; Malachite, 6329-6331 ; Manganese-dioxide, 6446, 6447 ; Mispickel, 6768, 6769 ; Scorodite, 7372 ; Silver (native) 7561, (ore) 7564 ; Wolfram, 8034b.

Geological Note : The main rocks in the locality are the shales and sandstones of Gympie Formation (Permo-Carboniferous), with which there are associated some masses of altered dolerite. Silver lodes are a conspicuous feature of the Sellheim Mineral Field, the principal occurrences being at Eukalunda. *See* G.S.Q. Pub. No. 57 for details and maps.

—— Bismuth Mine, Sellheim Mineral Field. *Min.Ref.* Bismite, *see* 315 ; Bismuth ores, 356 ; Copper Pyrites, 2267 ; Hematite, 4763 ; Manganese-dioxide, 6447.

Eulolo Lease Bores. *See under* Artesian Bores. No. 262.

Eulytite. *Compo.*, Silicate of bismuth. *Colour*, Yellowish, greyish, brownish, resinous. *H.* = 4·5. *Sp.gr.* = 5·9-6·0. *Contents* (*max*), Bismuth, 83 per cent.

2621. —— (?) Biggenden Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn. Gayndah line, 58 miles (by rail and road) W. of Maryborough. *Co.* Cook ; *Dist.* Burnett. *Ref.* G.S.M.

Eumarrah Bore. *See under* Artesian Bores. No. 415.

Eumundi Rail. Stn., 30 miles S.E. of Gympie. *Co.* Canning ; *Dist.* Moreton. *Railway Base* for Gold Mines at Mt. Ubi and Chinaman's Creek.

Eungella Goldfield—

Situation: *See maps,* Pls. 14, 15. About 10 miles W. of Finch Hatton Rail. Stn. (Mackay line), 48 miles (by rail and road) W.S.W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. Centre about *Lat.* 21° 6′ S.; *Long.* 148° 30′ E.

Area: 160,222 acres (nearly 251 sq. miles).

Population: Less than 20.

Proclamation: First, Nov. 8th, 1889. Last, Oct. 27th, 1909, as follows:—Commencing on the main coast range at the extreme head of Broken River, being the north-east corner of Eungella East O.L., and bounded thence on the south by that river downwards to a point bearing 83 degrees and distant one hundred and eighty-five chains from the north-east corner of Eungella Run; thence by a line bearing 211 degrees five miles and ten chains; thence by a line bearing 301 degrees about four miles and twenty chains to Broken River, by that river downwards to the western corner of Urannah No. 6, by the north-west boundary of that block north-easterly to its north corner; and thence by a line easterly to the point of commencement.

Principal Mining Centres: Bee Cr. Diggings.

Mineral Statistics: Gold, *included in* "Other Goldfields," *see maps,* Pls. 36, 46, 46a; *diagram,* Plate, 47.

Mineral References: Gold (alluvial) 3274, (reef) 4097-4103, 4105, 4106; Silver 7495, (native) 7560, (Tetrahedrite) 7773; Lead (Galena) 3003-3006; Copper (Bornite) 430, (Copper Pyrites) 2252a-2253, (Malachite) 6317a, 6318, 6322, (Tile Ore) 2567); Zinc Blende, 8166, 8166a; Iron (Iron Pyrites) 5289-5296, (Ironstone) 5583, (Limonite) 5883a-5883c, (Siderite) 7411a, 7411b. Zircon and *var.* Hyacinth, 8234.

Geological Note: The rocks are chiefly granite, in association with slate and schist. Gold-bearing reefs were worked many years ago and appear to have been small and highly mineralised. *See* G.S.Q. Pub. 181, p. 18 for details. Large quantities of small Zircons occur in the alluvial deposits.

Geological Publications: Reports—Nos. 54 (1889), 159 (1900), 181 (1903), 229 (1910). *See* Geol. Surv. Pub. List for titles.

Warden: Stationed at Mackay.

Inspector of Mines: Stationed at Rockhampton.

Felspar. *Compo.*, Variable silicates of alumina with potash, lime, or soda, or with two or more of these substances. *Sp.gr.* = 2-3. *H.* = 6. *Varieties*—Albite, Andesine, Oligoclase, Orthoclase, *which see.* Many are referred to simply as "Felspars."

GEOLOGICAL NOTE: Commonly found in association with Hornblende, Mica, Tourmaline, and Quartz, in lodes containing Tin, Wolfram, Molybdenite, etc., the country being altered sedimentary rocks, slate, greywacke, granite, greisen, and quartz prophyry. No attempt has been made to mine or quarry Felspar for industrial purposes, but supplies are available for future requirements.

USES: Felspar is commonly utilised in the manufacture of pottery, and in earthenware and brick enamelling processes. It is also used to a limited extent as a binding material or flux in the manufacture of emery and carborundum grinding wheels, and some varieties are used as a source of potash.

Fiery Creek Opal Field—

Situation: *See maps,* Pls. 18, 19. Twenty-five miles N.N.W. of Yowah, 85 miles W.N.W. of Cunnamulla. *Co.* Wellington; *Dist.* Warrego. Centre about *Lat.* 27° 35′ S.; *Long.* 144° 20′ E.

Population: Under 20.

Principal Mining Centres: Fiery Cross Opal Workings.

Mineral Statistics: Opal. *Included in* Paroo Mineral Field. *See* Pls. 44, 46-46A.

Mineral Reference: Opal (precious), 6967.

Geological Note: *See under* Paroo Mineral Field.

Geological Publications: Report—No. 177 (1902). *See under* Geol. Surv Pub. List for title and map.

Warden: Stationed either at Thargomindah or Cunnamulla.

Inspector of Mines: Stationed at Gympie.

—— Star Tin Mine, Mt. Amos, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 791; Tourmaline, 7829.

Flinders River. Heads at the Main Dividing Range 55 miles N.E. of Hughenden, and flows S.W. to Hughenden, thence N.W. into Gulf of Carpentaria 70 miles E. of Burketown. Length, about 450 miles. See *Lat.* 24° 30′ S.; *Long.* 151° 4′ E. Discovered in 1841 by Stokes. *Min.Ref.* Clay Deposits, *see* 1567; Coal, 1598; Hematite, 4679; Ironstone, 5508; Limestone (Coralline), 623.

Flinders River Coal Measures—

Situated: *See maps*, Pls. 20, 21. Left bank of Flinders R., 18 miles N.W. of Warreah (Coalbrook) Rail. Stn. (Hughenden line). *Co.* Wongalee; *Dist.* Burke.

Geological Note: The Coal Measures belong to the "Rolling Downs" Formation. A coal seam 1 ft. in thickness has been observed, but there are several others a few inches thick. *See* G.S.Q. Pub. No. 44 for details.

—— Shire Council Bores. *See under* Artesian Bores. Nos. 123, 124.

Flint. Said to occur with limestone in some of the Artesian bores in the Cretaceous beds of Western Queensland. *See* Artesian Bores and Notes. No. 157.

Floatstone. *Var.* of Opal, *which see.*

Flora Point, Rodd Peninsular. *Min.Ref.* Magnetite, *see* 6043.

Floraville (15 miles from), Leichhardt R., 40 miles S.S.E. of Burketown. *Lat.*, 18° 14′ S.; *Long.*, 139° 55′ E. *Min.Ref.* Porcellanite, *see* 5660.

Florence, Cloncurry. *Min.Ref.* Barytes, *see* 264A.

—— Creek Sub-artesian Bore. *See under* Artesian Bores. No. 286.

—— River. Rises about 38 miles S.byE. of Cloncurry, and flows W.byN. into the Cloncurry R. about 33 miles S.S.W. of Cloncurry. *Min.Ref.* Gold (alluvial), *see* 3176.

Florence River Copper Mines, Cloncurry. *Include* McPhail N., McPhail S. Extd., Edmonson, Dodger, Bobby Dazzler Extd., Frances Extd., United Extd., Our Luck, Myall King Extd., Eclipse, Lady Mary Extd., Theresa, Juno Extd., Queen Cross, Vivian, Gem and Mt. Flanagan M. Claims, Better Luck M.L., Lottery P.A., and Orion's Belt P.A. *Min.Ref.* Calcite, *see* 456; Chrysocolla, 1501; Copper Pyrites, 2083; Copper (native), 1979; Ferro-Calcite, 573; Iron Pyrites, 4925; Limonite, 5765; Malachite, 6122; Redruthite, 7228; Turgite, 7885.

Flori's Copper Lode, Perry Scrub. *Min.Ref.* Malachite, *see* 6194; Turgite, 7886.

Fluo-silicate of aluminium, *see* Topaz.

Fluoride of Lime, *see* Fluorspar.

Fluorine (F.). *Atom.Wt.* 19·0. *Sp.gr.* 1·14. (Liquid).

Minerals: *See* Fluorspar, Topaz.

Fluorite. *Syn.* Fluorspar, *which see.*

Fluorspar. *Syn.* Fluorite. *Compo.*, Fluoride of lime. *Colour*, green, white, blue, etc. *H.* = 4. *Sp.gr.* = 3·0-3·2. *Contents* (*max.*), Fluorine 49 per cent.

Geological Note: Large deposits of Fluorspar are unknown, but the mineral is common in tin and wolfram lodes in North Queensland, and sometimes occurs as small veins a few inches thick unassociated with any other mineral. It is almost invariably of a green colour, the blue, purple, and other shades being rare.

Uses: *See note under* Calcium.

2652. —— (green), in quartz. Content Reef, 3 miles N.W. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* **Burke.** *Ref.* B.D.

2653. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Calcite, and Argentine, in altered granite. *Loc.* Plant's Shaft, Golden Gate Gold Mines, 4 miles N.W. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 202, p. 26 (1905).

Forty-one mile Peg (Cooktown Railway). *Min.Ref.* Coal, *see* 1610.

Fossil Resin. *Syn.* Retinite, *which see.* Small masses of fossilized resin from pine trees have been found in the scrub country around Atherton, and mining for "gum" was proposed as an industry in that district. The matter has not been seriously considered, and no action has been taken to determine the extent of the deposits.

Fossilbrook—

Situation: *See maps*, Pls. 8, 9, 22. 38 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook. *Lat.*, 18° 2′ S.; *Long.*, 140° 30′ E.

Discoveries: Dates for Tin and Wolfram not obtainable. Monazite in association with Tin was found at Emu Cr., in 1904, by B. Dunstan.

Population: Included in Chillagoe Gold and Mineral Field.

Principal Mining Centres: Blackfellow's Creek, Four-mile Mountain, Night Shade, Tableland, Spring Cr., Pinnacles Cr., Eight-mile Mountain, *which see.*

Mineral References: Lead (Galena), *see* 2814; Copper (Azurite), 202, (Malachite) 6245; Tin (Cassiterite), 966, 968; **Wolfram,** 7978; Columbite, 1838; Zinc-Blende, 8090; Ilmenite, 4895a; Rutile, 7331, 7331a.

Geological Note: The country is made up of granite of various kinds, together with greisen, felsite, quartz-felsite, aplite, and schists. In these rocks there are deposits of tin, wolfram, and other minerals.

Geological Publications: Report No. 134 (1898), Map No. 220 (1909). *See under* Gov. Surv. Pub. List for title.

Warden: Stationed at Chillagoe. Inspector of Mines: Stationed at Herberton.

Franklen Co. Cook Dist. *See map*, Pl. 8.

Fraser Co. Wide Bay Dist. *See map*, Pl. 4.

Frazer Island. Situated between *Lat.* 24° 40′ S. and 25° 50′ S., and *Long.* 53° E. and 53° 20′ E., and forming in part the eastern shore of Hervey Bay. The island is 78 miles long and about 16 miles wide at its greatest width *Co.* Fraser; *Dist.* Wide Bay.

Geological Note: Recent blown sand, together with black, grey, and white sandrock, and Upper Cretaceous shales and sandstones are the formations on the island. Some of the Cretaceous rocks are marine, but freshwater beds might also occur. The black sandrock seen in many places has given the impression to many that coal beds might exist on the island, but no authenticated discovery of coal has yet been made.

Fulford Cr., br. of Lynd R., S.W. of Fisherton. *Min.Ref.* Cassiterite, *see* 830A; Wolfram, 7935A.

Fulgurites. These are made up of fused quartz grains, and are the result of lightning strokes in sand. They form very irregular tubes, rough outside and glazed inside, with numerous branches striking downward like the roots of a tree. The diameter of the fulgurites vary from one inch to a mere thread. They are commonly found at Southport, Tweed Heads, Stradbroke, Moreton, Curtis, and Fraser Islands, and Noosa Heads, and probably also occur on many other parts of the coast where large accumulations of blown sand exist.

Emu Plains Stn., 62 miles N.N.E. of Hughenden, 55 miles N.W.byW. of Pentland Rail. Stn. (Gt. Northern line). *Co.* Wongalee; *Dist.* Burke. *Ref.* (and *Assays*) Q.G.M.J., vol. 11, p. 136 (1910), and G.S.Q. Pub. 235, pp. 23-33 (1911).

2713. ——. *Assoc.with* Gold, in quartz. *Loc.* Soap Spar Gold Mine, Woolgar Goldfield, 97 miles N. of Richmond Rail. Stn., 404 miles (by rail and road), W.byS. of Townsville. *Co.* Woolgar; *Dist.* Burke. *Ref.* G.S.Q. Pub. 125, p. 39 (1898).

2714. ——. *Assoc.with* Gold, Silver, and Copper, in lodes. *Loc.* Woolgar Goldfield (*ante*). *Ref.* A.R.D.M., p. 42 (1886).

2715. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, and Zinc-Blende, in lode. *Loc.* Allendale Silver Mine, Chowey Cr., 6 miles N.W. of Chowey Rail. Stn. (Gayndah line), 68 miles (by rail and road) W. of Maryborough. *Co.* Bowen; *Dist.* **Burnett.** *Assay: See* No. 3567. *Ref.* G.S.Q. Pub. 125, p. 35 (1897), and P.R.S.Q., vol. 4, p. 39 (1887).

2716. ——. In lode. N. of Allendale Silver Mine, Chowey Cr. (*ante*). *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

2717. ——. Hannah's Lode, Chowey Cr. (*ante*). *Assay:* Gold = trace, Silver = 30 oz. per ton, Lead = 50 per cent. *Ref.* P.R.S.Q., vol. 4, p. 47 (1887).

2718. ——. Gilbert Rock, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.M.

2719. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Stibnite. *Loc.* Lady Norman and Reid Cr. Mines, 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Contents:* Gold = 2·25 and 5·05 oz. per ton. *Ref.* A.R.D.M., 1894, p. 34.

2720. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Zinc-Blende, and Barytes, in quartz. *Loc.* Potosi Copper Lode, 3 miles W. of Mungai, 6 miles W. of Mt. Perry Rail. Stn., 73 miles (by rail and road) S.W.byW. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

2721. ——. In lodes, nr. Potosi Lode, 6 miles W. of Mt. Perry Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

2721A.——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* California Reef, Reid's Cr. Goldfield, 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 21, p. 11 (1885), and G.S.M.

2722. Galena. *Assoc.with* Gold, Mispickel, Iron Pyrites, Zinc-Blende, and Stibnite, in quartz and felspar. *Loc.* Reid Cr. Reefs, on Branch Cr., Reid's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885), and A.R.D.M., p. 34 (1894).

2723. ——. Rocky Cr., 7 miles W of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.M.

2724. ——. *Assoc.with* Iron Pyrites and Zinc-Blende, with traces of Gold and Silver. *Loc.* Gt. Southern Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* O.R.

2725. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Paradise P.C., Paradise Goldfield, 8 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 68, p. 1 (1891).

2726. ——. *Assoc.with* Redruthite and Limonite, in lode. *Loc.* Girl-I-left-Behind-Me Mine, Stoney Cr., Degilbo Run, Stanton-Harcourt Diggings, 11 miles N. of Degilbo Rail. Stn. (Gayndah line), 69 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Assay:* Silver = 8 oz. per ton. *Ref.* G.S.Q. Pub. 168, p. 3 (1901).

2727. ——. *Assoc.with* Gold, Silver, Iron Pyrites, and Zinc-Blende, in quartz and calcite. *Loc.* Stanton Harcourt Diggings (*ante*). *Ref.* G.S.Q. Pub. 25, p. 4 (1886).

2728. ——. *Assoc.with* Iron Pyrites. *Loc.* M.L. (26), Gympie Copper Mines, Ltd., Gooroomjam Cr., 30 miles S. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* (and *Assays*) G.S.Q. Pub. 169, p. 7 (1901).

2729. ——. *Assoc.with* Copper Pyrites, Tenorite, Iron Pyrites, and Mispickel, in quartz and calcite. *Loc.* P.A. (2), Gympie Copper Mines, Ltd., Gooroomjan Cr. (*ante*). *Assays: See* No. 2139. *Ref.* G.S.Q. Pub. 169, p. 10 (1901).

2730. ——. *Assoc.with* Marcasite, Iron Pyrites, Copper Pyrites, and Azurite, in quartz. *Loc.* Black Watch Reef, Scrub Paddock Diggings, 13 miles N.N.E. of Nanango, *Co.* Fitzroy; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 29, p. 3 (1886).

2730A.——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Zinc-Blende, and Calcite, in ironstone lode. *Loc.* Ban Ban Stn., 12 miles S.E.byE. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Ref.* A.R., p. 179 (1909).

2730B.——. *Assoc.with* Cerussite, Anglesite, Massicot, Malachite, Azurite, and Limonite, in lode. *Loc.* About 5 miles S. of Coalstoun Lakes, 16 miles S.W. of Biggenden Rail. Stn. (Gayndah line). *Co.* Mackenzie (*ante*). *Ref.* A.R., pp. 287, 288, 291 (1910).

2731. ——. Cattle Cr., Rawbelle, 95 miles W.byS. of Bundaberg. *Co.* Rawbelle; *Dist.* Burnett. *Ref.* G.S.M.

2732. ——. Containing Silver *in assoc.with* Massicot. *Loc.* St. John's Cr. Goldfield, Burnett R., 16 miles S.W. of Eidsvold Goldfield. *Co.* Wicklow; *Dist.* Burnett. *Ref.* G.S.M.

2733. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* All Nations Reef, Eidsvold Goldfield, 37 miles W.S.W. of Mt. Perry, 80 miles W.S.W. of Bundaberg. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 43, p. 4 (1887).

2734. ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in quartz. *Loc.* Cosmopolitan Lease (42), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 102, p. 3 (1895).

2735. ——. *Assoc.with* Gold, Iron Pyrites, and Ironstone. *Loc.* Mt. Rose United Mine, Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 2 (1887).

2736. ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* E. of Burnett R., Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 5 (1887).

2737. ——. *Assoc.with* Silver and Anglesite. *Loc.* Yarrol Stn., Dawes Range, 25 miles N.W. of Mt. Perry Rail. Stn., 92 miles (by rail and road) W. of Bundaberg. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.M.

2738. ——. *Assoc.with* Anglesite and Cerussite, in red gossan. *Loc.* Spring Cr., br. of Blackfellow's Cr., trib. of Lynd R., 12 miles W. of Fossilbrook, 45 miles S.W. of Almaden Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* Cook. *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2739. ——. Cannibal Cr., 15 miles S.E. of Maytown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Assay:* Silver = 60 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 46 (1887).

2740. ——. *Assoc.with* Massicot and Mispickel, in quartz. *Loc.* Ebagoola, Hamilton Goldfield, 33 miles W. of Port Stewart, 173 miles N.W.byW. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* O.R.

2741. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Goldmount Reef, 6 miles S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 163, pp. 8, 9 (1901), and 209, p. 15 (1907).

2741A.——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Johannesburg (Lord Roberts) Reef, 3½ miles S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 7 (1901).

2741B.——. *Assoc.with* Mispickel, in quartz. *Loc.* Rothwell Reef, 5 miles from Coen, 50 miles (by road) N.N.W. of Port Stewart. *Co.* Coen; *Dist.* Cook. *Ref.* O.R.

2742. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Victory Reef, McLeodsville, 6 miles N.N.W. of Thornborough, 25 miles (by coach) N. of Dimbullah Rail. Stn. (Chillagoe line), Hodgkinson Goldfield. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 27 (1884).

2743. ——. *Assoc.with* Copper carbonates. *Loc.* Einasleigh R., 10 miles from Einasleigh Rail. Stn., 110 miles (by rail and road) S.S.W. of Almaden Rail. Stn. (Etheridge line). *Co.* Gilbert; *Dist.* Cook. *Ref.* O.R.

2744. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Aurora Reef, Aurora Cr., 8 miles S.W. of Georgetown, **Etheridge Goldfield.** *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 35, p. 5 (1887).

2745. ——. *Assoc.with* Gold and Iron Pyrites, in ironstained quartz. *Loc.* Redan Reef, Aurora Cr. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 10 (1900).

2745A.——. *Assoc.with* Cerussite and Anglesite, in lode. *Loc.* P.A., between Aurora Cr. and Rocky, about 8 miles S.W. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* A.R. 242 (1910).

2746. ——. *Assoc.with* Gold, Copper Pyrites, Iron Pyrites, and Mispickel, in quartz and calcite. *Loc.* Balmoral Reef, Castleton, 5 miles S.S.E. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), and 151, p. 12 (1900).

2747. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Big Reef (*ante*). *Ref.* G.S.Q. Pub. 151, p. 12 (1900).

2748. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz and calcite. *Loc.* Sir Henry Havelock Reef, 2½ miles N.W. of Castleton, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 151, p. 12 (1900).

2748A.——. *Assoc.with* Silver, Copper Pyrites, Cerussite, and Limonite, in lode. *Loc.* Mt. De Vall Claim, Charleston, 144 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* A.R., p. 212 (1910).

2749. ——. *Assoc.with* Gold, Copper Pyrites, Iron Pyrites, Redruthite, Mispickel, and Zinc-Blende, in quartz. *Loc.* Nil Desperandum Mine, Charleston (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), 151, p. 11 (1900), and 219, p. 14 (1909).

2750. ——. *Assoc.with* Gold, Iron Pyrites, Pyrrhotite, and Zinc Blende, in quartz. *Loc.* Queenslander Mine, Charleston (*ante*). *Ref.* O.R. and G.S.Q. Pub. 219, p. 13 (1909).

2751. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Cumberland Reef, Cumberland, 12 miles W.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 5 (1887).

2751A.——. *Assoc.with* Silver, Anglesite, Cerussite, and Malachite, in quartz lode. *Loc.* Wright's Leader, Donnyville, 4½ miles S. of Georgetown, Etheridge Goldfield (*ante*). *Assay:* *Ref.* A.R., p. 228 (1910).

2751B.——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Durham Consols Mine, Durham, 4 miles W. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* A.R., p. 323 (1911).

2752. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Durham Reef, Durham (*ante*). *Ref.* G.S.Q. Pub. 35, p. 4 (1884), and 219, p. 11 (1909).

2753. ——. Light of Asia Mine, Durham (*ante*). *Ref.* G.S.M.

2753A.——. *Assoc.with* Gold, Massicot, Cerussite, and Malachite, in quartz and schist. *Loc.* Ancient Briton Claim, Georgetown, 20 miles N. of Charleston Rail. Stn., 160 miles (by rail and road) S.W. of Almaden Rail. Stn., Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* A.R., p. 215 (1910).

2754. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Lady Maria Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 7 (1900).

2755. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* Papa Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 35, p. 3 (1887).

2756. ——. *Assoc.with* Gold, Iron Pyrites, and Tenorite, in quartz. *Loc.* Young Wexford Mine, Wexford Reef, 3 miles N. of Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 10 (1900), and G.S.M.

2756A.——. In lodes in slate. Mosquito Cr. Silver-Lead Lodes, about 10 miles S.W.byS. of Charleston, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* A.R.D.M., 1907, p. 57, and G.S.Q. Pub. 219, pp. 14-17 (1909).

2756B. Galena. *Assoc.with* Silver, Massicot, Limonite, in puartz. *Loc.* M.L. (64), Mosquito Cr. Silver-Lead Lodes (*ante*). *Assays:* Silver = 41 oz. and 12 oz. per ton; Lead = 75 and 32 per cent.; Gold = 1 dwt. 14 gr. per ton. *Ref.* A.R., p. 268 (1910).

2757. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in quartz. *Loc.* International Reef, Rocky, Sandy Cr., 7 miles S.W.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 151, p. 10 (1900), and 219, p. 9 (1909).

2757A. ——. *Assoc.with* Gold, Silver, Massicot, Anglesite, and Cerussite, in lode. *Loc.* 1 mile N. of International Mine, Rocky, Sandy Cr. (*ante*). *Assays:* Gold = 4 dwt. 14 gr. and 1 oz. 9 dwt., and Silver = 13 oz. 17 dwt. and 7 oz. 7 dwt. per ton; Lead = 65·8 and 47·7 per cent. *Ref.* A.R., p. 228 (1910).

2758. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Stonewall Jackson Reef, Rocky, Sandy Cr. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 10 (1900).

2759. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Butcher Bird, Deceitful Susan, Merry Monarch, and Stockman Reefs, between Talbot and Machine Crs., 10 miles S.E.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 151, p. 11 (1889).

2759A. ——. *Assoc.with* Silver, in quartz. *Loc.* Stockman Mine, between Talbot and Machine Creeks (*ante*). *Ref.* A.R., p. 254 (1910).

2759B. ——. *Assoc.with* Copper Ore. *Loc.* Dorothy Copper Mine, Macmillan Creek, about 24 miles E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 28 (1911).

2759C. ——. *Assoc.with* Copper Pyrites and Iron Pyrites, in granite. *Loc.* Stockman's Cr., 6 miles N.W. of Teesdale Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 234, p. 27 (1911).

See further Etheridge references under 2814A.

2760. ——. *Assoc.with* Gold, in quartz. *Loc.* Hit or Miss Mine, nr. Kingsborough, Hodgkinson Goldfield, 23 miles (by road) N. of Dimbulla Rail. Stn. (Chillagoe line), **Walsh and Tinaroo Mineral Fields.** *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 47 (1887).

2761. ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in quartz. *Loc.* Just-in-Time Reef, Northcote, 15 miles W. of Mareeba Rail. Stn., Cairns line, 61 miles (by rail and road) W. of Cairns, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 28 (1884).

2762. ——. *Assoc.with* Gold and Copper Pyrites, in quartz. *Loc.* Monarch Reef, Northcote (*ante*). *Ref.* G.S.Q. Pub. 16, p. 28 (1884).

2763. ——. *Assoc.with* Gold, Copper carbonate, and Calcite, in quartz. *Loc.* Black Ball Lease, 2½ miles N. of Thornborough, 21 miles (by coach) N. of Dimbullah Rail. Stn. (Chillagoe line), 92 miles (by rail and road) W. of Cairns. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 47 (1887).

2764. ——. *Assoc.with* Gold, in quartz. *Loc.* Pioneer Reef, ½-mile N. of Thornborough, 19 miles (by coach) N. of Dimbullah Rail. Stn., Chillagoe line, Hodgkinson Goldfield (*ante*).

2765. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Zinc-Blende, in quartz. *Loc.* Union Reef, Woodville, 13 miles N.W. of Thornborough, Lower Hodgkinson R., Hodgkinson Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 47 (1887), and G.S.Q. Pub. 16, p. 24 (1884).

2766. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Freethinker Tin Claim, Irvinebank, 12 miles W.S.W. of Herberton, 10 miles S.W. of Stannary Hills Rail. Stn., Chillagoe Br. line, Walsh and Tinaroo Mineral Field. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 59 (1890).

2767. ——. *Assoc.with* Anglesite. *Loc.* Agnostic Cutting, Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Yield:* Silver = 100 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 32 (1894).

2768. ——. *Assoc.with* Silver and Anglesite. *Loc.* Lady Jane Silver Mine, Montalbion (*ante*). *Yield:* Silver = 408 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

2769. ——. *Assoc.with* Copper Pyrites and Galena, in pipe veins. *Loc.* Montalbion Silver Mine, Montalbion (*ante*). *Ref.* G.S.Q. Pub. 119, p. 29 (1897).

2770. ——. *Assoc.with* Silver and Anglesite. *Loc.* North Queensland Silver Mg. Co., Montalbion (*ante*). *Yield:* Silver = 90 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 31 (1897).

2771. ——. *Assoc.with* Silver. *Loc.* Star Mine, Montalbion (*ante*). *Estimated Yield:* Silver = 46 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

2772. ——. *Assoc.with* Cerargyrite. *Loc.* Montalbion (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

2773. ——. *Assoc.with* Anglesite. Mountain Maid Mine, 5 miles S. of Montalbion, 12 miles S.S.W. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Average Yield:* Silver = 100 oz. per ton. *Ref.* G.S.Q. Pub. 119, p. 32 (1897).

2773A. ——. Orient Camp, Cumming's Cr., 4 miles S.S.W. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields (*ante*).

2774. ——. *Assoc.with* Anglesite and Zinc-Blende. *Loc.* Barossa Silver Lease, Silverfield, 1 mile S. of Montalbion, 8 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 119, p. 32 (1897).

2776. ——. *Assoc.with* Anglesite. *Loc.* Cuze's Lease, Silverfield (*ante*). *Ref.* G.S.M.

2777. ——. *Assoc.with* Anglesite. *Loc.* Mystery Lease, Silverfield (*ante*). *Ref.* G.S.M.

2778. ——. Prentice Bros'. Mine, Silverfield (*ante*). *Ref.* G.S.M.

2779. ——. *Assoc.with* Anglesite. *Loc.* Silver Hill Lease, Silverfield (*ante*). *Ref.* G.S.M.

2780. ——. *Assoc.with* Silver, Cppper Pyrites, Iron Pyrites, Mispickel, and Zinc-Blende. *Loc.* Tornado Silver Mine, Silverfield (*ante*). *Analysis:* Zinc = 13·42, Copper = 5·10, Lead = 6·06, Arsenic = 11·99, Iron = 29·06, Sulphur = 32·74, Silica = 2·11 per cent. *Ref.* P.R.S.Q., vol. 4, p. 48 (1887).

2781. ——. *Assoc.with* Stibnite. *Loc.* Victoria Silver Mine, Silverfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 45 (1887).

2782. ——. *Assoc.with* Zinc-Blende and Iron Pyrites, in lode. *Loc.* Victoria Amalgamated Silver Mine, Silverfield (*ante*). *Ref.* G.S.Q. Pub. 119, p. 32 (1897).

2783. ——. *Assoc.with* Cassiterite and Iron Pyrites. *Loc.* Great Wheel Busy Mine, Watsonville, head of James Cr., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 46 (1897).

2783A. ——. *Assoc.with* Cassiterite, Copper Pyrites, Mispickel, Wolfram, Garnet, and Chlorite, in greywacke. *Loc.* King of the Ranges Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 222, pp. 41-50 (1910).

2784. ——. *Assoc.with* Cassiterite and Iron Pyrites, in diorite dyke in porphyry. *Loc.* Mountaineer Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 28 (1883).

2785. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* Bamford, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay:* Gold = 19 gr.; Silver = 18 oz. 1 dwt. per ton; Lead = 4·6; Copper = 5·3 per cent. *Ref.* A.R., p. 46 (1906).

2786. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Molybdenite, and Zinc-Blende. *Loc.* Bamford (*ante*). *Assay: See* No. 2167. *Ref.* A.R., p. 101 (1907).

2787. ——. *Assoc.with* Copper Pyrites, Mispickel, and Zinc-Blende. *Loc.* Boomerang Mine, 1 mile W. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

2788. ——. *Assoc.with* Gold, Iron Pyrites, and Hornblende, in quartz. *Loc.* Luxton's Mine, E. of Mt. Luxton, Wet Cr., br. of California Cr., 3 miles N.E. of Ord Rail. Stn., Mt. Garnet-Chillagoe line, Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Gold = 150 oz. 16 dwt. per ton. *Ref.* G.S.Q. Pub. 119, p. 42 (1897).

2789. ——. *Assoc.with* Anglesite, Iron Pyrites, and Limonite, in quartz reef. *Loc.* nr. Mt. Luxton, Wet Cr., br. of California Cr. (*ante*). *Assay:* Silver = 39 oz. per ton. *Ref.* G.S.Q. Pub. 119, p. 42 (1897).

2790. ——. *Assoc.with* Copper Pyrites. *Loc.* Fortunatus Mine, Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 50 (1897).

2790A. ——. *Assoc.with* Massicot and Cerussite, in lode. *Loc.* Dolly Brand Mine, 1 mile from Chillagoe, Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Lead = 45 per cent.; Silver, 104 oz. 18 dwt. per ton; Gold = trace. *Ref.* A.R., p. 318 (1911).

2791. ——. *Assoc.with* Anglesite, Massicot, Cerussite, Manganese-dioxide, and Actinolite. *Loc.* Macrossan Mine, between Cathedral Range and Arbinjoe Cr., 2 miles E. of Chillagoe, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay: See* No. 28. *Ref.* G.S.Q. Pub. 67, p. 7 (1890).

2792. ——. *Assoc.with* Silver. *Loc.* Torpy's Silver-Lead Mine, Crooked Cr., br. of Walsh R., nr. Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* (1) Silver = 22 oz. per ton; Lead = 20·4; Zinc = 30·8 per cent. (2) Silver = 53 oz. per ton; Lead = 54·2 per cent. *Ref.* A.R., p. 123 (1907).

2793. Galena. *Assoc.with* Minium and Anglesite, in ferruginous gossan. *Loc.* Chillagoe Queen Mine, Dargalong, 7 miles S. of Mungana Rail. Stn., Chillagoe line, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 10 (1891), and G.S.M.

2794. ——. *Assoc.with* Anglesite, Massicot, and Cerussite, in talcose gossan. *Loc.* Ewan and Delaney's P.A., Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

2795. ——. *Assoc.with* Minium, Anglesite, Massicot, Cerussite, and Copper carbonate. *Loc.* Pandora Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

2796. ——. *Assoc.with* Minium and Cerussite, in ferruginous clay. *Loc.* P.A. (40 acres), Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

2797. ——. *Assoc.with* Copper Pyrites, Cassiterite, Iron Pyrites, Mispickel. *Loc.* Iolanthe Tin Mine, Koorboora, 108 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

2798. ——. *Assoc.with* Cassiterite, Copper Pyrites, Iron Pyrites, Mispickel, and Mica, in lode. *Loc.* Shakespeare Tin Lease, Koorboora (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

2799. ——. *Assoc.with* Silver and Cassiterite. *Loc.* Tennyson Tin and Silver Mine, Koorboora (*ante*). *Approx. contents:* Lead = 45; Tin = 22 per cent.; Silver = 80 oz. per ton.

2800. ——. *Assoc.with* Wolfram and Cassiterite, with traces of Chrysocolla and Magnetite, in chlorite, muscovite, and fluorspar. *Loc.* Koorboora (*ante*). *Ref.* B.D.

2801. ——. *Loc.* Comstock Mine, Lappa, 102 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

2802. ——. *Assoc.with* Cerussite. *Loc.* Lappa (*ante*). *Ref.* G.S.M.

2803. ——. *Assoc.with* Cerussite, Malachite, Tetrahedrite, and Zinc-Blende, in siliceous lode. *Loc.* Eclipse Mine, **Muldiva**, 6 miles S.W.byS. of Almaden Rail. Stn., (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

2804. ——. *Assoc.with* Anglesite and Copper carbonate, in lode material. *Loc.* New Moon Mine, Muldiva (*ante*). *Assay:* Silver = 269 oz. per ton. *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

2805. ——. *Assoc.with* Cuprite, Cerussite, Malachite, and Ironstone, in clay and quartz. *Loc.* Girofla Mine, Opera Cr., **Mungana**, 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 3 (1891), and B.D.

2806. ——. *Assoc.with* Silver. *Loc.* Lady Jane Mine, Mungana (*ante*). *Assay:* Silver = 31 oz. per ton; Lead = 62·2 per cent. *Ref.* A.R., p. 123 (1907).

2807. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Malachite, Minium, Cerussite, Hematite, Zinc-Blende, and Garnet, in gossan. *Loc.* Penzance Mine, Redcap Cr., Mt. Redcap, 3 miles N.E. of Mungana Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), and 134, p. 11 (1898).

2808. ——. *Assoc.with* Silver and Copper Ore. *Loc.* Penzance Mine, Redcap Cr., Mt. Redcap (*ante*). *Ref.* G.S.Q. Pub. 125, p. 5 (1897).

2809. ——. *Assoc.with* Minium and Cerussite, in limestone. *Loc.* Queenslander Mine, Redcap Cr., Mt. Redcap (*ante*). *Assays:* Silver = 30 oz. to 200 oz. per ton. *Ref.* G.S.Q. Pub. 69, p. 7 (1891), and G.S.M.

2809A. ——. Gilliam Wolfram Mine, Wolfram Camp. *Co.* Hodgkinson (*ante*). *Ref.* B.D. *See* further Walsh and Tinaroo references, Nos. 2844-2864.

2810. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Towalla King Mine, Cooliman Cr., Russell R. Extd. (Towalla) Goldfield, 30 miles (by rail) W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 97, p. 4 (1894).

2811. ——. *Assoc.with* Massicot, Cerussite, Iron Pyrites, Mispickel, and Zinc-Blende, in lode. *Loc.* Chillagoe Mine, off Wise's Knob, Oaks Goldfield, 30 miles (by road) S.byE. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy; *Dist.* Cook. *Ref.* A.R., p. 187 (1909).

2812. ——. *Assoc.with* Gold and Cerussite, in quartz leader. *Loc.* Avis's Lease, Oaks Gold and Mineral Field (*ante*). *Ref.* A.R., p. 156 (1908).

2812A. ——. *Assoc.with* Gold, in quartz. *Loc.* Goolha Goolha Reef, The Springs, 9 miles (by road) S.E. of Coen. *Co.* Sidmouth; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 22 (1901).

2813. ——. *Assoc.with* Gold and Iron Pyrites, in quartz veins in granite. *Loc.* Possession Is., Torres Strait, 12 miles S.E. of Thursday Is. *Co.* Somerset; *Dist.* Cook. *Assay:* Gold = 1 oz. 17 dwt. 5 gr. per ton; Silver = 1 oz. 1 dwt. 19 gr. per ton. *Ref.* G.S.Q. Pub. 180, p. 22 (1902).

2814. ——. *Assoc.with* Zinc-Blende, in quartz. *Loc.* Fossilbrook, 28 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Fields. *Co.* Tate; *Dist.* Cook. *Ref.* O.R.

2814A.——. *Assoc.with* Copper Ore and Iron Pyrites, in porphyry. *Loc.* Mt. Jardine, 12 miles N. of Einasleigh Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Tate (*ante*). *Ref.* G.S.Q. Pub. 234, p. 28 (1911).

2815. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Brilliant Mine, Brilliant and Parallel Reefs, Horn Is. Goldfield, 3 miles S.E. of Thursday Is., Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

2816. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Cornucopia Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896)

2817. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Dead Cat Mine, Good Luck Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

2818. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in quartz. *Loc.* Eclipse Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112 (1896), and G.S.M.

2819. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Italian Mine, Good Luck and Italian Reefs, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

2820. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Mystery P.C., Mystery or Dead Cat Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 2 (1896).

2821. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in quartz. *Loc.* Pioneer Claim, Pioneer Reef No. 1, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

2822. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Rosetta Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

2823. ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* Smith's Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.M.

2824. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in quartz. *Loc.* Triumph Mine, 2 and 3 Reefs, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

2825. ——. Chandi Chank, Gilberton, 24 miles S.byE. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.M.

2826. ——. Two miles W. of 6-Mile Cr., Gilberton (*ante*). *Ref.* G.S.M.

2827. ——. Gilberton (*ante*). *Assay:* Silver = 155 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 46 (1887).

2827A.——. Madras Silver-Lead Mine, 1 mile N.E. of Ashtonville, 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Wrotham; *Dist.* Cook.

2828. ——. *Assoc.with* Iron Pyrites, Mispickel, and Zinc-Blende. *Loc.* Ballandean Mines, 14 miles (by rail) S. of Stanthorpe (Main line). *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 125, pp. 29, 30 (1897).

2829. ——. *Assoc.with* Mispickel, Copper Pyrites, and Zinc-Blende, in chloritic rock. *Loc.* Doctor's Lode, Sel. (39), Jibbinbar, 20½ miles S.byW. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 67, p. 2 (1890).

2829A.——. *Assoc.with* Silver, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz reef. *Loc.* Jibbinbar Silver Mine, Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 125, pp. 29, 30 (1897).

2830. ——. *Assoc.with* Gold, Mispickel, and Minium, in quartz. *Loc.* Min. Area (25), Jibbinbar (*ante*). *Assays:* Silver, 16 oz. and 48 oz., and Gold = 3 dwt. per ton. *Ref.* G.S.Q. Pub. 87, p. 10 (1892).

2831. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Sels. 34, 35, Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

2832. ——. *Assoc.with* Gold and Mispickel, in quartz and calcite. *Loc.* Kaffir Chief Mine, Pikedale Goldfield, 20 miles N.W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* (*Yields, Assays*) G.S.Q. Pub. 20, p. 74 (1898).

2833. ——. *Assoc.with* Copper Pyrites, Redruthite, Copper carbonate, Ironstone, Manganese-dioxide, and Zinc-Blende, in lode. *Loc.* Pikedale Silver Mine, Woolshed Gully, Pikedale Head Stn., 20 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 87 (1892).

2834. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, and Zinc-Blende, in lode. *Loc.* Silver Queen Silver-Lead Mine, right bank of Severn R., 6 miles W. of Ballandean Rail. Stn. (Mail line), 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assays:* (1) Gold = 16 gr., Silver = 17 oz. 12 dwt. per ton; Copper = 1·26, Lead = 7·0, Zinc = 8·8 per cent.; (2) Lead = 40, Copper = 6 per cent., Silver = 64 oz. per ton. *Ref.* G.S.Q. Pub. 191, pp. 24, 39 (1904), and A.R., p. 210 (1910).

2835. Galena. *Assoc.with* Copper Pyrites, Zinc-Blende, and Cassiterite, in chlorite, quartz, and fluorspar lodes. *Loc.* Severn R., 7 miles W. of Ballandean Rail. Stn., 21 miles S.S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

2836. ——. *Assoc.with* Silver, Anglesite, and Massicot. *Loc.* Silvery Wave Mine, Stanthorpe, 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 125, p. 30 (1897).

2837. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz and chlorite. *Loc.* Mrs. Allison's Sugarloaf, 7 miles E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 120, p. 87 (1898).

2837A. ——. *Assoc.with* Silver and Cerussite. *Loc.* Macdonald Goldfield, 31 miles W.byS. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs.

2838. ——. *Assoc.with* Copper Pyrites. *Loc.* Silver Crown Mine, 4 miles E. of **Silver Spur,** 40 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* G.S.Q. Pub. 191, p. 37 (1904).

2839. ——. *Assoc.with* Anglesite, Cerussite, Redruthite, and Copper carbonate, in gossan. *Loc.* Silver King Mine, 3 miles N. of Silver Spur, 43 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* G.S.Q. Pub. 120, p. 94 (1898).

2840. ——. *Assoc.with* Gold, Pyrargyrite, Iron Pyrites, Copper Pyrites, Cuprite, Tile Ore, Malachite, Azurite, Cerussite, Zinc-Blende, Smithsonite, Ironstone, and Calcite. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe (*ante*). *Mean Analysis:* Silica = 14, Iron = 15, Lead = 13, Zinc = 26, Sulphur = 28, Copper = 1¼, Lime Carbonate = 1, Arsenic = nil, Alumina = 5 per cent., Silver = 26 oz. per ton. *Ref.* G.S.Q. Pub. 120 (1898), and p. 191 (1904).

2841. ——. *Assoc.with* Malachite. *Loc.* 3 miles N.W. of Silver Spur, Texas, 46 miles W.S.W. of Stanthorpe (*ante*). *Ref.* A.R. (1907), p. 126.

2841A. ——. *Assoc.with* Silver, Copper Pyrites, and Zinc-Blende, in lode. *Loc.* Claim on Lucky Valley Goldfield, 12 miles S.S.E. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* A.R., p. 223 (1910).

2842. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Ferro-Calcite. *Loc.* Louisa Mine, Talgai Goldfield, 21 miles W.N.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pubs. 120, pp. 55 (1898); 159, p. 1 (1900); and 186, pp. 17, 18 (1903), and G.S.M.

2843. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Try Again Reef, Thanes Cr. Goldfield, 24 miles W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 120, p 69 (1898).

2844. ——. *Assoc.with* Bismuthinite and Zinc-Blende. *Loc.* Great Britain Mines, Coolgarra, Return Cr., 9 miles N.N.E. of Mt. Garnet Rail. Stn. (Chillagoe Br. line), **Walsh and Tinaroo Mineral Fields.** *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.M.

2845. ——. *Assoc.with* Silver, Anglesite, Minium, and Malachite. *Loc.* Koh-i-noor Mine, Coolgarra (*ante*). *Yield:* Silver = 94 oz. per ton, Lead = 40 per cent. *Assays:* Silver = 300 oz. per ton. *Ref.* G.S.Q. Pubs. 72, p. 4 (1891), and 125, p. 32 (1897), and G.S.M.

2846. ——. *Assoc.with* Minium and Anglesite, in quartz. *Loc.* Tucker's Silver-Lead Lode, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

2847. ——. *Assoc.with* Cassiterite and Iron Pyrites, in quartzose lode. *Loc.* Victoria Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

2848. ——. Evelyn Mine, 4 miles from Coolgarra, 13 miles N.N.E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.M.

2849. ——. *Assoc.with* Cerussite, Massicot, and Limonite, in lode. *Loc.* Caledonia Mine, Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

2850. ——. *Assoc.with* Copper carbonate, in gossan. *Loc.* Dunn's Tunnel Mine, Dry R. (*ante*). *Reported Yield:* Silver = 84 to 105 oz. per ton. *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2851. ——. *Assoc.with* Chalcanthite, Anglesite, Minium, Massicot, Linarite, in slate. *Loc.* John Bull Silver-Lead Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

2852. ——. *Assoc.with* Malachite, in gossan. *Loc.* McFadden's or Paddy's Silver Lode, Dry. R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2853. ——. *Assoc.with* Iron Pyrites and Zinc-Blende. *Loc.* P.C., Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2854 ——. In lode in slate. *Loc.* Rainbow Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2855. ——. *Assoc.with* Massicot, Cerussite, Copper carbonate, and Ironstone, in quartz. *Loc.* Silver Streak Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2856. ——. In slate. *Loc.* Silver Valley Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

2857. ——. *Assoc.with* Cerussite, in gossan. *Loc.* Spring Cr., Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2858. ——. *Assoc.with* Minium, Argentite, and Siderite. *Loc.* Target Mine, Dry R. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 46 (1887).

2859. ——. *Assoc.with* Cerussite, in lode. *Loc.* Target 1 E. Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2860. ——. *Assoc.with* Copper Pyrites, Marcasite, and Zinc-Blende, in quartz. *Loc.* Try-no-more Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

2861. ——. *Assoc.with* Massicot and Cerussite, in quartz lode in shale and greywacke. *Loc.* White Star Mine, Dry R., br. of Wild (Upper Herbert) R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

2862. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Louisa Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns-Herberton line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 18 (1883).

2863. ——. *Assoc.with* Tetrahedrite, Malachite, Azurite, Mimetite, Hematite, and Limonite, in lode. *Loc.* Mt. Garnet, Return Cr., 136 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

2864. ——. *Assoc.with* Cerussite, Iron Pyrites, Copper Pyrites, Zinc-Blende, etc., in slate and volcanic tuff. *Loc.* Lancelot Mine, Newelton (Silver Valley), 9 miles S.W. of Herberton, 10 miles S.E.byS. of Stannary Hills Rail. Stn., br. of Chillagoe line, Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Lead = 78 per cent.; Silver = 200 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 46 (1887), and L.B. 1, p. 479 (1883).

2865. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Band of Hope Lease, Victoria Reef, **Charters Towers Goldfield**, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* W.C.T.

2866. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Blue Peter Lease and No. 1 E., Blue Peter Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2867. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Bonnie Doon Lease, (Bonnie Doon Reef), Charters Towers Goldfield (*ante*). *Ref* W.C.T.

2868. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Bonnie Dundee Lease (Queen, Victory, and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

2869. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Brilliant Block Lease (Brilliant Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2870. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Brilliant Central G.M. Lease (Brilliant, Victory, and Queen Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2871. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Brilliant Extd. Lease (Brilliant Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

2872. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Brilliant P.C. (Brilliant Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2873. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Brilliant and St. George United G.M. Lease, St. George, Brilliant and Victory Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2874. ——. *Assoc.with* Gold, Iron Pyrites, Zinc-Blende, and Chlorite, in quartz. *Loc.* Bryan O'Lynn Mine, Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, pp. 36 and 49 (1889).

2875. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in quartz and calcite. *Loc.* Carrington Lion 1 and 2 E. Lease (Lion Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2876. ——. *Assoc.with* Gold, Copper Pyrites, Iron Pyrites, Zinc-Blende, and Barytes, in quartz and calcite. *Loc.* Carrington's United Mines Ltd. Lease (Lion Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

2877. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Clark's Brilliant, Worcester, and Victory Leases (Victory Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2878. Galena. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Copper carbonate, and Zinc-Blende. *Loc.* Comstock or Stockholm Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

2879. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Craven's Caledonia Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2880. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Dan O'Connell Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2881. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Day Dawn Block and Wyndham Lease (Day Dawn and Wyndham Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

2882. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Day Dawn Gold Mines G.M. Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2883. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Day Dawn P.C. (Day Dawn, Talisman, Peabody, and North Australian Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and A.R.D.M., p. 185 (1894).

2884. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Day Dawn 3A West, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2885 ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* East Mexican G.M. Lease (Day Dawn and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2886. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Golden Alexandra Lease (Golden Alexandra Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2887. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Golden Gate Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2888. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Imperial G.M. Lease (Imperial Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2889. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Kelly's Queen Block Lease (Brilliant and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2890. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Mafeking P.C. G.M. Lease (Mafeking Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2891. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Marshall's Queen G.M. Lease (Queen, Brilliant, and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2892. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Mary and Rainbow Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2892A. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Mexican Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 28 (1879).

2893. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Millchester G.M. Lease (Old Identity Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2894. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Millet's Wellington Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2895. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Mills' Day Dawn United G.M. Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2896. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* New Brilliant Freeholds G.M. Lease (Day Dawn and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2897. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* New Craven's Caledonia G.M. Lease (Caledonia, Just-in-Time, and Victoria Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2898. ——. *Assoc.with* Gold and Iron Pyrites, in quartz and calcite. *Loc.* New Queen G.M. Lease (Queen, Brilliant, and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2899. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* New Towers Extd. Mine, Charters Towers Goldfield (*ante*). *Percentages:* Iron Pyrites = 61·2; Zinc-Blende = 21·0; Galena = 2·2; Silica = 15·6. *Yield:* Gold = 3·25 per ton. *Ref.* A.R.D.M., p. 185 (1894).

2900. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Papuan, Brilliant, and Victoria G.M. Leases (Brilliant, Victoria, and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2901. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Pfeiffer's Day Dawn Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2902. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Phœbe G.M. Lease (Victory and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2903. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Queen Central G.M. Lease (Victoria Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2904. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Queen Central Block G.M. Lease (Victoria Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2905. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Queen Deep Mines Lease (Queen Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2906. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Queen's Cross G.M. Lease (Victoria and Just-in-Time Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2907. ——. *Assoc.with* Gold, Iron Pyrites, Zinc-Blende, Calcite, Gypsum, and Chlorite, in quartz. *Loc.* Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 26 (1879), P.R.S.Q., vol. 4, pp. 36 and 47 (1887), G.S.M., and W.C.T.

2908. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Quinn's Block G.M. Lease (Millchester Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2909. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Rainbow Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2910. ——. *Assoc.with* Gold and Iron Pyrites, in quartz and calcite. *Loc.* Roger's Millchester Block (Millchester Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2911. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Ruby G.M. Lease, (Ruby and Rose of England Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2912. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Ruby United G.M. Lease (Ruby Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2913. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Stockholm (Brilliant G.M. Co.) Lease, Stockholm Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2913A. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz reef. *Loc.* St. Patrick Block, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 28 (1879).

2914. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende. *Loc.* Sunburst P.C., Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

2914A. ——. *Assoc.with* Gold and Iron Pyrites, in serpentine and quartz. *Loc.* Sunlight Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2915. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Union Jack Consolidated Mines (Victoria Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2916. ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in quartz. *Loc.* Victoria Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2917. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Victoria and Caledonia Block Lease (Just-in-Time and Victoria Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2918. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Victoria and Queen G.M. Lease (Victoria and Caledonia Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

2919. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Victory, Charters Towers, G.M. Lease (Victory and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2920. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Victory G.M. Lease (Victory Reef), Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

2921. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Wallis's Day Dawn Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

2921A. ——. *Assoc.with* Silver, Cerussite. *Loc.* Nr. Chinaman's Gully, about 2½ miles E. of Mt. Leyshon. *Co.* Davenport; *Dist.* Kennedy North. *Assay:* Silver = 72 oz. per ton; Lead = 65·2 per cent. *Ref.* A.R., p. 229 (1910).

2921B. ——. *Assoc.with* Gold, Silver, Cerussite, and Limonite, in lode. *Loc.* ¾ mile E. of Mt. Leyshon, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

2921C. ——. *Assoc.with* Gold, Silver, Massicot, Anglesite, and Cerussite, in lode. *Loc.* Right-hand br. of One-mile Gully, 1½ mile S.E. of Mt. Leyshon. *Co.* Davenport (*ante*). *Ref.* A.R., 259 (1910).

2922 Galena. *Assoc.with* Gold, Iron Pyrites and Copper Pyrites, in quartz. *Loc.* Livingstone Reef, 1 mile S.S.E. of Bluff Stn., 9 miles S.E. of Mt. Leyshon, 19 miles S.S.E. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

2923. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Swain's Reef, 70-Mile Diggings, 8 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.M.

2923A. ——. *Assoc.with* Gold, in quartz. *Loc.* Severn Reef, Broughton, 10 miles E. byS. of Charters Towers. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

2924. ——. *Assoc.with* Gold and Zinc-Blende, in quartz and calcite. *Loc.* Donnybrook Reef, Donnybrook Mining Centre, 6½ miles S. of Ravenswood Rail. Stn. (Gt. Northern line), **Ravenswood Goldfield,** 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

2924A. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Erin's Hope Reef, Donnybrook Mining Centre (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1898).

2925. —— *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* J.R.D. and Premier Reefs, Hillsborough (Eight Mile), 5¾ miles N.N.E. of Ravenswood, Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 152, p. 9 ((1894).

2926. ——. *Assoc.with* Gold and Silver, in lead ochre. *Loc.* Comstock Silver Mine, nr. Plumtree Cr., 3½ miles E.S.E. of Ravenswood Rail. Stn. (Gt. Northern line), Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

2927. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. Crescent G.M. Lease (New Moon Reef), Ravenswood Township, Ravenswood Goldfield (*ante*). *Ref.* W.C.T.

2928. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* General Grant Reef, Ravenswood Township (*ante*). *Ref.* G.S.M.

2929. ——. *Assoc.with* Copper Pyrites and Zinc-Blende, in quartz. *Loc.* Sunset Reef, Ravenswood Township (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1897).

2930. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in quartz. *Loc.* Sunset and General Grant Reefs, Ravenswood Township (*ante*). *Ref.* G.S.Q. Pub. 183, pp. 2-6 (1903).

2931. ——. *Assoc.with* Iron Pyrites. *Loc.* Big Ben Silver Mine, One-Mile, Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

2932. ——. *Assoc.with* Zinc-Blende. *Loc.* Bonnie Dundee Silver Mine, One Mile (*ante*). *Assay:* Silver = 100 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 48 1887).

2933. ——. *Assoc.with* Zinc-Blende and Stibnite. *Loc.* Hannon's Silver Mine, One Mile (*ante*). *Ref.* G.S.M.

2934. ——. *Assoc.with* Silver, Stibnite, Zinc-Blende, Iron Pyrites, and Copper Pyrites, in lode. *Loc.* King's Silver Mine, One Mile (*ante*). *Analysis:* Copper = 16·25; Antimony = 26·30; Iron = 8·49; Zinc = 8·75; Sulphur = 17.02; Silicious matter = 7·31; Silver = 15·35 per cent. = 5013 oz. per ton. *Ref.* G.S.Q. Pub. 152, p. 11 (1897).

2935. ——. *Assoc.with* Zinc-Blende. *Loc.* Pyramid Silver Lease, One Mile (*ante*). *Analysis:* Zinc-Blende = 34·23 per cent.; Lead = 42·01 per cent.; Sulphur = 22·80 per cent.; Iron = 1·11 per cent. *Ref.* P.R.S.Q., vol. 4 (1887).

2936. ——. Rainbow Silver Mine, One Mile (*ante*). *Ref.* G.S.M.

2937. ——. *Assoc.with* Gold, Silver, and Cerussite, in quartz. *Loc.* Ravenswood Silver Mine, One Mile (*ante*). *Ref.* G.S.Q. Pub. 125, p. 34 (1897), and P.R.S.Q., vol. 4, p. 47 (1887).

2938. ——. *Assoc.with* Gold, Zinc-Blende, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Cousin Jack Reef, 2½ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. Mining Centre, Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

2939. ——. *Assoc.with* Cerussite. *Loc.* Esperanza Silver Mine, 3¼ miles E.byS. of Ravenswood Rail. Stn., Sandy Cr. Mining Centre (*ante*). *Ref.* G.S.M.

2940. ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* Fanny Fern Mine, 2½ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. Mining Centre (*ante*). *Yield:* Gold = 6 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 35 (1897).

2941. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende. *Loc.* John Bull Block, 3 miles E.S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* G.S.M

2942. ——. *Assoc.with* Gold, Iron Pyrites, Zinc-Blende, and Copper Pyrites, in quartz and steatite. *Loc.* Politician Mine, 2¾ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, pp. 47 and 48 (1887).

2943. ——. *Assoc.with* Silver. *Loc.* Sandy Cr., 3 miles E.S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Contents:* Lead = 65 per cent., Silver = 259 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

2944. ——. *Assoc.with* Gold, Iron Pyrites, and Cerussite, in quartz. *Loc.* Star of the South Reef, 12 miles S.W.byS. of Ravenswood Rail. Stn., Connolly Cr., Trieste Mining Centre, Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1900), and G.S.M.

2945. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Trieste Reef, 10 miles S. of Ravenswood Rail. Stn., Trieste Mining Centre (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1900).

2946. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Bell Gay Reef, Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn. (Gt. Northern line), 72 miles (by rail and road) S.W.byW. of Charters Towers, Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

2947. ——. In quartz reef. *Loc.* Gully nr. Morning Star Reef, Mt. Remarkable (*ante*). *Ref.* G.S.Q. Pub. 73, p. 4 (1891).

2948. ——. *Assoc.with* Cerussite, in quartz lode. *Loc.* Specimen Cr., Mt. Remarkable (*ante*). *Assays:* (1) Silver = 6 oz. per ton, Lead = 73· per cent.; (2) Silver = 4 oz. per ton, Lead = 48·75 per cent. *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

2949. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Mystery Reef, Pentland, 66 miles (by rail) S.W.byW. of Charters Towers, Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

2950. ——. *Assoc.with* Gold, Iron Pyrites, and Ironstone, in quartz. *Loc.* Harp of Erin Reef, Upper Cape, 17 miles W.byN. of Cape R. Rail. Stn., 77 miles (by rail and road) W.S.W. of Charters Towers, Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

2951. ——. *Assoc.with* Gold, in quartz. *Loc.* Occidental Reef, Upper Cape (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

2952. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Agnes Howson Reef, New Homestead Diggings, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

2953. ——. *Assoc.with* Gold, Silver, Redruthite, Copper carbonate, and Iron Pyrites, in quartz. *Loc.* Main's Reef, Old Homestead Diggings (*ante*). *Ref.* (and *Assays*): G.S.Q. Pub. 73, p. 11 (1891), and G.S.M.

2953A. ——. *Assoc.with* Malachite, in quartz. *Loc.* Old Harry Show, Wyandotte, 48 miles S.E. of Mt. Surprise Rail. Stn. (Etheridge line). *Co.* Gunnawarra; *Dist.* Kennedy North. *Ref.* A.R., p. 178 (1909).

2953B. ——. *Assoc.with* Anglesite and Cerussite, in quartz lode. *Loc.* Valley of Lagoons Run, 6 miles E. of Wyandotte Tel. Stn., about 64 miles S.E.byE. of Mt. Surprise Rail. Stn. *Co.* Gunnawarra (*ante*). *Ref.* A.R., p. 176 (1909).

2954. ——. *Assoc.with* Anglesite and Copper Pyrites, in lode. *Loc.* Dawn or Don R., 35 miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Assay:* Silver = 9 oz. 4 dwt. per ton; Lead = 78·2 per cent.; Copper = trace; Bismuth = trace. *Ref.* A.R., p. 61 (1906).

2954A. ——. *Assoc.with* Massicot. *Loc.* Cardigan Stn., S. side of Burdekin R., 19 miles S.W. of Ravenswood. *Co.* Murray; *Dist.* Kennedy North. *Ref.* A.R., p. 306 (1911).

2955. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Currency Reef, Dreghorn Diggings, Burdekin R., 15 miles S.S.W. of Ravenswood Rail. Stn. *Co.* Murray (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

2956. ——. *Assoc.with* Copper Pyrites. *Loc.* Jack's Cr., 56 miles N.W. of Charters Towers. *Co.* O'Connell; *Dist.* Kennedy North. *Assay:* Silver = 35 oz. 18 dwt. per ton; Copper = 7·0 per cent. *Ref.* A.R., p. 96 (1907).

2957. ——. Bowen R., Bowen R. Coalfield, about 50 miles S.W. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4 (1879).

2957A. ——. Flagstone Cr., Bowen R. Coalfield (*ante*). *Ref.* G.S.Q. Pub. 4, p. 4 (1879).

NOTE: A silver-lead mine is said to have been worked here 20 years ago.

2957B. ——, containing Silver. *Loc.* Mitchell Plains, N. of Mt. Mackenzie, 24 miles W.S.W. of Bowen. *Co.* Salisbury (*ante*). *Ref.* B.D.

2958. ——. *Assoc.with* Cerussite, Copper carbonate, Chrysocolla, Manganese-dioxide, and Garnet, in gossan. *Loc.* Black Star Lease (116), 1¾-mile N.byW. of Ewan, Running R., **Kangaroo Hills Mineral Field**, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

2959. Galena. In ferruginous garnet. Black Star South Lease (199), 1½ mile N.byW. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

2960. ——. *Assoc.with* Bornite, Cerussite, and Copper Carbonate, in lode. *Loc.* Blue Bell Lease (226), 1¼ mile N.W. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

2961. ——. *Assoc.with* Malachite, Azurite, Cerussite, and Manganese-dioxide. *Loc.* Bonnybrook Lease (178), 1½ mile N.W.byN. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

2962. ——. In lode. Caledonian Lease (174), ¾-mile N.E.byN. of Ewan, Running R. (*ante*). *Assay:* Silver = 59 oz. 13 dwt. 22 gr. per ton; Lead = 57 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 9 (1892).

2963. ——. *Assoc.with* Cerussite and traces of Copper, in lode. *Loc.* Regner and Nevan's Hole, Day Dawn Lease (170), 1¼ mile N. of Ewan, Running R. (*ante*). *Assay:* Silver = 17 dwt. 23 gr. per ton; Copper = 4·1 per cent.; Lead = 29·5 per cent. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

2964. ——. *Assoc.with* Silver (native), Cerussite, Malachite, Chrysocolla, Mispickel, Zinc-Blende, Hematite, and Manganese-dioxide, in lode. *Loc.* Hidden Treasure Lease (165), 1¾ mile W.N.W. of Ewan, Running R. (*ante*). *Assays: See* No. 1241. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), and 82, p. 7 (1892).

2965. ——. *Assoc.with* Azurite, Kaolin, Lithomarge, and Steatite, in quartz lode. *Loc.* Hidden Treasure E. Lease (166), 1½ mile N.W. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 82, p. 7 (1892).

2966. ——. *Assoc.with* Cerussite, Manganese-dioxide, and Ironstone, in chloritic lode. *Loc.* Hidden Treasure E. Lease (166), 1½ mile N.W. of Ewan, Running R. (*ante*). *Assays:* (1) Silver = 41 oz. 11 dwt. 8 gr. per ton; Lead = 30·5 per cent. (2) Silver = 37 oz. per ton; Lead = 72 per cent. (3) Silver = 42 oz. per ton; Lead = 40 per cent. (4) Silver = 65 oz. per ton; Lead = 20 per cent. *Ref.* G.S.Q. Pub. 82, pp. 6 and 7 (1892).

2967. ——. *Assoc.with* Cassiterite and Copper Pyrites. *Loc.* Kangaroo Hills Tin Freehold, about 3 miles N.E.byE. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 167, p. 5 (1901).

2968. ——. One mile S. of Mt. Benham, nr. Ewan, Running R. (*ante*). *Assay:* Gold = 2 dwt. 9 gr. per ton; Silver = 3 oz. 3 dwt. 13 gr. per ton; Lead = 23·5 per cent. *Ref.* A.R., p. 55 (1906).

2969. ——. *Assoc.with* Cerussite, Malachite, Chrysocolla, Lievrite, Manganese-dioxide, and Garnet, in lode. *Loc.* Mt. Hishon Lease (210), 1½ mile N.W.byN. of Ewan, Running R. (*ante*). *Assay:* Gold = trace; Silver = 2 oz. 20 gr. per ton; Lead = 22·3 per cent. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

2970. ——. *Assoc.with* Cerussite, in quartz and garnet rock. *Loc.* Mt. Hishon 1 E. Lease (224), about 1½ mile N.N.W. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

2971. ——. *Assoc.with* Cerussite, Chrysocolla, Pyrolusite, Calcite, and Gypsum, in garnet rock. *Loc.* Mt. Moss S. Lease (168), (Elsie's Shaft), about 2 miles N. of Ewan, Running R. (*ante*). *Assay:* Silver = 16 oz. 6 dwt. 16 gr. per ton; Lead = 69·8 per cent.; Gold = trace. *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

2972. ——. *Assoc.with* Copper Pyrites, Bornite, Cuprite, Tenorite, Copper carbonate, Iron Pyrites, Ironstone, and Zinc-Blende, in lode. *Loc.* Mt. Thekla Copper and Silver Mine, 4 miles N. of Ewan, Running R. (*ante*). *Assays:* (1) Silver = 86 oz. 17 dwt. per ton; Copper = 21·37 per cent.; Lead = 8·65 per cent.; Zinc = 4 to 5 per cent. (2) Silver = 121 oz. per ton; Lead = 22 per cent. *Average of Assays:* Silver = 26 oz. 12 dwt. per ton; Copper = 22 per cent. *Carbonate Ores Assay:* Silver = 22 oz. 17 dwt. per ton; Copper = 15·75 per cent.; Zinc = 4 per cent. *Ref.* G.S.Q. Pub. 167, p. 7 (1901).

2973. ——. *Assoc.with* Azurite and Atacamite, in quartz. *Loc.* Rattler Lease (233), about 1¼ mile N. of Ewan, Running R. (*ante*). *Assays:* (1) Silver = 17 dwt. 23 gr. per ton. (2) Silver = 9 oz. 16 dwt. per ton; Copper = 3½ per cent. (3) Silver = 22 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

2974. ——. *Assoc.with* Native Silver, Bornite, Cuprite, Copper Pyrites, and Copper carbonate, in lode. *Loc.* True Blue Lease (161), ¾-mile N.N.W. of Ewan, Running R. (*ante*). *Assays:* (1) Silver = 60 oz. per ton; Copper = 27·5 per cent. (2) Silver = 56 oz. per ton; Copper = 31·4 per cent. *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

2975. ——. *Assoc.with* Tile Ore, Hematite, Cerussite, Bornite, Copper Pyrites, and Mispickel, in lode. *Loc.* Wallaroo Lease (162), 4¼ miles E. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

2976. ——. Will's Shaft, Ewan, Running R. (*ante*). *Ref.* G.S.M.

2977. ——. *Assoc.with* Redruthite and Zinc-Blende, in lode. *Loc.* Macauley Cr. Copper and Silver Lodes, 5 miles S.byW. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 167, pp. 9, 10 (1901).

2978. ——. *Assoc.with* Cerussite, Copper carbonate, and Hematite, in gossan. *Loc.* Mt. Brown Lease (183), Mt. Brown, about 2 miles W.byS. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 82, pp. 9, 10 (1892).

2979. ——. *Assoc.with* Copper carbonate, in quartz lode. *Loc.* Pinnacles Extd. Lease (220), about 2 miles S.W. of Mt. Brown, 4 miles S.W.byW. of Ewan, Running R. (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

2980. ——. *Assoc.with* Zinc Blende, Cerussite, Minium, Copper carbonate, Chrysocolla, and Hematite, in lode. *Loc.* White Wings P.A., Mt. Brown, about 2½ miles W.byS. of Ewan, Running R. (*ante*). *Assays:* Silver = 16 oz. and 2 oz. 7 dwt. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

2981. ——. *Assoc.with* Minium, Anglesite, Cerussite, Pyromorphite, and Linarite, in lode. *Loc.* Alpha Silver-Lead Mine, **Star R. (Argentine) Mineral Field**, 50 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Assay:* Lead = 79 per cent.; Silver = 107 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

2982. ——. *Assoc.with* Minium and Ironstone. Ard. Righ Silver-Lead Mine, Star R. Mineral Field (*ante*). *Assay:* Silver = 57 oz. per ton; Lead = 61 per cent. *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

2983. ——. *Assoc.with* Copper Pyrites, Malachite, Minium, Cerussite, Mispickel, Manganese-dioxide, Ironstone, and Iron Ochre, in lode. *Loc.* Colorado Silver Mine, Star R. Mineral Field (*ante*). *Assays:* Silver = 16 oz. and 42 oz. per ton; Lead = 16 and 48 per cent. *Ref.* G.S.Q. Pub. 26, p. 7 (1886).

2984. ——. *Assoc.with* Minium and Cerussite, in gossan. *Loc.* Croesus Silver-Lead Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

2985. ——. *Assoc.with* Minium, Anglesite, and Ironstone. *Loc.* Hero Silver Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, pp. 2, 3 (1886).

2986. ——. *Assoc.with* Minium, Massicot, Cerussite, and Ironstone. *Loc.* John Bull Silver Mine, Star R. Mineral Field (*ante*). *Assay:* Lead = 61½ per cent.; Silver = 52 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

2987. ——. *Assoc.with* Iron Pyrites, Zinc-Blende, and Stibnite. *Loc.* Murphy and Godson's M.L. (73), Star R. Mineral Field (*ante*). *Assay:* Lead = 52½ per cent.; Silver = 81½ oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

2988. ——. Nevada Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.M.

2989. ——. *Assoc.with* Minium and Cerussite, in lode. *Loc.* Nonpareil Silver-Lead Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

2990. ——. *Assoc.with* Iron Pyrites and Zinc-Blende, in quartz lode. *Loc.* Northbrook (A. Beazley's Sel.) Lease (179), Star R. Mineral Field (*ante*). *Assays:* (1) Lead = 65 per cent.; Silver = 70 to 90 oz. per ton. (2) Silver = 40 to 55 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

2991. ——. *Assoc.with* Cerussite, Minium, and Ironstone, in schistose and gossany lode. *Loc.* Overlander Silver Mine, Star R. Silver Field (*ante*). *Assay:* Lead = 65 per cent.; Silver = 150 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

2992. ——. *Assoc.with* Minium and Cerussite. *Loc.* Prince of Wales Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

2993. ——. *Assoc.with* Cerussite and Lead Ochre. *Loc.* Silver Sel. (169), Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

2994. ——. *Assoc.with* Lead Ochre and Ironstone, in gossan. *Loc.* Southern Cross Silver Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

2995. ——. *Assoc.with* Minium, Anglesite, and Hematite, in quartz. *Loc.* Struck Oil Silver Lode, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

2996. ——. *Assoc.with* Minium, Anglesite, Cerussite, and Ironstone, in lode. *Loc.* St. John's Silver-Lead Lease, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

2997. ——. *Assoc.with* Gold and Hematite, in quartz. *Loc.* Thermopylae Reef, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

2998. ——. *Assoc.with* Minium, Anglesite, and Cerussite, in ferruginous lode. *Loc.* True Blue Mine, Star R. Mineral Field (*ante*). *Assay:* Lead = 72 per cent.; Silver = 68 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

2999. ——. *Assoc.with* Gold, Iron Pyrites, Minium, Anglesite, Cerussite, Zinc-Blende, and Siderite, in quartz lode. *Loc.* Union Silver Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886), and G.S.M.

3000. ——. *Assoc.with* Anglesite, Minium, Cerussite, Iron Pyrites, and Mispickel, in lode. *Loc.* Venture Silver Mine, Star R. Mineral Field (*ante*). *Assays:* (1) Lead = 68 per cent.; Silver = 82 oz. per ton. (2) Lead = 60 per cent.; Silver = 69 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

3001. ——. *Assoc.with* Massicot, Anglesite, Cerussite, and Ironstone. *Loc.* Washington (1 and 2) Mines, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

3002. ——. *Assoc.with* Silver, Azurite, and Barytes. *Loc.* Star R. (Argentine Silver Field (*ante*). *Ref.* L.B. 1, p. 479 (1883).

3003. ——. *Assoc.with* Gold, Iron Pyrites, Limonite, Turgite, Ironstone, and Copper Pyrites, in quartz. *Loc.* Broken R. Gold and Silver Co.'s Mine, Bee Cr. Diggings, Eungella Goldfield, 10 miles W. of Finch-Hatton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* (and *Assays*): G.S.Q. Pubs. 54, pp. 2 and 3 (1889), and 229, pp. 31, 32 (1910).

3004. ——. *Assoc.with* Gold, Iron Pyrites, Siderite, and Zinc-Blende, in quartz. *Loc.* Coral Tree P.C., Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 29 (1910).

3005. ——. *Assoc.with* Gold, Copper Pyrites, Iron Pyrites, Limonite, Siderite, Malachite, and Zinc-Blende, in quartz. *Loc.* Highland Mary P.C., Bee Cr. Diggings (*ante*). *Ref.* (and *Assay*): G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 30 (1910).

3005A. ——. *Assoc.with* Gold, in gossany ore. *Loc.* Lord Nolan (Queen) Reef, Bee Cr. Diggings (*ante*). *Ref.* (and *Assays*): G.S.Q. Pub. 229, p. 31 (1910).

3006. ——. In quartz. Martin's Reef, Bee Cr. Diggings (*ante*). *Assay:* Silver = 70 oz. per ton. *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

3007. ——. *Assoc.with* Malachite, Azurite, and Iron Pyrites, in quartz. *Loc.* Duffey's Claim, Blue Mountain, **Mt. Spencer** Gold and Mineral Field, 6 miles S.W. of Eton Rail. Stn. (Mackay line), 29 miles (by rail and road) S.W.byS. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), and 229, pp. 18, 19 (1910).

3008. ——. *Assoc.with* Copper Pyrites, Malachite, and Zinc-Blende, in quartz. *Loc.* Mackay's Mine, Blue Mountain, Mt. Spencer Gold and Mineral Field (*ante*). *Assay:* Gold = 3 dwt. 6 gr. per ton; Silver = 2 oz. 5 dwt. 17 gr. per ton; Lead = 11 per cent. *Ref.* G.S.Q. Pub. 53, p. 10 (1889).

3009. ——. *Assoc.with* Gold, Copper Pyrites, Tetrahedrite, Tenorite, Malachite, Azurite, and Ironstone, in quartz. *Loc.* Pine Vale Cr. Copper Mine, Mt. Spencer Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), and 229, pp. 12-17 (1910).

3010. ——. *Assoc.with* Copper Pyrites and Zinc-Blende, in quartz. *Loc.* Ben Mohr M.L. (8), Mt. Spencer Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 229, p. 19 (1910).

3011. ——. *Assoc.with* Cerussite, Copper Pyrites, Malachite, Azurite, Iron Pyrites, Mispickel, and Zinc-Blende. *Loc.* **Mt. Barker** Silver Mines, 3 miles N.W. of Eungella Stn., 33 miles (by rail and road) W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* Kennedy South. *Assay:* Silver = 47 oz. per ton; Lead = 73·4 per cent.; Zinc = 6·8 per cent. *Ref.* G.S.Q. Pubs. 54, p. 3 (1889), 181 (1903), and 229, pp. 34, 35 (1910).

3012. ——. *Assoc.with* Cerussite, Iron Pyrites, and Zinc-Blende, in lode. *Loc.* Bonnie Dundee Silver Mine, **Eukalunda,** Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Assays: See* No. 1288. *Ref.* G.S.Q. Pub. 57, p. 6 (1889).

3013. ——. *Assoc.with* Minium, Cerussite, Zinc-Blende, Iron Pyrites, and Copper Pyrites, in lode. *Loc.* General Gordon Silver-Lead Mine, Eukalunda (*ante*). *Assays: See* No. 1289. *Ref.* G.S.Q. Pub. 57, p. 6 (1889).

3014. ——. Macdonald's Lode, Eukalunda (*ante*). *Ref.* G.S.M.

3015. ——. *Assoc.with* Minium, Cerussite, and Clay, in lode, in slate. *Loc.* New Year's Gift Mine, Two-mile Cr., Eukalunda (*ante*). *Assay: See* No. 1290. *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

3016. ——. *Assoc.with* Minium, Cerussite, Anglesite, Zinc-Blende, Iron Pyrites, and Ironstone, in lode and vein. *Loc.* Pyramid Silver Mine, Eukalunda (*ante*). *Assays:* (1) Lead = 58·1 per cent.; Silver = 78 oz. per ton. (2) Lead = 58·45 per cent.; Silver = 71 oz. per ton. (3) Lead = 69·1 per cent.; Silver = 80½ oz. per ton. *Ref.* G.S.Q. Pub. 57, pp. 2-4 (1889).

3017. ——. *Assoc.with* Silver, Minium, Cerussite, Iron Pyrites, Ironstone, and Zinc-Blende, in lode. *Loc.* Rob Roy Silver-Lead Mine, Eukalunda (*ante*). *Assays:* (Galena) (1) Lead = 63·75 per cent.; Silver = 24½ oz. per ton; (2) Lead = 71·8 per cent.; Silver = 66½ oz. per ton. (Zinc-Blende) (3) Zinc = 32·78 per cent.; Silver = 5 oz. per ton; (4) Zinc = 20 per cent.; Silver = 45 oz. per ton. *General Assay:* Lead = 20·72 per cent.; Zinc = 31·33 per cent.; Silver = 22 oz. 10 dwt. 19 gr. per ton; Gold = trace; Copper = trace; Iron = large quantity. *Ref.* G.S.Q. Pub. 57, pp. 4-6 (1889).

3018. ——. *Assoc.with* Silver, Minium, and Cerussite, in lode. *Loc.* Silver King Silver-Lead Mine, Eukalunda (*ante*). *Assay: See* No. 1293. *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

3019. ——. *Assoc.with* Minium, in gossan. *Loc.* Stackpool's Silver Lease, Eukalunda (*ante*). *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

3020. ——. *Assoc.with* Native Silver and Copper ore. *Loc.* Sunbeam Silver Mine, Eukalunda (*ante*).

3021. ——. *Assoc.with* Gold, Minium, and Mispickel, in lode. *Loc.* Venture Silver Mine, Eukalunda (*ante*). *Assays: See* No. 4147. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

3022. ——. *Assoc.with* Gold, Copper Pyrites, Malachite, Azurite, Native Bismuth, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Hematite, and Ironstone, in lode. *Loc.* Daisy Bismuth Mine, N. of Mt. Wyatt and Bowen Road, 3 miles E. of Eukalunda, Sellheim Mineral Field. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 57, p. 8 (1889), and G.S.M.

3022A. ——. *Assoc.with* Copper Pyrites, and Zinc-Blende, in quartz. *Loc.* nr. Coolan's P.A., Mt. Wyatt Goldfield, about 60 miles S.S.E. of Ravenswood. *Co.* Sellhem (*ante*). *Ref.* G.S.M

3022B. ——. *Assoc.with* Silver, Anglesite, and Cerussite, in lode. *Loc.* Black Cr., br. of Police Cr., about 30 miles S.byE. of Mt. Wyatt Goldfield. *Co.* Sellheim (*ante*). *Ref.* A.R., p. 221 (1910).

3023. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Crown Reef, Copperfield, 5 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 27, p. 6 (1886).

3024. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Palm-tree Reef, Copperfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 6 (1886).

3025. ——. *Assoc.with* Minium and Cerussite, in veins of quartz in sandstone. *Loc.* Reefs, E. of Mt. Clarke, Mt. Britton Goldfield, 75 miles (by road) W.S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Assay:* Silver = 130 oz. per ton. *Ref.* G.S.Q. Pub. 39, p. 6 (1887)

3026. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Zinc-Blende, and Mispickel, in silicious lode. *Loc.* Silver-Lead Deposit, Por. (46), Par. of Monsildale, head of Brisbane R., 36 miles N.byW. of Esk Rail. Stn., 102 miles (by rail and road) N.N.W. of Brisbane. *Co.* Canning; *Dist.* **Moreton.** *Ref.* (and *Assays*) G.S.Q. Pub. 169, pp. 1-4 (1907).

3027. ——. *Assoc.with* Iron Pyrites, Massicot, Bismite, Mispickel, and Chlorite, in quartzite and slate. *Loc.* Blackbutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* O.R.

3028. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Tenorite, and Zinc-Blende, in altered sedimentary rocks. *Loc.* Pyramid Copper and Silver Mine (Saxon shaft), Cressbrook Cr., 12 miles N. of Esk Rail. Stn., Brisbane Valley Br. line, 79 miles (by rail and road) W.N.W. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

3029. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Zinc-Blende, in sedimentary rocks. *Loc.* Rising Star Copper Area, Cressbrook Cr. (*ante*). *Assay:* Copper = 3·75 per cent.; Silver = 1 oz. 13 dwt. 23 gr. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 169, p. 4 (1901).

3030. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Sandy Mt., Crow's Nest Rail. Stn., 34 miles (by rail) N.N.E. of Toowoomba. *Co.* Cavendish; *Dist.* Moreton. *Ref.* A.R., p. 148 (1908).

3030A. ——. *Assoc.with* Iron Pyrites and Zinc Blende, in lode. *Loc.* Kipper Cr., 8 miles W. of Esk Rail. Stn. (Brisbane Valley line). *Co.* Cavendish (*ante*). *Assay:* Silver = 5 oz. 13 dwt., Lead = 34 per cent., Zinc = 5 per cent., Gold, trace. *Ref.* A.R., p. 245 (1910).

3031. ——. In gossany quartz. Alexandra Queen P.A., Mt. Langan, Emu Cr., 14½ miles W.N.W. of Kannungar Rail. Stn. (Brisbane Valley line). *Co.* Cavendish (*ante*). *Ref.* L.C.B., and Q.G.M.J., vol. 7, p. 467 (1906).

3032. ——. *Assoc.with* Gold, Massicot, and Zinc-Blende, in gossany quartz. *Loc.* Iceberg P.A., Mt. Langan (*ante*). *Ref.* L.C.B., and Q.G.M.J., p. 467 (1906).

3032A. ——. *Assoc.with* Gold, Silver, and Zinc-Blende, in lode. *Loc.* Langan's Mine, Mt. Langan (*ante*). *Ref.* A.R., p. 213 (1910).

3033. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Anglesite, Massicot, Mispickel, and Limonite, in gossan and slate. *Loc.* Silver Knob P.A., Mt. Langan (*ante*). *Assay:* Silver = 31 oz. per ton; Lead = 13 per cent.; Gold = trace. *Ref.* Q.G.M.J., vol. 7, p. 467 (1906).

3033A. Galena. *Assoc.with* Copper Pyrites and Zinc-Blende, in slate and quartzite. *Loc.* Deep Rocky Gorge, between Murphy's Cr. and Perseverance, 4½ miles N.byE. of Murphy's Cr. Rail. Stn. (Main line). *Co.* Cavendish; *Dist.* Moreton. *Ref.* O.R. (1910).

3034. ——. *Assoc.with* Copper Pyrites, in altered tuffs. *Loc.* Moller and Bennett's Copper Workings, Por. 52v, about 4½ miles N. of Murphy's Cr. Rail. Stn. *Co.* Cavendish (*ante*). *Ref.* B.D.

3035. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reefs. *Loc.* Sel. 194, Brookfield Cr., 10 miles W.S.W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 63, p. 2 (1890).

3035A. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz. *Loc.* Perseverance Reef, Mountain Camp, Enoggera, 6½ miles W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 143, p. 9 (1899), and G.S.M.

3036. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Zinc-Blende, in quartz. *Loc.* Friend's Claim, Barmundoo (Tableland) Goldfield, 28 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Assay:* Gold = 14 dwt., Silver = 2 oz. 2 dwt. 11 gr. per ton. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

3036A. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende. *Loc.* Georgina Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.M.

3037. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* Griffith's Reef, Diggers' Cr., Barmundoo Goldfield (*ante*). *Yield: See* No. 4235. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

3038. —— (Argentiferous). Silver Queen Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.M.

3039. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in quartz and calcite. *Loc.* Stand-by Reef, Mt. Jacob Mine, **Bompa** Goldfield, about 4 miles E.byS. of Littlemere Rail. Stn. (Boyne Valley line), 56 miles (by rail and road) S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

3040. ——. *Assoc.with* Gold, in quartz. *Loc.* Federal Block G.M. Lease 52, Eastern Boyne Goldfield, 26½ miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 150, p. 9 (1900).

3041. ——. *Assoc.with* Gold, Silver, Minium, Anglesite, Cerussite, Massicot, Hematite, and Limonite, in lode. *Loc.* Bompa Silver-Lead Mines, 2 miles W.byS. of Littlemere Rail. Stn. (Boyne Valley line), 53 miles (by rail and road) S. of Gladstone. *Co.* Clintn (*ante*). *Ref.* G.S.Q. Pub. 159, pp. 7, 8 (1901).

3042. ——. *Assoc.with* Copper Pyrites, Cuprite, Bornite, Tenorite, Malachite, Azurite, Zinc-Blende, Hematite, Magnetite, Garnet, Chlorite, and Calcite. *Loc.* Glassford Cr. Copper Mines, Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne Valley line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), and 194, p. 28 (1904), and A.R., pp. 309, 310, 319, 320 (1911).

3043. ——. *Assoc.with* Gold, Copper Pyrites, Iron Pyrites, Mispickel, Zinc-Blende, and Calcite, in quartz. *Loc.* Advance Reef, **Norton** (Milton) Goldfield, about 4 miles E. of Wietalaba Rail. Stn. (Boyne Valley line), about 43 miles (by rail and road) S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), and 208, p. 11 (1907), and G.S.M.

3044. ——. *Assoc.with* Gold, Silver, Zinc-Blende, and Iron Pyrites, in quartz and calcite. *Loc.* All Nations Reef, Norton (Milton) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 13 (1907).

3045. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Malachite, and Zinc-Blende, in quartz. *Loc.* Brigham Young (Todman's Tapautohaunga) Mine, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, pp. 15, 16 (1907).

3046. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz. *Loc.* Conran's Reef, Norton (Milton) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 8 (1890).

3047. ——. *Assoc.with* Gold, Iron Pyrites, Zinc-Blende, and Calcite, in quartz. *Loc.* Frampton United Mine, Norton (Milton) Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

3047A. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz and calcite. *Loc.* Frampton Reef, Norton Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 208, p. 21 (1907).

3047B. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Friend's Mine, Norton Goldfield (*ante*). *Ref.* G.S.M.

3048. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, and Zinc-Blende, in quartz. *Loc.* Galena Reef, Norton Goldfield (*ante*). *Assay:* Gold = 2 oz. 8 dwt. 9 gr., and Silver = 5 oz. 3 dwt. 13 gr. per ton. *Ref.* G.S.Q. Pubs. 21, p. 8 (1885), and 208, pp. 22-24 (1907).

3049. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Zinc Blende, and Redruthite, in quartz. *Loc.* Goody's (Carmichael's Reef), Norton Goldfield (*ante*). *Assay: See* No. 4277. *Ref.* G.S.Q. Pub. 208, p. 26 (1907).

3050. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Hans Big Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 27 (1907).

3051. ——. *Assoc.with* Gold, Iron Pyrites, Zinc-Blende, in quartz and calcite. *Loc.* Hickey's Reef, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

3052. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, and Zinc-Blende, in quartz and calcite. *Loc.* Who'd Ha' Thought It Reef, Norton Goldfield (*ante*). *Assay: See* No. 4294. *Ref.* G.S.Q. Pubs. 21, p. 6 (1885) and 208, p. 39 (1907).

3053. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Capricornian Mine, Ulam Goldfield, 3 miles S. of Toonda Rail. Stn., North Coast line, 44 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 99, p. 6 (1894).

3054. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Just-in-Time Mine, Ulam Goldfield (*ante*). *Assay:* Gold = 1 oz. 9 dwt. 9 gr. per ton. *Ref.* G.S.Q. Pub. 99, p. 11 (1894).

3055. ——. *Assoc.with* Gold, Iron Pyrites, and Copper carbonate, in quartz. *Loc.* Lamona Claim, Busby's Gully, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 9 (1894).

3056. ——. *Assoc.with* Gold, Iron Pyrites, in quartz. *Loc.* Queenslander P.C., Queenslander Cr., Top Camp, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99 p. 4 (1894).

3057. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Seaview Mine, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 6 (1894).

3058. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Victory Mine, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 10 (1894).

3058A. ——. *Assoc.with* Gold, Silver, Zinc-Blende, and Copper Pyrites, in quartz reef in diorite country. *Loc.* Britannia Mine, N. of Lake Learmouth, Canoona Goldfield, 35 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Assay:* 6 oz. Gold and 4 oz. Silver per ton. *Ref.* B.D.

3059. ——. *Assoc.with* Gold, Zinc-Blende, and Dolomite, in quartz reef. *Loc.* Annie Mine, Cawarral Goldfield, 23 miles (by rail) N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 125, p. 28 (1897), and G.S.M.

3060. ——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* Miners' Dream Mine, Bob's Cr., 4 miles E.N.E. of Bouldercombe, 13 miles S. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 13, p. 16 (1898).

3061. ——. *Assoc.with* Gold, Zinc-Blende, and Copper Pyrites, in quartz. *Loc.* Mary Florence Mine, Blackfellow's Gully, Morinish Goldfield, 30 miles W.N.W. of Rockhampton. *Co.* Livingtone (*ante*). *Ref.* A.R.D.M., p. 60 (1885), and G.S.M.

3062. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Welcome Mine, Morinish Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 47 (1887).

3063. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* "The Pointers," nr. Yaamba, 13 miles N.W.byW. of Rockhampton. *Co.* Livingtone; *Dist.* Port Curtis. *Ref.* Q.M.

3064. ——. *Assoc.with* Anglesite. *Loc.* Carmilla Mine, Carmilla Cr., Connor's Range, 30 miles N. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* Q.M.

3065. ——. *Assoc.with* Gold and Cerussite, in quartz. *Loc.* Magpie Lode, Carmilla Mine, Connor's Range (*ante*). *Ref.* G.S.Q. Pub. 141, p. 5 (1898).

3066. ——. In gossan vein. Limekiln Beach, Hunter Is., 45 miles N.E.byE. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 21 (1894).

3067. ——. *Assoc.with* Gold, Silver, Native Copper, Copper Pyrites, Cuprite, Redruthite, Azurite, Malachite, Iron Pyrites, Molybdenite, and Ironstone in breccia and granite rock. *Loc.* Moonmera Copper Mines, nr. Moonmera Rail. Stn., 20 miles (by rail) S.S.W. of Rockhampton, Mt. Morgan Br. line. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 143, p. 27 (1899), and 195, pp. 18-20 (1904).

3068. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, Malachite, Azurite, Zinc-Blende, Iron Pyrites, and Calcite, in slate, diorite, andesite, syenite, and quartzite. *Loc.* Blue Bell Copper Mine, Amamoor Cr. 19 miles S.S.E. of Gympie. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* Q.G.M.J., vol. 8, pp. 524-526 (1907).

3069. Galena. *Assoc.with* Gold, Silver, Copper Pyrites, Redruthite, Pyrrhotite, Mispickel, and Stibnite. *Loc.* Mariners' Reef, **Black Snake** Goldfield, 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Analyses and Assays of Ore, etc.: See* No. 2318. *Ref.* G.S.Q. Pub. 28, p. 6 (1886).

3070. ——. Mt. Coora, Black Snake Goldfield, 8 miles S.S.E. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.M.

3071. ——. *Assoc.with* Gold, Silver, Native Copper, and Copper carbonate. *Loc.* Mt. Terrible Lode, Black Snake, 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

3072. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Mispickel, Zinc-Blende, and Schorl, in quartz. *Loc.* Victoria Reef, Black Snake (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

3073. ——. *Assoc.with* Azurite, Malachite, Copper Pyrites, and Mispickel, in granitic lode. *Loc.* Calgoa West Lode, Sel. 1393, Calgoa Cr., nr. Munna Copper Mine, 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

3074. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Chinaman's Cr., Mt. Ubi, W. of Blackall Range, 15 miles W.byS. of Palmwoods Rail. Stn. (North Coast line). *Co.* Lennox (should be March); *Dist.* Wide Bay. *Ref.* G.S.M.

3075. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Zinc-Blende. *Loc.* Mellor and Elworthy's Stn., Imbil, 8 miles from Kandanga, 15 miles S. of Gympie. *Co.* Lennox (*ante*). *Assay:* Gold = 4 dwt., Silver = 39 oz. per ton, Copper = 0·25 per cent. *Ref.* A.R., p. 93 (1907).

3076. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Empress Reef, Jimna (now Yabba) Goldfield, 35 miles S. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 169, p. 15 (1901).

3077. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc-Blende, in quartz and calcite. *Loc.* Rise and Shine Reef, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 2 (1889).

3078. ——. *Assoc.with* Gold, Iron Pyrites, Tenorite, Copperas, Calamine, and Zinc-Blende, in quartz. *Loc.* Beer and Dawson's Lease, 1 mile E. of Yorkey's Goldfield, 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 8 (1902).

3079. ——. *Assoc.with* Gold and Stibnite, in quartz. *Loc.* Triad Lease, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 7 (1902).

3080. ——. In quartz. Columbia Reef, **Gympie Goldfield**, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 52, p. 26 (1889).

3081. ——. *Assoc.with* Silver. *Loc.* Fat Hen Cr. Mine, Gympie Goldfield (*ante*). *Estimated Contents:* Lead = 50 per cent.; Silver = 60 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 52 (1897).

3082. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Glanmire Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 16 (1889).

3083. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Gt. Eastern No. 2 Lease (779), Inglewood Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 2 (1891).

3084. ——. *Assoc.with* Gold, in calcite and quartz. *Loc.* Gt. Eastern Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 19 (1889).

3085. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* New Dawn Mine, Gympie Goldfield (*ante*).

3086. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Phœnix P.C. Lease (829), Western Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 12 (1894), and G.S.M.

3087. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Phœnix 3 N. Lease (799), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 32 (1884), and 100, p. 14 (1894).

3088. ——. *Assoc.with* Gold and Iron Pyrites, in quartz and calcite. *Loc.* Phœnix 2 S. Lease (512), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 25 (1889).

3089. ——. *Assoc.with* Gold. Iron Pyrites, Siderite, and Zinc-Blende, in quartz, between walls of slate and diorite (?). *Loc.* Enterprise Reef, on br. of Cochrane Cr., 5½ miles N.W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 52, p. 12 (1889)

3090. ——. *Assoc.with* Gold and Zinc-Blende, in quartz. *Loc.* Exhibition Reef, 6 miles N. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 2 (1889).

3091. ——. *Assoc.with* Gold and Iron Pyrites, in crystalline quartz. *Loc.* Veteran Reef, 7 miles N.N.W. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

3092. ——. *Assoc.with* Copper Pyrites and Zinc-Blende. *Loc.* Mt. Widgee, 14 miles W. of Gympie. *Co.* March (*ante*). *Assay:* Gold = trace, Silver = 2 oz. 16 dwt. per ton, Lead = 7·95, Copper = 1·43, Zinc = 6·30 per cent. *Ref.* A.R., 1908, p. 163.

3093. ——. *Assoc.with* Copper Pyrites, in lode. *Loc.* St. Aignan (Misima) Is., Louisiade Archipelago, 379 miles E.byS. of Port Moresby, **Brit. New Guinea.**

—— Reef, Norton Goldfield. *Min.Ref.* Copper Pyrites, *see* 2291; Galena, 3048; Gold, 4276; Iron Pyrites, 5375; Silver, 7523; Zinc-Blende, 8193.

—— and Mt. Fairbrother Reefs, Mt. Jacob Mine, Bompa Goldfield. *Min.Ref.* Gold, *see* 4248; Iron Pyrites, 5359.

Gardner Bros'. Bore. *See under* Artesian Bores. No. 288.

Gardner's Manganese Workings, nr. Calliope, S. of Gladstone. *Min.Ref.* Ironstone, *see* 5617A; Manganese-dioxide, 6461.

Garibaldi Diggings. *See* Cawarral Goldfield.

Garnet. *Compo.* Varieties depend on certain percentages of silica, alumina, lime, magnesia, iron, etc. *Colour,* red, brown, yellow, white, apple-green, and black. *Lustre,* vitreous to resinous. *H.* =6·5-7·5. Brittle. *Sp.gr.* 3·1-4·3.

VARIETIES: Almandine, Andradite, Colophonite, Melanite, Pyreneite, Pyrope; also unclassified Garnet. *See* below.

ASSOCIATED MINERALS: Commonly found with Copper Pyrites, Iron Pyrites, Zinc-Blende, and Mispickel, also with Cassiterite, Wolfram, Bismuthinite, Manganese, and several secondary minerals. Among non-metallic minerals, Epidote, Wollastonite, and Chert are common associates, but it is also found with Mica, Quartz, Fluorspar, Hornblende, Tourmaline, etc. In alluvial deposits it frequently occurs with Gold, Tin, Sapphire, Zircon, Topaz, Rock Crystal, etc., etc.

ASSOCIATED ROCKS: These include limestone, granite, mica schist, chlorite rock, hornblende rock, epidote rock, etc., etc.

MINERALOGICAL NOTE: Garnet, in many localities, is found as an alteration or contact deposit between granite and limestone, in association with Epidote, Wollastonite, Chert, Magnetite, and Hematite, the two latter often being found as pseudomorphs after Garnet.—G.S.Q. Pub. No. 196 describes its general mode of occurrence under these conditions. As gemstones there is but little demand for Queensland Garnets, but the brownish-red Pyrope found at Lowood (No. 3168) is worthy of attention.

3094. ——. *Assoc.with* Staurolite, in mica schist. *Loc.* Cattle Cr., Corella R., about 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, Pl. I., p. 18 (1908), and G.S.M.

3110. ——. *Assoc.with* Copper Pyrites, Cuprite, Redruthite, Malachite, Azurite, Chrysocolla, and Fluorspar, in felspathic rock. *Loc.* Dorothy Copper Mine, Opera Cr., 1½ mile S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 2 (1891), and P.R.S.Q., vol. 15, p. 51 (1900).

3111. —— (as rock mass). *Assoc.with* Cerussite. *Loc.* Lady Jane Mine, 1 mile S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

3112. ——. *Assoc.with* Copper Pyrites, Cuprite, Cerussite, Azurite, Malachite, Galena, Minium, Zinc-Blende, and Hematite, in felspathic matrix. *Loc.* Penzance Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), and 134, p. 11 (1898).

3113. ——. Henrietta Cr., Jordan Goldfield, 24 miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* O.R.

3114. ——. *Assoc.with* Ruby, Sapphire, Corundum, Zircon, Tourmaline, and Topaz, in alluvial deposits. *Loc.* Jordan Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 157, p. 6 (1901).

3115. ——. *Assoc.with* Gold, Bismutite, Magnetite, Limonite, Manganese-dioxide, and Ruby, in alluvial deposits. *Loc.* Agate Cr., br. of Robertson R., 21 miles S.S.W. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* L.B. 1, p. 940 (1887).

3116. ——. *Assoc.with* Copper Pyrites and Calcite. *Loc.* Malone's Silver Mine, S. of Pikedale Hotel, 11 miles W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs.

3117. ——. *Assoc.with* Diamond, Sapphire (yellow, green, blue, and pink), Spinel, Beryl, Zircon (red), Tourmaline (black), Topaz (white), Cairngorm, Amethyst, Rock Crystal, Cassiterite, and traces of Gold, in alluvial deposits. *Loc.* Hunt's, Quartpot, Sugarloaf, Lode, Arbouin's, Cannon, and Kettle-Swamp Creeks, and Severn R., Stanthorpe, 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120 (1898), and B.D.

3118. —— (as rock mass). Por. 14v, Spring Cr., Nundubbermere, 13 miles S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* L.C.B.

3119. ——. *Assoc.with* Cassiterite, Cairngorm, Topaz, Sapphire, Zircon, Spinel, Diamond, and Gold, in alluvial deposits. *Loc.* Spring Cr., and its tributaries, Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 32 (1890).

3120. ——. *Assoc.with* Staurolite, in mica schist. *Loc.* Grey Ranges, New South Wales border, South Western Queensland. *Co.* ——; *Dists.* **Gregory South** and **Warrego.** *Ref.* G.S.M.

3121. ——. *Assoc.with* Magnetite. *Loc.* E. of Mt. Garnet, and E. of Herbert R., 11 miles S. of Coolgarra, 9 miles N.N.E. of Mt. Garnet Rail. Stn., Chillagoe line, Walsh and Tinaroo Mineral Field. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* B.D.

3122. —— in rock mass. *Assoc.with* Limestone and Calcite. *Loc.* Newellton (Silver Valley), Dry R., 10 miles S.W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*).

3123. ——. *Assoc.with* Iron Pyrites, Magnetite, Ironstone, Malachite, Graphite, and Calcite. *Loc.* Double-Barrel Cr. (Manton), 27 miles (by rail) S. of Townsville (Gt. Northern line). *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* L.B. 2, pp. 720-729 (1891).

3124. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Malachite, in calcite lode. *Loc.* Hein's Lode, Limestone Range, W. of Double-Barrel Cr., about 27 miles S.byW. of Townsville. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 77 p. 7 (1891), and G.S.M.

3125. —— (massive). Ben Lomond, Gregory R., 18 miles S.E. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* O.R.

3126. ——. *Assoc.with* Galena, Cerussite, Copper carbonate, Chrysocolla, and Manganese-dioxide, in gossan. *Loc.* Black Star Lease (116), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

3127. ——. *Assoc.with* Lievrite, Manganese-dioxide, and Cerussite. *Loc.* Boomerang Lease 186, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

3128. ——. *Assoc.with* Galena, Cerussite, Malachite, Chrysocolla, and Manganese-dioxide, in kaolin lode. *Loc.* Mt. Hishon Lease (210), Kangaroo Hills Mineral Field (*ante*). *Assay: See* No. 2969. *Ref.* G.S.Q. Pub. 82, p. 6 (1882).

3129. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Zinc Blende, Smithsonite, Mispickel, Hematite, Ironstone, and Fluorspar, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

3130. ——. *Assoc.with* Copper carbonate, Calcite, and Chlorite. *Loc.* Running R. N. Lease (164), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

3131. ——. *Assoc.with* Topaz and Cassiterite, in alluvial deposits. *Loc.* Running Cr., Star R., 50 miles N.W. of Ravenswood Junction (Gt. Northern line). *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, pp. 60 and 68 (1887), and G.S.M.

3132. ——. *Assoc.with* Zircon and Gold, in alluvial deposits. *Loc.* Branches of Black Waterhole Cr., 2 miles N.byE. of Hazledean, 24 miles S.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 164, p. 10 (1901).

3133. ——. *Assoc.with* Hematite, Wolfram, Stilbite (?), and Mica, in alluvial deposits and in lode. *Loc.* Eungella Stn., Broken R., 50 miles W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

3134. ——. *Assoc.with* Gold, Sapphire, Spinel, Zircon, Amethyst, Cairngorm, Chalcedony, Jasper, Rutile, Topaz, Diamond, Magnetite, Ilmenite, Magnesite, Tourmaline, and Hornblende, in alluvial deposits. *Loc.* Retreat Cr., Sheep Station Cr., Policeman Cr., Tomahawk Cr., and Central Cr., Anakie Sapphire Field, 193 miles (by rail) W. of Rockhampton, Central line. *Cos.* Clermont and Plantagenet: *Dist.* **Leichhardt.** *Refs.* G.S.Q. Pubs. 81 (1892), 125 (1897), and 172 (1902).

3135. ——. *Assoc.with* Gold, Zircon, Magnetite, and Tourmaline, in alluvial deposits below basalt. *Loc.* Basalt Hill Diggings, 3 miles N. of Borilla Rail. Stn., 7 miles W. of Anakie Rail. Stn., Central line. *Co.* Plantagenet; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 172, p. 7 (1902).

3136. Garnet. In Murphy's Cr., 58 miles (by rail) W. of Ipswich. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 120, p. 85 (1898).

3137. —— (red). *Assoc.with* Gold, Ruby, Almandine, Spinel, Sapphire (blue), Topaz (white), and Zircon, in alluvial deposits. *Loc.* Wallace's and Eldridge's Claim, Seven-mile Diggings, 7 miles S.E. of Nanango, 123 miles N.W.byN. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* L.C.B.

3138. ——. *Assoc.with* Gold, Copper Pyrites, and Mispickel, in quartz and calcite. *Loc.* P.A., head of Ithaca Cr., Mt. Cootha, 5 miles W.byS. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* (and *Assay*) G.S.Q. Pub. 98, p. 2 (1894).

3138A. ——. *Assoc.with* Ilmenite. *Loc.* Carney's Cr., Coochin Coochin, 3 miles S. of Dugandan Rail. Stn. (Fassifern line). *Co.* Ward; *Dist.* Moreton.

3139. ——. *Assoc.with* Epidote and Wollastonite. *Loc.* Booreeco Cr., Barmundoo Stn., 30 miles S.W. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.M.

3140. ——. *Assoc.with* Copper Pyrites, Cuprite, Bornite, Tenorite, Malachite, Azurite, Galena, Zinc-Blende, Hematite, Magnetite, Chlorite, and Calcite. *Loc.* Glassford Cr. Copper Mine, Glassford Cr., 20 miles S. of Miriam Vale Rail. Stn., North Coast line. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), and 194, p. 28 (1904).

3141. ——. *Assoc.with* Gold, Copper carbonate, Rock Crystal, and Calcite. *Loc.* Mt. Grim, 3½ miles W.S.W. of Mt. Alma Stn., 31 miles W.S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p 24 (1904).

3142. ——. *Assoc.with* Magnetite, Hematite, and Epidote. *Loc.* ½-mile S.S.E. of Targinie Head Stn., 9 miles W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 23 (1904).

3143. ——. As rock formation, nr. limestone and granite. *Loc.* Buggeriegar Copper Mine, between Morinish and Ridgelands, 20 miles from Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* B.D.

3143A. ——. As rock mass. *Assoc.with* Magnetite. *Loc.* Olsen's Caves, nr. Mt. Etna, 15 miles N.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 194, p 14 (1904).

3143B. ——. As rock formation. *Assoc.with* Hematite. *Loc.* Spring Cr. Diggings, 10 miles N.E. of Cania Goldfield. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 31 (1904).

3144. ——. As rock mass. Glen Dee, Dee River, 5 miles E.N.E. of Mt. Morgan. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* B.D.

3145. ——. *Assoc.with* Wollastonite. *Loc.* Gigoomgan Run, 35 miles W.S.W. of Maryborough. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.M.

3146. ——. As rock mass. *Assoc.with* Wollastonite, in altered limestone. *Loc.* Glenbar Head Stn., 20 miles W. of Tiaro Rail. Stn. (Gympie-Maryborough line). *Co.* Lennox (*ante*). *Ref.* L.C.B.

3147. ——. As rock mass. *Assoc.with* Bornite and Wollastonite, in altered limestone. *Loc.* Munna Copper Mine, Por. 167, 17 miles N. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 12 (1902).

3148. ——. As rock mass in lode. *Loc.* E. of Campbell's, Yorkey's Goldfield, Running Cr., 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* L.C.B.

3149. ——. *Assoc.with* Actinolite, Epidote, and Hematite, etc. *Loc.* Yorkey's Surprise G.M. Lease, Yorkey's Goldfield (*ante*).

—— **Almandine** (*var.*). *Syn.*, Precious Garnet (in part). *Compo.*, Silicate of alumina and iron. *Colour,* deep red, pale red, brownish red, and nearly black.

3150. —— ——. *Assoc.with* Malachite, Cuprite, Ironstone, and Asbolane. *Loc.* Valley, W. of Mt. Eurie, nr. head of Dugald R., 40 miles N.byW. of Cloncurry. *Co.* Argylla; *Dist.* **Burke.** *Ref.* P.R.S.Q., vol. 4, p. 66 (1887).

3151. —— ——. *Assoc.with* Cuprite, Malachite, Manganese-dioxide, and Asbolane. *Loc.* Mountain Home Copper Mine, Mt. Norma, Elder Cr., 17 miles S.E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 15 (1885).

3152. —— —— (crystals). *Loc.* Head of Williams R., 35 miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* B.D., G.S.M., and A.R., p. 393 (1912).

3153. —— ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* At the Lower Crossing of Coen (or Kendall's) R., 45 miles (by road) N.N.W. of Port Stewart, 189 miles N.W. of Cooktown. *Co.* Coen; *Dist.* **Cook.**. *Ref.* G.S.M.

3154. —— ——. In alluvial deposits. Nr. Quartz Hill, Almaden-Georgetown Road, 48 miles E.N.E. of Georgetown, Etheridge Goldfield. *Co.* Tate; *Dist.* Cook. *Ref.* B.D.

3155. —— ——. Percy R., 60 miles S. of Georgetown, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.M.

3155A. —— ——. *Loc.* Grey Ranges, border of N.S.W., S.W. Queensland. *Dists.* Gregory South and Warrego. *Ref.* G.S.M. and A.R., 394 (1912).

—— **Andradite** (*var.*). *Compo.*, Silicate of iron and lime. *Colour*, greenish, yellowish, brownish, black.

3156. —— ——. Head of Dismal Cr., and Alexander R., 20 miles N. of Donaldson, 75 miles N.byW. of Cloncurry. *Co.* Granada; *Dist.* **Burke.** *Ref.* L.C.B.

3157. —— ——. *Assoc.with* Calcite. *Loc.* Don Jon Mine, nr. Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.M. and A.R., p. 393 (1912).

3158. —— ——. *Assoc.with* Actinolite. *Loc.* Mt. Hastings Mine, 2 miles S.E. of Mt. Biggenden, 5 miles S.W. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.M.

3159. —— —— (as crystals). *Assoc.with* Calcite and Fluorspar. *Loc.* Dorothy Mine, Opera Cr., 1½ mile S.E. of Mungana Rail Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd.; *Dist.* **Cook.** *Ref.* B.D.

3159A. —— ——. *Loc.* Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M. and A.R., p. 393 (1912).

3159B. —— ——. *Loc.* Nr. Petford, about 97 miles (by rail) S.W.byW. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M. and A.R., p. 394 (1912).

3160. —— ——. In alluvial deposits. *Loc.* Henrietta Cr., Jordan Goldfield, 22 miles W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.M.

3160A.——. *Assoc.with* Limestone, Epidote, Magnetite, and Amethyst. Don R., nr. Bowen Road. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* B.D.

3161. —— ——. *Assoc.with* Epidote, Wollastonite, and Chert, in granite and limestone. *Loc.* Diglam Cr., Barmundoo, 28 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis.

3161A. —— ——. Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne Valley br. line). *Co.* Clinton (*ante*). *Ref.* G.S.M. and A.R., p. 393 (1912).

—— ——. **Colophonite** (*sub.var.*). *Colour*, brownish, yellowish. Resinous. Coarse, granular.

3162. —— —— ——. *Assoc.with* Calcite. *Loc.* Don Jon Mine, nr. Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.M.

—— ——. **Melanite** (*sub.var.*). *Syn.* Black Garnet (in part). *Colour*, black.

3163. —— —— ——. In alluvial deposits. *Loc.* Henrietta Cr., Jordan Goldfield, 22 miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* **Cook.** *Ref.* G.S.M.

—— ——. **Pyreneite** (*sub.var.*). *Colour*, greyish black.

3164. —— —— ——. Westwood, 31 miles (by rail) S.W. of Rockhampton (Central line). *Co.* Pakington; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 150, p. 14 (1900).

——. **Pyrope** (*var.*). *Syn.* Precious Garnet (in part). *Compo.*, Silicate of alumina and magnesia. *Colour*, deep red to nearly black.

3165.—— ——. Head of William R., 35 miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.M.

3166. —— ——. *Assoc.with* Calcite and Epidote. *Loc.* Mt. Havilah, 2¾ miles S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* **Burnett.** *Ref.* B.D.

3167. —— ——. Wyagampinny Mt., Motley Scrub, 7 miles N.byW. of Pittsworth, 43 miles (by rail and road) N.W.byW. of Toowoomba. *Co.* Aubigny; *Dist.* Darling Downs. *Ref.* G.S.M.

3168. —— ——. *Assoc.with* Hornblende and Ilmenite, as inclusions in basaltic dyke. *Loc.* Lowood, 45 miles (by rail) W. of Brisbane. *Co.* Churchill; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 175, p. 12 (1902), and A.R., p. 392 (1912).

3169. —— ——. As small dodecahedral crystals, in granite. *Loc.* Four-Mile Cr., nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.W. of Rockhampton. *Co.* Raglan; *Dist.* **Port Curtis.** *Ref.* B.D.

Garnierite. *Syn.* Noumeite, *which see.*

Garrick Coal Seam, Pelican Cr., Bowen R. Coalfield. *Min.Ref.* Coal, *see* 1652, 1653.

Garry Owen Reef, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3753.

Gas Bores. Glenalvon Mineral Oil Co.

Glenalvon Gas Bores (Nos. 1 and 2), nr. Rosewood Rail. Stn. Por. 10, Par. Forbes. *Co.* Churchill; *Dist.* Moreton. *Ref.* Q.G.M.J., July, 1907, p. 372, and April, 1909, p. 203; L.B. 13, p. 355. Originally sunk for water (?), and found gas, but afterwards sunk deeper for oil, but failed to find it.

Mineral Oil Co.'s Bore, and Roma Gas Bores (Nos. 1 and 2). Por. 89, Par. Roma. *Co.* Waldegrave; *Dist.* Maranoa. *Ref.* Q.G.M.J., Jan., 1905, p. 17; Nov. 1908, p. 591; A.R.D.M. (1908), p. 173.

See also, for gas in bores, Artesian Bores (and Notes). Nos. 24, 46, 385, 386, 387, 406, and 439.

Gas Making. Coal required for this purpose is to be found at Burrum, Ipswich, Walloon, Beaudesert, Styx River, etc., references to which are made under Coal. For retorts, firebricks, fireclay, and other fire-resisting purposes, clays of good quality occur in many places in the State, references to which are given under Kaolin and "Fireclay." Earthy hematite and lime, used in gas purifying, are obtainable in quantity, references being made under Hematite, "Ironstone," and Limestone.

Gasworks (Mackay) Sub-artesian Bore. *See under* Artesian Bores. No. 320.

Gatton, W. of Brisbane. *Lat.*, 27° 33′ S.; *Long.*, 152° 19′ E. *Min.Ref.* Olivine, *see* 6928; Strontiano-calcite, 614; Tripolite, 7030.

—— Rail. Stn (30 miles from). *Min.Ref.* Hyalite, *see* 7019.

Gavial Cr. Goldfield, nr. Mt. Usher, 6 miles N.E. of Mt. Morgan, now included in the Mount Morgan Goldfield. DISCOVERY: Gold found in October, 1865. Field deserted in 1866. *Min.Ref.* Gold, *see* 4338; Iron Pyrites, 5406.

Gayndah District Sub-artesian Bore. *See under* Artesian Bores. No. 25.

Gayndah Goldfields and Mining Centres. Mt. Shamrock, Mt. Biggenden, Gebangle, Brovinia, Paradise, Stanton-Harcourt, Chowie Creek, Mount Steadman, *which see.*

Gayndah, 90 miles W. of Maryborough. *Lat.*, 25° 37′ S.; *Long.*, 151° 36′ E. *Min.Ref.* Clay Ironstone, *see* 1594; Gold, 3629; Limonite, 5832; Silver, 7439; Turgite, 7888; Coal, 1599A; 1601A.

RAILWAY BASE for Eidsvold and St. John's Cr. Goldfields, Cardarga Cr. and Dykehead Gold Mines, and Hungry Hill (McKonky Cr.) Antimony Mines.

GEOLOGICAL NOTE: No geological examination has been made of this locality, but casual observations show that the country is made up of altered sedimentary rocks belonging to the Gympie Formation (Permo-Carboniferous), with granite some miles to the west. A coal seam is said to occur at Gayndah in a well, but no information is available concerning the formation in which it occurs.

Gayndah-Mundubbera line (under construction). *Min.Ref.* Limestone, *see* 628A; Turquoise, 7902A.

Gayundah Co. Mitchell Dist. *See map,* Pl. 18.

Gebangle Goldfield (unproclaimed)—

SITUATION: *See maps,* Pls. 4, 5. Three miles up Yarrabil Cr., 12 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Bowen; *Dist.* Burnett.

DISCOVERY: In year 1888.

MINERAL STATISTICS: *Included in* "Other Goldfields."

MINERAL REFERENCES: Copper carbonate, *see* 1878, 1879; Felspar, 2626; Gold, 3575-3581; Iron Pyrites, 4976-4982; Ironstone, 5509; Mispickel, 6648, 6649.

GEOLOGICAL NOTE: The country is made up of slate, shale, and porphyry, in which there are small, low-grade, gold-bearing reefs. Between the porphyry and slate a large mass of volcanic agglomerate exists, also carrying gold in small quantities. *See* G.S.Q. Pub. No. 60 for notes.

Gem Discoveries. *See under* Discoveries.

—— Fields and Centres. *See under* Opal and Corundum. *See also maps*, Pls. 11, 19, 21, 31.

Gem Import Duties. *See under* Import Duties on Gems.

Gemstones. (*See under* name of Mineral for details)—

- Agate, *var.* of Chalcedony (banded).
- Almandine, *var.* of Garnet (red). *See also* Spinel.
- Andradite, *var.* of Garnet (greenish, yellowish).
- Amethyst, *var.* of Quartz. Oriental Amethyst, *var.* of Corundum.
- Aquamarine, *var.* of Beryl (bluish green). *See also* Oriental Aquamarine.
- Asteria, *var.* of Corundum (six-rayed).
- Barklyite, *var.* of Ruby (opaque ruby).
- Beryl (pale green), *var.*—Aquamarine (bluish green). *See also* Oriental Aquamarine.
- Black Opal, *var.* of Precious Opal (brilliant play of colours).
- Bloodstone, *var.* of Chalcedony (green with red spots).
- Cairngorm, *var.* of Quartz (yellowish).
- Calcite, *var.*—Satinspar (pearly).
- Carnelian, *var.* of Chalcedony (red and yellow).
- Chalcedony, *vars.*—Agate, Bloodstone, Carnelian, Chrysoprase, Onyx, Prase, Sard, Sardonyx.
- Chrysolite, *var.* of Olivine (pale greenish yellow).
- Chrysoberyl. *See* Oriental Chrysoberyl.
- Chrysoprase, *var.* of Chalcedony (apple green).
- Chrysocolla (bluish green), *var.*—Cyanochalcite (azure blue).
- Corundum, *vars.*—Asteria (Star Sapphire), Corundum, Orange Sapphire, Oriental Amethyst, Oriental Aquamarine, Oriental Cat's Eye, Oriental Chrysoberyl, Oriental Moonstone, Oriental Peridot, Oriental Topaz, Pink Sapphire, Ruby, Sapphire (blue), White Sapphire.
- Cyanochalcite, *var.* of Chrysocolla (azure blue).
- Diamond (colourless, pale yellow).
- Epidote (green).
- Garnet, *vars.*—Almandine, Andradite, Pyrope.
- Grass-stone, *var.* of Quartz (sagenitic).
- Gypsum, *var.*—Satinspar (pearly).
- Hornblende, *var.*—Actinolite (bright green).
- Hyacinth, *var.* of Zircon (brownish red).
- Jargoon, *var.* of Zircon (smoky, brown).
- Jasper, *vars.*—Black (Lydianstone or Touchstone), brown, Egyptian, green, red.
- Kyanite (blue).
- Labradorite (grey, usually with internal reflections of blue colour).
- Lapis Lazuli (blue shades).
- Lazulite (azure blue).
- Lydianstone, *var.* of Jasper (velvet black).
- Malachite, botryoidal form (green).
- Morion. *See* Quartz.
- Olivine, *vars.*—Chrysolite (pale canary yellow), Olivine (bright green), Peridot (pale or dark olive green).
- Onyx, *var.* of Chalcedony (black and white).
- Opal, *vars.*—Precious, Black, Common, "Matrix."
- Oriental Amethyst, *var.* of Corundum (purple sapphire).
- Oriental Aquamarine, *var.* of Corundum (bluish green sapphire).
- Oriental Cat's Eye, *var.* of Corundum.
- Oriental Chrysoberyl, *var.* of Corundum (pale yellow sapphire).
- Oriental Moonstone, *var.* of Corundum.
- Oriental Peridot, *var.* of Corundum (olive green sapphire).
- Oriental Topaz, *var.* of Corundum (yellow sapphire).

Gemstones—*continued:*

Peridot, *var.* of Olivine (olive green).
Prase, *var.* of Chalcedony (deep green).
Pyrope, *var.* of Garnet (deep red).
Quartz, *vars.*—Amethyst, Cairngorm, Morion, Rock Crystal, Rose Quartz, Sagenite or Grass-stone.
Rhodonite (pink).
Rhodochrosite (pink).
Rock Crystal, *var.* of Quartz (colourless).
Rose Quartz, *var.* of Quartz (rose).
Rubellite, *var.* of Tourmaline (pink).
Ruby, *var.* of Corundum (red).
Sagenite (Grass-stone), needles of Rutile in Quartz.
Sapphire, *var.* of Corundum (blue, pink, green ,yellow, orange, white, purple).
Sard, *var.* of Chalcedony (red).
Sardonyx, *var.* of Chalcedony (red, white, brown).
Satinspar, *var.* of Gypsum, also Calcite.
Smoky Quartz. *See* Morion and Cairngorm.
Spinel, *vars.*—Spinel Ruby, Spinel Almandine.
Spinel Almandine, *var.* of Spinel (violet).
Spinel Ruby, *var.* of Spinel (red, pink).
Topaz (colourless, pale blue, pale green), sometimes called "White Sapphire" by miners.
Touchstone. *See* Lydianstone. *Var.* of Jasper.
Tourmaline, *var.*—Rubellite.
Turquoise (blue, green).
Zircon, *vars.*—Hyacinth, Jargoon.

Gem Opal Mine, Keeroongooloo Run. *Min.Ref.* Opal (precious), *see* 6946A.

—— Reef, Lower Twelve-mile, Croydon Goldfield. *Min.Ref.* Galena, *see* 2711A; Gold, 3554; Iron Pyrites, 4964.

—— Statistics. *See tables and diagram,* Pls. 44, 46, 46A, 56.

General Gordon Mine, Mt. Hogan, Etheridge Goldfield. *Min.Ref.* Gold, *see* 3792.

—— —— ——. Yatton Goldfield. *Min.Ref* Gold, *see* 4174.

—— —— ——. Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Min. Ref.* Cerussite, *see* 1289; Clay, 1575; Copper Pyrites, 2268; Galena, 3013; Iron Pyrites, 5318; Minium, 6633; Zinc-Blende, 8170.

—— Grant Reef, Mt. Davenport, Cape R. Goldfield. *Min.Ref.* Gold, *see* 4045; Iron Pyrites, 5260.

—— —— ——. Ravenswood Goldfield. *Min.Ref.* Galena, *see* 2928; Gold, 4021; Iron Pyrites, 5242.

—— —— and Sunset Reefs, Ravenswood Goldfield. *Min.Ref.* Galena, *see* 2930; Gold, 4029; Iron Pyrites, 2230.

—— —— Tin Mine, Herberton. *Min.Ref.* Cassiterite, *see* 1082.

—— Map of Queensland. *See map,* Pl. 1.

—— Sarsfield Reef, Palmer Goldfield. *Min.Ref.* Gold, *see* 3672.

General's (W. H.) Sub-artesian Bore. *See under* Artesian Bores. No. 161.

Geographical Maps of Queensland, and districts. *See* Pls. 1, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20.

Geological Formations. *See* Pls. 0, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21.

Geological Reports. *See* Geological Survey of Queensland Publications. *See also under* Govt. Ming. Jour., Q., for list of Special Reports, *also under* Supplementary Reports.

Geological Map of Queensland. *See* Pls. 3, 5, 7, 9, 11, 13, 15, 17, 19, 21.

Geological Survey of Queensland—

HEADQUARTERS: Queensland Geological Survey Office and Museum, Queen and George streets, Brisbane.

OFFICER IN CHARGE: B. Dunstan, Government Geologist of Queensland.

See under "Government Geologists of Queensland" for a record of the appointments of Geologists and Assistant Geologists.

DUTIES: The examination of mines and mineral localities; the geological examination of districts; the determination of the value of minerals for prospectors and others; furnishing information bearing on the application of Government assistance to prospecting parties and to mining companies in deep-sinking propositions; making examinations of areas of country proposed to be reserved for mining purposes; the preparation of geological reports and plans for publication, etc.

PUBLICATIONS, 1879-1912. (Obtainable at Geol. Surv. Office, Brisbane, and at Agent-General's Office, 409 Strand, London, W.C.). *See also under* name of author for author's list. *See under* Supplementary Reports *for list of* Reports in Annual Progress Reports.

COUNCIL AND ASSEM. PAPERS, BULLETINS, MAPS, ETC.

(1.) On the Geology and Mineral Resources of the District between Charters Towers Goldfield and the Coast. [With two Geological Maps.] R.L.J. (F'cap. C.A. Paper. 1879). 3s. 6d.

(2.) Preliminary Report on the Geological Features of Part of the Coast Range between the Dalrymple and Charters Towers Roads. R.L.J. (F'cap. C.A. Paper. 1879). 3d.

(3.) Preliminary Report on the Bowen River Goldfield. [With Geological Sketch Map.] R.L.J. (F'cap. C.A. Paper. 1879). 3d.

(4.) On the Bowen River Coalfield. [With a Geological Sketch Map.] R.L.J. (F'cap. C.A. Paper. 1879). 2s. 6d.

(5.) On the Normanby and Marengo Goldfields. [With two Geological Maps.] R.L.J. (F'cap. C.A. Paper. 1879). 1s.

(6.) On the Progress of the Search for Coal in the Cook District. R.L.J. (F'cap. C.A. Paper. 1879). (Out of print).

(7.) Second Report on the Progress of the Search for Coal in the Cook District. R.L.J. (F'cap. C.A. Paper. 1879). (Out of print).

(8.) On Explorations in Cape York Peninsula. 1879-80. R.L.J. (F'cap. C.A. Paper. 1881). 1s. 3d.

(9.) Further Reports on the Progress of the Gold Prospecting Expedition in Cape York Peninsula, and Report on the Wild River Tin Mines. [With Geological Map.] R.L.J. (F'cap. C.A. Paper. 1881). 6d.

(10.) Six Reports on the Geological Features of Part of the District to be traversed by the proposed Transcontinental Railway. [With three Geological Maps.] R.L.J. (F'cap. C.A. Paper. 1885). (For reprint see No. 136).

(11.) On the Little River Coalfield, near Cooktown. [With a Geological Map.] R.L.J. (F'cap. C.A. Paper. 1882). 6d.

(12.) On the Stanthorpe Tin Mining District. R.L.J. (F'cap. C.A. Paper. 1882). 3d.

(13.) On the Tin Mines of Herberton, Western, and Thompson's Creek Districts, and the Silver Mines of the Dry River. [With two Geological Maps and six Plates of Sections.] R.L.J. (F'cap. C.A. Paper. 1883). 1s. 3d.

(14.) First Sketch of a Geological Map of the Hodgkinson Goldfield. R.L.J. 1883. (Out of print.)

(15.) Progress Report of the Government Geologist for the Year 1883. R.L.J., in Annual Report of the Department of Mines for 1883 p. 54. (F'cap. C.A. Paper. 1884). (Out of print).

(16.) On the Hodgkinson Goldfield. [With two Geological Maps and five Plates of Sections.] R.L.J. (F'cap. C.A. Paper. 1884). (Out of print, for reprint see No. 116).

(17.) On the Mount Morgan Gold Deposits. [With Geological Map and Sketch Map.] R.L.J. (F'cap. L.A. Paper.) Reprinted unofficially (Pole, Outridge & Co.), 1893.

(18). On the Gold Deposits of Mount Leyshon. [With a Geological Map.] R.L.J. (F'cap. C.A. Paper. 1885). 3d. (Out of print).

(19.) Progress Report of the Government Geologist for the Year 1884. R.L.J., in Annual Report of the Department of Mines for 1884 p. 50. (F'cap. C.A. Paper. 1885). (Out of print).

Geological Publications—*continued:*

(19*a*.) On the Proposed Deep Bore for Artesian Water in the Western Interior. R.L.J. (L.A. Paper. 1885). (Out of print).

(20.) Progress Report of the Assistant Government Geologist for the Year 1884. W.H.R., in Annual Report of the Department of Mines for 1884, p. 52. (F'cap. C.A. Paper. 1885). (Out of print).

(21.) On the Goldfields of Raglan, Calliope, Milton (Norton), and Cania, in the Port Curtis District, and on the Mineral Deposits in the Burnett District. [With three Geological Maps and two Plates of Sections.] W.H.R. (F'cap C.A. Paper. 1885). 2s.

(22.) Progress Report of the Government Geologist for the Year 1885. R.L.J., in Annual Report of the Department of Mines for 1885 p. 53. (F'cap. C.A. Paper. 1886). (Out of print).

(23.) Progress Report of the Assistant Government Geologist for the Year 1885. W.H.R., in Annual Report of the Department of Mines for 1885, p. 62. (F'cap. C.A. Paper. 1886). (Out of print).

(24.) On the Burrum Coal Field. [With two Geological Maps and three Plates of Sections.] W.H.R. (F'cap. C.A. Paper. 1886). (For reprint see No. 170).

(25.) On the Gold and Silver Deposits in the neighbourhood of Mount Shamrock. W.H.R. (F'cap. C.A. Paper. 1886). 3d.

(26.) On the Argentine (Star) Silver Mines, Kennedy District. [With a Geological Map and one Plate of Sections.] R.L.J. (F'cap. C.A. Paper. 1886). 1s. (Out of print).

(27.) On the Geology and Mineral Deposits of the country in the Vicinity of Clermont. [With Geological Map and Plate of Sections.] W.H.R. (F'cap. C.A. Paper. 1886). (Out of print).

(28.) On the Geology and Mineral Resources of the Districts of Kilkivan and Black Snake. [With three Geological Maps and one Plate of Sections.] W.H.R. (F'cap. C.A. Paper. 1886). 1s. 6d.

(29.) On the Gold Deposits in the neighbourhood of Nanango. [With Geological Map and two Plates of Sections.] W.H.R. (F'cap. C.A. Paper. 1886). 3d.

(30.) Geological Map of Queensland, on the scale of 32 miles to an inch. [Issued under the authority of the Department of Public Works and Mines.] R.L.J. 1886. (Printed but not issued; superseded by No. 90).

(31.) Handbook of Queensland Geology. R.L.J. (8vo. Brisbane: Warwick & Sapsford, 1886). [Also issued with Essays prepared for the Colonial and Indian Exhibition, London, 1886.] (Out of print).

(32.) Annual Report of the Government Geologist for the Year 1886. R.L.J., in Annual Report of the Department of Mines for 1886 p. 63. (F'cap. C.A. Paper. 1887). (Out of print).

(33.) Annual Report of the Assistant Government Geologist for the Year 1886. W.H.R., in Annual Report of the Department of Mines for 1886, p. 65. (F'cap. C.A. Paper. 1887). (Out of print).

(34.) Geological Map of the City of Brisbane and its Environs, accompanied by a Report. W.H.R. (F'cap. C.A. Paper. 1887)

(35.) Geological Observations in the North of Queensland, 1886-7. [With three Geological Maps.] R.L.J. (F'cap. C.A. Paper. 1887). 2s. 6d. (Out of print).

(36.) On the Geology of and Mineral Deposits occurring in the country in the neighbourhood of Beenleigh and of the Logan and Albert Rivers. W.H.R. (F'cap. C.A. Paper. 1887). 3d.

(37.) On Mineral Lease, 276, Watsonville. [With a Geological Map.] R.L.J. (F'cap. L.A. Paper. 1887). 1s. (Out of print).

(38.) On a Cobalt Lode at Black Snake, Kilkivan. W.H.R. (F'cap. C.A. Paper. 1887). 3d.

(39.) On the Geological Features of the Mackay District. [With three Geological Maps.] R.L.J. (F'cap. C.A. Paper. 1887). 1s.

(40.) On the Glenelg and other Reefs in the neighbourhood of Thane's Creek and Talgai, and certain Mineral Deposits near Stanthorpe. W.H.R. (F'cap. C.A. Paper. 1887). 3d.

(41.) Annual Progress Report of the Government Geologist for the Year 1887. R.L.J., in Annual Report of the Department of Mines for 1887 p. 81. (F'cap. C.A. Paper. 1888). (Out of print).

Geological Publications—*continued:*

(42.) Annual Progress Report of the Assistant Government Geologist for the Year 1887. W.H.R., in Annual Report of the Department of Mines for 1887, p. 92. (F’cap. C.A. Paper. 1888). (Out of print).

(43.) On the Eidsvold Goldfield. [With Geological Map and Plate of Sections.] W.H.R. (F’cap. C.A. Paper. 1887). 1s. (Out of print; for reprint see No. 124).

(44.) Coal Discoveries on the Flinders. R.L.J. (F’cap. C.A. Paper. 1888). 3d.

(45.) On the Geology of the Russell River. [With Geological Map.] R.L.J. (F’cap. C.A. Paper. 1888). 1s.

(46.) On Limestone District, part of the Palmer Goldfield. [With a Map.] R.L.J. (F’cap. C.A. Paper. 1889). 1s. (Out of print).

(47.) Second Report on the Mount Morgan Gold Deposits. [With two Plates of Diagrams and Sections.] R.L.J. (F’cap. C.A. Paper. 1889). 1s.

(48.) The Mineral Wealth of Queensland. [With Map showing the positions of Mineral Fields.] R.L.J. (8vo. Brisbane: Warwick & Sapsford, 1888). [Issued for the Centennial International Exhibition, Melbourne, 1888.] 1s.

(49.) Annual Progress Report of the Geological Survey for the Year 1888 (F’cap. C.A. Paper. 1889). 6d.

(50.) On the Taranganba Gold Mine. R.L.J. (F’cap. C.A. Paper. 1889). 1s.

(51.) On the Albert and Logan District. [With Geological Map and Sheet of Sections.] W.H.R. (F’cap. C.A. Paper. 1889). 1s.

(52.) On the Gympie Goldfield. [With three Geological Maps and seven Plates of Sections.] W.H.R. (F’cap. C.A. Paper. 1889). 3s. 6d.

(53.) On the Geological Features and Mineral Resources of the Mackay District. [With Geological Map and four Plates of Sections.] A.G.M. (F’cap. C.A. Paper. 1889). 2s. 6d.

(54.) Geological Observations at the heads of the Isaacs, the Suttor, and the Bowen Rivers. [With three Geological Maps.] A.G.M. (F’cap. C.A. Paper. 1889). 1s. 9d.

(55.) On Geological Specimens from New Guinea. R.L.J. and A. W. Clarke. (F’cap. New Guinea Government Gazette. 1889). Free.

(56.) On Geological Specimens from New Guinea. W.H.R. (F’cap. New Guinea Government Gazette. 1889). (Out of print).

(57.) On the Sellheim Silver Mines and surrounding District. [With two Geological Maps and Plates of Sections.] R.L.J. (F’cap. C.A. Paper. 1889). 2s. 6d.

(58.) Annual Progress Report of the Geological Survey for the Year 1889 [With Geological Map.] (F’cap. C.A. Paper. 1890). 1s.

(59.) On the Tiaro District Coal Measures, Neardie Antimony Mine and Teebar and Culgoa Copper Lodes. [With Geological Map and Plate of Sections.] W.H.R. (F’cap. C.A. Paper. 1890). 1s. 6d.

(60.) On Mount Biggenden Bismuth Mine, Gebangle, and the Mount Shamrock Mine. [With Geological Map and Plate of Sections.] W.H.R. (F’cap. C.A. Paper. 1890). 1s. 6d.

(61.) On the Proposed Boring for Artesian Water on the Etheridge and Croydon Goldfields. R.L.J. (F’cap. C.A. Paper. 1890). 6d.

(62.) On the Proposal to Bore for Artesian Water at Normanton. R.L.J. and A.G.M. (F’cap. C.A. Paper. 1890). 1s.

(63.) On the Brookfield, Pullen Vale, and Moggill Districts. W.H.R. (F’cap. C.A. Paper. 1890). 3d.

(64.) On the Coal in the Parish of Noosa W.H.R. (F’cap. C.A. Paper. 1890). 3d.

(65.) On the Proposed Boring for Water at Brisbane. R.L.J. (F’cap. C.A. Paper. 1890). 3d.

(66.) On the Tin Mines near Cooktown. [With Geological Map and two Sheets of Plans.] R.L.J. (F’cap. C.A. Paper. 1891). 1s. 6d.

(67.) On the Mineral Selections on the Ballandean and Jibbinbar Runs. W.H.R. (F’cap. C.A. Paper. 1890). 3d.

(68.) On the Paradise Goldfield. W.H.R. (F’cap. C.A. Paper. 1891). 1s.

(69.) On the Chillagoe and Koorboora Mining Districts. [With Map and Geological Map.] R.L.J. (F’cap. C.A. Paper. 1891). 1s. 6d.

Geological Publications—*continued:*

(70.) On the Geology of the Cooktown District. [With Geological Map and two Sheets of Sections). A.G.M. (F'cap. C.A. Paper. 1891). 2s.

(71.) On the Geology and Mineral Resources of the Upper Burdekin. [With Geological Map and two Sheets of Sections.] A.G.M. (F'cap. C.A. Paper. 1891). 1s.

(72.) On the Coolgarra Tin Mines and surrounding District. [With Geological Map and Sheet of Plans.] A.G.M. (F'cap. C.A. Paper. 1891). 1s.

(73.) On the Cape River Goldfield. [With two Geological Maps and two Plates of Sections.] W.H.R. (F'cap. C.A. Paper. 1891). 1s. 6d.

(74.) Notes on Broken Hill. (N.S.W.). R.L.J. (F'cap. C.A. Paper. 1891). 3d.

(75) On the Physical Geology of Magnetic Island. [With two Geological Maps and two Plates of Sections.] A.G.M. (F'cap. C.A. Paper. 1892). 1s.

(76.) Second Report on Gympie Goldfield. W.H.R. (F'cap. C.A. Paper. 1891). 6d.

(77.) Annual Progress Report of the Geological Survey for the year 1890. [With Plate of Sections, and Geological Maps of Cania and Part of Gilbert Goldfield.] (F'cap. C.A. Paper. 1891). 1s. 6d.

(78.) On the Moondilla Goldfield. R.L.J. (F'cap. C.A. Paper. 1891). 3d.

(79.) On an Alluvial Cinnabar Deposit near Kilkivan. W.H.R. (F'cap. C.A. Paper. 1892). 6d.

(80.) On the New Discovery of Coal near the Callide Creek, Port Curtis District. [With a Sketch Map and Sections.] W.H.R. (F'cap. C.A. Paper. 1891). 1s. (Out of print).

(81.) On the Sapphire Deposits and Gold and Silver Mines near Withersfield. [With a Map.] R.L.J. (F'cap. C.A. Paper. 1892). 6d.

(82.) On the Kangaroo Hills Silver and Tin Mines. [With a Geological Map.] R.L.J. (F'cap. C.A. Paper. 1892). 1s.

(83.) Third Report on the Mount Morgan Gold Deposits. [With two Maps, four Plates of Sections, and twenty Views.) R.L.J. (F'cap. C.A. Paper. 1892). 2s. 6d.

(84.) On the Styx River Coalfield. [With Geological Map and Plate.] W.H.R. (F'cap. C.A. Paper. 1892). 1s.

(85.) Geological Observations in British New Guinea in 1891. [With Geological Maps and Sections.] A.G.M. (F'cap. C.A. Paper. 1892). 2s. 6d.

(86.) On Olsen's and Johannsen's Caves, near Rockhampton. [With Map and Plate.] W.H.R. F'cap. C.A. Paper. 1892). 9d.

(87.) Annual Progress Report of the Geological Survey for the Year 1891. [With a Geological Map.] (F'cap. C.A. Paper. 1892). 1s.

(88.) Second Report on the Normanby Goldfield. [With Map.] R.L.J. (F'cap. C.A. Paper. 1893). 1s.

(89.) On the Russell River Goldfield. [With Geological Map.] R.L.J. (F'cap. C.A. Paper. 1893). 1s.

(90.) Geological Map of Queensland, on the scale of 16 miles to an inch. [In six Sheets.] R.L.J. (1892). (Out of print; 2nd. Edition, *see* No. 145).

(91.) Geological Observations in the Cooktown District. [With Map.] W.H.R. (F'cap. C.A. Paper. 1893). 6d.

(92.) Geology and Palaeontology of Queensland and New Guinea. [With 68 Plates and Geological Map of Queensland on the scale of 16 miles to an inch.] R. L. Jack and R. Etheridge, junr. (Roy. 8vo., pp. 768. 1892). £1 1s.

(93.) On the Grass-Tree Goldfield. [With Map.] R.L.J. (F'cap. C.A. Paper. 1893). 6d.

(94.) Annual Progress Report of the Geological Survey for the Year 1892. (F'cap C.A. Paper. 1893). 6d.

(95.) Geological Map of Charters Towers Goldfield, on the scale of 4 chains to an inch. [In six Sheets.] R.L.J., W.H.R., and A.G.M. (1892). (2nd. Edition, *see* No. 142). 10s 6d.

(96.) On the Deep Lead, Pentland, Cape River Goldfield. [With Map.] W.H.R. (F'cap. C.A. Paper. 1894). 6d.

Geological Publications—*continued :*

(97.) On the Towalla and Mareeba Goldfields. [With Map.] W.H.R. (F'cap. C.A. Paper. 1894). 6d.

(98.) Annual Progress Report of the Geological Survey for the Year 1893 (F'cap. C.A. Paper. 1894). 5d.

(99.) On the Ulam Goldfield. [With Map and Sections.] A.G.M. (F'cap. C.A. Paper. 1894). 1s.

(100.) Third Report on Gympie Goldfield. [With Sections.] W.H.R. (F'cap. C.A. Paper. 1894). 1s. 6d.

(101.) Bulletin No. 1. Artesian Water in the Western Interior of Queensland. R.L.J. (8vo. 1895). 3d.

(102.) Second Report on Eidsvold Goldfield. [With a Geological Map.] W.H.R. (F'cap. C.A. Paper. 1895). 1s.

(103.) Annual Progress Report of the Geological Survey for the Year 1894. [With Map.] (F'cap. C.A. Paper. 1895). 4s. (Out of print)

(104.) On the Leichhardt Goldfield and other Mining Centres in the Cloncurry District. W.H.R. (F'cap. C.A. Paper. 1895). 3d.

(105.) Bulletin No. 2. Notes on the Pikedale Goldfield. A.G.M. (8vo 1895). 3d.

(106.) Coal near Cooktown. R.L.J. (F'cap. C.A. Paper. 1895). 3d.

(107.) On the Proposed Boring for Coal on the Central Railway. [With Map and Plan.] A.G.M. (F'cap. C.A. Paper. 1895). 1s.

(108.) Annual Progress Report of the Geological Survey for the Year 1895. [With four Maps.] (F'cap. C.A. Paper. 1896). 6s. (Out of print).

(109.) Geological Sketch Map of the Desert Sandstone Tableland between the Palmer and Mossman Waters. R.L.J. (1896). 1s. 6d. (Also issued with No. 108).

(110.) Map of the Palmer Districts. [In two Sheets.] R.L.J. (1896). 2s. (Also issued with No. 108).

(111.) Map showing Reefs in the neighbourhood of Maytown, Palmer Goldfield. R.L.J. (1896). 6d. (Also issued with No. 108).

(112.) On the Horn Island Goldfield. [With Geological Map.] W.H.R. (F'cap. C.A. Paper. 1896). 1s.

(113.) Bulletin No. 3. Mount Cannindah Copper and Gold Deposits. [With Plan.] W.H.R. (8vo. 1896). 6d. (Out of print).

(114.) Notes on Two Traverses of the Bunya Bunya Range, and a visit to Brovinia Goldfield. R.L.J. (F'cap. C.A. Paper. 1896). 3d.

(115.) On the Deep (Tin) Lead, Herberton. [With five Plates of Maps and Sections.] S.B.J.S. (F'cap. C.A. Paper. 1896). 1s. 6d.

(116.) On the Hodgkinson Goldfield. R.L.J. (Reprint of No. 16.) 2s. 6d. (Out of print.)

(117.) Bulletin No. 4. Notes on the Present Condition of the Hodgkinson Goldfield. R.L.J. (8vo. 1896). 3d.

(118.) On the Croydon Goldfield. [With five Maps and eleven Plates.] W.H.R. (F'cap. C.A. Paper. 1896). 2s.

(119.) On the Tin Mines of Watsonville, and on various Tin, Silver, Gold, and Copper Mines at Herberton, Mount Albion, Irvinebank, Muldiva Calcifer, Chillagoe, California Creek, the Tate River, Mareeba, etc. [With Maps and Sections.] S.B.J.S. (F'cap. C.A. Paper. 1897). 2s.

(120.) On the Geology of . . . Stanthorpe and Warwick, . . . with special reference to Tin, Gold, and Silver . . . [With Maps and Sections.] S.B.J.S. (F'cap. C.A. Paper. 1898). 4s.

(121.) On the Delimitation of the Artesian Water Area north of Hughenden. [With Map and Sections.] A.G.M. (F'cap. C.A. Paper. 1898). 1s.

(122.) No Publication issued.

(123.) Bulletin No. 5. Notes on the Palmer as a Reefing District. R.L.J. (8vo. 1897). 3d.

(124.) On the Eidsvold Goldfield. [With Map and Sections.] W.H.R. (F'cap. 1897. Reprint of No. 43). 6d.

(125.) Bulletin No. 6. Catalogue of the Exhibits in the Queensland Mining Court, Queensland International Exhibition. R.L.J. (8vo. 1897). 3d.

(126.) On the Geology of the Basalt Workings, Mount Rainbow Goldfield. [With a Sketch Map.] W.E.C. (F'cap. C.A. Paper. 1897). 6d.

Geological Publications—*continued:*

(127.) On Mount Clifford and other Mines near Anakie. B.D. (F'cap. C.A. Paper. 1898). 3d.

(128.) Bulletin No. 7. Additions to the Fossil Flora of Queensland, mainly from the Ipswich Formation, Trias-Jura System. By John Shirley, B.Sc. (1898). 1s.

Coal with Glossopteris Flora, near Hughenden. (v.) Carbonaceous Glossopteris-bearing Strata near Pentland. (vi.) Gold on Mt. Emu Plains Station, Hughenden District. (vii.) The Granite Castle Lode, Mt. Emu Plains Station, Hughenden District. (viii.) Prospecting on Cape River Goldfield. (ix.) Gold on Witty's Freehold, Ormeau. x.) The Tin Lodes of Sandy Creek, Charters Towers District. (xi.) Olivines in the Toowoomba Basalt. W.E.C. and E.O.M. 8vo. 1911. 6d.

(236.) Sketch Map of Goldfields in the Vicinity of Charters Towers. Scale, 4 miles to an inch. Compiled by W.H.G. 1911. 1s. 6d.

(237.) Mount Mulligan Coalfield (with one Map, four Sections, and eight Plates). L.C.B. 8vo. 1912. 6d.

(238.) Outside Mines of Charters Towers Goldfield (with one Map and nine Plates). E.O.M. 8vo. 1913. 6d.

(239.) Coal Resources of Queensland. (A general review.) B.D. 8vo. 1913. 6d.

SUPPLEMENTARY (PROGRESS) REPORTS.

See List under separate heading, page 927.

Geologists of Queensland (List of). *See* Government Geologists.

Georgetown—

Situation: *See maps*, Pls. 8, 9, 32. Twenty miles N. of Forsythe R. Stn., and one hundred and sixty miles S.W. of Almaden Rail. Stn. (Chillagoe line). *Co.* Gilbert; *Dist.* Cook. *Lat.*, 18° 19′ S.; *Long.*, 143° 32′ E.

Population: Included in Etheridge Goldfield.

Rainfall: Yearly average between 1902 and 1907 equals 28·64 inches, with 62 wet days.

Mineral Statistics included in Etheridge Goldfield, *which see.*

Mineral References: Cerussite, *see* 1190d; Copper (Ores), 2025; Copper Pyrites, 2148-2150; Galena, 2753a, 2754-2756; Gold, 3724-3734; Iron Pyrites, 5046-5052; Malachite, 6217a: Marcasite, 6501: Massicot, 6525b; Mispickel, 6682; Pyrrhotite, 7154; Tenorite, 7719; Zinc Blende, 8077.

Reefs: Better Luck, Chance, City of Sydney, Gladstone, Havelock, Lady Maria, North Star, Papa, Paxo, Rescue, Spero Meliora, St. George, Telegraph, Young Wexford, Victoria, etc.

Geological Note: The country rocks are coarse-grained porphyritic granite, elvan rock, and schist. The latter rock occurs in bands, and are supposed to indicate a metamorphic origin for the granite. The elvan rock traverses the granite as dykes, and is frequently associated with gold-bearing quartz reefs. *See* G.S.Q. Pub. No. 92, p. 16, for details.

Geological Publications: *See under* Etheridge Goldfield.

Warden: Stationed at Georgetown. Inspector of Mines: Stationed at Croydon.

General Information: Consult *Pugh's Almanac*, *Queensland Post Office Directory*, *Post and Telegraph Guide*. Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Local Newspapers: *Mundic Miner* and *Etheridge Gazette.*

Georgetown and Cumberland (between), Etheridge Goldfield. *Min.Ref.* Felspar, *see* 2632; Mica, 6555.

Georgina Co. Gregory North Dist. *See map*, Pl. 20.

—— Mine, Barmundoo Goldfield. *Min.Ref.* Galena, *see* 3036a; Gold, 4234; Iron Pyrites, 5355; Zinc-Blende, 8180.

Geraghty (T.)—

Geological Survey Publication:

137. Map of the Etheridge Goldfields. Scale, 1 mile to an inch ... 1898

Geraldine Reef, Woodville, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3764.

Geraldton (Innisfail)—

Situation: *See maps*, Pls. 8, 9. On the Johnstone River, 4 miles from Gladys Inlet and 130 miles N.W. of Townsville. *Co.* Nares; *Dist.* Cook. *Lat.*, 17° 31′ S.; *Long.*, 146° 02′ E.

Port for Jordan and Russell Goldfields.

Harbourage: The Johnstone River is navigable for 12 miles for vessels drawing 7 ft. at neap tides and 9 ft. 6 in. at springs. Tides vary from 3 ft. to 9 ft., and are very irregular.

Population: About 1,700.

Rainfall: *See under* separate heading.

Mineral References: Beach Sand, *see* No. 287; Magnetic Sand, 5995; Monazite, 6878; Tantalum, 7697.

Geological Notes: The rocks about the town are clay slates, which have a N.N.W. and S.S.E. strike, and are nearly vertical. Basalt outcrops are exposed about 4 miles to the west, and large areas of alluvial deposits have been formed at the junction of the north and south branches of the Johnstone River. At the mouth of the river the beach sands contain monazite. *See* G.S.Q. Pubs. Nos. 97 and 196 for details.

Geological Publications: Report No. 196. *See under* Gov. Surv. Pub. List for title.

Warden: Stationed at Innisfail. Inspector of Mines: Stationed at Charters Towers.

Ming. Jour., Report No. 22.

Gilbert Co. Cook Dist. *See map*, Pl. 8.

Gilbert Goldfield. Now portion of the Etheridge Goldfield. Mineral Statistics included in Etheridge returns.

Geological Note: Slates of undetermined age, "Desert Sandstone," and (?) Tertiary basalt are the prevailing rocks. Reefs occur in the slates associated with elvan dykes, and are gold-bearing, but it is from the alluvial deposits that most of the gold from this field has been obtained. *See* G.S.Q. Pub. No. 92, p. 29, etc., for notes.

Discovery: Gold was discovered on the Gilbert R., in May, 1869, and a "rush" took place immediately afterwards.

—— Reef, Normanby Goldfield. *Min.Ref.* Gold, *see* 3683.

—— River. Rises in the Newcastle Range, 50 miles S.E. of Charleston (Etheridge), flows S.W. for 20 miles, thence N.W. into Gulf of Carpentaria, 40 miles N. of Normanton. Length about 300 miles. Trib. Einasleigh R. (sub-trib.) Etheridge and Copperfield Rivers. *Min.Ref.* Bismuthinite, *see* 370; Bismutite, 397; Diamond, 2573; Gold, 3241, 3242; Pyromorphite, 7144; Rock Crystal, 7188; Sapphire, 2346.

—— Rock. Mt. Perry. *Min.Ref.* Galena, *see* 2718.

Gilberton, 24 miles S.byE. of Charleston, Etheridge Goldfield. *Lat.*, 19° 13′ S.; *Long.*, 143° 36′ E. *Min.Ref.* Copperas, *see* 2336; Galena, 2825-2827; Gold, 3829, 3830; Hematite, 4723; Iron Pyrites, 5102; Limestone, 643; Magnetite, 5997; Malachite, 6246; Silver (native), 7554; Telluride of Gold, 7701-7702.

Gismondite. *Syn.* Gismondine. *Compo.*, Silicate of alumina and lime. A zeolite. *Colour*, usually white. Glassy. *H.* = 4·5. *Sp.gr.* = 2·2.

3170. ——. In basalt. Rosewood Goldfield, 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 68 (1887).

Gladstone.

Situation: *See maps*, Pls. 2, 3, 33. By rail, 328 miles N.N.W. of Brisbane. *Co.* Clinton; *Dist.* Port Curtis. *Lat.*, 25° 50′ S.; *Long.*, 151° 15′ E.

Port for the Goldfields of Barmundoo (Tableland), Bompa, Calliope, Canal Cr., Cania-Kroombit, Langmorn, Maxwelton, Monal, Mt. Rainbow, Norton, and Raglan; New Zealand Gully and Mt. Jacob Gold Workings; the Mt. Cannindah and Glassford Cr. Mineral Fields; Bompa Silver-Lead Workings; Many Peaks Copper Workings; Mt. Hector Copper Mine; Manganese Workings at Auckland Point and Mt. Miller; and the Callide Cr. Coal Beds. A railway has now been constructed which connects the Many Peaks and Glassford Creek Copper Mines with Gladstone.

Harbourage: Port Curtis is one of the best harbours in Queensland, being protected from bad weather by Curtis and Facing Islands, and having good anchorage for ships of all sizes. At the Government wharf the depth of water at low tide is 20 ft. Spring tides rise from 10 to 12 ft.

Population: 6,656 (Census 1911).

Rainfall: Yearly average between 1902 and 1907, 14·73 inches, with 67 wet days.

Mineral Statistics (Gladstone and Outlying Fields):

Manganese,	*see tables,*	Pls. 40, 46, 46A.
Silver,	,,	Pls. 37, 46, 46A.
Lead,	,,	Pls. 38, 46, 46A.
Copper,	,,	Pls. 39, 46, 46A.
Limestone,	,,	Pls. 41, 46, 46A.
Ironstone,	,,	Pls. 41, 46, 46A.

Mineral References: Chloropal, 1470; Gold, 4295B; Ironstone, 5616A; Manganese-dioxide, 6458-6460; Prase, 1402; Psilomelane, 7097; Pyrolusite, 7129; Scheelite, 7355.

Geological Note: The country rocks are Devonian slates, quartzites, jasperoids, and schists, intersected by dykes of trachyte, syenite, and diorite. Manganese occurs in many localities, but principally at Mt. Miller and Auckland Point. *See* G.S.Q. Pub. No. 194 for details.

Geological Publications: Report—No. 194 (1904). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Gladstone.

Inspector of Mines: Stationed at Rockhampton.

Chamber of Commerce: A. Fisher, Secretary.

Glanworth Co. Warrego Dist. *See map*, Pl. 18.

Glass Manufacture. Most of the ingredients for the manufacture of glass are of common occurrence, but works have not yet been established for the manufacture of glass from the raw material. Sand of suitable quality exists close to Brisbane, particularly on Bribie, Moreton, and Stradbroke Islands, and on some of the shores about Moreton Bay. Deposits of pure sand occur in many other localities along the coast.

Glassford Creek Mineral Field—

Situation : *See maps*, Pls. 2, 3, 34. Eight miles W.S.W. of Many Peaks Rail. Stn., 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton ; *Dist.* Port Curtis. Centre about *Lat.* 24° 35′ S. ; *Long.* 151° 26′ E.

Discovery : Glassford Cr. Copper Mine was discovered in 1893.

Proclamation of Field : First gazetted, 5th April, 1900. Last, 24th Oct., 1900, as follows :—Commencing at the south-west corner of Grazing Farm 16, portion 8v, and bounded thence by Dawes Range westerly and northerly to the northern watershed of Glassford Creek, by that watershed and the south boundaries of portions 11v and 10v north-easterly to the west corner of Bompa Goldfield, by the south-west boundary of that goldfield south-easterly to the north-west boundary of Grazing Farm 6, portion 1v, by the north-west boundaries of portions 1v, 4v, and 9v south-westerly to the north-west corner of portion 9v, and by the western boundaries of portions 9v and 8v southerly to the point of commencement.

Area : 62,080 acres (97 sq. miles).

Principal Mining Centres : Glassford Cr. and Many Peaks.

Mineral Statistics : Included in Gladstone returns.

Mineral References : Silver, 7517 ; Lead (Anglesite) 62, (Galena) 3042 ; **Copper** (Azurite) 243A, 243B, (Bornite) 435, (Copper, native) 2009, (Copper Pyrites) 2285-2287, (Cuprite) 2472, 2473, (Malachite) 6352-6354, (Tenorite) 7739, (Tile Ore) 2570 ; Zinc-Blende, 8185 ; Iron (Hematite) 4783-4785, (Iron Pyrites) 5364, (Limonite) 5906, 5907, (Magnetite) 6035-6037 ; Limestone, 674, 675. Other Minerals—Actinolite, 4865 ; Calcite, 528, 529 ; Chlorite, 1465 ; Epidote, 2601 ; Garnet, 3140, 3161A.

Geological Note : The country rocks are quartzites, slates, and greywackes, with intrusive masses of granite. Limestone and garnet rock occur in the vicinity of the township in association with lodes of pyritous ore containing copper and iron. *See* G.S.Q. Pubs. Nos. 150 and 194 for details. *See under* Geol. Surv. Pub. List for title.

Geological Publications : Reports—Nos. 150 (1900), 159 (1901), 190 (1904), 194 (1904).

Warden : Stationed at Gladstone.

Inspector of Mines : Stationed at Rockhampton.

Reports : (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour. ; annually in A.R.D.M.

Smelting Works : *See under* Smelting Works in Queensland.

Glassford Cr. Copper Mines (includes the Bompa Syndicate's Copper Mines), Glassford Cr. Mineral Field. *Min.Ref.* Azurite, *see* 243B ; Bornite, 435 ; Calcite, 528, 674 ; Chlorite, 1465 ; Copper Pyrites, 2286 ; Cuprite, 2473 ; Galena, 3042 ; Garnet, 3140 ; Hematite, 4783, 4784 ; Magnetite, 6036 ; Malachite, 6354 ; Tenorite, 7739 ; Zinc Blende, 8185. *Discovery.*—Copper was first found here in 1893, but it was only on 10th Jan., 1899, that the first mineral lease was applied for.

—— —— —— Mine (Blue Bag Shaft). *Min.Ref.* Actinolite, *see* 4865 ; Copper Pyrites, 2285 ; Epidote, 2601 ; Hematite, 4784 ; Magnetite, 6037 ; Malachite, 6353.

Glasshouse Mountains. Between 40 and 46 miles N.byW. of Brisbane, and close to the North Coast Railway Line. *Min.Ref.* Opal (wood), *see* 6988.

Geological Note : The mountains are trachytic masses, and appear to be the necks of old volcanic cones. They are surrounded by sandstones belonging to the Ipswich (Mesozoic) Series. Descriptions of the peaks are given in "The Geology of the Glasshouse Mountains and District," by Dr. H. I. Jensen, in Proc. Linn. Soc., N.S.W., 1903, pt. 4, and "Geology of the Volcanic Area of the East Moreton and Wide Bay Districts," same author, Proc. Linn. Soc., N.S.W., 1906, pt. 1.

Glassy Felspar. *Syn.* Sanidine, *var. of* Orthoclase, *which see.*

Glastonbury Goldfield—

SITUATION: *See map*, Pls. 4, 5. About 7 miles W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. Centre about *Lat.* 26° 9′ S.; *Long.* 152° 33′ E. Discovered in 1886.

PROCLAMATION: First (and only one) gazetted, June 3rd, 1887, as follows:—Commencing on the right bank of Widgee Creek at the north-west corner of portion 12, parish of Widgee, and bounded thence on the south by that portion bearing east, by the west boundary of portion 1121 bearing south, by the south boundary of that portion and a line in continuation bearing east to Glastonbury Creek, by that creek downwards to the southern termination of the east boundary line of portion 924, parish of Brooyar, by the east, the north, and part of the west boundaries of that portion north, west, and south to the north-east corner of cancelled portion 1492, by the north boundary of that portion and a line in continuation west to Widgee Creek, and by that creek upwards to the point of commencement—exclusive of all alienated and selected lands.

AREA: 6,400 acres (10 sq. miles).

MINERAL STATISTICS: *Included in* "Other Goldfields." *See tables*, Pls. 36, 46, 46A; *also diagram*, Pl. 47.

MINERAL REFERENCES: Gold, *see* 4396-4399; Copper (Copper Pyrites), 2324; Manganese (Pyrolusite), 7133.

GEOLOGICAL NOTE: The country is made up of hardened sandstone, more or less ferruginous, with bands of a dark shale containing plumbago. Some distance away from the sedimentary rocks outcrops of granite are exposed. Gold-bearing quartz reefs, well defined, occur in the sandstone, and vary in thickness from a few inches to about 2 ft. *See* G.S.Q. Pub. No. 52 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 52 (1889), 94 (1893). *See under* Geol. Surv. Pub. List for title.

Gold (Au.). *Atom.Wt.* 197·2. *Sp.gr.* 19·3 at 15·5° C.

Mineralogical Notes: *Quality of Gold*—The purest gold in Queensland (and also of the world) is that mined at Mt. Morgan, which contains 99·7-8 per cent. of fine gold, and is valued at £4 4s. 8d. per oz. The gold of poorest quality is that occurring in the reefs at Croydon Goldfield, which has an average value of £2 4s. per oz., although some of the gold on this field is alloyed with so much silver that the bullion is worth only 7s. 6d. per oz. *Native Gold Alloys*—The 0·2-3 per cent. of alloyed metal in Mt. Morgan gold is made up of copper and iron, and a minute trace of silver. All other native gold alloys of Queensland, so far recognised, contain only gold and silver. *Associated Metallic Minerals*—Those which are known to contain gold include Native Bismuth, Native Silver, Native Copper, Native Arsenic, Iron Pyrites, Copper Pyrites, Marcasite, Mispickel, Galena, Stibnite, Pyrrhotite, Zinc Blende, Wolfram, Bornite, Bismuthinite, Tetradymite, Jöseite, Hematite, Limonite, Magnetite, Cuprite, Tenorite, Lead Ores, etc., etc. *Mineral Compounds*—Three defined minerals have been recognised, viz.: Altaite, Calaverite, and Hessite, but others exist of doubtful composition. *See under* mineral names for details.

Geological Notes: *Gangues, etc.*—Quartz, Ironstone, Calcite, Felspar, Graphite, Manganese Ores, Slate, Serpentine, Asbestos, Scheelite, Kaolin. *Associated Rocks*—Granite, Syenite, Schist, Diorite, Diabase, Andesite, Dolerite, Serpentine, Quartzite, Conglomerate, Slate, Graphite, Hornblende-rock, etc., etc. *Alluvial Deposits*—Associated minerals include Platinum, Osmiridium, Monazite, Cassiterite, Magnetite, Ilmenite, Tourmaline, Pleonaste, Garnet, Zircon, Topaz, Ruby, Sapphire, Diamond, etc. *Geological Horizons*—Reefs occur in Granite, Schist, Slate, etc., of undetermined age, and in the Permo-Carboniferous System (Middle Gympie Formation). Alluvial deposits range from Upper Permo-Carboniferous (Clermont Coalfield) to Recent. *See* Geological maps, Pls. 3, 5, 7, 9, 11 13, 15, 17, 19, 21.

Geographical Note: The gold-bearing areas are mostly confined to the eastern half of the State. They are contained in a belt of country which is on an average about 100 miles wide, and which extends from Horn Island in Torres Strait to Pikedale south of Warwick, a distance of over 1,300 miles, the whole of the coast line being made up of proclaimed goldfields, mineral fields, coalfields, and tracts of country known to contain minerals of economic value, but not specially reserved for mining purposes. *See maps*, Pls. 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 25, 26.

Discoveries: Gold was first found at Black Snake near Kilkivan, a specimen being unearthed there in 1852. In the following year, 1853, Calliope was discovered, although not worked until 1862. Canoona was opened in 1857, Peak Downs in 1861, Gympie in 1867, Ravenswood in 1868, Etheridge in 1871, Charters Towers in 1872, Palmer in 1873, Mt. Morgan in 1882, and Croydon in 1885. For other discoveries and notes, *see* Discoveries under separate heading.

Statistical Notes:

World's Gold Production, 1851 to 1910	£2,172,006,825
Australia's Production, 1851 to 1910	525,808,844
Queensland's Production, 1860 to 1910	72,100,202
Australia's Percentage of World's Production	24·21 per cent.
Queensland's Percentage of World's Production	3·32 ,, ,,
Queensland's Percentage of Australia's Production	13·71 ,, ,,

World's Production for Year 1910	£97,051,622
Australia's Production for Year 1910	11,593,328
Queensland's Production for Year 1910	1,874,946
Australia's Percentage of World's Production (1910)	11·94 per cent.
Queensland's Percentage of World's Production (1910)	1·93 ,, ,,
Queensland's Percentage of Australia's Production (1910)	16·17 ,, ,,

Greatest Annual Gold Production in Queensland		(1900)	£2,871,579
Second Greatest	ditto	(1903)	2,839,801

Mt. Morgan (including Rockhampton)—Percentage of Queensland's Gold Production, 1912	41·38 ,, ,,
Gympie—Percentage of Queensland's Gold Production, 1912	11·35 ,, ,,

Quality of Gold.—An attempt was made to estimate the quality of gold obtained from each field, but the data was so fragmentary and unreliable that the attempt had to be abandoned. The trouble in arriving at something definite was in not being able to obtain assay values, most of the returns being based on cash sales to storekeepers and banks.

Statistical Tables and Diagrams:

See Pls. 36 and 47 for Goldfield Returns
See Pls. 45 and 57 for State Annual Value Summary.
See Pls. 46, 46a for District Quantity and Value Summary.

GOLD FIELDS AND PRINCIPAL MINING CENTRES: Queensland possesses over 90 distinct goldfields, the great majority of which were proclaimed as such many years ago. There are about half-a-dozen known as Provisional Goldfields, some have recently been amalgamated to form a group of fields, while others have been abandoned and the land utilised for agricultural and other purposes. Total area of proclaimed mineral fields in the State is 78,000 square miles. *See* further references under name of field. Proclaimed fields below are indicated by an asterisk.

*Agate Downs G.F.	16,000 ac. (25 sq. miles)	*See* Pls. 20, 21.
*Alice R. (Philp) G.F.	64,000 ac. (100 sq. miles)	*See* Pls. 8, 9.
Allandale Prov. G.F.	850 ac. (about)	*See* Pls. 16, 17.
*Balcooma G.F.	19,200 ac. (30 sq. miles)	*See* Pls. 16. 17.
*Birmundoo G.F.	161,920 ac. (253 sq. miles)	*See* Pls. 2, 3.

* Includes 8 stamps as equivalent to 2 Huntington Mills.

† Ball Mills (5,000 tons capacity per week) not included. Includes 15 stamps as equivalent to Kroms Rolls, etc.

Gold-lease Rents. *See under* Rents for time of payment. *See* copy of "Mining Act" for fees charged.

Gold (native). *Compo.*, usually alloyed with silver. *Colour and Streak*, gold-yellow, sometimes silver white. *H.* = 2·5-3. *Sp.gr.* = 15·6-19·3.

3171. ——. In alluvial deposits. Fisher's Cr., 12 miles E.byN. of **Cloncurry.** *Co.* Beaconsfield; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

3172. ——. *Assoc.with* Native Bismuth, in alluvial deposits. *Loc.* Pumpkin Gully, 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

3172A. ——. In alluvial deposits. Cambridge Cr. Diggings, 15 miles S.W. of Chudleigh Park Stn., about 65 miles N.N.W. of Hughenden Rail. Stn. (Northern line). *Co.* Chudleigh; *Dist.* Burke. *Ref.* E.O.M.

3173. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Black Springs Waterhole, Locket Cr., about 20 miles S.E. of Croydon, Stanhills Tinfield. *Co.* Esmeralda; *Dist.* Burke. *Ref.* G.S.Q. Pub. 211, p. 11 (1907).

3174. ——. In alluvial deposits. Mistake Cr., trib. of Gunpowder Cr., about 90 miles N.W.byN. of Cloncurry. *Co.* Kamileroi; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

3175. ——. In alluvial deposits. Nr. Gorge in Cloncurry R., 20 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 6 (1895).

3176. ——. In alluvial deposits. Bell's Flat, Florence R., 33 miles S.byW. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 104, p. 6 (1895).

3177. ——. In alluvial deposits. Armstrong Gully, **Top Camp Diggings,** Cloncurry R., 24 miles S.byW. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 104, p. 5 (1895).

3178. ——. In alluvial deposits. Chinaman's Flat, Cloncurry R., Top Camp Diggings, 24 miles S.byW. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 10, p 6 (1885), and 104, p. 5 (1895).

3179. ——. *Assoc.with* Native Bismuth and Bismutite, in alluvial deposits. *Loc.* Mary Douglas Hill, Top Camp Diggings (*ante*). *Ref.* G.S.Q. Pub. 10, p. 6 (1885), and 104, p. 5 (1895).

3180. ——. In alluvial deposits. Red Jack Flat, Top Camp Diggings (*ante*). *Ref.* G.S.Q. Pub. 10 (1885).

3181. ——. In alluvial deposits. Sharkey's Flat, Top Camp Diggings (*ante*). *Ref.* G.S.Q. Pub. 10, p. 6 (1885).

3182. ——. In alluvial deposits. Blackfellow's Gully, 2 mile Cr. Diggings, 23 miles S.byW. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 5 (1895).

3183. ——. In alluvial deposits, in "Desert Sandstone." *Loc.* The Springs, 10 miles S.E. of Croydon, Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p 3 (1896).

3184. ——. In alluvial deposits. Head of Copper-mine Cr., Leichhardt R., nr. Mighty Atom Copper Mine, 42 miles N.W.byW. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 304 (1908).

3185. ——. As traces, in alluvial deposits, in granite country. *Loc.* Br. of Dobbyn Cr., Leichhardt R., 70½ miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 10, p. 8 (1885).

3186. ——. In alluvial deposits. Eastern Cr.. trib. of Gunpwoder Cr., Leichhardt R., 87 miles N.W.byW. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

3187. —— (traces). In alluvial deposits. Gunpowder Cr., Leichhardt R. (*ante*). *Co* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

3188. ——. In alluvial deposits. Surprise Cr., Leichhardt R., about 70 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

3189. ——. In alluvial deposits. Butcher's Gully, trib. of Oxley Cr., 25 miles W.byN. of Upper Cape Diggings. *Co.* Wongalee; *Dist.* Burke. *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

3190. ——. In alluvial deposits. Italian Gully, trib. of Oxley Cr. (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

3191. ——. In alluvial deposits. Jackson's Gully, trib. of Oxley Cr. (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

3191A. ——. *Assoc.with* Magnetite, in alluvial deposits. *Loc.* Anderson Bros. R.C., Por. 2, Par. of Cracknell, Upper Flinders, Mt. Emu Plains Stn., 62 miles N.N.E. of Hughenden, and 55 miles N.W.byW. of Pentland Rail. Stn. (Gt. Northern line). *Co.* Wongalee (*ante*). *Ref.* Q.G.M.J., vol. 11, p. 136 (1910).

3192. Gold. In alluvial deposits. In gullies near the divide between Degilbo and Stanton-Harcourt Runs, 63 miles (by rail and road) W.byN. of Maryborough. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 25, p. 4 (1886).

3193. ——. In alluvial deposits. In gullies nr. Stony Cr., Stanton-Harcourt Diggings, Degilbo Run, 11 miles N. of Degilbo Rail. Stn., 69 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 25, p. 4 (1886).

3194. ——. In alluvial deposits. Duffer Rush Cr. Diggings and other workings, Gobango Cr., 16 miles S.E. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* A.R.D.M., p. 64 (1885).

3195. ——. In alluvial deposits. German's or Dry Gully, Gooroomjam Cr., Scrub Paddock Diggings, 23 miles N.N.E. of Nanango, 30 miles S. of Kilkivan Rail. Stn. *Co.* Fitzroy (*ante*). *Ref.* G.S.Q. Pub. 29, p. 2 (1886).

3196. ——. In alluvial deposits. White's or Manaramby Cr., Scrub Paddock Diggings (*ante*). *Ref.* G.S.Q. Pubs. 29, p. 2 (1886), and 169, p. 11 (1901).

3197. ——. In alluvial deposits. Brovinia Cr., br. of Cadarga Cr., 90 miles (by coach) N.N.E. of Chinchilla, 50 miles S.W. of Gayndah Rail. Stn. *Co.* Newcastle; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 114, p. 3 (1896).

3198. ——. *Assoc.with* Silver, in alluvial deposits. *Loc.* **St. John's Cr. Goldfield,**, 16 miles S.W. of Eidsvold. *Co.* Wicklow; *Dist.* Burnett. *Assay:* Gold = 3 oz. 15 dwt.; Silver = 2 oz. 18 dwt. per ton. *Ref.* A.R., p. 59 (1906).

3199. ——. In alluvial deposits. Cabbage Tree Cr., br. of Splinter Cr., nr. Mt. Cannindah, 40 miles S.W. of Miriam Vale Stn. (North Coast line), 83 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 113, p. 5 (1896).

3200. ——. In alluvial deposits. McKonkey's Cr. Diggings, The Springs, between McKonkey's and Hungry Hill Creeks, 16 miles S.E. of Eidsvold. *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pub. 160, pp. 14, 15 (1901).

3200A.——. In alluvial deposits Antimony Cr., Kitty Gully and Starlight Gully, etc., Munburra, 40 miles N.N.W. of Cooktown, **Starcke Goldfield.** *Co.* Banks; *Dist.* **Cook.** *Ref.* G.S.Q. Pubs. 209, p. 6 (1907), and 223, p. 16 (1909).

3200B.——. In alluvial deposits. Diggings Cr., Bearaway, Fearaway, McKenzie, and Prospector's Gullies, Old Starcke Workings, 4 miles E. of Munburra, Starcke Goldfield, about 44 miles N.N.W. of Cooktown. *Co.* Banks (*ante*). *Ref.* G.S.Q. Pubs. 209, p. 6 (1907), and 223, p. 16 (1909).

3201. ——. *Assoc.with* Stibnite, in alluvial deposits. *Loc.* Cocoa Cr., trib. of McIvor R., nr. Wilton Rail. Stn. (Cooktown line), 33 miles N.N.W. of Cooktown. *Co.* Banks; *Dist.* Cook. *Yield:* Gold = 4 oz. 14 dwt. per ton. *Ref.* G.S.Q. Pubs. 91, p. 3 (1893), 209, pp. 6, 7 (1907), and 223, pp. 23, 24 (1909).

3202. ——. In alluvial deposits. Head of E. br. of Starcke R., 22 miles N.W. of Cooktown. *Co.* Banks (*ante*). *Ref.* G.S.Q. Pub. 209, p. 6 (1907).

3203. ——. In alluvial deposits. **Tate Goldfield,** about 32 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 49 (1900).

3204. ——. In alluvial deposits. *Loc.* Wandoo Cr., trib. of Muldiva Cr., Walsh R., 10 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

3205. ——. In conglomerate, in alluvial deposits. *Loc.* Limestone, **Palmer Goldfield,** 60 miles S. of Laura Rail. Stn., Cooktown line. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.M.

3206. ——. In alluvial deposits. Catalpa, nr. Maytown, 50 miles S. of Laura Rail. Stn. (Cooktown line), Palmer Goldfield. *Co.* Chelmsford (*ante*) *Ref.* G.S.Q. Pub. 125, p. 19 (1897).

3207. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Granite Cr., 9 miles E. byS. of Maytown, Palmer Goldfield. *Co.* Chelmsford (*ante*).. *Ref* P.R.S.Q., vol. 4, p. 3 (1887).

3208. ——. In alluvial deposits. Chinaman's Gully, Yanky Bill's Gully, Soda and Acid Cr., Old Township Cr., Two-mile Cr., and Llankelly Cr., **Coen Goldfield,**, 45 miles (by road) N.N.W. of Port Stewart, 189 miles N.W. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 24 (1901).

3209. ——. *Assoc.with* Garnet, *var.* Almandine, in alluvial deposits. Lower Crossing, Coen (or Kendall's) R., Coen Goldfield (*ante*). *Ref.* G.S.M.

3210. ——. *Assoc.with* Ilmenite, in alluvial deposits. *Loc.* Dunwich Gully, 1¼ mile N.E.byE. of Ebagoola, **Hamilton Goldfield.** *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 16 (1901).

3211. ——. In alluvial deposits. Corbett's, Dick's, Dickie's P.C., Four Mile, Good Luck, Gold Mt., Hit or Miss, Jackson's, Looking Glass, Nuggety, Peterson's, Queenslander, Ross' Well, Slaughteryard, Steel's, and Tasmanian Gullies, Hamilton Goldfield, 33 miles W. of Port Stewart, 173 miles N.W.byW. of Cooktown. *Co.* Coen (*ante*). *Ref.* G.S.Q. Pub. 163, pp. 16 and 17 (1901).

3211A.——. In alluvial deposits. Mt. Adler, 7 miles N. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Copperfield; *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 21 (1911).

3212. ——. *Assoc.with* Scheelite in alluvial deposits. *Loc.* Western Cr., 17 miles S.W. from Georgetown, **Etheridge Goldfield.** *Co.* Gilbert; *District* Cook. *Ref.* B.D.

3213. ——In alluvial deposits. Nuggety Gully, **Green Hills Goldfield,** 24 miles S.W.byS. Georgetown. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 125, p. 21 (1897).

3214. ——. In alluvial deposits. Red Flat, Green Hills Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 24 (1897).

3215. ——. In alluvial deposits. Hodgkinson R., **Hodgkinson Goldfield,** 19 miles (by coach) from Dimbullah Rail. Stn., 92 miles (by rail and road) W. of Cairns. *Co.* Hodgkinson or Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 15, p. 49 (1884).

3216. ——. In alluvial deposits. 2 miles from Ninian Bay, 13 miles S.S.E. of Cape Melville, 84 miles N.W.byN. of Cooktown. *Co.* Melville; *Dist.* Cook. *Ref.* L.B. 1, p 577 (1884).

3217. ——. In alluvial deposits. **Bartle Frere Diggings,** nr. Cooroo Peak, 11 miles W.byS. of Geraldton. *Co.* Nares; *Dist.* Cook.

3218. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Kingsford Sluicing Claim, Barron River, nr. Cairns. *Co.* Nares (*ante*).

3219. ——*Assoc.with* Sapphire, in alluvial deposit. *Loc.* Jordan Cr., **Jordan Goldfield,** 22 miles W.S.W. of Geraldton. *Co.* Nares (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 66 (1900).

3220. ——. In alluvial deposits. Beatrice R., Bola Gully, Douglas Cr., Fairbank's Gully, Golden Gully, Henrietta Cr., Jordan Cr., Joyce's Gully, Lemon's Cr., Little Beatrice R., Macintosh Gully, Nuggety Gully, Poverty Gully, Smith's Gully, and Spring Cr. Jordan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 157, p. 4 (1901).

3220A.——. In alluvial deposits. Creek, foot of Mt. Bartle Frere, Upper Mulgrave, 15 miles W.byN. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* A.R.D.M., p. 33 (1890).

3221. ——. In alluvial deposits. Swiper's Flat, head of Christmas Cr., Mulgrave R., 18½ miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 89, p. 4 (1893).

3222. ——. In alluvial deposits. In the Coochee Reach, Russell R., 19 miles W.byN. of Geraldton, **Russell Goldfield.** *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 45, p. 3 (1888).

3223. ——. In alluvial deposits. Coojeebah Cr., Russell R., 16 miles W.byN. of Geraldton (*ante*). *Ref.* G.S.Q. Pub. 45, p. 2 (1888).

3224. ——. In alluvial deposits. Cooppooroo Cr., Russell R., 20 miles W.byN. of Geraldton (*ante*). *Ref.* G.S.Q. Pub. 45, p. 3 (1888).

3225. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Tachappa Cr. and brs., Russell R., 13 miles W.N.W. of Geraldton (*ante*). *Ref.* G.S.Q. Pub. 45, p. 2 (1888).

3226. ——. In alluvial deposits. Tinkinchilla Cr., Russell R., 15 miles W.N.W. of Geraldton (*ante*). *Ref.* G.S.Q. Pub. 45, p. 2 (1888).

3227. ——. In alluvial deposits. Wairamba Cr., Russell R., about 21 miles W.byN. of Geraldton (*ante*). *Ref.* G.S.Q. Pub. 45, p. 3 (1888).

3227A.——. In alluvial deposits. Burn's and Party's Mine, Russell R. Terraces, 22 miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 45, p. 3 (1888).

3228. ——. In alluvial deposits. Butler and McDonald's Claim, Russell R. Terraces (*ante*). *Ref.* G.S.Q. Pub. 45, p. 3 (1888).

3229. ——. *Assoc.with* Platinum, in alluvial deposits. *Loc.* Clarke and Joss's Claim, Russell R. Terraces (*ante*). *Ref.* G.S.Q. Pub. 45, p. 2 (1888).

3230. ——. *Assoc.with* Cassiterite and Ironstone, in alluvial deposits. *Loc.* Russell R. Terraces (*ante*). *Ref.* G.S.Q. Pubs. 45, pp. 3, 4 (1888), and 89 (1893).

3231. ——. *Assoc.with* Sapphire, in alluvial deposits. *Loc.* Russell Goldfield, 15 to 20 miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 81, p. 2 (1892).

3232. Gold. In alluvial deposits. Stony Cr., nr. Cairns. *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 125, p. 20 (1897).

3233. ——. In alluvial deposits. Combo Cr., **Towalla Goldfield,** 18 miles W.byS. of Geraldton. *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 97, p. 2 (1894).

3234. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Tinaroo Cr., 6 miles N.N.E. of Tolga Rail. Stn. (Atherton line), Walsh and Tinaroo Mineral Fields. *Co.* Nares (*ante*). *Refs.* G.S.Q. Pub. 125, p. 21 (1897), and P.R.S.Q., vol. 15, p. 49 (1900).

3235. ——. In alluvial deposits. Upper Mulgrave, 9 miles S.S.W. of Mulgrave Rail. Stn. (Cairns-Mulgrave tramway), 25 miles N.W.byN. of Geraldton. *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 125, p. 20 (1897).

3235A.——. In alluvial deposits. Christmas Hill, 14 miles E.S.E. of Percyville, **Etheridge Goldfield.** *Co.* Percy; *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, pp. 20, 21 (1911).

3236. ——. In alluvial deposits. Mountain Maid Cr., Percy R., trib. of Gilbert R., 60 miles S. of Georgetown, Etheridge Goldfield. *Co.* Percy (*ante*). *Ref.* G.S.Q. Pub. 58, p. 13 (1890).

3237. ——. In alluvial deposits. Oaks Gold and Mineral Field, 30 miles (by road) S.byE. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy (*ante*). *Ref.* A.R.D.M., p. 57 (1907).

3237A.——. In alluvial deposits. Old Oaks Diggings, 25 miles S.S.W. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy (*ante*). *Ref.* G.S.Q. Pub. 234, p. 20 (1911).

3237B.——. In alluvial deposits. Yarraman Cr., about 18 miles S.S.W. of Oak Park Stn., about 66 miles S. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy (*ante*). *Ref.* E.O.M.

3238. ——. In alluvial deposits. Rocky R. Goldfield, 26 miles N.E. of Coen, 71 miles N.N.W. of Port Stewart, 215 miles N.W. of Cooktown. *Co.* Sidmouth; *Dist.* Cook.

3239. ——. In alluvial deposits. Spring Cr., Smyth's Cr., and in Reconstruction Claim, **Horn Island Goldfield,** 3 miles S.E. of Thursday Is., Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.Q. Pub. 112, pp. 2, 5 (1896).

3240. ——. *Assoc.with* Ruby, Garnet, Bismutite, Limonite, Manganese-dioxide, and Magnetite, in alluvial deposits. *Loc.* Agate Cr., 21 miles S.S.W. of Charleston Rail. Stn., **Etheridge Goldfield.** *Co.* Victor; *Dist.* Cook. *Ref.* L.B. 1, p. 940 (1887).

3241. ——. *Assoc.with* Sapphire, in alluvial deposits. *Loc.* Gilbert R., about 50 miles S.E. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 20 (1897).

3242. ——. *Assoc.with* Diamond, in alluvial deposits. *Loc.* Gilbert R. (*ante*). *Ref.* B.D.

3243. ——. In alluvial deposits. Robertson R., 21 miles S. of Charleston, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 24 (1897).

3243A. ——. In alluvial deposits. "Baird Rush" or Bairdville, about 52 miles N. of Coen. *Co.* Weymouth; *Dist.* Cook. *Ref.* Q.G.M.J., p. 603 (1910).

3243B.——. In alluvial deposits. Lockhart R., about 10 miles N.N.W. of **Hayes's Prov. Goldfield.** *Co.* Weymouth (*ante*). *Ref.* Q.G.M.J., p. 601 (1910).

3243C.——. In alluvial deposits. Batavia R., 7 miles N. of Bairdville, 58 miles N. of Coen. *Co.* Weymouth (*ante*). *Ref.* Q.G.M.J., vol. 12, p. 307 (1911).

3244. ——. In alluvial deposits. Macintyre Brook, opposite Sandy Cr., 33 miles W.S.W. of Warwick. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 87, p. 9 (1892).

3245. ——. In alluvial deposits. In watercourses heading from range between Macintyre Brook and Condamine R., about 28 miles W.S.W. of Warwick. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 40, p. 2 (1887).

3246. ——. In alluvial deposits. **Pikedale Goldfield,** 18 to 20 miles N.W.byN. of Stanthorpe. *Co.* Bentinck (*ante*). *Refs.* P.R.S.Q., vol. 4, p. 20 (1887), and G.S.Q. Pub. 105, p. 9 (1895).

3247. ——. *Assoc.with* Cassiterite, Stannite, Sapphire, Diamond, Topaz, Zircon, and Amethyst, in alluvial deposits. *Loc.* Broadwater Cr. and its tributaries, **Stanthorpe Mineral Field,** 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 31 (1898).

3248. ——. *Assoc.with* Cassiterite, Diamond, Sapphire, Topaz, Zircon, Spinel, Garnet, and Cairngorm, in alluvial deposits. *Loc.* Spring Cr. and its tributaries, 2¾ miles W. of Stanthorpe, Stanthorpe Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 120, p. 32 (1890).

3249. ——. (traces). *Assoc.with* Stibnite and Cassiterite, in alluvial deposits. *Loc.* Head of Thirteen-mile Cr., trib. of Pike Cr., 10 miles W.N.W. of Stanthorpe, Stanthorpe Mineral Field (*ante*). *Ref.* B.D.

3250. ——. In alluvial deposits. Camp Hill Range, head of Canal Cr., 28 miles W.byS. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 40, p. 2 (1887), and 120, pp. 71, 72 (1898).

3251. ——. In alluvial deposits. **Lucky Valley Goldfield,** 10 miles S.E. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 48, p. 41 (1888).

3252. ——. In alluvial deposits. Dun's Gully, **Talgai Goldfield,** 3 miles W. of Pratten, 21 miles W.N.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 120, p. 55 (1898).

3253. ——. In alluvial deposits. Big Hill Gully, Darkey's Flat, Friday Gully, Gladstone Gully, Gum-tree Flat, Louisa, Maccabie's Sawpit, and Spring Gullies, Talgai Goldfield, 3 miles W. of Pratten, 21 miles W.N.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pubs. 94, p. 5 (1893), and 120, p. 55 (1898).

3254. ——. In alluvial deposits. Dunn's Gully, Talgai Goldfield ((*ante*). *Ref.* G.S.Q. Pub. 40, p. 3 (1887).

3255. ——. *Assoc.with* Cassiterite, Ilmenite, Wolfram, and Topaz, in alluvial deposits. *Loc.* Deep Lead, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns-Herberton line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 115, pp. 1-15 (1896), and P.R.S.Q., vol. 15, p. 49 (1900).

3256. —— *Assoc.with* Corundum, in alluvial deposits. *Loc.* Tully R., 42 miles S. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

3256A.——. In alluvial deposits. *Loc.* Broken River, 3 miles above Dosey Creek, 108 miles W.N.W. of Charters Towers. *Cos.* Clarke and Philp; *Dist.* Kennedy North.

3257. ——. In alluvial deposits. Cornish Jim's Gully, 3 miles N.byE. of Mt. Leyshon, 19 miles S. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 18, p. 2 (1885).

3258. ——. In alluvial deposits. Greasy Bill's Gully, 3½ miles N.N.E. of Mt. Leyshon (*ante*). *Ref.* G.S.Q. Pub. 18, p. 2 (1885).

3259. ——. In alluvial deposits. Gully ½-mile N. of Arthur's Cr., Far Fanning, 28 miles (by road) N.W. of Ravenswood Junction. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 133, p. 9 (1898).

3260. ——. In alluvial deposits. Head of Camoomilli Cr., Magnetic Is., Cleveland Bay, 5½ miles N. of Townsville. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 75, p. 7 (1892).

3261. ——. In alluvial deposits. Watercourses at Mt. Success, 15 miles W.N.W. of Ravenswood Junction. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pubs. 123, p. 9 (1897), and 125, p. 20 (1897).

3262. ——. In alluvial deposits. Connolly Cr., trib. of Burdekin R., **Ravenswood Goldfield,** 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.*. Kennedy North.

3263. ——. In alluvial deposits. Elphinstone Cr., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 11 (1900).

3264. ——. In alluvial deposits. Jessop's and Buchannan's Gullies, trib. of Elphinstone Cr., ½-mile S.S.W. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 11 (1900).

3265. ——. In alluvial deposits. Chinaman's Gully, Gahn's Flat, Milkonan's Point, Red Hill, between Rocky and Sandy Crs., and on the S. side of Sandy Cr., Lower Cape, Capeville, **Cape R. Goldfield,** 62 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, pp. 6, 7 (1891).

3266. ——. In alluvial deposits. White Hill Lead. Lower Cape (Capeville) (*ante*). *Ref.* G.S.Q. Pub. 73, p. 6 (1891).

3267. ——. In alluvial deposits, in gullies of quartzite. *Loc.* W. of Mt. Black, 9 miles W. of Upper Cape, 26 miles W.byN. of Cape R. Rail. Stn., Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

3268. ——. In alluvial deposits. In watercourses, Mt. Davenport, 4 miles N.W. of Cape R. Rail. Stn. (Gt. Northern line), 70 miles (by rail and road) S.W.byW. of Townsville, Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 2 (1891).

3269. ——. In alluvial deposits. In flat nr. Mt. Davenport (*ante*). *Ref.* G.S.Q. Pub. 73, p. 2 (1891).

3270. Gold. In alluvial deposits. Escort or Stone Cr., Golden, Graveyard, Green's, Long, Moran's Nuggety, Paddy's, Quartzite, Sharper's Specimen, and other gullies, Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn., Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 4 (1891).

3271. ——. In alluvial deposits. In gully on range, 5 miles up Ready Cr., opposite Mt. Richardson, 18 miles W.byN. of Cape R. Rail. Stn., Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

3272. ——. In alluvial deposits. Deep Lead, Pentland, 3 miles N.W.byN. of Pentland Rail. Stn., Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 96 (1894), and 125, p. 20 (1897).

3272A.——. In alluvial deposits. Bluff Lead, Canton Lead, and Pothole Lead, Upper Cape Diggings, 17 miles W.byN. of Cape R. Rail. Stn. (Gt. Northern line), 77 miles (by rail and road) of Charters Towers, Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 8 (1891).

3273. ——. In alluvial deposits. In gully nr. Old Homestead Reef, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

3273A.——. In alluvial deposits. Head of the Don R., about 39 miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* Q.G.M.J., vol. 5, pp. 610, 611 (1904).

3273B.——. In alluvial deposits. Manton's Cr., trib. of Don R., about 39 miles S. of Bowen (*ante*). *Ref.* Q.G.M.J., vol. 5, pp. 610, 611 (1904).

3273C.——. *Assoc.with* Chalcedony, Jasper, Lydianstone, Zircon, and Sapphire, in alluvial deposits. *Loc.* 14v, Bunerba, ½-mile S. of Don R., about 39 miles S. of Bowen (*ante*). *Ref.* Q.G.M.J., vol. 5, pp. 610, 611 (1904).

3274. ——. In alluvial deposits. Gullies at the head of Bee Cr., Broken R., 60 miles W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

3275. ——. *Assoc.with* Garnet and Zircon, in alluvial deposits. *Loc.* Branches of Black Waterhole Cr., 2 miles N.byE. of Hazledean, 24 miles S.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, p. 10 (1901).

3276. ——. *Assoc.with* a recent ironstone formation. *Loc.* **Normanby Goldfield,** 46 miles S. of Bowen. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pubs. 5, p. 10 (1879), and 88, p. 1 (1893).

3277. ——. *Assoc.with* Iron Pyrites, in alluvial deposits. *Loc.* Otto's Claim, McMaster's (Top Camp), 14 miles N.W.byN. of Clermont, **Clermont Goldfield.** *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 201, p. 64 (1906).

3278. ——. *Assoc.with* Ironstone, Psilomelane, Marcasite, and Epsomite, in alluvial deposits. *Loc.* Paterson's Claim, McMaster's (Top Camp) (*ante*).

3279. ——. *Assoc.with* Magnesite, in alluvial deposits. *Loc.* Head of Prospectors' Gully, McMaster's (Top Camp) (*ante*). *Ref.* G.S.Q. Pubs. 27, p. 2 (1886), and 201, p. 61 (1906).

3280. ——. In alluvial deposits. Schuffler's Dam, ½-mile W.S.W. of McMaster's (Top Camp) (*ante*). *Ref.* G.S.Q. Pub. 201, p. 64 (1906).

3281. ——. *Assoc.with* Magnesite, in alluvial deposits. *Loc.* Yankee Camp, ¾-mile S.E. of McMaster's (Top Camp) (*ante*). *Ref.* G.S.Q. Pub. 201, p. 65 (1906).

3282. ——. In alluvial deposits. Boulder Hill, Middle Camp, Miclere, 20 miles N.byW. of Clermont. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 201, p. 67 (1906).

3283. ——. In alluvial deposits. Bootlace, Mill's Cr., Miclere (*ante*). *Ref.* G.S.Q. Pub. 201, p. 71 (1906).

3284. ——. In alluvial deposits. Boulder Gully, Mill's Cr., Miclere (*ante*). *Ref.* G.S.Q. Pub. 201, p. 71 (1906).

3285. ——. In alluvial deposits. Goana, Mill's Cr., Miclere (*ante*). *Ref.* G.S.Q. Pub. 201, p. 71 (1906).

3286. ——. *Assoc.with* Coal Bands, in conglomerate. Lower Camp, Mill's Cr., Miclere (*ante*). *Ref.* G.S.Q. Pub. 201, p. 70 (1906).

3287.——. In alluvial deposits. Upper Camp, Miclere (*ante*). *Ref.* G.S.Q. Pub. 201, p. 67 (1906).

3288. ——. In alluvial deposits. Black Johnson's, ½-mile W. of 17-Mile Hill, 14 miles N.W.byW. of Clermont. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 201, p. 65 (1906).

See other Clermont references, *under* Leichhardt Dist. Nos. 3296-3360.

3289. ——. In alluvial deposits. Seven-mile Diggings, 7-Mile Gully, 16 miles N.W. of Clermont. *Co.* Rutledge; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3290. ——. *Assoc.with* Ironstone, in alluvial deposits. *Loc.* Between 7-Mile and 2-Mile Diggings, 15 miles N.W.byW. of Clermont. *Co.* Rutledge (*ante*). *Ref.* G.S.Q Pub. 27, p. 2 (1886).

3291. ——. In alluvial deposits. *Loc.* Gullies leading from Spurs on Drummond Range, 16 miles N.W. of Clermont. *Co.* Rutledge (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3291A. ——. In alluvial deposits. **Mt. Wyatt Goldfield**, 60 miles S.S.E. of Ravenswood. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 125, p. 21 (1897).

3292. ——. In alluvial deposits. Isabella Cr. and Mutton Gully, Sellheim R., **Sellheim Mineral Field.** *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 57, p. 2 (1889).

3293. ——. In alluvial deposits. Porphyry Cr., Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 125, p. 21 (1897).

3294. ——. In alluvial deposits. In gully, left bank of Sellheim R., nr. Mt. McConnell, Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, p. 1 (1889).

3295. ——. In alluvial deposits. Right bank of Sellheim R., Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, p. 2 (1889).

3296. ——. In alluvial deposits. White Gates, Apsley Cr., 4 miles N.N.W. of Clermont, **Clermont Goldfield.** *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 201, p. 74 (1906).

3297. ——. In alluvial deposits. Blue Ground, Black Ridge, 12¾ miles N.byW. of Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 201, pp. 38, 131 (1906).

3298. ——. In alluvial deposits. Cumberland Lead, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 32 (1906).

3299. ——. *Assoc.with* Marcasite, in alluvial deposits. *Loc.* Daintree's Knob, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 28 (1906).

3300. ——. *Assoc.with* Coal Bands, in alluvial deposits. *Loc.* Bantam Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 109 (1906).

3301. ——. *Assoc.with* Coal Bands, in alluvial deposits. *Loc.* Eldorado Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 113 (1906).

3302. ——. In alluvial deposits. Endearer Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 114 (1906).

3303. ——. *Assoc.with* Coal Bands and Epsomite, in old alluvial deposits. *Loc.* Mason's Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 50 (1906).

3304. ——. *Assoc.with* Coal Bands, in alluvial deposits. *Loc.* Nipper Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 122 (1906).

3305. ——. *Assoc.with* Hematite, in alluvial deposits. *Loc.* Pumpkin's Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 126 (1906).

3306. ——. *Assoc.with* Coal Bands, in alluvial deposits. *Loc.* True Blue Claim, Deep Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 20, p. 129 (1906).

3310. ——. In alluvial deposits. Northern Workings, W. of Gowrie Cr., Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 46 (1906).

3311. ——. *Assoc.with* Iron Pyrites, in alluvial deposits. *Loc.* Smith's Claim, Gowrie Cr., Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 48 (1906).

3312. ——. In alluvial deposits. Turkey's Nest, Gowrie Cr., Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 32 (1906).

3313. ——. *Assoc.with* Marcasite, in alluvial deposits. *Loc.* Cockson's Claim, Old Cricket Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 41 (1906).

3314. ——. In alluvial deposits. Old Cricket Ground, Black Ridge (*ante*) *Ref.* G.S.Q. Pub. 201, p. 38 (1906).

3315. ——. In alluvial deposits. Red Ground, Slaughter-yard Lead, Black Ridge (*ante*). *Ref.* G.S.Q Pub. 201, p 33 (1906)

3316. ——. In alluvial deposits. Smith's Workings, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 33 (1906).

3317. ——. In alluvial deposits. White Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 33 (1906).

3318. Gold. In alluvial deposits. Yellow Ground, Black Ridge (*ante*). *Ref.* G.S.Q. Pub. 201, p. 33 (1906).

3319. ——. In alluvial deposits. Black Snake Lead, 2 miles N.W. of Clermont, Clermont Goldfield. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 176, p. 10 (1902).

3320. ——. In alluvial deposits. Dead Horse and adjoining Leads, 1 mile S. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 176, p. 13 (1902).

3321. ——. In alluvial deposits. Deep Creek Leads, 3 miles S.E.byS. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 103, p. 10 (1895), and 176, p. 14 (1902).

3321A. ——. In alluvial deposits. Fiddler's Cr. Leads, 6 miles N.W.byN. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 176, p. 9 (1902).

3322. ——. In alluvial deposits. Leo's Flat Lead, 4½ miles N.W.byN. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 176, p. 10 (1902).

3323. ——. In alluvial deposits. Flyspeck, McDonald's Flat, 4½ miles S.S.E. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 148, pp. 7, 9, 11 (1900), 176, pp. 15, 16 (1902), and 201, p. 33 (1906).

3324. ——. In alluvial deposits. In the gullies at McDonald's Flat, 3 miles S.byE. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 27, p. 2 (1886), 103, p. 10 (1895), and 176, p. 14 (1902).

3325. ——. In alluvial deposits. Sandy Creek Leads, close to Clermont Township, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 103, p. 11 (1895), and 176, pp. 10, 32 (1902).

3326. ——. *Assoc.with* Psilomelane, in alluvial deposits. *Loc.* Wild Cat Lead, 1 mile S. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 201, pp. 75, 78 (1906).

3327. ——. In alluvial deposits. Wild Cat, Kitten, and Bower Bird Leads, 1 mile S. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 176, p. 11 (1902), and 201, pp. 75-78 (1906).

3328. ——. In alluvial deposits. In the gullies at Copperfield, 5 miles S.S.W. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3329. ——. In alluvial deposits. Drummond Creek, Copperfield, 3 miles S.W. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 103, p. 11 (1895).

3330. ——. In alluvial deposits. In gullies between Clermont, Drummond, and Douglas Creeks, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3331. ——. In alluvial deposits. Blacksmith's Gully, 4-Mile Flat, 10 miles W.N.W. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3332. ——. In alluvial deposits. Wolf's Gully, 4-Mile Flat (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3333. ——. In conglomerate. Hurley's Deep Lead, 12 miles N.W.byN. of Clermont, Clermont Goldfield. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pubs. 27, p. 2 (1886), and 176, p. 9 (1902), and 201, p. 73 (1906).

3334. ——. In alluvial deposits. Native Bee Diggings, 9 miles W.byN. of Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 176, p. 9 (1902).

3335. ——. *Assoc.with* Marcasite, in alluvial deposits. *Loc.* All Nations Claim, Victoria Lead, The Springs, 11 miles N.N.W. of Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pubs. 27, p. 2 (1886), 176, pp. 5, 8 (1902), 201, p. 22 (1906).

3336. ——. *Assoc.with* Coal, in alluvial deposits. *Loc.* Appleton's Claim (Linklater's Claim), The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 21 (1906).

3337. ——. In alluvial deposits. Black Gully, nr. Pewt's Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 20 (1906).

3338. ——. In alluvial deposits. Bullocky Gully, E. of Dodger's Flat, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 23 (1906).

3339. ——. In alluvial deposits (Permo-Carboniferous). *Loc.* Cement Hill, The Springs (*ante*). *Ref.* G.S.Q. Pubs. 27, p. 3 (1886), 103, p. 11 (1895), 176, pp. 4-9 (1902), and 201, pp. 16, 18 (1906).

3340. ——. *Assoc.with* Limonite, in alluvial deposits. *Loc.* Christmas Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 24 (1906).

3341. ——. In alluvial deposits. Duffer Gully, E. of Smith's Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 23 (1906).

3342. ——. In alluvial deposits. Leonard's Gully, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 23 (1906).

3343. ——. *Assoc.with* Dolomite, in alluvial deposits. *Loc.* Limestone Hill, Gowrie Cr., The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 19 (1906).

3344. ——. In alluvial deposits. McFadyen's Lead, Gowrie Cr., The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 19 (1906).

3345. ——. In alluvial deposits. Morgan's Gully, S. of Smith's Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 23 (1906).

3346. ——. In alluvial deposits. Pink Hill, N.W. of Black Gully, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 21 (1906).

3347. ——. In alluvial deposits. Prospector's Gully, Cement Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3348. ——. In alluvial deposits. Scrubby Gully, The Springs (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3349. ——. In alluvial deposits. Smith's Hill, E. of Dodger's Flat, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 23 (1906).

3350. ——. *Assoc.with* Coal Bands, in old alluvial deposits. Springs Cr., The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 19 (1906).

3351. ——. In alluvial deposits St. Patrick's Gully, Dodger's Flat, The Springs (*ante*). *Ref.* G.S.Q. Pubs. 27, p. 2 (1886), and 201, p. 22 (1906).

3352. ——. In alluvial deposits. Victoria Lead, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, pp. 21, 22 (1906).

3353. ——. *Assoc.with* Limonite, in alluvial deposits. *Loc.* Well and Hill's Claim, Pewt's Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 20 (1906).

3354. ——. In alluvial deposits. White Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 19 (1906).

3355 ——. In alluvial deposits. Bath Cr., Venus, 10 miles N.W.byN. of Clermont. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

3356. ——. In alluvial deposits. Mt. Walker, 1 mile N.W. of Venus, 11 miles N.W. byN. of Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 201, pp. 72, 79 (1906).

3357. ——. In alluvial deposits. Old 4-Mile Lead, 1¼ mile W.N.W. of Venus, 10 miles N.W.byW. of Clermont (*ante*). *Ref.* G.S.Q. Pub. 201, pp. 72, 73 (1906).

3358. ——. In alluvial deposits. Venus Flat, Bath Cr., Venus (*ante*). *Ref.* G.S.Q. Pub. 201, p. 72 (1906).

3359. ——. In alluvial deposits. Venus Leads, nr. junction of Bathampton and Hurley Crs., Venus (*ante*). *Ref.* G.S.Q. Pub. 176, p. 9 (1902).

3360. ——. In alluvial deposits. Theresa Cr., Peak Vale Stn., 18 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 175, p. 10 (1902). *See other* Clermont References under Kennedy South Dist. Nos. 3277-3288.

3361. ——. *Assoc.with* Diamond, Sapphire, Spinel, Garnet, Zircon, Topaz, Amethyst, Cairngorm, Jasper, Chalcedony, Tourmaline, Hornblende, Rutile, Ilmenite, Magnetite, and Magnesite, in alluvial deposits. *Loc.* Retreat, Sheep Stn., Policeman, Tomahawk, and Central Crs., **Anakie Sapphire Field,** 193 miles (by rail) W. of Rockhampton (Central line). *Cos.* Clermont and Plantagenet (*ante*). *Ref.* G.S.Q. Pubs. 81 (1892), 125 (1897), and 172 (1902).

3362. ——. In alluvial deposits. In gullies about Mt. Bullock, 6 miles N.W.byW. of Anakie Rail. Stn. (Central line). *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 172, p. 4 (1902).

3363. ——. In alluvial deposits. Paddy's Gully, 1½ mile of Rookwood Stn., 44 miles W.byS. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 9 (1901).

3364. ——. *Assoc.with* Garnet, Zircon, Magnetite, and Tourmaline, in alluvial deposits below basalt. *Loc.* Basalt Hill Diggings, 3 miles N. of Borilla Rail. Stn. (Central line). *Co.* Plantagenet; *Dist.* Leichhardt. *Ref.* G.S.Q. Pubs. 81, p. 3 (1892), and 172, p. 7 (1902).

3365. ——. In alluvial deposits. Mine Cr., trib. of Black Waterhole Cr., 5 miles N.byE. of Hazledean, 40 miles S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 164, p. 10 (1901).

3366. ——. In alluvial deposits. Moonlight Cr., **Mt. Britton Goldfield,** 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 35 (1887).

3366A. ——. *Assoc.with* Ilmenite, in alluvial deposits. *Loc.* Torrens Cr., 98 miles (by rail) S.W.byS. of Charters Towers. *Co.* Woura; *Dist.* **Mitchell.** *Ref.* O.R. (1909).

3366B. Gold. In alluvial deposits. Squirrel Cr., 7 miles N.W. of Monsildale Stn., 20 miles (by road) from Mooretown, and 20 miles N.byW. of Kannangur Rail. Stn. (Brisbane-Valley line). *Co.* Canning; *Dist.* **Moreton.** *Ref.* Q.G.M.J., vol. 5, p. 554 (1904).

3366C. ——. *Assoc.with* Sapphire, Pleonaste, etc., in alluvial deposits. *Loc.* Bunker's Hill, nr. Crow's Nest Rail. Stn. (Ravensbourne), 34 miles N.N.E. of Toowoomba. *Co.* Cavendish; *Dist.* Moreton. *Ref.* B.D.

3367. ——. *Assoc.with* Ruby, Spinel, Sapphire (blue), Garnet (red), Topaz (white), and Zircon, in alluvial deposits. *Loc.* Wallace's and Eldridge's Claim, **Seven-mile Diggings,** 7 miles S.E. of Nanango, and 40 miles (by road) N.W.byW. of Kannangur Rail. Stn. (Brisbane-Valley Br. line). *Co.* Cavendish (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 525 (1906).

3368. ——. In alluvial deposits. Yarraman Cr., Seven-mile Diggings (*ante*). *Ref.* G.S.Q. Pub. 29, p. 2 (1886).

3369. ——. In alluvial deposits, and in quartz and ironstone. *Loc.* nr. Grimes's Paddock (beyond Saltern's), on Ipswich Road, ½-mile W. of Rocklea Rail. Stn. (S. Coast line), and 6½ miles (by rail and road) S. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* B.D.

3370. ——. *Assoc.with* Silver, Platinum, Cassiterite, and Monazite, in beach deposits. *Loc.* Currumbin Cr., 1 mile N. of Point Danger, S. Coast of Queensland, 69 miles (by rail) S.S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 198 (1905).

3371. ——. *Assoc.with* Magnetite, in beach deposits. *Loc.* Currumbin Cr., 1 mile N. of Point Danger (*ante*). *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

3372. ——. *Assoc.with* Magnetite, in beach deposits. From mouth of Nerang Cr. to Tweed Heads, 49 to 69 miles (by rail) S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

3373. ——. In alluvial deposits. Diggers' Cr., **Barmundoo (Tableland) Goldfield,** 28 miles S.byW. of Gladstone. *Co.* Clinton or Raglan; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 58, p. 6 (1889).

3374. ——. In alluvial deposits. *Loc.* Diglum Cr., Barmundoo, 30 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 162, p. 6 (1901).

3375. ——. In alluvial deposits. *Loc.* Chandler's Gully, **Eastern Boyne Goldfield,** 26½ miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 150, p. 9 (1900).

3376. ——. In alluvial deposits. Machine Cr., E. side of Boyne Range, about 15 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 4 (1885).

3377. ——. In alluvial deposits. New Zealand Gully, E. side of Boyne Range, 5 miles S.E. of Calliope, 17 miles S.E. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 4 (1885).

3378. ——. In alluvial deposits. Pancake Gully, E side of Boyne Range, 14 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 4 (1885).

3379. ——. In alluvial deposits. Tucker's Gully, E. of Boyne Range, 12 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 4 (1885).

3380. ——. In alluvial deposits. Nuggety Gully, Calliope Township, 12 miles S. of Gladstone, **Calliope Goldfield.** *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

3381. ——. In alluvial deposits. Watercourses at the head of Brennan's Flat,, 3 miles S.S.E. of Calliope, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub.. 21, p. 3 (1885).

3382. ——. In alluvial deposits. Dog-leg Gully, trib. of Oakey Cr., 1 mile E.byS. of Calliope, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

3383. ——. In alluvial deposits. Gordon's Gully, head of Leixlip Cr., 4 miles S.E. of Calliope; and 16 miles S. of Gladstone, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

3384. ——. In alluvial deposits. Seven-mile Diggings, 6 miles E. of Calliope Township, 18 miles S. of Gladstone, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 4 (1885).

3385. ——. In alluvial deposits. Ten Men's Gully, br. of Oakey Cr., 3 miles S.E. of Calliope, 15 miles S. of Gladstone, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

3386. ——. In alluvial deposits. Moonlight Gully, Two-mile Diggings, 3 miles S. of Raglan Rail. Stn. (N. Coast line), 37 miles (by rail and road) W.N.W. of Gladstone, **Raglan Goldfield.** *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

3387. ——. In alluvial deposits. Mt. Larcombe Scrub, about 6 miles S.E. of Raglan (N. Coast line), 40 miles (by rail and road) W.N.W. of Gladstone, Raglan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

3388. ——. In alluvial deposits. Old Diggings, S. of Mt. Holly, about 4½ miles S. of Raglan Rail. Stn., 38½ miles (by rail and road) W.N.W. of Gladstone, Raglan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

3389. ——. In alluvial deposits. Two-mile Diggings, head of Fire Cr., about 3 miles S. of Raglan Rail. Stn. (N. Coast line), 37 miles (by rail and road) W.N.W. of Gladstone, Raglan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

3390. ——. In alluvial deposits. **Ulam Goldfield**, 3 miles S. of Toonda Rail. Stn. (N. Coast line), 44 miles (by rail and road) W.S.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.M.

3391. ——. In alluvial deposits. **Canoona Goldfield**, 26 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 125, p. 19 (1894).

3392. ——. In alluvial deposits. *Loc.* Gully N. from Western Workings, Oaks View, 4 miles N. of Oaks Stn., 45 miles (by road) N.N.W. of Rockhampton. *Co.* Liebeg (*ante*). *Ref.* G.S.Q. Pub. 205, p. 18 (1906).

3393. ——. In alluvial deposits. **Cawarral Goldfield**, 15 miles (by rail) N.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 126, p. 20 (1897).

3394. ——. In alluvial deposits. *Loc.* **Morinish Goldfield**, 29 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G S.Q. Pub. 125, p. 20 (1897.)

3395. ——. In alluvial deposits. Peter's Rush, Dee R., Mt. Usher, 4½ miles N.E. of Mt. Morgan Rail. Stn., and about 28 (by rail and road) S.S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* O.M.

3396. ——. In alluvial deposits. Herbert Cr. Diggings, Bailey's Gully, 10 miles E.S.E. of Herbert Cr. Rail. Stn. (Central line), and 64 miles (by rail and road) S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 155, p. 9 (1901).

3397. ——. In alluvial deposits. Native Cat and Candle-light Creeks, 6 miles W.byS. of Stanwell Rail. Stn. (Central line). *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

3397A.——. In alluvial deposits. **Rosewood Goldfield**, 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* A.R.D.M., p. 105 (1908).

3398. ——. In alluvial deposits. Box Flat, 3 miles down Dee River, 20 miles S.S.W. of Mt. Morgan, 44 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* A.R., p. 126 (1907).

3399. ——. In alluvial deposits. Callide Cr. Gullies, 52 miles S.W.byW. of Gladstone. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 80, p. 1 (1891).

3400. ——. In alluvial deposits containing basaltic ejectamenta. *Loc.* Cameron's Lookout, Callide Range, **Mt. Rainbow Goldfield**,, 42 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 126, pp. 1-3 (1897), and G.S.M.

3401. ——. *Assoc.with* Silver and Copper, in alluvial deposits (?). *Loc.* Mt. Rainbow Goldfield (*ante*). *Assay:* Gold = 4 dwt. 5 gr.; Silver = 50 oz. 8 dwt. 19 gr. per ton; Copper = 26·4 per cent. *Ref.* A.R., p. 44 (1906).

3402. ——. In alluvial deposits. Glen Dee, Dee R., 5 miles E.N.E. of Mt. Morgan. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 161, pp. 12-15 (1901).

3403. ——. In alluvial deposits. Four-mile Cr., nr. Moonmera Rail. Stn. (Mt. Morgan line), 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195, p. 17 (1904).

3404. ——. In alluvial deposits. In gullies between North and Middle Peaks, near Moonmera Rail. Stn., 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195, p. 17 (1904).

3405. ——. In alluvial deposits. East of Mt. Scott, near Moonmera Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 195, p. 17 (1904).

3406. ——. In alluvial deposits. Mt. Victoria, 3 miles W.S.W. of Mt. Morgan Rail. Stn., 27 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 87, p. 12 (1892).

3407. ——. In alluvial deposits. Colo Flat, 12 miles N.byE. of Kilkivan, **Marodian Goldfield.** *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 179, p. 1 (1902).

3408. ——. In alluvial deposits. Sel. 649, Yorkey's Hill, nr. Yorkey's Cr., 10 miles N.byE. of Kilkivan, Marodian Goldfield (*ante*). *Ref.* G.S.Q. Pub. 59, p. (1890.)

3409. ——. In alluvial deposits. Brooya Stn., Mary R., 20 miles N.W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* Q.M.

3410. Gold. In alluvial deposits. Mt. Ruby, ½-mile W.S.W. of Glenbar Head Stn., 20 miles W. of Tiaro Rail. Stn. (N. Coast line). *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

3411. ——. In alluvial deposits. Chinaman's Cr., trib. of Mary R., near Mt. Ubi, west of Blackall Range, 15 miles W.byS. of Palmwoods Rail. Stn. (N. Coast line). *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 196, p. 4, 5 (1905).

3412. ——. *Assoc.with* Platinum (?), in alluvial deposits. *Loc.* Brickfield Gully, nr. Lady Mary Mine, **Gympie Goldfield,** 106 miles (by rail) N.byW. of Brisbane (North Coast line). *Co.* March (*ante*). *Ref.* B.D.

3412A.——. In shallow alluvial deposits. *Loc.* Base of Mt. Cooroora, nr. Pomona Rail. Stn. *Co.* March; *Dist.* Wide Bay. *Ref.* B.D.

3413. ——. In alluvial deposits. Nash's Gully, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 1 (1889).

3414. ——. In alluvial deposits. Nuggety Gully, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 1 (1889).

3515. ——. *Assoc.with* Quartz, in alluvial deposits. *Loc.* Ora Cr., Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

3416. ——. In alluvial deposits. Sailor's Gully, Deep Cr., Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 1 (1889).

3417. ——. In alluvial deposits. Walker's Gully, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 1 (1889).

3418. ——. In alluvial deposits. White's Gully, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 1 (1889).

3419. ——. In alluvial deposits. In gullies and on alluvial flats, "Two Mile," N.W. of Gympie, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 1 (1889).

3420. ——. In alluvial deposits. Bartle Bay, 208 miles E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 85, p. 30 (1892).

3421. ——. *Assoc.with* Cinnabar, in alluvial deposits. *Loc.* Duan (Normanby) Island, D'Entrecasteaux Island, 262 miles E. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 85, p. 31 (1892).

3421A.——. *Assoc.with* Magnetite, in alluvial deposits. *Loc.* Gleeson Is., 100 miles up Avo, Purari R., 228 miles N.W. of Port Moresby (*ante*). *Ref.* A.R.B.N.G., p. 95 (1894).

3422. ——. *Assoc.with* Cinnabar, in alluvial deposits. *Loc.* Fergusson (Moratau) Is., 231 miles E. of Port Moresby (*ante*). *Ref.* G.S.M.

3423. ——. *Assoc.with* Topaz and Beryl, in alluvial deposits. *Loc.* Fly R., 304 miles W.byN. of Port Moresby (*ante*). *Ref.* G.S.Q. Pub. 77, p. 8 (1891).

3424. ——. In alluvial deposits. Mambare R., **Gira Goldfield,** 96 miles N.N.E. of Port Moresby (*ante*). *Ref.* G.S.M.

3425. ——. In alluvial deposits. McKeo (St. Joseph) River, 64 miles N.N.W. of Port Moresby (*ante*). *Ref.* G.S.M.

3426. ——. As finely crystallised pieces, not waterworn, in alluvial deposits. *Loc.* Ana (St. Patrick's) Cr., St. Aignan (Misima) Is., 379 miles E.byS. of Port Moresby (*ante*). *Ref.* G.S.Q. Pub. 85, p. 30 (1892).

3427. ——. In alluvial deposits. Gumonina (Inkomanina) Creek, St. Aignan's (Misima) Is. (*ante*). *Ref.* G.S.Q. Pub. 85, pp. 26, 30 (1892).

3428. —— (crystallised), in surface deposits. **St. Aignan** (Misima) **Island** (*ante*).

3429. ——. *Assoc.with* Magnetite, in alluvial deposits. *Loc.* St. Joseph R., 68 miles N.N.W. of Port Moresby (*ante*). *Ref.* A.R.B.N.G., p. 96 (1894), and G.S.M.

3430. ——. In alluvial deposits. Sudest Is., 448 miles E.S.E. of Port Moresby (*ante*). *Ref.* G.S.Q. Pub. 85, p. 30 (1892).

3431. ——. *Assoc.with* Mica, Magnetite, Ilmenite, Zircon, and Topaz, in yellow alluvial deposits. Seventeen miles up Vanapa River, 32 miles N. of Port Moresby (*ante*). *Ref.* G.S.Q. Pubs. 56, p. 2 (1889), and 85, p. 31 (1892).

3432. ——. In magnetic sand from pipe vein of clay and quartz, in alluvial deposits. *Loc.* Colonidow, 6 miles from Busai, Woodlark Island, 384 miles E. of Port Moresby (*ante*). *Ref.* G.S.M.

3433. ——. In alluvial deposits. Woodlark Is. (*ante*). *Ref.* G.S.M.

3434. ——. In alluvial deposits. **Yodda Valley Goldfield,** 86 miles N.E.byE. of Port Moresby, Brit. New Guinea. *Ref.* G.S.M.

3435. **Gold Nuggets.** *Weight,* 336 oz. *Loc.* Chinaman's Flat, Top Camp Diggings, Cloncurry Road, 24 miles S.byW. of Cloncurry. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 104, p. 5 (1895).

3436. —— ——. *Weight,* 17½ oz. *Loc.* Mary Douglas Hill, Top Camp Diggings (*ante*). *Ref.* A.R.D.M., p. 43 (1896).

3437. —— ——. *Weight,* 17 oz. *Loc.* Italian Gully, trib. of Oxley Cr., 25 miles W.byN. of Upper Cape, **Cape River Goldfield.** *Co.* Wongaler; *Dist.* Burke. *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

3437A.—— ——. *Weight,* 90 oz. *Loc.* Corbett's Gully, 1 mile S.E. of Ebagoola, **Hamilton Goldfield.** *Co.* Coen; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 163, p. 5 (1901).

3438. —— ——. *Weights,* from 8 oz. to 180 oz. *Loc.* **Green Hills Goldfield,** 24 miles S.W.byS. of Georgetown, Etheridge. *Co.* Gilbert or Lang; *Dist.* Cook. *Ref.* A.R.D.M., p. 8 (1896).

3439. —— ——. *Weights,* up to 12 oz. *Loc.* Dunn's Gully, 4 miles W.byS. of Pratten, 21 miles W.N.W. of Warwick, **Talgai Goldfield.** *Co.* Merivale; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 40, p. 3 (1887).

3440. —— ——. *Weight,* 65 oz. *Loc.* Gum Flat, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 55 (1898).

3441. —— ——. *Weights,* from 1 oz. to 16 oz. *Loc.* Gullies on the Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 55 (1898).

3441A.—— ——. *Weight,* 30 oz. *Loc.* Victoria Lead, The Springs, 11 miles N.N.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 48, p. 25 (1888).

3441B.—— ——. *Weight,* 48 oz. Found in 1864. McDonald's Flat, 3 to 4 miles S.byE. of Clermont. *Co.* Clermont (*ante*). *Ref.* B.D.

3441C.—— ——. *Weight,* 30 oz. Found October 27th, 1878. Copperfield, 5 miles S.S.W. of Clermont. *Co.* Clermont (*ante*).

3442. —— ——. *Weights,* 60 oz., 80 oz., 100 oz. Found in 1881. *Loc.* Moonlight Cr., **Mt. Britton Goldfield,** 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 6 (1887), and A.R.D.M., p. 40 (1884).

3443. —— ——. *Weights,* 69 oz., 60 oz., 50 oz., 45 oz., 40 oz., 35 oz. Found in 1881. *Loc.* Nuggety Gully, Mt. Britton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 5 (1887).

3444. —— ——. *Weight,* 73 oz. Found in 1866 (?). *Loc.* Nuggety Gully, **Calliope Goldfield,** 12 miles S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.**

3445. —— ——. *Weight,* 56 oz. **Langmorn Goldfield,** 8 miles W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. Nugget found by Edward Longstaff, in 1867.

3446. —— ——. *Weight* 17 oz. 15 dwt. Value, £68 17s. Ulam Goldfield, 44 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson (*ante*).

—— ——. *Dee River Nuggets*—

The above nuggets, together with others varying in weight from 40 oz. downwards, contained 4,350 oz., of an estimated value of £18,000, found in alluvial deposits between Sept., 1903, and Aug., 1904. *Loc.* Peters Rush, Dee R., 2 miles from Mt. Usher, 4½ miles N.E. of Mount Morgan Rail. Stn. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* "Daily Record," Rockhampton.

3447. —— ——. *Weight,* 258 oz., valued at £1,000. Found in 1868. *Loc.* Mt. Wheeler, 3 miles E.N.E. of Cawarral, 18 miles N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 48, p. 32 (1888).

3448. —— ——. *Weight,* 109 oz. *Loc.* Crocodile Cr. (1865), **Mount Morgan** (Crocodile Cr.) **Goldfield,** 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* (?).

3449. Gold Nuggets. *Gross weight,* 975 oz. Found in 1867. Assayed by Sydney Mint, and found to contain 906 oz. of gold, the value being £3,132 9s. 9d. *Loc.* Gympie Cr., **Gympie Goldfield,** 106 miles (by rail) N.byW. of Brisbane (North Coast line). *Co.* March; *Dist.* **Wide Bay.** *Ref.* P.R.S.Q., vol. 4, p. 35 (1887), and O.R.

3450. —— ——. *Weight,* 804 oz. *Loc.* Sailor's Gully, Deep Cr., Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 1 (1889).

3450A.—— ——. *Weight,* 80 oz. Found November 28th, 1877. *Loc.* No. 1 New Zealand Mine, Gympie Goldfield (*ante*). *Ref.* "In the Early Days," by J. J. Knight (1895).

3450B. **Gold in Quartz.** Fullarton R., about 26 miles N.E.byE. of Tip Top Diggings, and about 30 miles W. of Mackinlay, and about 76 miles *viâ* Tip Top or Mackinlay, S.S.E. of Cloncurry. *Co.* Allison; *Dist.* **Burke.** *Ref.* Q.G.M.J., vol. 5, p. 517 (1904).

3451. ——. *Assoc.with* Redruthite, in quartz reef. *Loc.* S. of Lease 61, Dugald R., 45 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 153, p. 8 (1900).

3452. ——. *Assoc.with* Iron Pyrites, Hematite, and Limonite. *Loc.* Gilded Rose Mine, Bishop's Cr., 11 miles E.S.E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Yield:* Gold = 2 oz. per ton. *Ref.* G.S.Q. Pubs. 10, pp. 13-15 (1885), and 104, p. 3 (1895).

3452A.——. *Assoc.with* Silver and Ironstone, in quartz. *Loc.* King Edward VII. Claim, Bishop's Cr. (*ante*). *Ref.* A.R., p. 282 (1910).

3453. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Surprise Leader, E. of Gilded Rose Reef, Bishop's Cr. (*ante*). *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

3454. ——. *Assoc.with* Copper Carbonate and Tetrahedrite. *Loc.* Flying Dutchman, Pumpkin Gully, 12 miles E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

3455. ——. *Assoc.with* Native Copper, Cuprite, Malachite, and Azurite. *Loc.* Homeward Bound M.C. 331, Pumpkin Gully (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 4 (1885), and 215, pp. 233, 234 (1908).

3456. ——. *Assoc.with* Hematite, Calcite, Siderite, in quartz. *Loc.* Uncle Tom Reef, between Fisher's Cr. and Pumpkin Gully (*ante*). *Ref.* P.R.S.Q., vol. 4, pp. 40, 73 (1887).

3457. ——. *Assoc.with* Copper Pyrites, Siderite, and Tourmaline, in quartz and calcite. *Loc.* S. of Fisher's Cr., Pumpkin Gully (*ante*). *Ref.* G.S.Q. Pub. 104, p. 4 (1895).

3458. ——. *Assoc.with* Ironstone, in quartz reef. *Loc.* Bertha P.C., Bower Bird Goldfield, 70 miles N.W. of Cloncurry. *Co.* Brahe or Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

3459. ——. In quartz leaders, in clay slate. *Loc.* Gertrude Mine, Douglas Cr., 4 miles from Sunday Gully, **Bower Bird Goldfield** (*ante*). *Ref.* G.S.Q. Pubs. 104, p. 3 (1895), 125, p. 2 (1897).

3460. ——. *Assoc.with* Ironstone, in quartz reef. *Loc.* Lily of the Valley P.C., Bower Bird Goldfield (*ante*). *Ref.* G.S.Q. Pub. 104, p. 2 (1895), and G.S.M.

3461. ——. *Assoc.with* Malachite, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Victoria P.C., Victoria Reef, Bower Bird Goldfield (*ante*). *Ref.* G.S.Q. Pub. 104, p. 2 (1895), and G.S.M.

3462. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Copper Carbonate, in quartz reef. *Loc.* Victoria 1 N. Claim, Bower Bird Goldfield (*ante*). *Ref.* G.S.Q. Pub. 104, p. 2 (1895).

3463. ——. In quartz. Catherine Reef, 8-Mile, **Agate Downs Goldfield,** 51 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.M.

3464. ——. In ironstone. Critchner's Mine, nr. Fine Gold Cr., Agate Downs Goldfield (*ante*). *Ref.* G.S.M.

3465. ——. In ferruginous quartz. Gibson's Claim, Tip Top Camp, Agate Downs Goldfield (*ante*). *Ref.* G.S.M.

3466. ——. In quartz. Kaufman's Reef, Fine Gold Cr., Agate Downs Goldfield (*ante*). *Ref.* G.S.M.

3467. —— (wire). *Assoc.with* Chrysocolla and Lievrite, in clayey talcose matrix, and in veins in slate. *Loc.* Nr. Maggie's Cr., Tip Top Camp, Agate Downs Goldfield (*ante*). *Ref.* G.S.Q. Pub. 104, p. 6 (1895), and G.S.M.

3468. ——. *Assoc.with* Iron Pyrites and Ironstone, in quartz and calcite. *Loc.* Last Call Reef, Martin's Cr., 12 miles S.E. of Top Camp, 25 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 5 (1895), and G.S.M.

3469. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, Limonite, Calcite, Actinolite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group, 1½ mile N.N.W. of Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

3469A.——. *Assoc.with* Native Copper, Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. pp. 219-224 (1908).

3470. —— (traces). *Assoc.with* Silver (traces), Redruthite, Malachite, Turgite, and Siderite, in chloritic schist and quartz. *Loc.* Noontide M.L. (239), (Pioneer Chief Group), W. of Cone Cr., ½-mile N. of Duck Cr., 27 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 129-131 (1908).

3471. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Azurite, Malachite, and Limonite, in chloritic schist. *Loc.* Pioneer Copper Lease (229), (Diagonal Group), S. of Duck Cr., 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 132-135 (1908).

3472. ——. *Assoc.with* Limonite, in quartz and calcite. *Loc.* Rose and Thistle Reef, Weatherley Cr., nr. Soldier's Cap, 24 miles SE.byS. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 104, p. 4 (1895).

3473. ——. *Assoc.with* Ironstone and Chalcedony, in quartz. *Loc.* Saracinesca Reef, between Rose and Thistle Reef and Soldier's Cap, 24 miles S.E.byS. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 104, p. 4 (1895).

3473A.——. *Assoc.with* Ironstone, in quartz. *Loc.* Black Fort Mt., nr. Top Camp, 24 miles S.byW. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* A.R., p. 268 (1910).

3474. ——. *Assoc.with* Calcite, in quartz. *Loc.* Weatherley's Reef, Weatherley Cr., nr. Soldier's Cap Diggings, 24 miles S.E.byS. of Cloncurry. *Co.* Selwyn (*ante*). *Yield:* Gold = 2 oz. per ton. *Ref.* G.S.Q. Pub. 10, p. 15 (1885).

3474A.——. *Assoc.with* Malachite, Tile Ore, and Limonite, in lode. *Loc.* Soldier's Cap Diggings (*ante*). *Ref.* A.R., p. 278 (1910).

3475. ——. *Assoc.with* Bismuth, in quartz leader. *Loc.* Two-mile Cr. Diggings, Blackfellow's Gully, 23 miles S.byW. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 104, p. 5 (1895).

3476. ——. In serpentinous quartz. May Day Reef, Belmore Cr., 2 miles N.E. of Croydon Rail. Stn., **Croydon Goldfield.** *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.M.

3477. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Blue Jacket Reef, Carron, 15 to 16 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 43 (1896).

3478. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Gilded Rose P.C. Lease (387), and No. 1 E. Mine, Carron (*ante*). *Ref.* G.S.Q. Pub. 118, p. 43 (1896).

3479. ——. *Assoc.with* Galena, in quartz. *Loc.* Jumbo Reef, Carron (*ante*). *Ref.* G.S.Q. Pub. 118, p. 44 (1896).

3480. ——. In quartz. Vanderbilt Reef, Carron (*ante*). *Ref.* G.S.Q. Pub. 118, p. 43 (1896).

3481. ——. *Assoc.with* Iron Pyrites and Galena, in quartz reef. *Loc.* Sarnia Gem Reef, Carron (*ante*). *Ref.* G.S.M.

3482. ——. In quartz. Bennion's Reef, Croydon Township, 94 miles (by rail) S.E. of Normanton, Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 211, pp. 12-14 (1907).

3483. ——. *Assoc.with* Silver, in graphitic quartz reef. *Loc.* Black Snake P.C., 1 mile E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 37 (1897).

3484. ——. *Assoc.with* Iron Pyrites, Graphite, and Felspar, in quartz. *Loc.* Caledonia Reef, 1 mile S.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, pp. 8, 9 (1887).

3485. ——. *Assoc.with* Iron Pyrites, Ironstone, and Graphite (impure), in quartz. *Loc.* Come-at-Last Reef, W. of Iguana, about 30 chains N.W. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

3486. ——. In quartz. Contents Reef, 3 miles N.W. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 13 (1896).

3487. ——. In quartz. The "Spare Ground," Iguana Hill, about 30 chains N.W. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 20 (1896).

3488. Gold. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Iguana Reef, Iguana Hill (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 8 (1887), and 118, p. 18 (1896).

3488A.——. *Assoc.with* Ironstone and Graphite (impure), in quartz. *Loc.* Norah Reef, ¼-mile N. of Iguana Hill, Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

3489. ——. *Assoc.with* Galena, Iron Pyrites, and Zinc Blende, in quartz. *Loc.* La Reine D'or Mine, Queen of Croydon Reef, 1 mile N. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 16 (1896), and G.S.M.

3490. ——. In quartz. Lady Mary Reef, about ½-mile E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 21 (1896), and G.S.M.

3491. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Ophir Block, Iguana Reef, 30 chains N.W. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 19 (1896),

3492. ——. *Assoc.with* Iron Pyrites, Limonite, and Zinc Blende, in quartz. *Loc.* Post Hole Reef, about 28 chains N.E.byE. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 8 (1887), and 118, p. 21 (1896).

3493. ——. *Assoc.with* Limonite, in quartz. *Loc.* Queen of Croydon Reef, 1 mile N. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

3493A.——. *Assoc.with* Native Silver and Limonite, in quartz. *Loc.* Miners' Right Lease, Queen of Croydon Reef, about 1 mile E.byS. of Croydon Rail. Stn., Croydon Goldfield (*ante*).

3494. ——. *Assoc.with* Ironstone, Chlorite, and Graphite, in quartz. *Loc.* Sir Walter Reef, ½-mile E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

3494A.——.*Assoc.with* Iron Pyrites and Hematite, in quartz. *Loc.* Sovereign 1 Mine, Post Hole Reef, ¾-mile N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

3495. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Sovereign Reef, about 28 chains N.E.byE. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 8 (1887), and 118, p. 21 (1896).

3496. ——. *Assoc.with* Graphite, in quartz. *Loc.* St. Patrick Block Lease, about 35 chains N.E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 20 (1896).

3497. ——. *Assoc.with* Silver, Iron Pyrites, and Galena, in quartz. *Loc.* Waratah Lease (570), Queen of Croydon Reef, 1¾ mile E.byS. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Assay: See* No. 7426. *Ref.* G.S.Q. Pub. 118, p. 17 (1896), and G.S.M.

3498. ——. *Assoc.with* Iron Pyrites, Hematite, Galena, and Graphite, in quartz. *Loc.* King of Croydon Reef, 5½ miles S.E.byE. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 7 (1887), and 118, p. 25 (1896).

3499. ——. In porphyry. Pack Saddle Reef, 1½ mile S. of Croydon King, 6 miles S.E.byE. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 118, p. 25 (1896).

3500. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Richmond Reef, 1½ mile E.N.E. of Croydon King, about 6 miles E.S.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 26 (1896).

3500A.——. In quartz. Morning Light Reef, 7 miles E.S.E of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 26 (1896).

3501. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* C. D. Roe Reef, nr. Flanagan's, about 12 miles E.byS. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 47 (1896).

3502. ——. *Assoc.with* Galena and Iron Pyrites, in ferruginous quartz. *Loc.* Duchess Reef, nr. Flannagan's (*ante*). *Ref.* G.S.Q. Pub. 35, p. 11 (1887).

3503. ——. *Assoc.with* Iron Pyrites, Minium, Hematite, and Limonite, in quartz. *Loc.* Eureka Reef, nr. Flanagan's (*ante*). *Ref.* G.S.Q. Pub. 35, p. 11 (1887), and 118, p. 47 (1896).

3504. ——. In quartz. Wanderer, Parnell, Kings of the Springs and Democrat Reefs, Flanagan's (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 47, 48 (1896).

3505. ——. In quartz. Ryan's 12 S. Mine (Banner of Freedom Reef), Golden Gate, 90 miles (by rail) E.S.E. of Normanton (Croydon line), and 4 miles N.W. of Croydon. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 202, p. 34 (1903).

3506. ——. In quartz and graphitic formation. Banner Block United 14 S. (Murray's), and Banner 18 S. Mines (Golden Gate Reef), Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 34, 35 (1905).

3507. ——. In quartz. Golden Gate Consols, 1 and 2 S. Lease (967), 3 and 4 S., 4 and 5 S. Block ("98"), 5 S., 5 and 6 N., 7 N., and Douglas Block Shaft, 9 N., 10 N., and 10 and 11 W., Golden Gate, Ltd. (Roger's No. 1), Golden Gate United Mines (Golden Gate Reef), Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 17-25 (1905).

3508. ——. In quartz. Golden Gate 7 S., 8 S. (Baltic), 8 S. Block, 9 S. and 9 S. Block, and 10 and 11 S. Block, Golden Gate and Nancy Lee United (Viles's), and Golden Gate and Nancy Lee Consols Mines (Golden Gate and Nancy Lee Reefs), Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 26-30 (1905).

3509. ——. In quartz. Morgan's Block Shaft (Golden Gate Reef), Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, p. 26 (1905).

3510. ——. In quartz. "Butcher Boy" Leader, in Golden Gate 10 and 11 S. Block Mines, and in Plant's Shaft, G.G. Gold Mines, G.G. Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 32, 33 (1905).

3511. ——. In quartz. "Magpie" Leader, in G.G. 11 and 12 S. Mines, G.G. Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 32, 33 (1905).

3512. ——. *Assoc.with* Iron Pyrites, Galena, Fluorspar, Calcite, and Argentine, in quartz. *Loc.* Plant's Shaft, G.G. Gold Mines, G.G. Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 30-32 (1905).

3513. ——. *Assoc.with* Graphite and Calcite, in granite. *Loc.* Plant's Shaft, G.G. Gold Mines, G.G. and Nancy Lee Reefs, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, pp. 26-30 (1905).

3514. ——. *Assoc.with* Limonite. *Loc.* Banner of Freedom Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 35, p. 9 (1887), and 202, p. 34 (1905).

3515. ——. *Assoc.with* Iron Pyrites, Galena, Zinc Blende, and Calcite. *Loc.* Golden Gate Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 202, p. 15 (1905).

3516. ——. *Assoc.with* Native Silver, Galena, Iron Pyrites, Zinc Blende, Mispickel, Fluorspar, Calcite, and Siderite. *Loc.* In the mines along the Golden Gate Line of Reef and branch reefs, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 118 (1896).

3517. ——. *Assoc.with* Magnetite and Chlorite, in quartz. *Loc.* Iron Duke Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 35, p. 9 (1887).

3518. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Iron Duke nad Nancy Lee Reefs, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 118, p. 12 (1896).

3519. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Nancy Lee Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 9 (1887), and 202, p. 26 (1905).

3520. ——. *Assoc.with* Iron Pyrites and Galena, in quartz reef. *Loc.* Australian Beauty Reef, Golden Valley, 12 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, pp. 40, 41 (1896), and G.S.M.

3521. ——. *Assoc.with* Iron Pyrites, Ironstone, and Galena, in quartz. *Loc.* King of Wallebadah Lease (410), Golden Valley (*ante*). *Ref.* G.S.Q. Pub. 118, p. 42 (1896), and G.S.M.

3522. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Lady Isabella Reef, Golden Valley (*ante*). *Ref.* G.S.M.

3523. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Belfast, Bell Bird, Carpentaria, Defiance, Don Juan, Grace Leigh, Hercules, Monkland, Perseverance, Queen of the Valley, Try It, Vasca de Gama, and Venture Reefs, Golden Valley (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 39-42 (1896).

3524. ——. In quartz. Highland Mary Reef, including Caledonia, Glengarry, Sir Garnet, and Archer Reefs, 1 mile S.E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, pp. 21-23 (1896).

3525. ——. *Assoc.with* Ironstone and Manganese dioxide, in quartz. *Loc.* Homeward Bound Reef, 4½ miles N.E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 10 (1887), and 118, p. 29 (1896).

3526. ——. In felsite and quartz. Pride of the Hills Reef, Homeward Bound Mg. Centre (*ante*). *Ref.* G.S.Q. Pub. 35, p. 10 (1887).

3527. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* St. Patrick Reef, 35 chains N.N.E. of Croydon, Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 10 (1887).

3528. ——. *Assoc.with* Zinc Blende, in quartz. *Loc.* Waterfall Reef, Homeward Bound Mg. Centre (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 10 (1887), and 118, p. 30 (1896).

3529. ——. *Assoc.with* Iron Pyrites, Galena, and Pyromorphite, in quartz. *Loc.* Billy Brown Reef, Mark Twain Centre, 5 miles E.N.E of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 46 (1896).

3530. Gold. *Assoc.with* Zinc Blende, in Quartz. *Loc.* Ironclad Reef, Mark Twain Centre (*ante*). *Ref.* G.S.Q. Pub. 118, p. 46 (1896), and G.S.M.

3531. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Mark Twain Reef, Mark Twain Centre (*ante*). *Ref.* G.S.Q. Pub. 118, p. 45 (1896).

3532. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* City of London Reef, on Moonlight Cr., 8 miles S.E.byE. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 26 (1896), and G.S.M.

3533. ——. In quartz. Moonstone Reef, Moonlight Cr., about 9 miles S.E.byE. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 26 (1896), and G.S.M.

3534. ——. *Assoc.with* Graphite in quartz. *Loc.* Elsie's Reef, Mt. Angus, 2 miles W. of Croydon; Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 24 (1896).

3535. ——. In quartz. Babe Reef, Mountain Maid Centre, 2¾ miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 28 (1896).

3536. ——. *Assoc.with* Chalcotrichite, Redruthite, Cerussite, Iron Pyrites, and Galena, in quartz. *Loc.* Mountain Maid Reef, Mountain Maid Centre (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 10 (1887), and 118, p. 28 (1896), and B.D.

3537. ——. In ironstone and quartz. Alabama Reef, Cork-tree Cr., 5 miles E.N.E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 35, p. 10 (1887).

3538. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Mulligan's P.A., Cork-tree Cr. (*ante*). *Ref.* G.S.Q. Pub. 35, p. 10 (1887).

3539. ——. In quartz. Macarthur's Reef, Mulligan's Camp, 7 miles N.E.byE. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 44 (1896).

3540. ——. *Assoc.with* Galena, Anglesite, Massicot, and Ironstone, in quartz. *Loc.* Ace of Hearts Reef, Tabletop, 9 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 35 (1896).

3541. ——. *Assoc.with* Ironstone and Massicot. *Loc.* Comet Reef, Table Top (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

3542. ——. *Assoc.with* Cerussite, Pyromorphite, and Ironstone, in quartz. *Loc.* Federation Reef, Table Top (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

3543. ——. *Assoc.with* Iron Pyrites and Mispickel. *Loc.* Happy Jack Reef, Table Top (*ante*). *Ref.* G.S.Q. Pub. 118, p. 35 (1896).

3544. ——. *Assoc.with* Anglesite, Pyromorphite, and Massicot, in quartz. *Loc.* Hope Reef, Table Top (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

3545. ——. *Assoc.with* Massicot, in quartz. *Loc.* Independence and Glencoe Reefs, Table Top (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 37, 38 (1896), and G.S.M.

3546. ——. *Assoc.with* Pyromorphite and Massicot, in quartz, in felsite country. *Loc.* Mt. Morgan Reef, Table Top (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 118, p. 35 (1896).

3547. ——. In quartz. Day Dawn, Last Chance, Surprise, Ida, Break o' Day, Black Diamond, Bobby Dazzler, Gt. Eastern, and Confidence Reefs, Table Top (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 34-38 (1896).

3548. ——. *Assoc.with* Iron Pyrites, Massicot, Galena, Cerussite, and Pyromorphite. *Loc.* Reefs at Table Top (*ante*). *Ref.* G.S.Q. Pub. 118, p. 34 (1896).

3549. ——. *Assoc.with* Native Copper, in quartz leaders traversing graphitic granite. *Loc.* Lady Isabelle Reef, True Blue Mg. Centre, 1¾ mile N.W.byN. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, pp. 13, 14 (1896).

3550. ——. *Assoc.with* Iron Pyrites and Galena, in quartz reef. *Loc.* Lady Isabel 2 and 3 S. United Lease (566), True Blue Mg. Centre (*ante*). *Ref.* G.S.Q. Pub. 118, p. 14 (1896), and G.S.M.

3551. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* True Blue Reef, True Blue Mg. Centre (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 13-16 (1896).

3552. ——. In fossiliferous "Desert Sandstone." *Loc.* True Blue Hill, True Blue Mg. Centre (*ante*). *Ref.* G.S.M.

3553. ——. *Assoc.with* Galena and Cerussite. *Loc.* Jenny Lind Reef, Lower Twelve Mile, 2½ miles W. of Twelve Mile, 8 miles N. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 34 (1896).

3554. ——. *Assoc.with* Iron Pyrites and Galena, in quartz, serpentine, and graphite. *Loc.* Oriental and Gem Reefs, Lower Twelve Mile (*ante*). *Ref.* G.S.Q. Pub. 118, p. 33 (1896).

3555. ——. *Assoc.with* Galena, in quartz. *Loc.* Jubilee and President Reefs, Twelve Mile, 6 miles N. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, pp. 31, 32 (1896).

3556. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Rising Sun Reef, Twelve Mile (*ante*). *Ref.* G.S.Q. Pub. 118, p. 33 (1896), and G.S.M.

3557. ——. In quartz. Apex, Lady Lottie, Maybelle, Colleen Bawn, Golden Fleece, Ross-shire, Golden Spur Reefs, Twelve Mile (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 32, 33 (1896).

3558. ——. In quartz. Harp of Erin Reef, 2¼ miles E.byS. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 23 (1896).

3559. ——. *Assoc.with* Marcasite, in quartz reef. *Loc.* Problem Reef, 7 miles E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 46 (1896), and G.S.M.

3560. ——. In quartz. *Loc.* Welcome Reef, Croydon Goldfield (*ante*). *Ref.* G.S.M.

3561. ——. In quartz reef. Sneakaway Gully, Oxley Cr., Flinders R., 25 miles W. byN. of **Upper Cape Diggings,** 42 miles (by rail and road) W.byN. of Charters Towers. *Co.* Wongalee; *Dist.* Burke. *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

3561A. ——. *Assoc.with* Galena, Cerussite, and Massicot, in lode. *Loc.* Boulder Hill, Hill, Broken Hill, and Granite Castle Silver-Lead Lodes, Por. 2, Par. of Cracknell, Upper Flinders R., Mt. Emu Plain Stn., 62 miles N.N.E. of Hughenden, 55 miles N.W.byW. of Pentland Rail. Stn. (Northern line), *Co.* Wongalee (*ante*). *Ref.* (and *Assays*) Q.G.M.J., vol. 11, p. 136 (1910).

3561B. ——. *Assoc.with* Massicot, in quartz lode. *Loc.* Cargoon Holding, 2½ miles from Upper Flinders R., Por. 2, Par. of Cracknell, Diecan Claim, Mt. Emu Plains Stn. (*ante*). *Assay:* Gold = 88 oz.; Silver = 37 oz. per ton. *Ref.* A.R., p. 215 (1910).

3561C. ——. *Assoc.with* Iron Pyrites, in granite. *Loc.* Diecan Claim, Upper Flinders R., Por. 2, Par. of Cracknell, Mt. Emu Plains Stn. (*ante*). *Refs.* (and *Assays*) Q.G.M.J., vol. 11, p. 136 (1910), and A.R., pp. 257 (1910) and 307 (1911).

3562. ——. *Assoc.with* Galena, in quartz reef. *Loc.* Soap Spar Mine, Woolgar Goldfield, 97 miles (by coach) N. of Richmond Rail. Stn. (Gt. Northern line), 404 miles (by rail and road) W.byS. of Townsville. *Co.* Woolgar; *Dist.* Burke. *Ref.* G.S.Q. Pub. 125, p. 39 (1897), and G.S.M.

3563. ——. *Assoc.with* Silver, Galena, and Copper, in lodes. *Loc.* **Woolgar Goldfield** (*ante*). *Ref.* A.R.D.M., p. 42 (1886).

3563A. ——. In quartz. Reefs on the Woolgar Goldfield (*ante*). *Ref.* A.R.D.M., pp. 89-93 (1895).

3564. ——. Containing Silver, in quartz. *Loc.* All Nations Reef, Boolboonda Hill, 12 miles N.E. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 21, p. 13 (1886).

3565. ——. *Assoc.with* Copper Pyrites, in quartz reef in micaceous schist. *Loc.* Boolboonda Copper Lode, Boolboonda Hill (*ante*). *Ref.* G.S.Q. Pub. 21, p. 13 (1886), and G.S.M.

3566. ——. *Assoc.with* Copper Pyrites. *Loc.* New Moonta Mine, Boolboonda Hill (*ante*). *Ref.* G.S.M.

3567. ——. *Assoc.with* Silver, Iron Pyrites, Mispickel, Galena, and Zinc Blende. *Loc.* Allendale Silver Lode, Chowey Cr., 6 miles N.W. of Chowey Rail. Stn., 68 miles (by rail and road) W. of Maryborough. *Co.* Bowen; *Dist.* Burnett. *Assay:* Gold = 1 oz., Silver = 39 oz. per ton. *Ref.* G.S.Q. Pubs. 21, p. 12 (1885), 25, p. 3 (1886), and P.R.S.Q., vol. 4, p. 3 (1887).

3568. ——. *Assoc.with* Iron Pyrites, Lead, Silver, and Magnetite. *Loc.* Hannan's Silver-Lead Lode, Chowey Cr. (*ante*). *Yield:* Lead = 50 per cent.; Silver = 30 oz. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

3569. ——. *Assoc.with* Molybdenite, in quartz reef. *Loc.* Lady Florence Mine, Chowey Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 35 (1897).

3570. ——. *Assoc.with* Ironstone and Manganese-dioxide, in quartz reef and in felsite. *Loc.* Mt. Melville, Chowey Cr. (*ante*). *Assay:* Gold = 16 dwt; and Silver = 6 oz. per ton. *Ref.* G.S.Q. Pub. 25, p. 3 (1886), and G.S.M.

3571. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Mispickel. *Loc.* Mt. Ophir Mine, Mt. Ophir, Chowey Cr. (*ante*). *Ref.* A.R., pp. 52, 158 (1908).

3572. ——. *Assoc.with* Molybdenite, Iron Pyrites, and Ironstone, in quartz. *Loc.* White's Reef, Mt. Ophir, Chowey Cr. (*ante*). *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

3573. Gold. *Assoc.with* Molybdenite and Molybdite, in quartz reefs. *Loc.* Old Chowey Mine, **Chowey Goldfield,** 6 miles N. of Didcot Rail. Stn. (Gayndah line), 74 miles (by rail and road) W. of Maryborough. *Co.* Bowen (Cook ?); *Dist.* Burnett. *Ref.* G.S.Q. Pub. 25, p. 4 (1886), and G.S.M.

3574. ——. *Assoc.with* Silver and Iron Pyrites. *Loc.* **Gaeta Goldfield,** 30 miles N. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. *Assay:* Gold = 7 oz. 2 dwt.; Silver = 1 oz. 16 dwt. per ton. *Ref.* A.R., p. 86 (1907).

3574A. ——. *Assoc.with* Iron Pyrites, in quartz. Pioneer and East Yorkshire Reefs, Gaeta Goldfield (*ante*). *Average Yield:* Gold = 15 to 18 dwt. *Ref.* Q.G.M.J., vol. 4, p. 298 (1903).

3575. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Mispickel, in felsite. *Loc.* Achillea Mine, Yarrabil Cr., **Gebangle Goldfield,** 12 miles N.W. of Degilbo Rail. Stn (Gayndah line), 70 miles (by rail and road) W. of Maryborough. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 60, p. 5 (1890), and G.S.M.

3576. ——. *Assoc.with* Iron Pyrites and Mispickel, in decomposed porphyry. *Loc.* Gebangle P. Claim, Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

3576A. ——. In quartz. Homeward Bound Reef, Yarrabil Cr., Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

3577. ——. *Assoc.with* Iron Pyrites and Copper carbonate, in quartz reef. *Loc.* Lady Francis Mine, Yarrabil Cr., Gebangle Goldfield (*ante*). *Yield:* Gold = 2 oz. per ton. *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

3578. ——. *Assoc.with* Iron Pyrites, in volcanic agglomerate and breccia. *Loc.* Lord Nelson Mine, Yarrabil Cr., Gebangle Goldfield (*ante*) *Ref.* G.S.Q. Pub. 60, p. 5 (1890), and G.S.M.

3579. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Mt. Allen Mine, Gebangle Goldfield (*ante*). *Average Assays:* Gold = 2 oz. 14 dwt. 11 gr.; Silver = 2 oz. 2 dwt. per ton. *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

3580. ——. *Assoc.with* Ironstone, in bluish sandstone. *Loc.* Pride of Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

3581. ——. *Assoc.with* Iron Pyrites and Copper carbonate, in quartz leader. *Loc.* Victoria Mine, Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

3582. ——. *Assoc.with* Iron Pyrites, Magnetite, and Hornblende, in quartz reef. *Loc.* Great Freehold Mine, Rocky Cr., Mt. Drain Diggings, nr. Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.M. and Q.M.

3583. ——. *Assoc.with* Silver and Copper carbonate. *Loc.* Harper's Hill, Mt. Drain Diggings (*ante*). *Ref.* G.S.Q. Pub. 125, p. 27 (1897).

3584. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in lode. *Loc.* Canterbury Copper Mine, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and G.S.M.

3585. ——. *Assoc.with* Copper Pyrites, Cuprite, Chalcotrichite, Tile Ore, Iron Pyrites, Zinc Blende, and Calcite, in lode. *Loc.* Mt. Perry Copper Mine, Mt. Perry (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and G.S.M.

3586. ——. *Assoc.with* Silver and Mispickel, in quartz. *Loc.* 3 miles S. of Mt. Perry, on Eidsvold Road. *Co.* Bowen; *Dist.* Burnett. *Ref.* A.R., p. 158 (1908).

3587. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Molangul Reef, about 5 miles S.S.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* G.S.M.

3588. ——. *Assoc.with* Iron Pyrites and Magnetite, in quartz reef. *Loc.* Mt. Webster, nr. Mt. Perry. *Co.* Bowen (*ante*). *Ref.* G.S.M.

3589. ——. *Assoc.with* Iron Pyrites and Molybdenite, in quartz reef. *Loc.* P. Areas, Perry Scrub, St. Agnes Cr., Perry R., 15 miles S of Gin Gin Rail. Stn. (Bundaberg-Mt. Perry line), 44 miles (by rail and road) S.W. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 184 (1903).

3590. ——. In quartz reef. Bennett's Mine, **Reid's Creek Goldfield,** 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* G.S.M.

3591. ——. *Assoc.with* Mispickel, Iron Pyrites, Galena, Stibnite, and Zinc Blende, in quartz and felspar lodes. *Loc.* Reid Cr. Reefs, Reid Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885), A.R.D.M., p. 34 (1894).

3592. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz and calcite reef *Loc.* Caledonia Reef, Reid's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 21, p. 11 (1885), 125, p. 28 (1897).

3593. ——. *Assoc.with* Iron Pyrites, Mispickel, Galena, and Zinc Blende, in quartz. *Loc.* California Reef, Reid's Creek Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885), and G.S.M.

3594. ——. *Assoc.with* Iron Pyrites, Mispickel, Galena, and Stibnite. *Loc.* Lady Norman and Reid's Cr. Mines, Reid's Cr. Goldfield (*ante*). *Ref.* A.R.D.M., p. 34 (1894).

3595. ——. *Assoc.with* Copper Pyrites and Molybdenite, in small quartz lodes in granite country. *Loc.* Globe Copper Mine, Wolca, 6 miles N. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. *Assay: See* No. 2130. *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and B.D.

3596. ——. *Assoc.with* Copper Pyrites and Oxidised Copper Ores. *Loc.* Wonbah Hill, 12 miles N.byW. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* G.S.M. and A.R., p. 303 (1911).

3596A.——. *Assoc.with* Copper Pyrites, Malachite, and Limonite, in lode. *Loc.* nr. Wonbah Hill Mine, 2 miles from Wonbah Siding (Mt. Perry line), 60 miles (by rail and road) S.W.byW. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* A.R., p. 264 (1910).

3597. ——. *Assoc.with* Iron Pyrites, Hematite, Magnetite, Mispickel, Native Bismuth, Bismite, Bismuthinite, Bismutite, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, Chalcedony, and Epidote, in veins of calcite, slate, and hornblende. *Loc.* Biggenden Gold and Bismuth Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Yields:* Gold = 1 to 4 oz. per ton; Bismuth = 10 per cent. *Ref.* G.S.Q. Pubs. 60, p. 2 (1890), 125, p. 23 (1897), and 173, pp. 1-5 (1902).

3598. ——. *Assoc.with* Iron Pyrites and Magnetite, in quartz and calcite. *Loc.* Mt. Hastings, Biggenden Cr., 2 miles S.E. of Mt. Biggenden, 5 miles S.byW. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

3599. ——. *Assoc.with* Silver, Iron Pyrites, Mispickel, Pyrrhotite, Copper Pyrites, Cuprite, Malachite, Tenorite, Bismuthinite, Zinc Blende, Hematite, and Calcite, in quartz lode. *Loc.* Commonwealth Mine, Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 185, p. 6 (1903), and 207, pp. 14-19 (1907).

3600. ——. *Assoc.with* Silver, Iron Pyrites, Native Bismuth, Bismuthinite, Copper Pyrites, Mispickel, Magnetite, and Ironstone, in lode. *Loc.* Don Jon Bismuth Mine, ¼-mile S. of Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Assay:* Gold = 2 dwt.; Silver = 2 oz. per ton; Bismuth = 4½ per cent. *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), and 207, pp. 13, 14 (1907.

3601. ——. *Assoc.with* Bismuth. *Loc.* Don Jon Bismuth Mine (*ante*). *Assay:* Bismuth = 12·4 per cent.; Gold = 12 dwt. 19 gr. per ton. *Ref.* A.R., p. 62 (1906.

3602. ——. *Assoc.with* Bismuth. *Loc.* Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Assay:* Bismuth = 12·3 per cent.; Gold = 8 dwt. 9 gr. per ton. *Ref.* A.R., p. 60 (1906).

3603. ——. *Assoc.with* Iron Pyrites, Mispickel, Bismuthinite, and Bismutite, in brecciated formation. *Loc.* Kent's Knob Mine, ¼-mile N. of Mt. Shamrock, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 25, p. 2 (1886), and B.D.

3604. —— (wire). *Assoc.with* Tetradymite, in calcite. *Loc.* Mt. Shamrock Gold Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* B.D.

3605. ——. *Assoc.with* Bismite and Earthy Hematite. Mt. Shamrock Mine (*ante*). *Assay:* Gold = 252 oz. per ton; Bismuth = 62 per cent. *Ref.* G.S.Q. Pub. 25, p. 1 (1886), P.R.S.Q., vol. 4, p. 39 (1887), and G.S.M.

3606. ——. *Assoc.with* Telluride of Gold, Copper Pyrites, Malachite, Native Bismuth, Bismuthinite, Joseite, Molybdenite, Zinc Blende, Mispickel, and Calcite, in volcanic tuff, syenite, trachyte, and breccia. *Loc.* Mt. Shamrock Mine (*ante*). *Ref.* G.S.Q. Pubs. 60, p. 6 (1890), 168 (1901).

3606A.——. *Assoc.with* Molybdenite and Molybdite, in quartz reef. *Loc.* Venus Mine, Mt. Steadman, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.M.

3607. ——. *Assoc.with* Molybdenite, in quartz reef. *Loc.* Mt. Steadman (*ante*). *Ref.* G.S.M.

3608. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Berrie-Paterson, **Paradise Goldfield,** 2 miles below Yarrabil Cr., 8 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 68, p. 1 (1891).

3609. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Bushnell's Advance P.A., Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3610. Gold. In quartz reef. Gt. Eastern Mine, Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 2 (1891).

3611. ——. In quartz reef. Horse Shoe Bend Mine, Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 2 (1891).

3612. ——. In quartz reef. Lady Jane P.A., Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3613. ——. In quartz reef. Lady Margaret Mine, Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3614. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Leishman's William Tell Mine, Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3615. ——. *Assoc.with* Ironstone, in quartz reef. *Loc.* Neill's Paradise Mine, Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3616. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Nil Desperandum P.A., Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3617. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Norris's Mine, Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 2 (1891).

3618. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* P.A. (261), Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3619. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz reef. *Loc.* Paradise P.C., Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 1 (1891).

3620. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Philadelphia Mine, Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

3621. ——. *Assoc.with* Ankerite, in lode. *Loc.* Girl-I-Left-Behind-Me Mine, Stony Cr., **Stanton-Harcourt Diggings,** 11 miles N. of Degilbo Rail. Stn., 69 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 168, p. 2 (1901).

3622. ——. *Assoc.with* Silver, Iron Pyrites, Galena, Zinc Blende, and Calcite, in quartz reef. *Loc.* Stanton Harcourt Diggings (*ante*). *Ref.* G.S.Q. Pubs. 25, p. 4 (1887), and 168, p. 2 (1901).

3623. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Young Australia Gold Mine, 53v, Woowoonga, 5 miles (by road) N.W. of Biggenden Rail. Stn., 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 185, pp. 3, 4 (1903).

3624. ——. *Assoc.with* Mercury, in quartz reef. *Loc.* Duffer Diggings, Gobango Cr., 16 miles S.E.byS. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 28, p. 4 (1886).

3624A. ——. In quartz. Golden Pile Shaft, **Nanango Goldfield,** 135 miles (by rail) S.S.W. of Maryborough. *Co.* Fitzroy (*ante*). *Ref.* G.S.Q. Pub. 169, p. 14 (1901).

3624B. ——. In quartz. Hooper's Luck Shaft, Nanango Goldfield (*ante*). *Ref.* L.Bs. 6, p. 788 (1900), 7, p. 48 (1901), and G.S.Q. Pub. 169, pp. 13, 14 (1901).

3624C. ——. In quartz. Golden Pile Shaft, Nanango Goldfield, 135 miles (by rail) *Ref.* L.Bs. 6, p. 788 (1900), 7, p. 48 (1901), and G.S.Q. Pub. 169, pp. 13, 14 (1901).

3625. ——. *Assoc.with* Calcite, in quartz. *Loc.* Black Watch Reef, Scrub Paddock Diggings, 13 miles N.E. of Nanango, 30 miles S. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 29 p. 3 (1886).

3625A. ——. *Assoc.with* Iron Pyrites and Hematite, in quartz reef. *Loc.* ½-mile E. 30° N. of Black Watch Reef, Scrub Paddock Diggings (*ante*). *Ref.* G.S.Q. Pub. 29, p. 4 (1886).

3626. ——. *Assoc.with* Copper and Iron Pyrites, in quartz. *Loc.* Wild Horse Reef, Scrub Paddock Diggings (*ante*). *Ref.* G.S.Q. Pub. 29, p. 3 (1886).

3627. ——. *Assoc.with* Malachite, in decomposed felspar porphyry. *Loc.* Branches of Sandy Cr., trib. of Baramba Cr., Ban Ban, 16 miles S.E. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Assay:* 1 oz. 6 dwt. per ton. *Ref.* P.R.S.Q., vol. 4, pp. 38, 70 (1887).

3628. —— containing Silver, in lode *Loc.* nr. Bin Bin Range, 2 miles S. of Mt. Shamrock [*sic.*], 12 miles S.E. of Gayndah Rail. Stn. *Co.* Mackenzie (*ante*). *Assays:* (1) Gold = 7 dwt. and 2 oz. 5 dwt. 17 gr.; Silver = 30 oz. and 204 oz. per ton. (2) Gold = 10 dwt. 21 gr.; Silver = 40 oz. 5 dwt. 12 gr. per ton. *Ref.* G.S.Q. Pub. 60, p. 6 (1890).

3628A. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, Zinc Blende, and Calcite, in ironstone lode. *Loc.* Ban Ban Station, 12 miles S.E.byE. of Gayndah Rail. Stn. *Co.* Mackenzie (*ante*). *Ref.* A.R., p. 179 (1909).

3629. ——. *Assoc.with* Silver, in quartz. *Loc.* British Empire Mine, between Murderer's and Bennett's Gullies, 14 miles W.byS. of Gayndah Rail. Stn. *Co.* Mackenzie (*ante*). *Ref.* A.R., p. 120 (1907).

3630. ——. *Assoc.with* Silver, Iron Pyrites, and Mispickel, in quartz. *Loc.* Auburn Falls Gold Mine, Cadarga Cr., Auburn R., 32 miles W. of Gayndah Rail. Stn. *Co.* Newcastle; *Dist.* Burnett. *Ref.* Q.G.M.J., vol. 5, pp. 162, 163 (1904), and G.S.Q. Pub. 207, p. 11 (1907).

3630A. ——. *Assoc.with* Iron Pyrites, Mispickel, Limonite, and Manganese-dioxide, in quartz. *Loc.* Cadarga Cr. Gold Mines, between Cadarga Cr. and Auburn R., 33 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle (*ante*). *Ref.* Q.G.M.J., vol. 5, pp. 162, 163 (1904), and G.S.Q. Pub. 207, p. 11 (1907).

3631. ——. *Assoc.with* Kaolin, in quartz reef. *Loc.* Dykehead Gold Mine, Deloura Cr., Auburn R., 11 miles from Dykehead Stn., 35 miles W.byS. of Gayndah Rail. Stn. *Co.* Newcastle (*ante*). *Ref.* G.S.Q. Pub. 207, p. 12 (1907).

3632. ——. *Assoc.with* Malachite, Chrysocolla, and Jasper, in quartz. *Loc.* F. Achilles Mine, Brovinia Goldfield, nr. Hawkwood, 50 miles S.W. of Gayndah Rail. Stn. *Co.* Newcastle (*ante*). *Assay:* Gold = 34 oz., Silver 13½ oz. per ton. *Ref.* G.S.Q. Pub. 114, p. 3 (1896), and G.S.M.

3633. ——. In quartz and calcite. *Loc.* May Queen Reef, **Brovinia Goldfield** (*ante*). *Ref.* G.S.Q. Pub. 114, p. 3 (1896).

3634. ——. In ferruginous quartz. Owen Macdonnell's Reef, Brovinia Goldfield (*ante*). *Ref.* G.S.Q. Pub. 114, p. 3 (1896).

3635. ——. In quartz. Burnett Squatter Reef, **St. John's Creek Goldfield,** 16 miles S.W. of Eidsvold. *Co.* Wicklow; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 207; p. 13 (1907).

3636. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* All Nations P.C. (All Nations Reef), **Eidsvold Goldfield,** 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 43, p. 4 (1889).

3637. ——. *Assoc.with* Iron Pyrites, Mispickel, and Galena, in quartz reef. *Loc.* Cosmopolitan Lease (42), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 102, p. 3 (1895).

3638. ——. In quartz. Craven Extd G.M.L. (93), Craven Reef, Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 160, p. 5 (1901), and G.S.M.

3638A. ——. In quartz. Golden Crown P.C. (Golden Crown Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 160, p. 12 (1901).

3639. ——. *Assoc.with* Limonite, in quartz reef. *Loc.* Golden Spur P.A., Golden Spur Reef (2), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 3 (1884).

3640. ——. In quartz. Lady Alma Reef, Eidsvold Goldfield (*ante*). *Ref.* G.S.M.

3641. ——. *Assoc.with* Cuprite, Hematite, and Stibnite, in quartz reef. *Loc.* Lady Augusta Lease (45), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 102, p. 4 (1895), and 160, pp. 6-11 (1901).

3642. ——. In quartz reef. Lady Minerva G.M.L. (68), Maid of Erin Reef, Eidsvold Goldfield. *Ref.* G.S.Q. Pubs. 102, p. 3 (1895), 160, p. 13 (1901).

3643. ——. *Assoc.with* Malachite, in quartz. *Loc.* Lady Rose Lease, Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 160, p. 12 (1901).

3644. ——. *Assoc.with* Copper carbonate and Bismite, in quartz reef. *Loc.* Maid of Erin Claim (Tunnel Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 43, p. 3 (1887), and 125, p. 37 (1897).

3645. ——. *Assoc.with* Molybdenite, in quartz. *Loc.* Moonlight Reef, Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 5 (1887).

3646. ——In quartz reef. Mountain Maid Mine, Eidsvold Goldfield (*ante*). *Ref.* G.S.M.

3647. ——. *Assoc.with* Iron Pyrites, Mispickel, and Zinc Blende, in quartz reef. *Loc.* Mt. Rose P.C. (Mt. Rose Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.M.

3648. ——. *Assoc.with* Iron Pyrites and Zinc Blende, in quartz and calcite. *Loc.* Mt. Rose 1 West Lease (41), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 102, p. 2 (1895).

3649. ——. In quartz. Mt. Rose 2 W., 3 W., and 1 E. Mines (Mt. Rose Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, pp. 2, 3 (1887).

3650. ——. *Assoc.with* Iron Pyrites, Ironstone, and Galena, in quartz reef. *Loc.* Mt. Rose United Mine (Mt Rose Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 2 (1887).

3651. ——. In quartz. Mt. Rose and Stockman Junction Lease (25), Mt. Rose Reef, Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 102, p. 2 (1895).

3652. Gold. In flat quartz reefs, in granitic formation. *Loc.* New Heights of Alma Lease (30), Maid of Erin and Mt. Rose Reefs, Eidsvold Goldfield (*ante*). *Yield:* Gold = 1 oz. 5 dwt. to 6 oz. per ton. *Ref.* G.S.Q. Pubs. 102, p. 3 (1895), and 160, p. 11 (1901).

3653. ——. In quartz. Stockman Amalgamated Mines (Stockman Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, pp. 4, 5 (1887).

3654. ——. *Assoc.with* Stibnite. *Loc.* Reef, S. of Stockman Mine, Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 4 (1887).

3655. ——. *Assoc.with* Iron Pyrites, Redruthite, Anglesite, and Zinc Blende, in quartz reef. *Loc.* United Victory Lease (33), Maid of Erin Reef, Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 103, p. 3 (1895).

3656. ——. *Assoc.with* Mispickel and Galena, in quartz reef. *Loc.* East side of Burnett R., Eidsvold Goldfield. *Ref.* G.S.Q. Pub. 43, p. 5 (1887).

3657. ——. *Assoc.with* Silver, Iron Pyrites, and Limonite, in quartz. *Loc.* Apple-tree Lease, Cabbage-tree Cr., Mt. Cannindah, 40 miles S.W. of Miriam Vale Rail. Stn. (North Coast line), 83 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Assay:* Gold = 1 oz. 4 dwt. 19 gr., Silver = 24 oz. 6 dwt. 2 gr. per ton. *Ref.* G.S.Q. Pubs. 113, p. 9 (1896), and 143, p. 4 (1899).

3658. ——. *Assoc.with* Silver, in quartz reef. *Loc.* Little Wonder Mine, Mt. Cannindah (*ante*). *Assays:* (1) Gold = 13 dwt. 17 gr., Silver = 12 dwt. 20 gr. per ton. (2) Gold = 1 oz. per ton. *Ref.* G.S.Q. Pub. 113, p. 9 (1896).

3659. ——. *Assoc.with* Silver, Native Copper, Cuprite, Tenorite, Azurite, and Malachite, in lode. *Loc.* Mt. Cannindah Mine, Mt. Cannindah (*ante*). *Ref.* (and *Assays*) G.S.Q. Pubs. 105, pp. 6, 7, 113, p. 7 (1896).

3660. ——. In quartz reef. P.A., Mt. Flori, Bania Range, 17 miles N.N.W. of Mt. Perry. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 143, p. 23 (1899).

3660A. ——. In quartz. Mayer's Reef, Horse Creek, about 38 miles N.W. of Coen. *Co.* Archer; *Dist.* **Cook.** *Ref.* A.R.D.M., p. 59 (1910), and Q.G.M.J., p. 603 (1910).

3661. ——. In quartz. Perseverance Reef, Potallah Cr., 25 miles W.N.W. of Alice Goldfield, 50 miles S.S.W. of Yarraden **(Hamilton Goldfield).** *Co.* Balurga; *Dist.* Cook. *Ref.* G.S.Q. Pub. 209, p. 20 (1907).

3662. ——. *Assoc.with* Stibnite, in quartz reef. *Loc.* First Call P. Claim, Cocoa Cr., trib. of McIvor R., 33 miles N.N.W. of Cooktown. *Co.* Banks; *Dist.* Cook. *Assays:* (1) Gold = 12 oz. 15 dwt. 21 gr. per ton; Antimony = 75 per cent. (2) Gold = 11 oz. 12 dwt. per ton; Antimony = 65 per cent. *Ref.* G.S.Q. Pubs. 91, p. 4 (1893), 94, p. 10 (1893), 209, p. 7 (1907), and 223, pp. 23, 24 (1909).

3663. ——. *Assoc.with* Stibnite, in quartz. *Loc.* First Call 1 S.E. Mine (*ante*). *Ref.* G.S.Q. Pubs. 91, p. 4 1893), 94, p. 10 (1893), 209, p. 7 (1907), and 223, pp. 23, 24 (1909).

3664. ——. In quartz. Boomerang Reef, Munburra, 40 miles N.N.W. of Cooktown, **Starcke Goldfield.** *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 209, p. 8 (1907), and 223, pp. 18-23 (1909).

3665. ——. In quartz. Duke of York Lease (7), Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, p. 25 (1909).

3666. ——. In quartz. Gold Mount Lease (20), Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, p. 25 (1909).

3667. ——. *Assoc.with* Silver and Iron Pyrites, in quartz. *Loc.* Last Hit Reef, Munburra (*ante*). *Assay:* Gold = 1 oz. 12 dwt. per ton; Silver = 5 dwt. per ton. *Ref.* A.R., p. 63 (1906), and G.S.Q. Pubs. 209, p. 9 (1907), 223, pp. 31-36 (1909).

3667A. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Monte Carlo (Sea View) Mine, Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, p. 37 (1909).

3667B. ——. In quartz. Queen Alexandra Reef, Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, p. 25 (1909).

3667C. ——. In quartz. Rio Tinto Claim, Starcke Consols Lease (23), Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, p. 25 (1909).

3667D. ——. *Assoc.with* Mispickel, in quartz. *Loc.* St. Patrick Workings (Starcke Consols Lease), Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, p. 41 (1909).

3667E. ——. In quartz. Starcke Consols Lease (23), *includes* Dyer's, St. Patrick, Rio Tinto, La France, Weir's, Slattery's, and Poor Old Torres Workings and Claims, Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, pp. 42-44 (1909), and A.R., p. 283 (1910).

3667F. ——. *Assoc.with* Silver, in quartz. *Loc.* Gladstone Reef, 4 miles N. of Munburra, 44 miles N.N.W. of Cooktown, Starcke Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 209, pp. 9, 10 (1907), 223, pp. 27-29 (1909), and A.R., p. 63 (1906).

3667G. ——. *Assoc.with* Stibnite and Cervantite, in quartz reef. *Loc.* Starcke Goldfield, 40 miles N.N.W. of Cooktown. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 31 (1897), and G.S.M.

3668. ——. *Assoc.with* Tetrahedrite, Tile Ore, Azurite, Malachite, Chalcanthite, and Ironstone, in lodes, in gneiss and schist. *Loc.* Arbouin Mines, nr. Nondah Cr. and Walsh R., 18 miles W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, pp. 13, 14 (1898).

3669. ——. *Assoc.with* Orthoclase, Biotite, and Quartz, in pegmatite. *Loc.* Golden Treasure Mine, 2 miles W. of Tate Tel. Stn., Tate R., about 34 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 119, p. 41 (1897), and P.R.S.Q., vol. 15, p. 49 (1900).

3670. ——. In quartz. Last Chance Reef, Jessop's Hill, 4 miles N. of Maytown, 32 miles S. of Laura Rail. Stn. (Cooktown line), 99 miles (by rail and road) S. byW. of Cooktown, **Palmer Goldfield.** *Co.* Chelmsford; *Dist.* Cook. *Average Yield:* Gold = 2 oz. 13 dwt. 12 gr. per ton. *Ref.* G.S.Q. Pub. 144, p. 3 (1899).

3671. ——. In quartz. Sunburst Reef, Jessop's Hill (*ante*). *Average Yield* = 2 oz. 11 dwt. 2 gr. per ton. *Ref.* G.S.Q. 144, p. 3 (1899).

3672. ——. In quartz. Difficulty, Downpatrick, General Sarsfield, Prince Patrick, St. Patrick, and Trieste Reefs, Jessop's Hill (*ante*). *Ref.* G.S.Q. Pub. 144, pp. 4, 5 (1899).

3672A. ——. *Assoc.with* Hematite, in quartz reef. *Loc.* Anglo Saxon 1 W. Mine, Limestone, 60 miles S. of Laura Rail. Stn., Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pub. 46, p. 1 (1889).

3673. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Anglo-Saxon Reef, Limestone (*ante*). *Ref.* G.S.Q. Pubs. 46, p. 1 (1889), 123, p. 7 (1897), and 144, p. 15 (1899).

3674. ——. *Assoc.with* Mispickel, in quartz. *Loc.* German Miner Reef, Limestone (*ante*). *Ref.* G.S.Q. Pub. 46, p. 2 (1889).

3675. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Good Hope Reef, Limestone (*ante*). *Ref.* G.S.Q. Pub. 46, p. 2 (1889).

3676. ——. In quartz. North Cross Reef, Limestone (*ante*). *Ref.* G.S.Q. Pubs. 46 (1889), 144 (1899).

3677. ——. *Assoc.with* Manganese-dioxide, in quartz. *Loc.* South Cross Reef, Limestone (*ante*). *Ref.* G.S.Q. Pubs. 46, p. 1 (1889), 144, p. 15 (1899).

3678. ——. In quartz. Catalpa, Comet, Mountain Maid, Queen, St. Patrick, and Viking Mines, Maytown, Palmer Goldfield, 36 miles S. of Laura Rail. Stn., 103 miles (by rail and road) S.byW. of Cooktown (Cooktown line). *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pub. 123, p. 7 (1897).

3679. ——. In quartz. Alexandra, Helen MacGregor, Queen of Beauty, and Rob Roy Reefs, Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, pp. 12, 13 (1899).

3680. ——. In quartz Anti-Clique, Ida, Just-in-Time, King of the Ranges, Louisa, Recompense, and Union Reefs (Ida Group), Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, pp. 7-11 (1899).

3681. ——. In quartz. Captain Cook, Mountain Maid, Queen of the North, Smithfield, and Viking Reefs (Queen Group), Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, pp. 11, 12 (1899).

3682. ——. In quartz. Baal Gammon, Best Friend, Wild Irish Girl, and Native Girl Reefs (Cradle Cr. Group), Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, pp. 6, 7 (1899).

3683. ——. In quartz. Isabella, Gilbert, Monte Christo, and Norton Reefs, Normanby, 40 miles S.S.W. of Cooktown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pub. 144, p. 16 (1899).

3683A. ——. In quartz. Gypsy Reef, left-hand br. of Palmer R., 3¼ miles N.N.E. of Maytown, Palmer Goldfield (*ante*). *Ref.* G.S.Q. Pub. 144, p. 5 (1899).

3684. ——. In quartz. Independent Reef, left-hand br. of Palmer R., 5 miles N.E. byN. of Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, p. 5 (1899).

3685. ——. In quartz. MacPherson Reef, left-hand br. of Palmer R., 3¼ miles N.N.E. of Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, p. 5 (1899).

3686. ——. In quartz. Star of the South Reef, left-hand br. of Palmer R., 2¼ miles N.byE. of Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, p. 5 (1899).

3687. Gold. In quartz. Walhalla Reef, left-hand br. of Palmer R., 5 miles N.E.byN. of Maytown (*ante*). *Ref.* G.S.Q. Pub. 144, p. 5 (1899).

3688. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Mt. Buchanan, Oakey Cr., 13 miles S.E.byS. of Maytown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref* G.S.Q. Pub. 123, p. 8 (1897).

3689. ——. *Assoc.with* Ironstone and Mispickel, in quartz. *Loc.* Mt. Madden, Oakey Cr., 13 miles S.E.byS. of Maytown (*ante*). *Assay:* Gold = 18 dwt. 7 gr., Silver = 1 dwt. 7 gr. per ton. *Ref.* G.S.Q. Pubs. 108, p. 11 (1896), and 123, p. 8 (1897).

3690. ——. In quartz reef. Oakey Cr., 12 miles S.E.byS. of Maytown (*ante*). *Ref.* A.R., pp. 161, 162 (1908).

3691. ——. In quartz. Boolay's P.P.A. (268) and Howe's P.P.A. (267), Mingin Cr., 9 miles N. of Maytown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 123, p. 7 (1897), 144, p. 6 (1899).

3692. ——. In quartz reef. Abdalla Mine, **Coen Goldfield,** 45 miles (by road) N.N.W. of Port Stewart, 189 miles N.W. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 19 (1901).

3693. ——. *Assoc.with* Iron Pyrites, Fluorspar, Calcite, and Pinite, in quartz reef. *Loc.* Daisy Mine, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 20 (1901), and G.S.M.

3694. ——. In quartz reef. Great Northern P.C., Coen Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 163, p. 20 (1901), 209, pp. 20, 21 (1907).

3695. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Llankelly Mine, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 22 (1901).

3696. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Long Tunnel Mine, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 21 (1901).

3697. ——. In quartz reef. Stockholm Mine, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 19 (1901), and G.S.M.

3698. ——. In quartz reef. Victoria Mine, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 125, p. 30 (1897), and 163, p. 19 (1901).

3699. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Wilson Mine, Coen Goldfield (*ante*). *Ref.* G.S..Q Pub. 163, p. 19 (1901).

3700. ——. *Assoc.with* Iron Pyrites and Hematite, in quartz. *Loc.* All Nations Reef, Ebagoolah, **Hamilton Goldfield,** 33 miles W. of Port Stewart, 173 miles N.W. byN. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 5 (1901).

3701. ——. In quartz. Caledonia Reef, Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 163, p. 6 (1901), 209, pp. 16, 17 (1907).

3702. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Gold Mount Reef, 6 miles S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 163, pp. 8, 9 (1901), and 209, p. 15 (1907).

3703. ——. In quartz. Hamilton King Reef, Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 163, p. 10 (1901), and 209, p. 16 (1907).

3704. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Hidden Treasure Reef, Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 209, p. 18 (1907).

3705. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Johannesburg (Lord Roberts) Line of Reefs, 3½ miles S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 7 (1901).

3706. ——. *Assoc.with* Graphite, in quartz. *Loc.* May Queen Line of Reef, 1½ mile S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 163, p. 12 (1901), and 209, p. 17 (1907).

3707. ——. *Assoc.with* Limonite and Copper carbonate, in quartz. *Loc.* Trafalgar Reef, 3½ miles S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, pp. 13, 14 (1901).

3708. ——. In quartz. Violet Reef, 7 miles S. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 209, p. 19 (1907).

3709. ——. In quartz. Agnes, Brilliant, Croydon King, Democrat, Good Luck, Golden Treasure, Hit or Miss, Kruger, Last Hit, Luck of Fortune, Oom Paul, Queenslander, Star of Hope, Tasmania, and True Blue Lines of Reefs, Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, pp. 4-14 (1901).

3710. ——. *Assoc.with* Talc, in quartz vein, in garnet schist. *Loc.* 1 mile N.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.M.

3710A. ——. In quartz. Golden King Reef, Yarraden, 14 miles S. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 209, pp. 12-14 (1907).

3711. ——. *Assoc.with* Graphite, in quartz. *Loc.* Lukin King Reefs, Yarraden (*ante*). *Ref.* G.S.Q. Pub. 209, p. 14 (1907).

3712. ——. In quartz. Savannah Reef, Yarraden (*ante*). *Ref.* G.S.Q. Pub. 209, p. 14 (1907).

3712A.——. In quartz. Lochinvar Prov. Goldfield, 43 miles W.byN. of Port Stewart. *Co.* Coen; *Dist.* Cook.

3713. ——. *Assoc.with* Iron Pyrites and Hematite, in quartz. *Loc.* B.B. Reef, McLeodsville, 6 miles N.N.W. of Thornborough, 25 miles N. of Dimbullah Rail. Stn. (Chillagoe line), 98 miles (by rail and road) W. of Cairns. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 26 (1884).

3714. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Galena, in quartz. *Loc.* Victory Reef, McLeodsville (*ante*). *Ref.* G.S.Q. Pub. 16, p. 27 (1884).

3715. ——. In quartz. Brilliant, Caledonia, Calliope, Cosmopolitan, Jenolan, National, and Sir Wm. Alfred Reefs, Lane's Cr., 16 miles N.N.W. of Georgetown, **Etheridge Goldfield.** *Co.* Einasleigh; *Dist.* Cook. *Ref.* G.S.Q. Pub., p. 10 (1900).

3716. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Aurora Reef, Aurora Cr., 8 miles S.W. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 5 (1887).

3717. ——. *Assoc.with* Iron Pyrites and Galena, in ironstained quartz. *Loc.* Redan Reef, Aurora Cr. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 10 (1900).

3718. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, and Galena, in quartz and calcite. *Loc.* Balmoral Reef, 1½ mile W. of Castleton, 5 miles S.S.E. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), 151, p. 12 (1900).

3719. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Big Reef, Castleton, 5 miles S.S.E. of Charleston Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 12 (1900).

3720. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Galena, in quartz. *Loc.* Sir Henry Havelock Reef, 2½ miles N.W. of Castleton, 5 miles S.S.E. of Charleston Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 12 (1900).

3721. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Redruthite, Mispickel, Galena, and Zinc Blende, in quartz. *Loc.* Nil Desperandum Reef, Charleston, 144 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), 265 miles (by rail) S.W. of Cairns, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 151, p. 11 (1900), and 219, p. 14 (1909).

3722. ——. *Assoc.with* Iron Pyrites, Pyrrhotite, Galena, and Zinc Blende, in quartz. *Loc.* Queenslander Mine, Charleston (*ante*). *Ref.* G.S.Q. Pubs. 151, p. 11 (1900), and 219, p. 13 (1909), and O.R.

3723. ——. In quartz. Struggle Reef, Charleston (*ante*). *Ref.* G.S.M.

3723A.——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Battista Menine's Claim, Delaney R., Charleston (*ante*). *Ref.* A.R., p. 261 (1910).

3724. ——. *Assoc.with* Iron Pyrites and Galena. *Loc.* Cumberland Reef, Cumberland, 12 miles W.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 5 (1887).

3724A.——. In quartz. Jubilee Reef, 2½ miles N.W. of Cumberland, 14 miles W.byS. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 219, pp. 11, 12 (1909).

3725. ——. In quartz. City of Glasgow Reef, Donnybrook, 4½ miles S. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, pp. 4, 15 (1900).

3725A.——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Durham Consols Mine, Durham, 4 miles W. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* A.R., p. 323 (1911).

3726. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Durham Reef, Durham (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 4 (1887), and 219, pp. 10, 11 (1909).

3727. ——. *Assoc.with* Marcasite and Copper Ores. *Loc.* Havelock Mine, 5 miles S. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, pp. 12, 13 (1909), and G.S.M.

3727A.——. *Assoc.with* Galena, Massicot, Cerussite, and Malachite, in quartz and schist. *Loc.* Ancient Briton Claim, Georgetown, 20 miles N. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* A.R., p. 215 (1910).

3728. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Lady Maria Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 7 (1900).

3729. Gold. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, Galena, and Zinc Blende, in quartz. *Loc.* Papa Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 35, p. 3 (1887).

3729A.——. *Assoc.with* Iron Pyrites and Zinc Blende, in quartz . *Loc.* Spero Meliora Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 35, p. 4 (1887).

3730. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* St. George Mine, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 6 (1900).

3731. ——. In quartz. Telegraph Mine, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 5 (1900).

3732. ——. In quartz. Better Luck, City of Sydney, North Star, Paxo, Rescue, and Victoria Reefs, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 7 (1900).

3732A.——. *Assoc.with* Iron Pyrites, Galena, and Tenorite, in quartz. *Loc.* Young Wexford Mine (Wexford Reef), 3 miles N. of Georgetown, 24 miles N. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 151, p. 6 (1900), and G.S.M.

3733. ——. In quartz. City of Dunedin, Coolgardie, Diamond Jubilee, Glencoe, and Melbourne Exhibition Reefs, 3 miles N. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* O.M.

3734. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Caledonia Reef, 5½ miles S.W. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 4 (1887), 151, pp. 7, 8 (1900).

3735. ——. *Assoc.with* Silver-Lead Ore. *Loc.* Grand Junction P.C., Glenrowan Cr., 8 miles W. of Charleston Rail. Stn., 20 miles S.byW. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 49 (1897).

3736. ——. *Assoc.with* Iron Pyrites, Hematite, and Limonite, in quartz. *Loc.* Caledonia Reef, Caledonia Cr., trib. of Goldsmith Cr., 27 miles S.S.E. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

3737. ——. *Assoc.with* Ironstone and Manganese-dioxide. *Loc.* Lady Franklin Reef, Caledonia Cr., trib. of Goldsmith Cr. (*ante*). *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

3738. ——. In quartz. All Nations, Black Jack, Canadian, Milky Way, and Ropewalk Reefs, Goldsmith Cr. (*ante*). *Ref.* G.S.Q. Pubs., p. 35 (1887), and 151, p. 13 (1900).

3739. ——. *Assoc.with* Silver, Copper Pyrites, Chalcanthite, and Copper carbonate, in quartz reef. *Loc.* Elektron Silver Mine, Caledonia Cr., trib. of Goldsmith Cr. (*ante*). *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

3740. ——. *Assoc.with* Iron Pyrites, Galena, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* International Reef, Rocky, Sandy Cr., 7 miles S.W.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 151, p. 10 (1900), 219, p. 9 (1909).

3740A.——. *Assoc.with* Silver, Galena, Massicot, Anglesite, and Cerussite, in lode. *Loc.* One mile N. of International Mine, Rocky, Sandy Cr. (*ante*). *Assays: See* 2757A. *Ref.* A.R., p. 228 (1910).

3741. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Stonewall Jackson Reef, Rocky, Sandy Cr. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 10 (1900), and G.S.M.

3742. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Butcher Bird, Deceitful Susan, Merry Monarch, and Stockman Reefs, between Talbot and Machine Crs., 10 miles S.E.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 151, pp. 10, 11 (1900).

3743. ——. In quartz. True True Reef, Western Cr., 16 miles S.W.byS. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, p. 13 (1900).

See further Etheridge references, No. 2829, etc.

3744. ——. In quartz. Hogan's Reef, **Green Hills Goldfield,** 24 miles S.W.byS. of Georgetown. *Cos.* Gilbert and Lang; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 24 (1897).

3745. ——. In quartz reef. Red Flat, Green Hills Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 24 (1897).

3746. ——. *Assoc.with* Copper carbonate, Galena, and Calcite, in quartz reef. *Loc.* Black Ball Mine, Central Hodgkinson, 2½ miles N. of Thornborough, 21 miles (by coach) N.N.W. of Dimbullah Rail. Stn. (Chillagoe line), 94 miles (by rail and road) W. of Cairns, **Hodgkinson Goldfield.** *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 6 (1884), and P.R.S.Q., vol. 4, p. 47 (1887).

3747. ——. *Assoc.with* Galena, in quartz reef. *Loc.* Hit or Miss Reef, Central Hodgkinson, 2 miles N.E. of Thornborough (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 47 (1887).

3748. ——. In quartz reef. *Loc.* Homeward Bound Reef, Central Hodgkinson, 2 miles N.E. of Thornborough (*ante*). *Ref.* G.S.Q. Pub. 16, p. 6 (1884), and G.S.M.

3749. ——. In quartz. *Loc.* Lady Catherine Reef, Central Hodgkinson, 2 miles N. of Thornborough (*ante*). *Ref.* G.S.Q. Pub. 16, p. 9 (1884).

3750. ——. *Assoc.with* traces of Stibnite. *Loc.* Mark Twain Reef, Central Hodgkinson, 2 miles N. of Thornborough (*ante*). *Ref.* G.S.Q. Pub. 16, p. 8 (1884).

3751. ——. *Assoc.with* traces of Galena, in quartz. *Loc.* North Star Reef, Central Hodgkinson, 2 miles N.N.E. of Thornborough (*ante*). *Ref.* G.S.Q. Pub. 16, p. 7 (1884).

3752. ——. *Assoc.with* Galena, in quartz. *Loc.* Pioneer Reef, ¾-mile N. of Thornborough, Hodgkinson Goldfield, 19 miles (by coach) N.N.W. of Dimbullah, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 16 (1884).

3753. ——. In quartz. Alliance, Amy Moore, Bismarck, Black Prince, Britannia, Caledonia, Columbia, Commodore, Devon and Cornwall, Emperor, Empress of India, Eureka, Explorer, Flying Pig, Forget-me-not. Fourth of July, Garry Owen, Great Northern, Henry Grattan, Hero, Hope, Idaho, King Attila, Lady Ann, Lady Mary, Mowbray, Outward Bound, Providence, Rob Roy, Tasmania, Tichborne, Tyrconnel, Von Molke, Vulcan, and other reefs. *Loc.* Central Hodgkinson (Thornborough and Kingsborough), Hodgkinson Goldfield (*ante*). *Ref.* G.S.Q. Pub. 16 (116), p. 5 (1884).

3753A. ——. *Assoc.with* Stibnite. *Loc.* Thornborough, Hodgkinson Goldfield (*ante*). *Assay:* Gold = 2½ oz. per ton; Antimony = 69·8 per cent. *Ref.* A.R., p. 92 (1907).

3753B. ——. *Assoc.with* Scheelite, in quartz. *Loc.* Southern Cross Mine, 1 mile S.W. of Kingsborough, Hodgkinson Goldfield (*ante*). *Ref.* Q.G.M.J., vol. 12, p. 62 (1911).

3754. ——. In quartz. Beaconsfield Mine (? Monarch Reef), Northcote, 15 miles W of Mareeba Rail. Stn. (Cairns line), 61 miles (by rail and road) W. of Cairns, Hodgkinson Goldfield (*ante*).

3755. ——. *Assoc.with* Iron Pyrites, Stibnite, and Cervantite, in quartz reef. *Loc.* Craig's Lease, Emily Line of Reef, Northcote (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 45 (1887).

3756. ——. *Assoc.with* Iron Pyrites, Stibnite, Cervantite, in quartz reef. *Loc.* Emily Antimony Lease, Northcote (*ante*). *Ref.* G.S.Q. Pub. 16 (116), p. 31 (1884), and 125, p. 48 (1897).

3757. ——. *Assoc.with* Iron Pyrites, Mispickel, and Galena, in quartz. *Loc.* Just-in-Time Reef, Northcote (*ante*). *Ref.* G.S.Q. Pub. 16 (116), p. 28 (1884).

3758. ——. *Assoc.with* Stibnite, in quartz reef. *Loc.* Matilda (Pyles') Mine, Northcote (*ante*). *Ref.* G.S.Q. Pub. 16 (116), p. 31 (1884).

3759. ——. *Assoc.with* Stibnite, in quartz reef. *Loc.* Minnie Moxham Mine, Northcote (*ante*). *Yield:* Gold = 2 oz. per ton. *Ref.* G.S.Q. Pub. 16 (116), p. 31 (1884), and P.R.S.Q., vol. 4, p. 45 (1887).

3760. ——. *Assoc.with* Copper Pyrites and Galena, in quartz. *Loc.* Monarch Reef, Northcote (*ante*). *Ref.* G.S.Q. Pub. 16 (116), p. 28 (1884).

3761. ——. In quartz. Australasian, Downpatrick, Enterprise, Maria, Monkland Mountaineer, You-Never-Can-Tell, and other reefs, Northcote (*ante*). *Ref.* G.S.Q. Pub. 16 (116), pp. 28-31 (1884).

3762. ——. *Assoc.with* Mispickel. *Loc.* Captain Cook Reef, Woodville, 9 miles N.W.byW. of Thornborough, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16 (116), p. 22 (1884).

3763. ——. *Assoc.with* Stibnite, in quartz. *Loc.* Home Rule Reef, Woodville (*ante*). *Ref.* G.S.Q. Pub. 16, p. 23 (1884), and G.S.M.

3764. ——. In quartz. Band of Freedom, Chance, Crown, Dagworth, Geraldine, Lighthouse, Result, Richmond, St. George, and other reefs, Woodville (*ante*). *Ref.* G.S.Q. Pub. 16 (116), pp. 22-26 (1884).

3765. ——. *Assoc.with* Iron Pyrites, Galena, Mispickel, and Zinc Blende, in quartz. *Loc.* Union Reef, 3½ miles N.W.byN. of Woodville, 13 miles N.W. of Thornborough, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 24 (1884), and P.R.S.Q., vol. 4, p. 47 (1887).

3766. ——. *Assoc.with* Iron Pyrites, Galena, and Hornblende, in quartz. *Loc.* Luxton's Mine, Wet Cr., California Cr., 3 miles N.E. of Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay:* Gold = 150 oz. 16 dwt. per ton. *Ref.* G.S.Q. Pub. 119, p. 42 (1897).

3767. ——. *Assoc.with* Native Silver and Copper. Noble Is., 80 miles N.W.byN. of Cooktown. *Co.* Melville; *Dist.* Cook. *Ref.* Q.G.M.J., vol. 9, p. 263 (1908).

3768. Gold. In quartz leader. Boulder Lease, **Jordan Goldfield,** 22 miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 157, p. 2 (1901).

3769. ——. In quartz. *Loc.* Douglas Cr. G. Lease, between Douglas and Henrietta Cr., Jordan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 157, p. 2 (1901).

3770. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Jordan Gold Mine, Jordan Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 157, p. 1 (1901).

3771. ——. *Assoc.with* Mispickel, in granite. *Loc.* Jordan P.C., Jordan Gully, Jordan Goldfield (*ante*). *Assay:* Gold = 2½ oz., Silver = 15 dwt. per ton. *Ref.* G.S.Q. Pub. 157, p. 3 (1901).

3772. ——. In quartz leader. *Loc.* McQueen's P.A. (19), Jordan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 157, p. 2 (1901).

3773. ——. *Assoc.with* Hematite, in quartz. *Loc.* Meyer's Leaders, **Mareeba Goldfield,** Tinaroo Cr., 5 miles S.E. of Mareeba Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 97, p. 6 (1894).

3774. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Queen Constance P.C., Mareeba Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 5 (1894).

3775. ——. *Assoc.with* Iron Pyrites, Zinc Blende, and Stibnite, in quartz. *Loc.* Queen Constance 5 N. Claim, Mareeba Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 6 (1894).

3776. ——. In quartz. Alabama, Carey's Golden Star United, Mullin's Prairie Flower, and Queen Constance 4 N. Mines, Mareeba Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, pp. 5, 6 (1894).

3777. ——. In quartz. Alice Reef, **Mulgrave Goldfield,** 9 miles S.S.W. of Mulgrave Rail. Stn. (Cairns-Mulgrave Tramway), 25 miles N.W.byW. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.M.

3778. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Walter Hodgson's Reef, Butcher's Cr., Mulgrave R., Mulgrave Goldfield (*ante*). *Ref.* G.S.Q. Pub. 89, p. 5 (1893).

3779. ——. In quartz. Airlie Reef, 1 mile S.W. of Coleman Township, **Russell Extd.** (Towalla) **Goldfield,** 18 miles W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Yield:* Gold = 3 oz. 15 dwt. 20 gr. per ton. *Ref.* G.S.Q. Pub. 97, p. 3 (1894).

3780. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Coral Queen Reef, Combo Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 89, p. 4 (1893), and 97, p. 2 (1894).

3781. ——. In quartz. Eureka Reef, Russell Extd. (Towalla) Goldfield (*ante*). *Yield:* Gold = 3 oz. per ton. *Ref.* G.S.Q. Pub. 97, p. 2 (1894).

3782. ——. In quartz reef. Gt. Eastern Mine, Combo Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 2 (1894).

3783. ——. In quartz reef. Ivanhoe Mine, Russell Extd. (Towalla) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 4 (1894).

3784. ——. In quartz reef. Kendle and Devry's Reef, Russell Extd. (Towalla) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 2 (1894).

3785. ——. In quartz reef. King of the Ranges Mine, New Zealand Gully, Russell Ext. (Towalla) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 3 (1894).

3786. ——. *Assoc.with* Ironstone and Quartz, in brecciated slate. *Loc.* Mt. Bartle Frere Reef, Christmas Cr., Mulgrave R., Russell Extd. (Towalla) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 89, p. 5 (1893).

3787. ——. In quartz leaders. New Zealand Reef, New Zealand Gully, Russell Extd. (Towalla) Goldfield (*ante*). *Yield:* Gold = 3 oz. per ton. *Ref.* G.S.Q. Pub. 97, p. 3 (1894).

3788. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Phœnix Reef, Russell Extd. (Towalla) Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 89, p. 4 (1893).

3789. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Rose and Shamrock Mine, French's Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Yield:* Gold = 3 oz. per ton. *Ref.* G.S.Q. Pub. 97, p. 3 (1894).

3790. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Towalla King Mine, Cooliman Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Yield:* 3 oz per ton. *Ref.* G.S.Q. Pub. 97, p. 4 (1894).

3791. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Victory Mine, Combo Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Yield:* Gold = 2½ oz. per ton. *Ref.* G.S.Q. Pub. 97, p. 2 (1894).

3791A.——. In quartz. Susan Leader, Christmas Hill, 14 miles E.S.E. of Percyville, **Etheridge Goldfield.** *Co.* Percy; *Dist.* Cook. *Ref.* G.S.Q. Pub. 24, pp. 20, 21 (1911).

3792. ——. In quartz. Captain Townley, General Gordon, Tasmania, and Welcome Mines, Mt. Hogan, 14 miles N.E.byE. of Gilberton, 44 miles S.E.byS. of Charleston (Etheridge Goldfield). *Co.* Percy (*ante*). *Ref.* A.R.D.M., p. 64 (1892).

3793. ——. In telluride ore. Mt. Hogan (*ante*). *Ref.* G.S.M.

3794. ——. *Assoc.with* Galena and Cerussite, in quartz leader. *Loc.* Avis's Lease, **Oaks Gold and Mineral Field**, 22 miles S.byE. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy; *Dist.* Cook. *Assay:* Gold = 2 oz. 6 dwt., Silver = 28 oz. 8 dwt. per ton; Lead = 43·8 per cent. *Ref.* A.R., p. 156 (1908).

3795. ——. In quartz reef. Wise's Lease, Oaks Gold and Mineral Field (*ante*). *Ref.* G.S.M.

3796. ——. *Assoc.with* Silver, Iron Pyrites, and Copper Pyrites, in quartz reef. *Loc.* Wise's Shaft, Wise's Knob, Oaks Goldfield (*ante*). *Assay:* Gold = 1 oz. 2 dwt., Silver = 3 oz. 16 dwt. per ton; Copper = 1·7 per cent. *Ref.* A.R., p. 164 (1908).

3797. ——. In ferruginous quartz. Oaks Goldfield (*ante*). *Ref.* O.R. and A.R.D.M., p. 57 (1907).

3798. ——. *Assoc.with* Agate. *Loc.* Cameron's Leader, Upper Percy R., 60 miles S. of Georgetown (Etheridge Goldfield). *Co.* Percy; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 24 (1897).

3799. ——. In quartz. Springfield P.C. and Klondyke King Mines, Klondyke Mg. Centre, 12 miles W. of Coen; **Coen Goldfield**. *Co.* Sidmouth; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 23 (1901).

3800. ——. *Assoc.with* Galena, in quartz. *Loc.* Goolha Goolha Reef, The Springs, 9 miles (by road) S.E. of Coen, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 22 (1901).

3801. ——. In quartz. Westralia Reef, The Springs (*ante*). *Ref.* G.S.Q. Pub. 163, p. 22 (1901).

3802. ——. *Assoc.with* Galena and Iron Pyrites, in quartz veins, in granite. *Loc.* Possession Is., 15 miles S.E. of Thursday Is., Torres Strait. *Co.* Somerset; *Dist.* Cook. *Assay:* Gold = 1 oz. 17 dwt. 5 gr., Silver = 1 oz. 1 dwt. 19 gr. per ton. *Ref.* G.S.Q. Pub. 180, p. 22 (1902).

3803. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* on Hammond Is., 1½ mile N. of Thursday Is., Torres Strait (*ante*). *Assays:* (1) Gold = 23 oz. per ton; (2) Gold = 8 oz. per ton. *Ref.* G.S.Q. Pub. 112, p. 1 (1896), and A.R., p. 191 (1909).

3804. ——. In quartz. Band of Hope Mine (Band of Hope Reef), Horn Island Goldfield, 3 miles S.E. of Thursday Is., Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

3805. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Brilliant Mine (Brilliant and Parallel Reefs), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

3806. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Cornucopia Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

3807. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Dead Cat Mine (Good Luck and Dead Cat Reefs), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

3808. ——. *Assoc.with* Galena, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Eclipse Mines, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 6 (1896).

3809. ——. *Assoc.with* Iron Pyrites, in quartz and felspar. *Loc.* Golden Gate Mine, Mystery and Dead Cat Reefs, Horn Island Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

3810. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Gympie Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

3811. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Italian Mine (Good Luck and Italian Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

3812. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Mystery P.C. Mine (Mystery or Dead Cat Reef), Horn Island Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 2 (1896).

3813. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* New Chum Mine (Dead Cat Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

3814. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in quartz reef. *Loc.* Pioneer Mine (Pioneer Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

3815. Gold. In quartz. Reward Claim (Dead Cat and Success Reefs), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

3816. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Rossetta Mine (Brilliant Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

3817. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Smith's Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.M.

3818. ——. In quartz. Thistle Mine, (?) Good Luck Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

3819. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz and chlorite. *Loc.* Triumph Mine (Nos. 2 and 3 Reefs), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

3820. ——. In quartz. Welcome Mine (Welcome Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

3821. ——. In quartz. Diggers' Luck, Horn Island, Narupai, Peter the Great, Reconstruction Mines, and Bonanza and Norseman Leaders, Horn Island (*ante*). *Ref.* G.S.Q. Pub. 112, pp. 3-5 (1896).

3822. ——. In quartz. In the Dead Cat Reef, in the Mystery P.C., Golden Gate, New Chum, and Reward Mines, Horn Island Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, pp. 2, 3 (1896).

3823. ——. In quartz. Good Luck Reef, in the Dead Cat, Thistle and Italian Mines, Horn Island Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112 (1896).

3824. ——. In quartz. Gold Workings, Prince of Wales Island, 1 mile S.W. of Thursday Is., Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.Q. Pub. 112, p. 1 (1896).

3824A. ——. *Assoc.with* Silver, in quartz. *Loc.* Pyramid Hill, Banks (Moa) Is., Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* A.R., p. 311 (1911).

3825. ——. In quartz. Alice Queen Reef, **Alice R. (Philp) Goldfield**, 80 miles N. of W. of Laura Rail. Stn. (Cooktown line). *Co.* Warner; *Dist.* Cook. *Ref.* G.S.Q. Pub. 209, p. 11 (1907).

3826. ——. In quartz. Peninsular King Reefs, Alice R. (Philp) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 209, pp. 11, 12 (1907).

3827. ——. In quartz reef. Dodd's Reef, ½-mile S. of Hayes's Cr., divide on Nesbit Waters; **Hayes' Cr. Prov. Goldfield,** about 190 miles N.W. of Cooktown. *Co.* Weymouth; *Dist.* Cook. *Ref.* A.R.D.M., p. 54 (1909), and Q.G.M.J., vol. 9, p. 264 (1908), and vol. 11 (pp. 600-603 (1910).

3827A. ——. *Assoc.with* Silver, in quartz. *Loc.* about 5 miles from Hayes' Cr. Prov. Goldfield, Cape York Peninsula, and about 195 miles N.W. of Cooktown. *Co.* Weymouth (*ante*). *Ref.* A.R., p. 287 (1910).

3827B. ——. *Assoc.with* Silver, in quartz. *Loc.* Valley of Hills, 6 miles N. of Hayes's Cr. Prov. Goldfield. *Co.* Weymouth (*ante*). *Ref.* A.R., p. 286 (1910).

3828. ——. *Assoc.with* Antimony, in lode. *Loc.* **Mitchell R.** Gold and Antimony Mines, 40 miles N.E. of Mungana Rail. Stn (Chillagoe line). *Co.* Wrotham; *Dist.* Cook. *Ref.* A.R.D.M., p. 71 (1907).

3829. ——. In telluride ore. Colley's Lord Robert's Mine, Gilberton, 48 miles S.byE. of Charleston Rail. Stn. (Etheridge line), **Etheridge Goldfield.** *Co.* Victor; *Dist.* Cook. *Ref.* G.S.M.

3830. ——. In quartz. Caledonia, Commissioner's Hill, Homeward Bound, Jeanette, Joseph Morris, Lord Roberts, and Lord Kitchener Mines, Gilberton (*ante*). *Ref.* A.R.D.M., pp. 64, 65 (1892), and p. 56 (1903).

3831. ——. *Assoc.with* Cuprite, Redruthite, and Copper carbonate, in lode. *Loc.* Percy R., 5 miles above junction with Gilbert R., 41 miles S. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, p. 13 (1900).

3831A. ——. In quartz. P.C. **Blair Prov. Goldfield,** Macintyre Brook, 10 miles E.byS. of Gore Rail. Stn. (Goondiwindi line). *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* A.R.D.M., p. 101 (1905).

3832. ——. *Assoc.with* Silver, Copper Pyrites, and Mispickel, in quartz reef. *Loc.* Fletcher's Sel. (29), Jibbinbar, 20½ miles S.byW. of Stanthorpe. *Co.* Bentinck (*ante*). *Assays:* Gold = 1 oz. 12 dwt. and 1 oz. 14 dwt., Silver = 51 oz. and 21 oz. per ton. *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

3833. ——. *Assoc.with* Galena, Minium, and Mispickel, in quartz and gossan. *Loc.* Min. Area (25), Jibbinbar (*ante*). *Assays:* (1) Silver = 16 oz. per ton; (2) Silver = 48 oz. Gold = 3 dwt. per ton. *Ref.* G.S.Q. Pub. 87, p. 10 (1892).

3833A. ——. *Assoc.with* Silver, Mispickel, and Zinc Blende, in quartz and granite. *Loc.* Steele's Sel. (31), Jibbinbar (*ante*). *Assays:* Gold = 3 dwt. 16 gr., Silver = 1 oz. 10 dwt. 12 gr. per ton. *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

3833B. ——. *Assoc.with* Iron Pyrites, Hematite, Limonite, Manganese-dioxide, in quartz. *Loc.* Glenelg Reef, nr. Oakey Cr., 9 miles E. of Glenelg Head Stn., 55 miles (by road) W.S.W. of Warwick. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 40, pp. 1, 2 (1887).

3834. ——. *Assoc.with* Iron Pyrites, Mispickel, and Galena, in quartz and calcite. *Loc.* Kaffir Chief Mine, **Pikedale Goldfield,** 20 miles N.W.byN. of Stanthorpe Rail. Stn. *Co.* Bentinck (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 105, pp. 7, 8 (1895), and 120, p. 74 (1898).

3835. ——. *Assoc.with* Mispickel, in quartz. *Loc.* P. and O. Mine, 3 miles W. of Macintyre Brook, Pikedale Goldfield (*ante*). *Assay:* Gold = 14 dwt. 8 gr. per ton. *Ref.* G.S.Q. Pubs. 105, pp. 6, 7 (1895), 120, p. 77 (1898).

3836. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Royel Standard Mine, Pikedale Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 78 (1898).

3837. ——. In quartz. Dan O'Connell, Good Hope, Independent, Lady Jane, and Star of the East Mines, Pikedale Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 105, pp 8, 9 (1895), and 120, pp. 77, 78 (1898).

3838. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Cameronian Reef, Pikedale Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 10 (1892), 105, p. 9 (1895), and 120, p. 77 (1898).

3839. ——. In quartz. Blackfellows', Rise and Shine, Star, Wanderer, and Webb's Reefs, Pikedale Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 10 (1892), and 120, pp. 72, 77 (1898).

3840. ——. *Assoc.with* Cassiterite, Mispickel, Wolfram, and Molybdenite, in quartz and greisen. *Loc.* Pikedale Lode (Sels. 705, 706w), 10 miles W.byN. of Stanthorpe Rail. Stn. *Co.* Bentinck; *Dist.* Darling Downs. *Assays:* Gold = 18 dwt. and 1 oz. 12 dwt. per ton. *Ref.* G.S.Q. Pubs. 40, p. 4 (1887), 120, p. 47 (1895).

3841. ——. In quartz. Nundubbermere, 13 miles S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

3842. ——. *Assoc.with* Silver, Iron Pyrites, and Copper carbonate, in quartz reef. *Loc.* Sel. (24), nr. Sundown Cr., Severn R., 11 miles W.S.W. of Ballandean Rail. Stn., 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay:* Gold = 18 dwt., Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

3842A. ——. *Assoc.with* Copper Ore. *Loc.* Glenlyon Run, about 2 miles north of Homestead, about 45 miles (by road) S.W.byW. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* Q.G.M.J., vol. 11, p. 258 (1910).

3842B. ——. In quartz. Lambert Bros. and Bracker and Party's Mines, **Macdonald Prov. Goldfield,** 31 miles W.byS. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* A.R.D.M., p. 101 (1905).

3843. ——. *Assoc.with* Pyrargyrite, Iron Pyrites, Copper Pyrites, Cuprite, Tile Ore, Azurite, Malachite, Galena, Cerussite, Zinc Blende, Smithsonite, Ironstone, and Calcite. *Loc.* Silver Spur Mine, 8 miles E. of **Texas,** 43 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* G.S.Q. Pubs, 120 (1898) and 191 (1904).

3844. ——. In quartz. Lady Caroline Mine, **Leyburn Goldfield,** 28 miles W.byN. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pubs. 125, p. 51 (1897), and 120, p. 71 (1898).

3845. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Talc, in quartz. *Loc.* Von Molke Mine, Leyburn Goldfield (*ante*). *Assays:* (1) Gold = 16 dwt. 9 gr., Silver = 6 dwt. per ton; (2) Gold = 5 oz. 8 dwt., Silver = 1 oz. 5 dwt. per ton. *Ref.* G.S.Q. Pubs. 120, p. 71 (1898), and 87, p. 8 (1892).

3846. ——. *Assoc.with* Silver, in quartz reef. *Loc.* Leyburn Goldfield (*ante*). *Assay:* Gold = 6 oz. 3 dwt., Silver = 1 oz. 14 dwt. per ton. *Ref.* A.R., p. 43 (1906).

3847. ——. *Assoc.with* Tellurium, in quartz vein. *Loc.* Lucky Valley, 10 miles S.E. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* D.H.A.

3848. ——. In quartz. Madam Ross Mine, **Palgrave Goldfield,** 21 miles W.S.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 125, p. 27 (1897).

3849. ——. In quartz. Mountain Maid Mine, Palgrave Goldfield (*ante*). *Ref.* A.R.D.M, p. 89 (1898).

3850. ——. *Assoc.with* Iron Pyrites and Limonite, in quartz. *Loc.* Clare's Reef, **Talgai Goldfield,** 21 miles W.N..W of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 205, p. 28 (1906).

3851. ——. *Assoc.with* Limonite and Manganese-dioxide, in quartz leaders. *Loc.* Golden Gate Lease, Talgai Goldfield (*nate*). *Ref.* G.S.Q. Pub. 205, p. 29 (1906).

3852. ——. In quartz. *Loc.* Louisa Mine, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 55 (1898).

3853. Gold. In quartz. Prince of Wales Mine, Gum-tree Flat, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 56 (1898).

3854. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* St. Patrick P.C., Saw Gully, 1 mile S.W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 120, p. 60 (1898); 186, p. 15 (1903); and 205, p. 31 (1906).

3855. ——. In quartz. Sultan and Taylor Mine, Taylor Reef, Darky Flat, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 7 (1892), and 120, pp. 56-59 (1898).

3856. ——. *Assoc.with* Silver. *Loc.* Big Hill Reef, 3 miles W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 7 (1892), and 120, p. 61 (1898).

3857. ——. In quartz. Gladstone Reef, 1½ mile S. of Mt. Gammie North, 2 miles S.W. of Big Hill, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 7 (1892); 186, p. 13 (1903); and 205, p. 31 (1906).

3858. ——. In quartz. Monte Christo Reef, Big Hill, or Mt. Gammie North, 3 miles W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pub. 87, p. 7 (1892).

3859. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Queenslander Mine, Big Hill, 3 miles W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 7 (1892); 120, p. 61 (1898); and A.R., p. 188 (1909).

3860. ——. *Assoc.with* Limonite, in quartz. *Loc.* Victoria Reef (Big Hill Lease), 3 miles W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 186, p. 16 (1903), and 205, p. 30 (1906).

3861. ——. *Assoc.with* Limonite, in quartz. *Loc.* Welcome Stranger Lease, nr. Big Hill Lease, 3 miles W. of Pratten (*ante*). *Ref.* G.S.Q. Pubs. 185, p. 4 (1903), and 205, p. 28 (1906).

3862. ——. In quartz. Brilliant, New Chum, Woodman's and Falconer's Reefs, Big Hill, 3 miles W. of Pratten (*ante*). *Ref.* G.S.Q. Pub. 120, pp. 63, 64 (1898).

3863. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz reef. *Loc.* 2½ miles S.W. of Talgai Stn., 23½ miles W.N.W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Assays:* (1) Gold = 3 oz. per ton; (2) Gold = 2 oz. 15 dwt., Silver = 3 oz. per ton. *Ref.* G.S.Q. Pub. 87 (1892).

3864. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Cullan's Twins P.A. (middle, northern, and southern reefs), **Thane's Cr. Goldfield,** 24 miles W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 205, pp. 34-36 (1906).

3865. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* El Dorado Mine, Thane's Creek, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 68 (1898).

3866. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Guiding Star Reef, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 120, p. 70 (1898), and 205, pp. 32, 33 (1906).

3867. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Just-in-Time (late Dawn of Hope) Mine, 1 mile W. of Mt. Gammie, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 40, p 2 (1887); 87, p. 8 (1892); and 120, p. 67 (1898).

3868. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Mountain Maid Reef, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 87, pp. 8, 9 (1892).

3869. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Telegraph Reef, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 87, p. 9 (1892).

3870. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Try again Reef, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 69 (1898).

3871. ——. In quartz. Beaconsfield, Howard's, Malakoff, Queen, and Sunny South Mines, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 8 (1892), and 120, pp. 64, 66, 70 (1898).

3872. ——. *Assoc.with* Ironstone, on surface of lode. *Loc.* Spur of Mt. Gammie, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 40, p. 3 (1887).

3873. ——. In laterite. Freestone Cr., trib. of Glengallan Cr., 9 miles N.N.E. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 186, p. 21 (1903).

3874. ——. In laterite. Mt. Sturt, 2 miles N.N.W. of Yangan Rail. Stn. (Killarney line), 15 miles (by rail and road) E.byN. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 186, p. 20 (1903).

3875. ——. In quartz. Lady Mary Reef, 1½ mile S.E. of Bray's Camp, nr. head of Sandy Cr., 22 miles S.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 87, p. 9 (1892).

3876. ——. *Assoc.with* Cuprite, Tile Ore, Tenorite, Malachite, Atacamite, Chalcanthite, Iron Pyrites, Limonite, Calcite, and Chalcedony, in kaolinised slate and gossan. *Loc.* Mt. Elliott Copper Mine, **Mt. Elliott** Group, Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 3-12 (1908).

3877. —— In quartz. Herbert R., Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns line), **Walsh and Tinaroo Mineral Fields.** *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.M.

3878. ——. *Assoc.with* Silver, Copper Pyrites, Iron Pyrites, Mispickel, Bornite, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Hematite, Magnetite, Cerussite, Minium, and Zinc Blende, in quartz lodes in quartzites and porphyry. *Loc.* Mt. Garnet Mines, Return Cr., 136 miles (by rail) S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

3879. ——. In quartz reefs. **Balcooma Goldfield,** 80 miles E.S.E. of Georgetown. *Co.* Clarke; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 15, p. 49 (1900).

3879A. ——. In quartz. Golden King, Lucky Surprise, Mint, Orient P.C., and Try Again United Mines, **Lucky Downs** (Cr.) Diggings, 56 miles S.E. of Einasleigh Rail. Stn., 96 miles E.S.E. of Georgetown. *Co.* Clarke; *Dist.* Kennedy North. *Ref.* A.R.D.M., p. 38 (1908).

3879B. ——. In quartz. **Allandale Prov. Goldfield,** 38 miles S.W.byS. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* A.R.D.M., p. 34 (*map*) (1905).

3880. ——. In quartz. **Carrington Goldfield,** 20 miles S.S.W. of Charters Towers Goldfield. *Co.* Davenport (*ante*). *Ref.* A.R.D.M., p. 34 (*map*) (1905).

3881. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. Alexandra Hill G.M. Co.'s Mine, Charters Towers, 82 miles (by rail) S.W. byS. of Townsville. *Co.* Davenport (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

3882. ——. *Assoc.with* Iron Pyrites, and Galena, in quartz. *Loc.* Band of Hope Lease (Victoria Reef), **Charters Towers Goldfield** (*ante*). *Ref.* W.C.T.

3883. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Blue Peter Lease and No. 1 E. (Blue Peter Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3884. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Bonnie Doon Lease, Bonnie Doon Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3885. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Bonnie Dundee Lease, Queen, Victory, and Brilliant Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3886. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Brilliant Block Lease, Brilliant Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3887. ——. *Assoc.with* Iron Pyrites and Galena, in quartz.. *Loc.* Brilliant Central G.M. Lease, Brilliant, Victory, and Queen Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3888. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Brilliant Extd. Lease, Brilliant Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3889. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Brilliant P.C., Brilliant Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3890. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Brilliant and St. George Utd. G.M. Co. Lease, St. George, Brilliant and Victory Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3891. ——. *Assoc.with* Iron Pyrites, Zinc Blende, Galena, and Chlorite, in quartz. *Loc.* Byran O'Lynn Mine, Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, pp. 36, 49 (1887).

3892. ——. In quartz reef. Caroline Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3893. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Carrington Lion 1 and 2 E. Lease, Lion Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3894. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, Zinc Blende, and Barytes, in quartz and calcite. *Loc.* Carrington Untd. Mines Ltd. Lease, Lion Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3895. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Clark's Brilliant, Worcester, and Victory Leases, Victory Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3896. ——. *Assoc.with* Iron Pyrites, and Galena, in quartz reef. *Loc.* Craven's Caledonia Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3897. ——. *Assoc.with* Galena and Iron Pyrites, in quartz reef. *Loc.* Dan O'Connell Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3898. Gold. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Day Dawn Block and Wyndham Lease, Day Dawn and Wyndham Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3899. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Day Dawn Gold Mines Ltd. Lease, Day Dawn Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3900. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Day Dawn P.C., Day Dawn, Talisman, Peabody, and North Australian Reefs, Charters Towers Goldfield (*ante*). *Refs.* W.C.T. and A.R.D.M., p. 33 (1894).

3901. ——. *Assoc.with* Iron Pyrites, Zinc Blende, and Galena, in quartz reef. *Loc.* Day Dawn 3A West, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3902. ——. *Assoc.with* Iron Pyrites, in quartz reef. Day Dawn 5 W. Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3903. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Deep Levels Mines of Charters Towers, Brilliant Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3904. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* East Mexican G.M. Lease (Day Dawn and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3905. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Golden Alexandra Lease, Golden Alexandra Reef, Charters Towers Goldfield (*ante*) *Ref.* W.C.T.

3906. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Golden Gate Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3907. ——. *Assoc.with* Iron Pyrites and Zinc Blende, in quartz. *Loc.* Hope Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3908. ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Imperial G.M. Lease, Imperial Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3909. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Kelly's Queen Block Lease, Brilliant and Victory Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3910. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Lady Maria Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3911. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Mafeking P.C. G.M. Lease, Mafeking Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3912. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Marshall's Queen G.M. Lease, Queen, Brilliant, and Victory Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3913. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Mary and Rainbow Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3914. ——. *Assoc.with* Ironstone, in quartz. *Loc.* McColl's Just-in-Time P.C., Just-in-Time Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3915. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Millchester G.M. Lease, Old Identity Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3916. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Millet's Wellington Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3917. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Mills's Day Dawn United G.M. Lease, Day Dawn Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3918. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* New Brilliant Freeholds G.M. Lease, Day Dawn and Brilliant Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3918A. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* New Cravens Caledonia G.M. Lease, Caledonia, Just-in-Time, and Victoria Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3919. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz. *Loc.* New Imperial Mine, Charters Towers Goldfield (*ante*). *Assay:* Gold = 8·4 oz. per ton. *Ref.* A.R.D.M., p. 185 (1894).

3920. ——. *Assoc.with* Iron Pyrites and Galena, in quartz and calcite. *Loc.* New Queen G.M. Lease, Queen, Brilliant, and Victory Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3921. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* New Towers Extd. Mine, Charters Towers Goldfield (*ante*). *Yield:* Gold = 3·25 oz. per ton. *Ref.* A.R.D.M., p. 185 (1894).

3922. ——. *Assoc.with* Iron Pyrites, Zinc Blende, Bartyes, in quartz. *Loc.* Old Identity Mine, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 36 (1887), and G.S.M.

3923. ——. *Assoc.with* Iron Pyrites and Zinc Blende, in quartz. *Loc.* Old Imperial Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3924. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Papua Block Mine, Victory Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3925. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Papuan, Brilliant, and Victoria G.M. Lease, Brilliant, Victoria, and Victory Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3926. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Pfeiffer's Day Dawn Lease, Day Dawn Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3927. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Phœbe G.M. Lease, Victory and Brilliant Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3928. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Queen Central G.M. Lease, Victoria Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3929. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Queen Central Block G.M. Lease, Victoria Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3930. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Queen Deep Mines Lease, Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3931. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Queen's Cross G.M. Lease, in Victoria and Just-in-Time Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3932. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Quinn's Block G.M. Lease, Millchester Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3933. ——. *Assoc.with* Iron Pyrites and Galena, in quartz and calcite. *Loc.* Roger's Millchester Block, Millchester Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3934. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Ruby G.M. Lease, Ruby and Rose of England Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3935. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Ruby United G.M. Lease, Ruby Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3936. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Stockholm (Brilliant G.M.) Lease (Stockholm Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3937. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* St. Patrick Block Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 28 (1879).

3938. ——. In quartz reef. St. Patrick Extd Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3939. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Sunburst P.C., Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

3940. ——.*Assoc.with* Iron Pyrites, in quartz. *Loc.* Talisman and New Dawn G.M. Lease, Peabody and North Australian Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3941. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Union Jack Consld. Mines, Victoria Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3942. ——. *Assoc.with* Iron Pyrites, Mispickel, and Galena, in quartz. *Loc.* Victoria Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3943. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Victoria and Caledonia Block Lease, Just-in-Time and Victoria Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3944. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Victoria and Queen G.M. Lease, Victoria and Caledonia Reefs, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3945. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Victory, Charters Towers G.M. Lease, Victory and Brilliant Reefs, Charters Towers Goldfield (*ante*). Average thickness of stone = 2 ft. Average value per ton = £4. *Ref.* W.C.T.

3946. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Victory G.M. Lease, Victory Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3947. Gold. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Wallis's Day Dawn Lease, Day Dawn Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3948. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Blue Peter Reef, in Blue Peter and Blue Peter No. 1 E. G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3949. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Bonnie Doon Reef, in Bonnie Doon Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3950. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Brilliant Reef, in Brilliant and St. George Utd.; Brilliant Central; Brilliant North; Brilliant Block; Brilliant Extd.; Brilliant P.C.; Bonnie Dundee; Charters Towers Deep Level Mines; East Mexican; Kelly's Queen Block; Marshall's Queen; New Brilliant Freeholds; New Queen; Papuan Brilliant and Victoria; Phœbe; and Victory, Charters Towers G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.Q. Pub. 224, p. 20 (1909).

3951. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Caledonia Reef, in New Craven's Caledonia; and Victoria and Queen G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3952. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Day Dawn Reef, in Day Dawn Block and Wyndham; Day Dawn Gold Mines; Day Dawn School Reserve (Mills's United); Day Dawn P.C.; East Mexican; Mills's Day Dawn United; New Brilliant Freeholds; Pfeiffer's Day Dawn; and Wallis's Day Dawn G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T., and G.S.Q. Pub. 224 (1909).

3953. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Golden Alexandra Reef, in Golden Alexandra Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3954. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Hit or Miss Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3955. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Hope Reef, Millchester, 2 miles E.S.E. of Charters Towers, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3956. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Imperial Reef, in Imperial G.M. Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3957. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Just-in-Time Reef, in New Craven's Caledonia; Queen's Cross; and Victoria and Caledonia Block G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T., and G.S.M.

3958. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, Zinc Blende, and Barytes, in quartz and calcite. *Loc.* Lion Reef, in Carrington Lion 1 and 2 E. and Carrington United Mines, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3959. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Mafeking Reef, in Mafeking P.C., Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3960. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Mexican Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 28 (1879).

3961. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Millchester Reef, in Quinn's Block G.M. Lease and Roger's Millchester Block, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3962. ——. *Assoc.with* Iron Pyrites, Calcite, Gypsum, and Chalcedony, in quartz. *Loc.* North Australian Reef, in Talisman and New Dawn, and Day Dawn G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T., G.S.M., and P.R.S.Q., vol. 4, p. 36 (1887).

3963. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Old Identity Reef, in Millchester G.M. Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

3964. ——. *Assoc.with* Selenite, in quartz. *Loc.* Old Warrior Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

3965. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Peabody Reef, in Talisman and New Dawn, and Day Dawn P.C. G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3966. ——. *Assoc.with* Iron Pyrites, Galena, Zinc Blende, Calcite, Gypsum, and Chlorite, in quartz. *Loc.* Queen Reef, in Brilliant Central, Bonnie Dundee, Marshall's Queen, New Queen, Queen Deep, and Bryan O'Lynn G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 26 (1879); P.R.S.Q., vol. 4, pp. 36-47 (1887), G.S.M., and W.C.T.

3967. ——. *Assoc.with* Iron Pyrites, in quartz *Loc.* Queenslander Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3968. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Rainbow Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3969. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Rose of England Reef, in Ruby G.M. Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3970. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Ruby Reef, in Ruby and Ruby United G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3971. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* St. George Reef, in Brilliant and St. George United G.M. Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3972. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Copper carbonate, Galena, and Zinc Blende, in quartz. *Loc.* Stockholm or Comstock Reef, in Stockholm (Brilliant) Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and P.R.S.Q., vol. 4 (1887).

3973. ——. *Assoc.with* Iron Pyrites and Galena, in serpentinous quartz. *Loc.* Sunlight Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

3974. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Talisman Reef, in Day Dawn P.C., Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3975. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Victoria Reef, in Band of Hope; New Craven's Caledonia; Papuan Brilliant and Victoria; Queen Central; Queen Central Block; Queen's Cross; Union Jack Consld. Mines; Victoria and Queen; and Victoria and Caledonia Block G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3976. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Victory Reef, in Brilliant and St. George Utd.; Brilliant Central; Bonnie Dundee; Clark's Brilliant; Worcester; and Victory; Kelly's Queen Block; Marshall's Queen; New Queen; Papuan Brilliant and Victoria; Phœbe; and Victory, Charters Towers G.M. Leases, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

3976A. ——. *Assoc.with* Silver, Anglesite, Massicot, and Cerussite, in lode. *Loc.* nr. Bluff Stn., 9 miles S.E. of Mt. Leyshon, 22 miles S.S.E. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* A.R., p. 260 (1910).

3976B. ——. *Assoc.with* Silver, Galena, Cerussite, and Limonite, in lode. *Loc.* ¾-mile E. of Mt. Leyshon, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

3976C. ——. *Assoc.with* Silver, Galena, Anglesite, Massicot, and Cerussite, in lode. *Loc.* Right-hand br. of One-mile Gully, 1½ mile S.E. of Mt. Leyshon. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

3977. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Galena, in quartz. *Loc.* Livingstone Reef, 1 mile S.S.E. of Bluff Stn., nr. Mt. Leyshon, 19 miles S.E.byS. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

3977A. —— in Arsenic, in quartz. *Loc.* Mary Lou Mine, 3 miles S.W. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* E.O.M.

3978. ——. *Assoc.with* Manganese-dioxide, in quartz. *Loc.* ½-mile N.E. of Mt. Deane, 6 miles E.byS. of Mt. Leyshon, 20 miles S.S.E. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

3979. ——. *Assoc.with* Iron Pyrites, Magnetite, Hematite, Limonite, Chalcanthite, Manganese-dioxide, and Talc, in quartz, quartzite, kaolin, volcanic breccia and porphyry rock. *Loc.* Mt. Leyshon Mine, 17 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.M., and G.S.Q. Pubs. 18, p. 2 (1885), and 73, p. 13 (1891).

3980. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Copper carbonates, in quartz. *Loc.* Mt. Leyshon Mine (*ante*). Average value per ton = 17s. 6d. *Ref.* W.C.T.

3981. ——. In vein of iron pyrites and quartz. Mt. Mawe, E. of Mt. Leyshon, 16 miles E.S.E. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 18, p. 2 (1887).

3981A. ——. Newhaven Prov. Goldfield, 24 miles W.N.W. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* A.R.D.M., p. 34 (*map*) (1905).

3982. ——. In porphyry. Wallaby Point, 1½ mile S. of Mt. Leyshon, 18½ miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pub. 73, p. 13 (1891).

3983. ——. In ironstone. Above Cornish Jim's Tunnel, Pyramids or Seventy-mile Diggings, 3 miles N.byE. of Mt. Leyshon, 19 miles S. of Charters Towers (*ante*). *Ref.* G.S.M.

3984. ——. *Assoc.with* Iron Pyrites, Pyrrhotite (?), and Hematite. *Loc.* Greasy Bill's Reef, Pyramids or Seventy-mile Diggings (*ante*). *Yield:* Gold = 13 oz. per ton (?). *Ref.* G.S.Q. Pub. 1, p. 19 (1879).

3985. Gold. *Assoc.with* Iron Pyrites, Galena, and Pyrrhotite. *Loc.* Swan's Reef (late Cornish Jim's), Pyramids or Seventy-mile Diggings (*ante*). *Yield:* Gold = 100 oz. per ton (?). *Ref.* G.S.Q. Pub. 1, p. 19 (1879).

3986. ——. *Assoc.with* Silver, in quartz reef. *Loc.* Pyramids or Seventy-mile Diggings (*ante*). *Assay:* Gold = 6 oz. per ton; Silver = 16 oz. per ton. *Ref.* G.S.M.

3987. ——. *Assoc.with* Iron Pyrites. *Loc.* Top of Range, between the Charters Towers and Ravenswood Roads, nr. Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 2, p. 2 (1879).

3988. ——. In quartz. Windsor Block Mine, and Windsor Gold Mines, **Windsor Goldfield**, 22 miles S.S.W. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* A.R.D.M., p. 33 (1903).

3989. ——. *Assoc.with* Galena, etc., in quartz. *Loc.* Severn Reef, Broughton, 10 miles E.byS. of Charters Towers. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

3990. ——. In quartz. Bank of England Lease, **Far Fanning**, 28 miles (by road) N.W. of Ravenswood Junction. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 133, p. 7 (1898).

3991. ——. *Assoc.with* Iron Pyrites, Mispickel, and Copper Pyrites, in quartz. *Loc.* Good Luck United (Lancashire Lass No. 1 W.) Mine, Far Fanning (*ante*). *Ref.* G.S.Q. Pub. 133, p. 7 (1898).

3992. ——. In quartz. Kitty O'Shea Mine, Far Fanning (*ante*). *Ref.* G.S.Q. Pub. 133, p. 8 (1898).

3993. ——. *Assoc.with* Iron Pyrites and Limonite, in quartz. *Loc.* Lancashire Lass Mine, Far Fanning (*ante*). *Ref.* G.S.Q. Pub. 133, p. 6 (1898), and G.S.M.

3994. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Spotted Calf Mine, Far Fanning (*ante*). *Ref.* G.S.Q. Pub. 133, p. 7 (1898), and G.S.M.

3995. ——. In quartz. Union Mine, Far Fanning (*ante*). *Ref.* G.S.Q. Pub. 133, p. 8 (1898).

3996. ——. *Assoc.with* Iron Pyrites, Malachite, Hematite, and Garnet. *Loc.* Hein's Lode, Limestone Range, W. of Double-Barrel Cr., 27 miles S.byW. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 77, p. 7 (1891), and G.S.M.

3997. ——. In quartz. Dot or Spark's Reef, at foot of Spur, Mt. Cook, **Magnetic Is.**, 5½ miles N. of Townsville. *Co.* Elphinstone (*ante*). *Assay:* Gold = 2 oz. 2 dwt. 1 gr. per ton; Silver = 11 dwt. 10 gr. per ton. *Ref.* G.S.Q. Pub. 75, p. 6 (1892), and G.S.M.

3998. ——. In quartz. Frederick Reef, head of Knight's Gully, Magnetic Is., (*ante*). *Ref.* G.S.Q. Pub. 75, p. 6 (1892).

3999. ——. In quartz. Head of Camoomilli Cr., Magnetic Is. (*ante*). *Ref.* G.S.Q. Pub. 75, p. 6 (1892).

4000. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* On beach E. of Hawking's Point, Magnetic Is. (*ante*). *Ref.* G.S.Q. Pub. 75, p. 7 (1892).

4001. ——. *Assoc.with* Iron Pyrites, in quartz reef. On flanks of Mt. Cook, Magnetic Is. (*ante*). *Ref.* G.S.Q. Pub. 75, p. 6 (1892).

4002. ——. *Assoc.with* Iron Pyrites and Zinc Blende, in quartz. *Loc.* Mt. Elliott, 20 miles S.E.byS. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

4003. ——. *Assoc.with* Iron Pyrites, Limonite, and Zinc Blende, in quartz and calcite. *Loc.* Golden Valley Reef, **Mt. Success**, 15 miles N.N.W. of Ravenswood Junction (Gt. Northern line). *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 133, p. 10 (1898), and G.S.M.

4004. ——. *Assoc.with* Silver, in lode 36 ft. wide. *Loc.* Lease (278), Mt. Success (*ante*). *Estimated Contents:* Gold = 2½ oz. per ton; Silver = 6 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 58 (1897).

4005. ——. *Assoc.with* Silver, in lode 75 ft. wide. *Loc.* Little's Lease (280), Mt. Success (*ante*). *Estimated Contents:* Gold = 1 oz. per ton; Silver = 10 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 58 (1897).

4006. ——. *Assoc.with* Iron Pyrites and Zinc Blende, in quartz. *Loc.* Mt. Success Reef, Mt. Success (*ante*). *Ref.* G.S.Q. Pub. 133, p. 9 (1898), and G.S.M.

4007. ——. In quartz. Castle Hill, Townsville, 854 miles N.W. of Brisbane. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

4008. ——. *Assoc.with* Galena and Zinc Blende, in quartz and calcite. *Loc.* Donnybrook Reef, Donnybrook Mining Centre, 6½ miles S. of Ravenswood Rail. Stn., **Ravenswood Goldfield.** *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

4009. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Erin's Hope Reef, Donnybrook Mining Centre (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1898).

4010. ——. In quartz. Day Dawn Reef, Donnybrook Mining Centre (*ante*). *Ref.* G.S.M.

4011. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz. *Loc.* New Consols Mine, Nil Desperandum Reef, Donnybrook Mining Centre (*ante*). *Assay:* Gold = 2 oz. 2 dwt. 2 gr. per ton; Silver = 10 oz. 18 dwt. per ton. *Ref.* G.S.M.

4011A.——. In quartz. Old Man and Beaumont Reefs, Four-mile Cr., 2 miles W. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

4012. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. J.R.D. and Premier Reefs, Hillsborough (8-Mile), 3¾ miles N.N.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 9 (1900), and G.S.M.

4013. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* Wey Reef, Hillsborough (8-Mile) (*ante*). *Ref.* G.S.M.

4014. ——. In quartz. Three Sisters Extd. and 1 S. Mines, and Crescent P.C., Kirk Diggings, 15 miles W. of Ravenswood, Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* A.R.D.M., p. 101 (1907).

4015. ——. *Assoc.with* Cerargyrite (Horn Silver). Old Silver Mine at One Mile, about 1¼ mile N. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* B.D.

4016. ——. *Assoc.with* Silver, Galena, and Cerussite, in quartz. *Loc.* Ravenswood Silver M. Co.'s Mine, One Mile, Ravenswood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 47 (1887), and G.S.Q. Pub. 125, p. 34 (1897).

4017. ——. *Assoc.with* Iron Pyrites. *Loc.* Beaconsfield Mine, Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

4018. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Black Jack Reef, ¼-mile N.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900), and G.S.M.

4019. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Tenorite, Malachite, Mispickel, and Zinc Blende, in quartz. *Loc.* Buck Reef, ½-mile S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Assay:* Gold = 2 oz. per ton. *Ref.* P.R.S.Q., vol. 4, pp. 53, 76 (1887), and G.S.Q. Pub. 152, p. 8 (1900).

4020. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Crescent S.M. Lease, New Moon Reef, Ravenswood Goldfield (*ante*). *Ref.* W.C.T.

4021. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* General Grant Reef, ½-mile S. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

4022. ——. In quartz.. Golden Crown Reef, Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

4023. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* London Reef, Elphinstone Cr., about 7 chains S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

4024. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Zinc Blende. *Loc.* New England No. 1 S. Mine, Elphinstone Cr., ¼-mile N.W. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* A.R.D.M., p. 34 (1894).

4025. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Zinc Blende. *Loc.* New England Reef, Elphinstone Cr., ¼-mile N.W. of Ravenswood Rail. Stn. (*ante*). *Analysis: See* No. 5246. *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

4026. ——. *Assoc.with* Copper Pyrites, in quartz. *Loc.* New Idea Reef, Ravenswood Goldfield, 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

4027. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Saratoga Mine, ¼-mile S.E. byS. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Yield:* Gold = 25 oz. per ton. *Ref.* G.S.Q. Pub. 152, p. 7 (1900), and G.S.M.

4028. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Shellmalier Reef, 30 chains N.byE. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Yield:* Gold = 6 oz. per ton. *Ref.* G.S.Q. Pub. 152, p. 8 (1900), and G.S.M.

4029. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Sunset and General Grant Reef, ½-mile S. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 183, pp. 2-6 (1903).

4030. ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Sunset Reef, ½-mile S. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 ((1900).

4031. Gold. *Assoc.with* Iron Pyrites, etc., in quartz. *Loc.* Union Jack Mine, ¾-mile N.E.byN. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

4032. ——. *Assoc.with* Copper Pyrites and Zinc Blende, in quartz. *Loc.* Wild Irish Girl Mine, New England Reef, ¼-mile N.W. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

4033. ——. In quartz. Deep Mines and Saratoga Leases (406 and 537), Golden Hill Lease (415), Grand Junction Consols Leases (503 and 520), London P.C. Lease (399), Overlander Lease (741), B.B. Extd. Mine, etc., Ravenswood Goldfield, 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* A.R.D.M., pp. 98, 99 (1907).

4034. ——. In quartz. *Loc.* Hadleigh Castle Mine and Captain P.C., Rochford Mining Centre, 18 miles W.byS. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* A.R.D.M., p. 89 (1896).

4035. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz. *Loc.* Australia Felix Mine, 2½ miles E.S.E. of Ravenswood Rail. Stn., Sandy Cr., Ravenswood Goldfield (*ante*). *Assay:* Gold = 20 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 35 (1887).

4035A.——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Cousin Jack Reef, 2¼ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. Mining Centre (*ante*). *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

4036. ——. *Assoc.with* Iron Pyrites and Galena. *Loc.* Fanny Fern Mine, 2½ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Yield:* Gold = 6 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 35 (1897).

4037. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* John Bull Reef, about 3 miles E.S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* G.S.Q. Pub. 152, p. 8 (1900), and G.S.M.

4038. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in quartz and steatite. *Loc.* Politician Mine, 2½ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 48 (1887), and G.S.Q. Pub. 152 p, 9 (1900).

4039. ——. *Assoc.with* Silver and Galena, in lead ochre. *Loc.* Comstock Silver Mine, 3½ miles S.E.byS. of Ravenswood Rail. Stn., and about 1 mile E. of Sandy Cr., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Assays:* (1) Gold = 1 oz. 13 dwt. per ton; Silver = 19 oz. 12 dwt. per ton; Lead = 14 per cent. (2) Silver = 81¾ oz. per ton; Lead = 73·5 per cent. *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

4040. ——. *Assoc.with* Iron Pyrites, Galena, and Cerussite, in quartz. *Loc.* Star of the South Reef, Connolly Cr., Trieste Mining Centre, 12 miles S.W.byS. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1900), and G.S.M.

4041. ——. In quartz. *Loc.* Tingleairy Extd. Mine, Trieste Mining Centre (*ante*). *Ref.* A.R.D.M., p. 100 (1907).

4042. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Trieste Reef, Trieste Mining Camp (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1900), and G.S.M.

4043. ——. *Assoc.with* Iron Pyrites. *Loc.* Mt. Wright, 6 miles N. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

4044. ——. Strathalbyn Goldfield, 30 miles E.byS. of Ravenswood. *Co.* Gladstone (*ante*).

4044A.——. In quartz. **Allandale Prov. Goldfield,** about 3 miles S.E. of Thalanga Rail. Stn., 44 miles (by rail and road) S.W.byW. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* A.R.D.M., p. 34 (*map*) (1905).

4045. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* General Grant Reef, Mt. Davenport, 4 miles N.W. of Cape R. Rail. Stn., **Cape R. Goldfield.** *Co.* Griffith (*ante*). *Ref.* G.S.Q. Pub. 73, p. 2 (1891), and G.S.M.

4046. ——. *Assoc.with* Iron Pyrites and Hematite, in quartz. *Loc.* Union Reef, between Mt. Davenport and Davenport Cr., 4 miles N.W. of Cape R. Rail. Stn., Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 7, p. 2 (1891), and G.S.M.

4047. ——. *Assoc.with* Ironstone, in quartz *Loc.* Barcoo Reef, Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn., Gt. Northern line, 72 miles (by rail and road) S.W.byW. of Charters Towers, Cape R. Goldfield (*ante*) *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

4048. ——. *Assoc.with* Iron Pyrites, Galena, and Copper Pyrites, in quartz. *Loc.* Bell-Gay Reef, Mt. Remarkable (*ante*). *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

4049. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Martin's Reef, Mt. Remarkable (*ante*). *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

4050. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Governor Blackall and Victoria Reefs, Mt. Remarkable (*ante*). *Ref.* G.S.Q. Pub. 73, p. 4 (1891).

4051. ——. In quartz. Commissioner's, Duchess, Lone Star, and Morning Star Reefs, Mt. Remarkable (*ante*). *Ref.* G.S.Q. Pub. 73, pp. 3-5 (1891).

4052. ——. In quartz and kaolin leaders. Red, White, and Blue Claim, Paddy's Gully, Mt. Remarkable (*ante*). *Ref.* G.S.Q. Pub. 73, p. 6 (1891).

4052A.——. *Assoc.with* Silver, with traces of copper, lead, and bismuth. *Loc.* Paddy's Gully, Mt. Remarkable (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 37 (1887).

4053. ——. In quartz. Big Reef and Just-in-Time Reef, Pentland, 66 miles (by rail) S.W.byW. of Charters Towers, Cape R. Goldfield. *Co.* Griffith (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

4054. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Hayward Reef, Pentland (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

4055. ——. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Mystery Reef, Pentland (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

4056. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Hughes's Leader and Sarah Howson Reef, Pentland (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

4057. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Golden Hill Reef, "Springs." 2 miles W.S.W. of Pentland Rail. Stn., 68 miles (by rail and road) S.W.byW. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 4 (1891).

4058. ——. *Assoc.with* Limonite, in quartz. *Loc.* Springs Reef, "Springs" (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

4059. ——. *Assoc.with* Ironstone, Galena, and Iron Pyrites, in quartz. *Loc.* Harp of Erin Reef, Upper Cape Diggings, 17 miles W.byN. of Cape R. Rail. Stn., 77 miles (by rail and road) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

4060. ——. *Assoc.with* Galena, in quartz. *Loc.* Occidental Reef, Upper Cape Diggings, Cape River Goldfield. *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

4061. ——. *Assoc.with* Iron Pyrites and Ironstone, in quartz. *Loc.* Wheel of Fortune Reef, Upper Cape Diggings (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

4061A.—— (wire). *Assoc.with* Silver and Calcite, and with traces of copper, lead, and iron, in quartz. *Loc.* Upper Cape Diggings (*ante*). *Ref.* P.R.S.Q., vol. 4 (1887).

4062. ——. In veinlets of quartz. Green's Specimen Reef, on spur of Mt. Elvan, 1 mile N. of Upper Cape Diggings, 18 miles W.byN. of Cape Rail. Stn., Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 8 (1891).

4063. ——. In quartz leaders. Daunton's Hill, Gorge Cr., Mt. Elvan (*ante*). *Ref.* G.S.Q. Pub. 73, p. 8 (1891).

4064. ——. In quartz leaders. Surface Hill, Gorge Cr., Mt. Elvan (*ante*). *Ref.* G.S.Q. Pub. 73, p. 8 (1891).

4065. ——. *Assoc.with* Manganese-dioxide and Iron Pyrites, in quartz. *Loc.* Lissner Reef, 7 miles W.N.W. of Lamond's Rail. Stn., Gt. Northern line, 41 miles (by rail and road) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 13 (1891).

4066. ——. In quartz. Ada Reef, New **Homestead Diggings**, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith (*ante*). *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

4067. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Galena, in quartz. *Loc.* Agnes Howson Reef, New Homestead Diggings (*ante*). *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

4068. ——. In quartz. Callaghan, Evening Star, and Wild Scotchman Reefs, New Homestead Diggings (*ante*). *Ref.* G.S.Q. Pub. 73, pp. 5-12 (1891).

4069. ——. In quartz. Denison's, Klasted and Party's, Lind and Party's, and Whistling Tom Reefs, Old Homested Diggings, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

4070. ——. *Assoc.with* Mispickel. *Loc.* High Bar Reef, Old Homestead Diggings (*ante*). *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

4071. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Higham Reef, Old Homestead Diggings (*ante*). *Ref.* G.S.M.

4072. ——. *Assoc.with* Silver, Iron Pyrites, Redruthite, Copper carbonate, and Galena, in quartz. *Loc.* Main's Reef, Old Homestead Diggings (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 73, p. 11 (1891), and G.S.M.

4073. Gold. *Assoc.with* Cuprite, Malachite, and Hematite. *Loc.* Copper King Mine, **Happy Valley,** 1½ mile from Lamington Mine, 41½ miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Assay:* Gold = 1 dwt. 13 gr. per ton; Copper = 2 per cent. *Ref.* A.R., p. 62 (1906).

4074. ——. *Assoc.with* Copper, in ferruginous quartz. *Loc.* Albion Reef, **Marengo Goldfield,** 24 miles S.S.W. of Bowen. *Co.* Herbert (*ante*). *Ref.* G.S.Q. Pub. 5, p. 12 (1879).

4075. ——. *Assoc.with* Carbonate of Copper. *Loc.* Manchester Reef, Marengo Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 12 (1879).

4076. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Copper carbonate, Yellow Ochre, in quartz. *Loc.* Seymour's Reef, Marengo Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

4077. ——. *Assoc.with* Silver, Iron Pyrites, Copper Pyrites, Azurite, and Malachite, in quartz. *Loc.* Venture Reef, Marengo Goldfield (*ante*). *Assay:* Gold = 1 oz. 6 dwt. 3 gr., Silver = 6 oz. 12 dwt. per ton. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

4078. ——. *Assoc.with* Tourmaline (fibrous), in quartz vein. *Loc.* Morres's Run, near Euri Cr., 18 miles W.S.W. of **Bowen.** *Co.* Herbert; *Dist.* Kennedy North. *Ref.* G.S.M.

4078A. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Limonite, in quartz. *Loc.* Lady Augusta P.A. (129), Moss Vale Stn., nr. Euri Cr., about 7 miles S.W. of Bowen. *Co.* Herbert (*ante*). *Ref.* A.R., p. 269 (1910).

4079. ——. In serpentine. Burdekin, 9 miles above Cardigan Stn., Charters Towers. *Co.* Murray; *Dist.* Kennedy North. *Ref.* G.S.M.

4080. ——. In quartz. Canton Reef, nr. Canton Range, 13 miles S. of Ravenswood Rail. Stn. *Co.* Murray (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 152, p. 10 (1900).

4081. ——. In quartz leader Albion, Clinker, and Queenslander Reefs, **Dreghorn Diggings,** 15 miles S. of Ravenswood Rail. Stn. *Co.* Murray (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

4082. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Currency Reef, Dreghorn Diggings (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

4083. ——. *Assoc.with* Hematite and Iron Pyrites, in quartz. *Loc.* Ellen Boss Reef, Dreghorn Diggings (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

4084. ——. *Assoc.with* Copper Pyrites and Malachite, in quartz. *Loc.* Overland Reef, between Dreghorn and Burdekin R., 14 miles S. of Ravenswood Rail. Stn. *Co.* Murray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

4085. ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, and Chalcanthite, in quartz reef in granite. *Loc.* Continong Mine, Burdekin R., 70 miles W. of Townsville. *Co.* O'Connell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 35, p. 12 (1887), and G.S.M.

4086. ——. In quartz reef. On Bowen-Normanby road, Don R., towards spur of Bode's Range, 6 miles S. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 88, p. 5 (1893).

4087. ——. *Assoc.with* Silver and Iron Pyrites, in quartz reef. *Loc.* Bowden Sel. (147), **Star R. (Argentine) Mineral Field,** 50 miles (by coach) N.W. of Ravenswood Junction, Gt. Northern line, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.M.

4088. ——. *Assoc.with* Tenorite and Malachite, in quartz reef. *Loc.* Excelsior Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886), and G.S.M.

4089. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Gt. Kennedy Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.M.

4090. ——. In quartz reef. Nil Desperandum Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.M.

4091. ——. In quartz reef. Southern Cross Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886), and G.S.M.

4092. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Struck Oil Lode, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886), and G.S.M.

4093. ——. *Assoc.with* Galena and Hematite, in quartz. *Loc.* Thermopylæ Reef, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

4094. ——. *Assoc.with* Iron Pyrites, Galena, Cerussite, Anglesite, Minium, Siderite, and Zinc Blende, in quartz reef. *Loc.* Union Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886), and G.S.M.

4095. ——. In quartz. Piccadilly P.C., **Piccadilly Goldfield,** 60 miles N.W. of Ravenswood Junction. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* A.R.D.M., p. 102 (1907).

4096. ——. In ironstone quartz reef. *Loc.* Uncle Leaper P.C., Alligator Cr., 10 miles S.byE. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Assays:* (1) Gold = 31 oz. 10 dwt., (2) Gold = 15 oz. 10 dwt., (3) Gold = 27 oz. 15 dwt., Silver = 2 oz. 16 dwt. per ton. *Refs.* A.R.D.M., p. 56 (1889), and G.S.Q. Pubs. 54, p. 3 (1889), and 93, p. 8 (1893).

4097. ——. In quartz. Annie, Coral Tree 1 E. and 1 W., Eureka, Highland Mary 1 E. and Martin's Mines, Bee Cr. Diggings, Broken R., **Eungella Goldfield,** 10 miles W. of Finch Hatton Rail. Stn. (Mackay line), 48 miles W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 3 (1889), 229, p. 29 (1910).

4097A.——. *Assoc.with* Iron Pyrites, Copper Pyrites, Limonite, Turgite, Ironstone, and Galena, in quartz. *Loc.* Broken R. Gold and Silver Co.'s Mine, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pubs. 54, pp. 2, 3 (1889), 229, pp. 31, 32 (1910).

4097B.——. *Assoc.with* Iron Pyrites and Wulfenite, in quartz. *Loc.* Buttercup Reef, Bee Cr. Diggings. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 229, p. 28 (1910).

4098. ——. *Assoc.with* Iron Pyrites, Siderite, Zinc Blende, and Galena, in quartz reef. *Loc.* Coral Tree P.C., Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), 229, p. 29 (1910).

4099. ——. *Assoc.with* Iron Pyrites, in quartz. Golden Crown Mine, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

4099A.——. *Assoc.with* Limonite and Malachite, in quartz. *Loc.* Highland Chief Reef, Bee Cr. Diggings (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 229, p. 30 (1910).

4100.——. *Assoc.with* Iron Pyrites, Limonite, Siderite, Copper Pyrites, Malachite, Galena, and Zinc Blende, in ferruginous quartz. *Loc.* Highland Mary P.C., Bee Cr. Diggings (*ante*). *Ref.* (and *Assay*) G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 30 (1910).

4101. ——. *Assoc.with* Silver, in quartz. *Loc.* Junction P.C., Bee Cr. Diggings (*ante*). *Assay:* Gold = 2 oz. per ton; Silver = 5 oz. per ton. *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

4101A.——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Landslip Reef, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 229, p. 30 (1910).

4101B.——. *Assoc.with* Galena, in gossany ore. *Loc.* Lord Nolan (Queen) Reef, Bee Cr. Diggings (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 229, p. 31 (1910).

4101C.——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Phœnix Mine, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

4102. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Queen Reef, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

4103. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Lady Norman Reef, left bank of Broken River, 10 miles S. of Bee Creek Diggings. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

4104. ——. *Assoc.with* Silver, in lode. *Loc.* Block (6), Eungella Run, Broken R., 30 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* O.M.

4105. ——. In quartz. Orchid Mine, Eungella Goldfield, 10 miles W. of Finch Hatton Rail. Stn. (Mackay line), 48 miles (by rail and road) W.S.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.M.

4106. ——. *Assoc.with* Copper Pyrites, Tile Ore, and Malachite, in lode. *Loc.* Shaft, nr. Old Orchid No. 1 N. Claim, Eungella Goldfield (*ante*). *Ref.* A.R., p. 155 (1908).

4107. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* One Mile, E. of Eungella Stn., Broken R., 30 miles W. of Mirani Rail. Stn. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

4108. ——. In quartz. Argonaut, Dickisson's, Lynch's, and Walsh's Leases, **Grass-tree Goldfield,** 17 miles S.byE. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 93, pp. 5-8 (1893).

4109. ——. In kaolin lode. Barker's Lease, Grass-tree Goldfield (*ante*). *Ref.* G.S.Q. Pub. 93, p. 4 (1893).

4110. ——. In veins of ironstone, in diorite dyke. *Loc.* Burton's Lease, Grass-tree Goldfield (*ante*). *Ref.* G.S.Q. Pub. 93, p. 7 (1893).

4111. ——. *Assoc.with* Limonite, in quartz. *Loc.* Captain Brown's Lease, Grass-tree Goldfield (*ante*). *Ref.* G.S.Q. Pub. 93, p. 8 (1893).

4112. ——. *Assoc.with* Ironstone, in veins of quartz, in felspathic quartzose lode. *Loc.* Golden Cross Lease, Grass-tree Goldfield (*ante*). *Ref.* G.S.Q. Pub. 93, p. 4 (1893).

4113. Gold. In felspathic and quartzose formation. *Loc.* Griffith and Black's Lease, Grass-tree Goldfield (*ante*). *Ref.* G.S.Q. Pub. 93, p. 5 (1893).

4114. ——. In lode, veined with quartz and ironstone. *Loc.* Logan's Lease, Grass-tree Goldfield (*ante*). *Ref.* G.S.Q. Pub. 93, p. 7 (1893).

4115. ——. In siliceous and felspathic lode. *Loc.* Taylor's Lease, Grass-tree Goldfield (*ante*).. *Ref.* G.S.Q. Pub. 93, p. 6 (1893).

4116. ——. In kaolin lode. Zelma Mine, Grass-tree Goldfield (*ante*). *Ref.* G.S.Q. Pub. 93, p. 2 (1893).

4117. ——. *Assoc.with* Ironstone, in quartz reef *Loc.* Bell's Sel. (615), S. of Mt. Chalona, 16 miles S.E.byS. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 39, p. 3 (1887).

4118. ——. *Assoc.with* Silver, Copper Pyrites, Hematite, Bismutite, and Mispickel, in quartz veins. *Loc.* Gold Workings, Mine Cr., nr. Black Waterhole Cr., 2 miles N.byE. of Hazledean, 37 miles S.W. of Mackay, **Mt. Spencer Goldfield.** *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, p. 10 (1901).

4119. ——. *Assoc.with* Limonite, in quartz. *Loc.* Sel. (661), on hill nr. Mackay, 172 miles N.W.byN. of Rockhampton. *Co.* Carlisle (*ante*). *Assays:* (1) Gold = 1 oz. 5 dwt. per ton; (2) Gold = 3 oz. 12 dwt. per ton. *Ref.* G.S.Q. Pub. 39, p. 3 (1884).

4120. ——. *Assoc.with* Silver, in quartz. *Loc.* Albion Reef, **Normanby Goldfield,** 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 5, p. 7 (1879).

4121. ——. In quartz. Black Snake Reef, Hibenia Lease (16), and Monte Christo Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 5, p. 2 (1879), 88, pp. 3, 4 (1893), and G.S.M.

4122. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* Enterprise Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 8 (1879).

4123. ——. *Assoc.with* Iron Pyrites and Copper carbonate, in quartz. *Loc.* Eureka Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 5, p. 10 (1879), 88, p. 4 (1893), and G.S.M.

4124. ——. *Assoc.with* Iron Pyrites and Copper carbonate, in quartz. *Loc.* Faith (Just-in-Time) Reef, Normanby Goldfield (*ante*). *Assay:* Gold = 6 oz. 4 dwt. 3 gr. per ton. *Ref.* G.S.Q. Pubs. 5, p. 8 (1879), 88, p. 5 (1893), and G.S.M.

4125. ——. *Assoc.with* Copper Pyrites, Mispickel, and Siderite, in quartz reef. *Loc.* Faith (Just-in-Time) Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 88, p. 5 (1893).

4126. ——. *Assoc.with* Mispickel, Marcasite, and Copper Pyrites, in quartz. *Loc.* Frederick I. Reef, Peter's Cr., Normanby Goldfield (*ante*). *Assay:* Gold = 2½ oz. per ton. *Ref.* G.S.Q. Pub. 88, p. 1 (1893), and G.S.M.

4127. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz. *Loc.* Glengarry Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 5, p. 6 (1879), and 88, p. 3 (1893).

4128. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Tetrahedrite, Mispickel, Siderite, Ironstone, and Yellow Ochre, in quartz. *Loc.* Grace Darling Lease (11), Normanby Goldfield (*ante*). *Assay:* Gold = 16 oz. 6 dwt. 16 gr. per ton. *Ref.* G.S.Q. Pubs. 5, p. 6 (1879), and 88, p. 3 (1893).

4128a.——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Lady O'Reilly Mine, Normanby Goldfield (*ante*). *Assay:* Gold = 3 oz. 3 dwt. 5 gr., Silver = 2 oz. 9 dwt. 19 gr. per ton. *Ref.* A.R., p. 153 (1908).

4129. ——. In quartz. Lardyda Reef, Oakey Cr., Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 9 (1879).

4130. ——. *Assoc.with* Copper Pyrites and Copper carbonate, in quartz. *Loc.* Marquis Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 3 (1879).

4131. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Mt. Flat-top, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 9 (1879).

4132. ——. *Assoc.with* Copper carbonate, in quartz. *Loc.* New Zealand Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 4 (1879).

4133. ——. *Assoc.with* Silver and Iron Pyrites, in quartz. *Loc.* Perseverance Reef, Normanby Goldfield (*ante*). *Assay:* Gold = 1 oz. 4 dwt., Silver = 7 dwt. per ton. *Ref.* A.R., p. 161 (1908).

4134. ——. *Assoc.with* Copper Pyrites and Iron Pyrites, in quartz. *Loc.* Star of Hope Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 4 (1879), and G.S.M.

4135. ——. *Assoc.with* Copper Pyrites and Azurite, in quartz. *Loc.* True Blue Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 88, p. 4 (1893).

4135A. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Venture Reef, Normanby Goldfield (*ante*).

4136. ——. *Assoc.with* Marcasite, Iron Pyrites, Copper Pyrites, and Mispickel, in quartz and steatite. *Loc.* Victor Tunnel, Normanby Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 88, p. 5 (1893).

4137. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, and Copper carbonate, in quartz. *Loc.* Welcome Reef, Normanby Goldfield (*ante*). *Assay:* Gold = 8 oz. 9 dwt. 20 gr., Silver = 1 oz. 12 dwt. 16 gr. per ton. *Ref.* G.S.Q. Pubs. 5, p. 5 (1879), 88, p. 2 (1893), and G.S.M.

4138. ——. In quartz. *Loc.* Wild Scotchman Reef, Mt. High, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 9 (1879).

4139. ——. *Assoc.with* Copper carbonate, in quartz. *Loc.* Reef, S.W. of Just-in-Time Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 8 (1879).

4140. ——. *Assoc.with* Iron Pyrites, Ironstone, Malachite, and Chlorite, in quartz reef. *Loc.* Spring Cr., Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 7 (1879).

4141. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, Tenorite, Malachite, Azurite, Galena, and Ironstone, in quartz lode. *Loc.* Pine Vale Copper Mine, 9 miles S.byE. of Eton Rail. Stn., 32 miles (by rail and road) S.byW. of Mackay, **Mt. Spencer Gold and Mineral Field.** *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), 181, p. 19 (1903), and 229, pp. 12-17 (1910).

4142. ——. In quartz leaders. Yankee Flat, Miclere, 20 miles N.byW. of Clermont. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 103, p. 13 (1895).

4143. ——. In quartz leaders. Seven-mile, Copperfield, Aramac road, 16 miles N.W. of Clermont. *Co.* Rutledge; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 201, p. 75 (1906).

4144. ——. In quartz. New Reef and Pioneer Reef (Western Reefs), 25 miles N.W. of Clermont. *Co.* Rutledge (*ante*). *Ref.* G.S.Q. Pubs. 176, p. 16 (1902), and 201, p. 79 (1906).

4145. ——. *Assoc.with* Bismuthinite and Bismutite. *Loc.* Carrington Bismuth Mine, Sellheim R., **Sellheim Mineral Field,** 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.M.

4146. ——. *Assoc.with* Galena, Copper Pyrites, Cuprite, Malachite, Azurite, Native Bismuth, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Hematite, and Ironstone. *Loc.* Daisy Bismuth Mine, Ukalunda, Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, pp. 7, 8 (1889), and G.S.M.

4147. ——. *Assoc.with* Mispickel, Minium, and Galena, in lode. *Loc.* Venture Silver Mine, Sellheim Mineral Field (*ante*) *Assays:* Gold = 6 oz. 5 dwt., and 5 oz. 6 dwt. per ton. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

4148. ——. In quartz reef. **Mt. Wyatt Goldfield,** 60 miles S.S.E. of Ravenswood. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* A.R.D.M., 1895, pp. 92.

4148A. ——. In quartz. Callan's Claim, 3 miles S. of Clermont, **Clermont Goldfield.** *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 201, p. 82 (1906).

4149. ——. In quartz leaders. Crane's Mine, near New Idea Claim, 3½ miles S.S.E. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 201, p. 81 (1906).

4150. ——. *Assoc.with* Ironstone. *Loc.* Cumberland Reef, 1 mile N. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 4 (1886).

4150A. ——. *Assoc.with* Hematite, in a large siliceous body, in slate country. *Loc.* Leviathan Mine, Clermont Goldfield (*ante*). *Ref.* B.D.

4151. ——. *Assoc.with* Ironstone, in quartz and limestone. *Loc.* Lincoln Leaders, 2½ miles S.W. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 176, p. 22 (1902).

4152. ——. In quartz. Mystery No. 1 W., S. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 201, p. 81 (1906).

4153. ——. *Assoc.with* Siderite, in quartz. *Loc.* New Idea Mine, 3½ miles S.S.E. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 201, p. 80 (1906).

4154. ——. In quartz. Old Mystery Mine, S. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 201, p. 80 (1906).

4155. ——. In quartz. Sultan Reef, nr. head of Madden Gully, 2½ miles S. of Clermont, Clermont Goldfield (*ante*).

4156. ——. In clayey cement and quartz. *Loc.* Venus Reef, nr. 4-Mile Flat, 15 miles N.W. of Clermont, Clermont Goldfield (*ante*) *Ref.* G.S.Q. Pubs. 27, p. 4 (1886), 176, p. 17 (1902).

4157. ——. In quartz. Bismarck, Homeward Bound, and Welcome Reefs, Copperfield, 5 miles S.S.W. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 27, pp. 5-7 (1886).

4158. Gold. *Assoc.with* Galena and Iron Pyrites, in quartz. *Loc.* Crown Reef, Copperfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 6 (1886).

4159. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Palm-tree Reef, Copperfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 6 (1886).

4160. ——. *Assoc.with* Copper oxides, Copper carbonates, Manganese-dioxide, and Hematite, in gossan lode. *Loc.* Peak Downs Copper Mine, Copperfield (*ante*). *Assay:* Gold = 14 dwt. to 1 oz. 15 dwt., and Silver = 5 oz. per ton. *Ref.* G.S.Q. Pub. 27, p. 7 (1886).

4161. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz and chlorite. *Loc.* Star of Hope Reef, Copperfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 5 (1886).

4162. ——. In slate and diorite. Caldwell's Claim, 12-Mile Diggings, Big Ti-tree Gully, Brewery Cr., 12 miles S.W. of Copperfield, Clermont Goldfield. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 201, p. 83 (1906).

4163. ——. In quartz. Christmas, Croydon, Doctor's, Grick's, Lady Eleanor, Peter the Greek's, Prince of Wales, Robertson's, and St. Patrick's Reefs, McDonald's Flat, 3½ miles S.S.E. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 27, p. 7 (1886), 176, pp. 18, 19 (1902), and G.S.M.

4164. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Bedsford Reef, McDonald's Flat (*ante*). *Ref.* G.S.Q. Pub. 176, p. 19 (1902).

4165. ——. *Assoc.with* Iron Pyrites, Siderite, Magnesite, and Dolomite, in quartz. *Loc.* Biddy Walsh Reef, McDonald's Flat (*ante*). *Ref.* G.S.Q. Pub. 176, p. 18 (1902).

4166. ——. *Assoc.with* Marcasite, in quartz. *Loc.* Somersetshire Reef, McDonald's Flat (*ante*). *Ref.* G.S.Q. Pub. 27, p. 6 (1886), and Q.M

4167. ——. *Assoc.with* Copper Pyrites, Bornite, Chalcanthite, and Copperas, in diorite and slates. *Loc.* Mt. Clifford Mine (Rainbow, New Find, King, Queen, and Eastern Reefs), between Retreat and Ruby Crs., Mt. Clifford, 9½ miles (by road) N.W. of Anakie Rail. Stn. (Central line). *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 127, p. 2 (1898).

4168. ——. *Assoc.with* Limonite and Magnetite, in quartz and lydianstone. *Loc.* Oswald Mine, Mt. Clifford (*ante*). *Ref.* G.S.Q. Pub. 127, p. 3 (1898).

4169. ——. *Assoc.with* Hematite and Limonite, in gossan. *Loc.* Stewart and Spier's Mine, Mt. Clifford (*ante*). *Ref.* G.S.Q. Pub. 127, p. 3 (1898).

4170. ——. *Assoc.with* Limonite and Hematite, in slate. *Loc.* N. of Policeman Cr., 9 miles N. of Anakie Rail. Stn. (Central line). *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 172, p. 4 (1902).

4171. ——. *Assoc.with* Iron Pyrites and Hornblende, in quartz. *Loc.* Camboon Mine, Camboon, Upper Dawson R., 114 miles N.W.byW. of Mt. Perry Rail. Stn. *Co.* Dawson; *Dist.* Leichhardt. *Ref.* G.S.M.

4172. ——. *Assoc.with* Hyalite, in trachyte. *Loc.* Minerva Cr., Springsure, 206 miles (by rail) W.S.W. of Rockhampton. *Co.* Denison; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 103, pp. 9, 10 (1895).

4173. ——. In quartz. Koffman Diggings, Rannes, 62 miles S.byW. of Rockhampton. *Co.* Ferguson; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 8 (1901).

4174. ——. In felsite. General Gordon Mine, Yatton Goldfield, 21 miles S.W. of St. Lawrence. *Co.* Killarney; *Dist.* Liechhardt. *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

4175. ——. In calcite and quartz. Hidden Treasure Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

4176. ——. *Assoc.with* Calcite and Siderite, in quartz. *Loc.* Mountain Maid Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

4177. ——. *Assoc.with* Copper Pyrites, Chalcanthite, Orthoclase, and Calcite, in quartz. *Loc.* Red Streak Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, pp. 7, 8 (1887).

4178. ——. *Assoc.with* Ironstone and Calcite, in quartz. *Loc.* Southern Cross Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

4179. ——. *Assoc.with* Iron Pyrites, Siderite, Calcite, Steatite, and Felspar, in quartz. *Loc.* St. Catherine Reef, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

4180. ——. In felsite. Union Jack Mine, Yatton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

4181. —— (containing Silver). *Assoc.with* Mispickel and Malachite, in quartz. *Loc.* Ironbark Mine, Miner's Cr., nr. Sandy Cr., Whelan Cr., Collaroy, 25 miles N.W. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Assay:* Gold = 2 dwt. 7 gr., Silver = 1 oz. 16 dwt. 2 gr. per ton. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

4182. ——. In quartz and clay. Paddy's Cr., 1½ mile S.W. of **Rookwood** Stn., 44 miles W.byS. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 9 (1901).

4183. ——. *Assoc.with* Ironstone, in serpentine. *Loc.* Mt. Blowhard (Mt. Hope), 52 miles S.S.W. of Rockhampton. *Co.* Pakington; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 8 (1901).

4184. ——. In quartz. Gt. Kauffman and Jubilee Mines, **Rannes Goldfield,** 32 miles S. of Westwood Rail. Stn. (Central line), 63 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Pakington (*ante*). *Ref.* A.R.D.M., p. 48 (1887), and G.S.M.

4185. ——. In calcite and quartz. Erratic Star Reef, Nuggety Gully, **Mt. Britton Goldfield,** 75 miles S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

4186. ——. *Assoc.with* Iron Pyrites, in quartz and calcite. *Loc.* Keeley and Valentine's Claim, Nuggety Gully (*ante*). *Assays:* (1) Gold = 3 oz. 5 dwt. 8 gr. per ton. (2) Gold = 1 oz. 13 dwt. per ton. (3) Gold = 1 oz. 11½ dwt. per ton. *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

4187. ——. In quartz and calcite. *Loc.* Little Wanderer Reef, Nuggety Gully (*ante*). *Ref.* G.S.Q. Pub. 39, p. 4 (1887), and G.S.M.

4188. ——. In quartz and calcite. Union Reef, Nuggety Gully (*ante*). *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

4188A. ——. *Assoc.with* Silver, Iron Pyrites, and Copper, in quartz. *Loc.* "Tally Ho" Claim, Mt. Spencer Run, about 10 miles S. of Eton Rail. Stn. (**Mackay** line). *Co.* Wodehouse (*ante*). *Ref.* A.R., p. 284 (1910), and p. 317 (1911).

4189. —— (traces). *Assoc.with* Silver, Tile Ore, Minium, and Copper carbonate, in ferruginous quartz and steatite. *Loc.* Reef or Lode, 4 miles N.W. of junction of Terawoomba and Boothill Crs., 50 miles S.S-W. of Mackay. *Co.* Wodehouse (*ante*). *Assay: See* No. 7505. *Ref.* G.S.Q. Pub. 39 (1887).

4190. ——. *Assoc.with* Silver, Iron Pyrites, Mispickel, Galena, and Zinc Blende, in silicious gangue. *Loc.* Silver and Lead Deposits (Por. 46), Par. of Monsildale, 35 miles N.byW. of Esk Rail. Stn. *Co.* Canning; *Dist.* **Moreton.** *Ref.* (and *Assays*) G.S.Q. Pub. 169, pp. 2, 3 (1901).

4191. ——. *Assoc.with* Malachite and Ironstone, in quartzite. *Loc.* Blackbutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton.

4192. ——. *Assoc.with* Silver (ore) and Bismuth (native). *Loc.* Emu Cr., about 10 miles N.W. of Toogoolawah Rail. Stn. (Brisbane-Valley line), 89 miles (by rail and road) W.N.W. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* O.M.

4193. ——. *Assoc.with* Cassiterite, Wolfram, and Ilmenite, in quartz reef. *Loc.* **Crow's Nest,** 34 miles (by rail) N. of Toowoomba, 135 miles (by rail) W.byN. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 175, p. 4 (1902).

4193A. ——. *Assoc.with* Bismuthinite, in granite. *Loc.* Dattu Dattu Mine, about 25 miles N.N.E. of Crow's Nest Rail. Stn. *Co.* Cavendish (*ante*). *Ref.* (and *Assays*) Q.G.M.J., vol. 4, p. 188 (1903).

4194. ——. In quartz veins in granite. *Loc.* Near Milford Rocks Head Stn., 23 miles N.byW. of Esk Rail. Stn. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 169, p. 7 (1901).

4195. ——. *Assoc.with* Massicot, Galena, and Zinc Blende, in gossany quartz. *Loc.* Iceberg P.A., Emu Cr., **Mt. Langan,** 14½ miles W.N.W. of Kannungar Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Ref.* L.C.B., and Q.G.M.J., p. 467 (1906).

4195A. ——. *Assoc.with* Silver, Galena, and Zinc Blende, in lode. *Loc.* Langan's Mine, Mt. Langan (*ante*). *Ref.* A.R., p. 213 (1910).

4196. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Massicot, Anglesite, Galena, Mispickel, and Limonite, in gossan and slate. *Loc.* Silver Knob P.A., Emu Cr., Mt. Langan (*ante*). *Assay: See* No. 3033. *Ref.* L.C.B., and Q.G.M.J., p. 467 (1906).

4197. ——. *Assoc.with* Iron Pyrites, Massicot, Cerussite, Cassiterite, Bismuth, and Calcite, in kaolinised greisen. *Loc.* Snowdrop P.A., Emu Cr., Mt. Langan (*ante*). *Ref.* L.C.B., and Q.G.M.J., p. 467 (1906).

4198. ——. *Assoc.with* Silver, Lead, and Bismuth, in clay. *Loc.* Mt. Langan, nr. Blackbutt, 32 miles N.W. of Esk Rail. Stn. (Brisbane-Valley Br. line), 91 miles (by rail and road) N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Assay: See* No. 7507. *Ref.* A.R., p. 69 (1906).

4199. ——. *Assoc.with* Native Bismuth, in steatite. *Loc.* **Nanango Goldfield,** 135 miles (by rail) S.S.W. of Maryborough. *Co.* Cavendish (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 44 (1887).

4200. Gold. *Assoc.with* Silver. *Loc.* Mt. Powers, Nanango Goldfield (*ante*). *Ref.* A.R., p. 71 (1906).

4201. ——. *Assoc.with* Iron Pyrites, Mispickel, and Tourmaline, in quartz reef. *Loc.* Seven-mile Diggings, 7 miles S.E. of Nanango Goldfield, 123 miles N.W.byN. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* Q.G.M.J., p. 525 (1906).

4202. ——. In the debris shed from a dyke. *Loc.* W side of Diggings Gully, Seven-mile Diggings (*ante*). *Ref.* Q.G.M.J., p. 525 (1906).

4203. ——. *Assoc.with* Ironstone, Copper Oxide, and Malachite, in quartz. *Loc.* Black Diamond Mine, nr. **Taromeo**, 6 miles N.N.W. of Benarkin Rail. Stn., 117 miles (by rail and road) N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Assay:* Gold = 3 dwt. 22 gr. per ton; Silver = 5 dwt. 5 gr. per ton; Copper = trace. *Ref.* G.S.Q. Pub. 159, p. 25 (1901).

4204. ——. In gossan and quartz veins. Red Queen Mine, nr. Taromeo (*ante*). *Assays:* (1) 3 dwt. of Silver per ton, traces of Gold. (2) 10 dwt. of Silver per ton, 3 dwt. of Gold per ton. (3) 13 dwt. of Silver per ton, 13 dwt. of Gold per ton. All contain traces of Copper. *Ref.* G.S.Q. Pub. 159, p. 25 (1901).

4205. ——. *Assoc.with* Silver and Copper. Near Taromeo (*ante*). *Assays:* (1) Gold = 2 dwt., Silver = 4 oz. 10 dwt. 19 gr. per ton. (2) Gold = 1 dwt. 5 gr., Silver = 2 oz. 6 dwt. per ton; Copper = 0·27 per cent. (3) Gold = 19 gr., Silver = 2 oz. 11 dwt. 13 gr. per ton; Copper = 1·36 per cent. *Ref.* A.R., p. 71 (1906).

4206. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* On Pors. 236, 241A, and 289, Par. of **Indooroopilly**, Gold Cr., Brookfield, 10 miles (by rail) W.S.W of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Assay:* Gold = 8 gr. per ton. *Ref.* G.S.Q. Pub. 108, p. 25 (1896).

4207. ——. *Assoc.with* Iron Pyrites and Galena, in quartz reefs. *Loc.* Sel. (194), Brookfield Cr. (*ante*). *Ref.* G.S.Q. Pub. 63, p. 2 (1890).

4208. ——. In quartz. Gravel Reserve, Par. of Capalaba, about 65 chains S. of Wellington Point Rail. Stn. (**Cleveland** line), 19 miles (by rail) E. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* O.M.

4209. ——. In quartz. Por. (117), Par. of Capalaba, 2½ miles S.S.W. of Cleveland Rail. Stn., 14 miles S.byE. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.M.

4210. ——. In quartz. Cleveland G.P. Co.'s Mine, about 12 chains S.S.W. of Cleveland, 23 miles (by rail) E. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.M.

4211. ——. In quartz. William's Gold Mine, about 16 chains S.W. of Cleveland (*ante*). *Ref.* O.M.

4212. ——. In quartz. Por. 116, Par. of Cleveland, about 35 chains S.S.W. of Cleveland (*ante*). *Ref.* O.M.

4213. ——. In quartz reef. Guest's Sel., next to Gordon's, Mountain Camp, **Enoggera** Range, 6½ miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton.

4214. ——. In quartz. Jubilee Reef, Mountain Camp (*ante*). *Ref.* G.S.Q. Pub. 143, p. 9 (1899).

4215. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz reef. *Loc.* Perseverance Mine, Mountain Camp (*ante*). *Ref.* G.S.Q. Pub. 143, p. 9 (1899), and G.S.M.

4216. ——. *Assoc.with* Silver and Iron Pyrites, in quartz reef. *Loc.* Bethania, 21 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Stanley (should be Ward); *Dist.* Moreton. *Assay:* Gold = 9 dwt. 19 gr., Silver = 3 dwt. per ton. *Ref.* A.R., p. 51 (1906).

4217. ——. *Assoc.with* Copper Pyrites, Garnet, and Mispickel, in quartz and chlorite. *Loc.* P. Area, head of Ithaca Cr., Mt. Cootha, 5 miles W.byS. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Assays:* (1) Gold = 16 dwt. 8 gr., Silver = 4 dwt. 21 gr. per ton. (2) Gold = 2 oz. 19 gr., Silver = 4 dwt. 15 gr. per ton. *Ref.* G.S.Q. Pub. 98, p. 2 (1894).

4217A. ——. *Assoc.with* Silver, in quartz. *Loc.* 2 miles S. of **Kingston** Rail. Stn. (Beaudesert line), 19 miles S.E.byS. of Brisbane. *Co* Stanley (*ante*). *Ref.* A.R., p. 275 (1910).

4217B. ——. *Assoc.with* Silver and Hematito. *Loc.* Dundas, 16 miles N.N.W. of Ipswich. *Co.* Stanley (*ante*). *Ref.* A.R., p. 316 (1911).

4218. ——. In quartz. Mt. Taylor Gold Mine, Bennett's Sel. (411), 1 mile N. of Kingston Rail. Stn. (South Coast line), and 18 miles (by rail and road) S.E.byS. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 143, p. 18 (1899).

4219. ——. In quartz reef. Perseverance Mine, Nerum Cr., 6 miles S.W. of **Woodford,** 40 miles N.N.W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.M.

4219A.——. *Assoc.with* Iron Pyrites and Silver, in quartz and slate. *Loc.* Samson Cr., **Samford,** 8 miles W.N.W. of Enoggera Rail. Stn. *Co.* Stanley (*ante*). *Ref.* O.R.

4220. ——. In quartz reef. Broad's Sel., **Pine R.,** 14 miles (by rail) N.byW. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.M.

4221. ——. *Assoc.with* Manganese-dioxide, in quartzite. *Loc.* Callan's Banana Plantation, Por. 66, Par. of Bunza, ½-mile S. of Cash's Crossing. South Pine R., 11 miles N.N.W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.M.

4222. ——. In quartz reef. Pors. 192 and 193, Par. of Yeerongpilly, 1 mile W. of Yeerongpilly Rail. Stn., 5 miles (by rail and road) S. of Brisbane. *Co.* Stanley (*ante*). *Ref.* L.B. 3, p. 585 (1895), and A.R., pp. 309, 323 (1911).

4223. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz reef. *Loc.* Beaton's Sel. (68), nr. **Beenleigh** Rail. Stn. (South Coast line), 24 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Assays:* From 2 dwt. to 13 dwt. of Gold per ton. *Ref.* G.S.Q. Pub. 51, p. 6 (1889).

4224. ——. *Assoc.with* Mispickel, in quartz reef. *Loc.* Buckley's Shaft, 8 miles S. of Beenleigh Rail. Stn. (South Coast line), 32 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 36, p. 2 (1887).

4225. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Fischer's Sel. (121), ¾-mile W. of Beenleigh (South Coast line), 24 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Assays:* Gold = 5 dwt. 12 dwt. 10 gr. and 9 dwt. 12 gr. per ton. *Ref.* G.S.Q. Pub. 36, p. 1 (1887).

4225A.——. *Assoc.with* Iron Pyrites, in quartzite reef. *Loc.* Por. 239, Witty's Freehold, 1 mile W. of Ormean Rail. Stn. (South Coast line), 32 miles (by rail and road) S.W. of Brisbane. *Co.* Ward (*ante*). *Ref.* Q.G.M.J., vol. 11, p. 493.

4226. ——. *Assoc.with* Mispickel, in quartz reef. Sel. 239, Witty's Mountain (*ante*). *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 36, p. 1 (1887).

4226A.——. *Assoc.with* Silver, in quartz. *Loc.* Por. 158, Par. of Boyd, 4 miles S. of Beenleigh. *Co.* Ward (*ante*). *Ref.* (and *Assays*) Q.G.M.J., vol. 11, p. 418 (1910).

4226B.——. *Assoc.with* Mispickel and Ironstone, in quartz. *Loc.* 5 miles S. of Beenleigh Rail. Stn. (South Coast line), 29 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., p. 217 (1910).

4227. ——. *Assoc.with* Graphite, in siliceous schist. *Loc.* Carrington's Sel. (32), **Coomera R.,** 38 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Ward (*ante*). *Assay:* 7 to 10 dwt. of Gold per ton. *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

4228. ——. *Assoc.with* Limonite, in quartz. *Loc.* Jamieson's Sel. (36), Wonga Wallen Cr., Coomera R. (*ante*). *Assay:* Gold = 7 dwt. per ton. *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

4229. ——. In quartz reef. On eastern fall of steep ridge in Sel. (20), 6 miles W.S.W. of **Nerang** Rail. Stn. (South Coast line), 55 miles (by rail and road) S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton.

4230. ——. *Assoc.with* Silver. *Loc.* 4 miles S. of Nerang Rail. Stn., 49 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., p. 83 (1907).

4231. ——. *Assoc.with* Silver and Iron Pyrites, in quartz reef. *Loc.* Tunnel, nr. **Southport** (South Coast line), 50 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., 150 (1908).

4231A.——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Banner Reef, **Barmundoo** (Tableland) Goldfield, 40 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* A.R., p. 214 (1910).

4232. ——. *Assoc.with* Iron Pyrites and Felspar, in quartz reef. *Loc.* Bunker's Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

4233. ——. In quartz. Cadell and Sutherland's Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 6 (1899).

4234. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende. *Loc.* Georgina Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.M.

4235. ——. *Assoc.with* Iron Pyrites, Mispickel, Galena, and Zinc Blende, in quartz and felspar. *Loc.* Griffith's Reef, W. side of Diggers' Cr., Barmundoo Goldfield (*ante*). *Yield:* 45 lb. of the pyritous stone went 6 dwt. of gold = 15 oz. of gold per ton. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

4236. ——. In quartz reef. East of Griffith's Reef, W. of Digger's Cr., Barmundoo Goldfield (*ante*). *Assay:* Gold = 1 oz. 16 dwt., Silver = 30 oz. per ton. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

4237. Gold. In quartz reef. Martin's Mine, Barmundoo Goldfield (*ante*). *Assay:* Gold = 6 to 7 oz. per ton. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

4238. ——. *Assoc.with* Iron Pyrites. *Loc.* Mountain Rise Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.M.

4239. ——. In quartz reef. Barmundoo Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

4240. ——. In quartz. Smith's Reef, Barmundoo Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

4241. ——. In quartz. Alexia Mine, Crow's Cr., Barmundoo Run, 35 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Yield:* Gold = 3 oz. per ton. *Ref.* G.S.Q. Pub. 58, p. 5 (1890).

4242. ——. *Assoc.with* Iron Pyrites, Mispickel, and Zinc Blende, in quartz reef *Loc.* Good Hope Mine, Crow's Cr., Barmundoo Run (*ante*). *Assays:* Gold = 4 oz. 3 dwt. 7 gr., 1 oz. 8 dwt. 14 gr., and 1 oz. 8 dwt. 14 gr.; Silver = 6 oz. 15 dwt., 5 oz. 17 dwt. 14 gr., and 2 oz. 3 dwt. 6 gr. per ton. *Ref.* G.S.Q. Pub. 58, p. 5 (1890).

4243. ——. In quartz reef. Mabel Mine, Crow's Cr., Barmundoo Run (*ante*). *Ref.* G.S.Q. Pub. 58, p. 5 (1890).

4244. —— (traces). *Assoc.with* Silver, Ironstone, Wollastonite, Epidote, and Copper carbonate, in limestone, garnet rock, and granite. *Loc.* P.A. (49), Diglum Cr., Barmundoo Stn., 21 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 162, pp. 6, 9 (1901).

4245. ——. *Assoc.with* Silver, Azurite, Malachite, and Mispickel, in quartz, ironstone, and clay. *Loc.* P.A. (56), Diglum Cr., Barmundoo Stn. (*ante*). *Ref.* G.S.Q. Pub. 162, p. 9 (1901).

4246. ——. In quartz reef. Dream Extd. Gold Mine, Mt. Jacob, **Bompa Goldfield,** 44½ miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 125, p. 20 (1897).

4247. ——. In decomposed granite dyke. *Loc.* Mt. Agnes and Sleeping Beauty Claims, Jacob's Knob, Bompa Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

4248. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Mt. Jacob Mine (Garden, Mt. Fairbrother and Stand-by reefs), Bompa Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 7 (1880).

4249. ——. *Assoc.with* Iron Pyrites, Mispickel, Copper Pyrites, and Zinc Blende, in quartz reef. *Loc.* Roger's Claim, Bompa Goldfield (*ante*). *Assay:* Gold = 16 dwt. 8 gr., Silver = 1 oz. 9 dwt. 9 gr. per ton. *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

4250. ——. In quartz. Smart, Wills, and Roger's Reef, 3 miles W. of Mt. Jacob, 47 miles S.byE. of Gladstone, Bompa Goldfield. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

4251. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Stand-by Reef, Bompa Goldfield (*ante*). *Assay:* Gold = 9 dwt. 19 gr., Silver = 1 oz. 15 dwt. per ton. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

4252. ——. *Assoc.with* Calcite, in a casing of calcareous clay. *Loc.* Alexandra Reef, Boyne Range, above New Zealand Gully, 5 miles S.E. of Calliope, 17 miles S.E. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 5 (1885).

4253. ——. *Assoc.with* Calcite, in quartz. *Loc.* Mitchell Reef, Boyne Range, New Zealand Gully (*ante*). *Ref.* G.S.Q. Pub. 21, p. 5 (1885).

4254. ——. *Assoc.with* Galena, in quartz reef. *Loc.* Federal Block G.M.L. (52), Eastern Boyne Goldfield, 26½ miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 150, p. 9 (1900).

4255. ——. In quartz reef. *Loc.* Golden Spur G.M. Lease (50), **Eastern Boyne Goldfield** (*ante*). *Ref.* G.S.Q. Pub. 150, p. 9 (1900).

4256. ——. In quartz reef. *Loc.* True Blue G.M. Lease (44), Eastern Boyne Goldfield (*ante*). *Ref.* G.S.Q. Pub. 150, p. 10 (1900), and G.S.M.

4257. ——. *Assoc.with* Iron Pyrites in chloritic quartz. *Loc.* Connemara Reef, **Calliope Goldfield,** 12 miles S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 21, p. 4 (1885), 58, p. 8 (1890).

4258. ——. *Assoc.with* Iron Pyrites, in chloritic quartz. *Loc.* John Bull Reef, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 8 (1890).

4259. ——. In quartz reef. Sheep Station Hill, Calliope Goldfield (*ante*). *Ref.* G.S.M.

4259a. ——. In quartz. *Loc.* **Fig-tree Prov. Goldfield,** 36 miles S.W.byS. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* O.R.

4260. ——. *Assoc.with* Silver, Galena, Cerussite, Anglesite, Massicot, Minium, Hematite, and Limonite. *Loc.* Bompa Silver-Lead Mine, Glassford Cr., 2 miles W.byS. of Littlemere Rail. Stn.. (Boyne Valley line), 53 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 159, pp. 7, 8 (1901).

4261. ——. In quartz. Mt. Alice P.C. and Caledonia P.C., etc., Mines, **Maxwelton Goldfield,** 35½ miles S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* A.R.D.M., pp. 77, 78 (1892).

4262. ——. In quartz. Lady Griffith, United Rise, and other Lines of Reef, **Monal Goldfield,** 42½ miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* A.R.D.M., pp. 77, 78 (1892).

4263. ——. *Assoc.with* Copper carbonate, Garnet, Rock Crystal, and Calcite. *Loc.* Mt. Grim, 3½ miles W.S.W. of Mt. Alma Stn., 30 miles W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 24 (1904).

4263A. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, and Ironstone, in crystalline limestone, etc. *Loc.* Mt. Hector Copper Mine, E. side of Dawes Range, 60 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* Q.G.M.J., vol. 4, pp. 174-177 (1903).

4264. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, Galena, Zinc Blende, and Calcite, in quartz. *Loc.* Advance Reef, **Norton Goldfield,** 33 miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Assay:* Gold = 2 oz. 7 dwt. 9 gr., Silver = 24 oz. 8 dwt. 22 gr. per ton. *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), 208, p. 11 (1907).

4264A. ——. *Assoc.with* Stibnite, in quartz. *Loc.* Advance Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 6 (1885).

4265. ——. *Assoc.with* Silver, Iron Pyrites, Zinc Blende, and Galena, in quartz and calcite. *Loc.* All Nations Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 21, p. 8 (1885), and 208, p. 13 (1907).

4266. ——. *Assoc.with* Iron Pyrites, Mispickel, Scorodite, and Copper Pyrites, in quartz. *Loc.* Bald Hills Reef, Norton Goldfield (*ante*). *Assays:* Gold = 19 dwt. and 1 oz. 4 dwt., and Silver = 7 oz. per ton; Copper = 1½ and 3 per cent. *Ref.* G.S.Q. Pub 208, pp. 13, 14 (1907).

4267. ——. *Assoc.with* Silver, Iron Pyrites, Galena, Zinc Blende, and Malachite, in quartz. *Loc.* Brigham Young (Tadman's Tapautohaunga), Norton Goldfield (*ante*). *Refs.* (and *Assays*) G.S.Q. Pub. 208, pp. 15, 16 (1907).

4268. ——. In calcite. Calcite Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 17 (1907).

4269. ——. *Assoc.with* Silver, Iron Pyrites, Copper Pyrites, Redruthite, Azurite, Malachite, Mispickel, Scorodite, and Zinc Blende, in quartz. *Loc.* Chandler's Reef, Norton Goldfield (*ante*). *Assay:* Gold = 3 oz. 3 dwt., Silver = 4 oz. 17 dwt. per ton. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

4270. ——. *Assoc.with* Silver, Iron Pyrites, Galena, Mispickel, and Zinc Blende, in quartz. *Loc.* Conran's Reef, Norton Goldfield (*ante*). *Assay:* Gold = 7 oz., Silver = 8 oz. per ton. *Ref.* G.S.Q. Pub. 58, p. 8 (1890), and G.S.M.

4271. .—— *Assoc.with* Silver, in quartz. *Loc.* Dent's Reef, Norton Goldfield (*ante*) *Ref.* G.S.Q. Pub. 208, p. 19 (1907).

4272. ——. In quartz and calcite. Emu Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 20 (1907).

4273. ——. *Assoc.with* Iron Pyrites, Galena, Zinc Blende, and Calcite, in quartz. *Loc.* Frampton United Mine, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

4274. ——. *Assoc.with* Iron Pyrites, Mispickel, Zinc Blende, and Galena, in quartz and calcite. *Loc.* Frampton's Reef, Norton Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 208, p. 21 (1907).

4275. ——. *Assoc.with* Iron Pyrites, Galena, etc., in quartz reef. *Loc.* Friend's Mine, Norton Goldfield (*ante*). *Ref.* G.S.M.

4276. ——. *Assoc.with* Silver, Galena, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Galena Reef, Norton Goldfield (*ante*). *Assay: See* No. 3048. *Ref.* (and *Assays*) G.S.Q. Pub. 208, pp. 22-24 (1907).

4277. ——. *Assoc.with* Silver, Iron Pyrites, Mispickel, Redruthite, Galena, and Zinc Blende. *Loc.* Goody's (Carmichael's) Reef, Norton Goldfield (*ante*). *Assay:* Gold = 19 dwt., Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 208, p. 26 (1907).

4278. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Han's Big Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 27 (1907).

4279. ——. *Assoc.with* Iron Pyrites, Zinc Blende, Galena, and Calcite, in quartz. *Loc.* Hickey's Reef, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

4280. Gold. *Assoc.with* Silver, Iron Pyrites, Mispickel, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Little Wonder Reef, Norton Goldfield (*ante*). *Assay:* Gold = 1 oz. 9 dwt. 19 gr., Silver = 3 oz. 16 dwt. 9 gr. per ton. *Ref.* G.S.Q. Pubs. 21, p. 7 (1885), and 208, p. 29 (1907).

4281. ——. *Assoc.with* Silver, in quartz reef. *Loc.* Marodian Main and Leader, Norton Goldfield (*ante*). *Assays:* "Marodian Main"—Gold = 1 oz. 6 dwt., Silver = 1 oz. 8 dwt. 19 gr. per ton. "Marodian Leader"—Gold = 5½ oz., Silver = 6½ oz. per ton. *Ref.* A.R., p. 50 (1906).

4282. ——. *Assoc.with* Silver, Iron Pyrites, Zinc Blende, in quartz and calcite. *Loc.* Marodian Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 32 (1907).

4283. ——. In gossany quartz. Martin's Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 7 (1885).

4284. ——. *Assoc.with* Iron Pyrites, etc., in quartz. *Loc.* Mundic Lode, Norton Goldfield (*ante*). *Ref.* G.S.M.

4285. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Never Never Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 7 (1885).

4286. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz. *Loc.* New Constitution Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 33 (1907).

4287. ——. *Assoc.with* Iron Pyrites, Limonite, Mispickel, and Zinc Blende, in quartz. *Loc.* Paddock Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 34 (1907).

4288. ——. *Assoc.with* Iron Pyrites and Mispickel, in calcite. *Loc.* Sailor Boy Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 35 (1907).

4289. ——. In quartz. Scorpion Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 35 (1907).

4290. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Smart's Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 36 (1907).

4291. ——. In quartz. Spotted Gum Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 36 (1907).

4292. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Sulphide Reef, Norton Goldfield (*ante*). *Assay:* Gold = 1 oz. 8 dwt., Silver = 2 oz. 7 dwt. 4 gr. per ton. *Ref.* G.S.Q. Pub. 208, p. 38 (1907).

4293. ——. In quartz. Welcome Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 39 (1907).

4294. ——. *Assoc.with* Silver, Iron Pyrites, Mispickel, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Who'd-Ha'-Thought-It Reef, Norton Goldfield (*ante*). *Assay:* Gold = 5 oz. 10 dwt. 9 gr., Silver = 6 oz. 9 dwt. 14 gr. per ton. *Ref.* G.S.Q. Pubs 21, p. 6 (1885), 208, p. 39 (1907).

4295. ——. *Assoc.with* Iron Pyrites and Mispickel, in quartz reefs. *Loc.* Granite Ridges, Wattle and Cattle Crs., Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 7 (1885).

4295A.——. In quartz. **Uncle Sam Prov. Goldfield,** 24¼ miles S.byE. of Gladstone. *Co.* Clinton (*ante*).

4295B.——. *Assoc.with* Silver and Hematite, in quartz. *Loc.* Found-at-Last Gold Mine, One-tree Hill, 1 mile S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* (and *Assays*) Q.G.M.J., vol. 3, pp. 606, 607 (1902).

4296. ——. In ferruginous quartz. Duke of Brittany Reef, **Raglan Goldfield,** 34 miles (by rail) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

4297. ——. In casing of Kaolin, in quartz. Port Alma Reef, Raglan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

4297A.——. *Assoc.with* Silver and Mispickel, in quartz. *Loc.* Archer Reef, **Targinnie** Goldfield, 4 miles N.N.W. of Yarwun Rail. Stn. (North Coast line). *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* (and *Assays*) Q.G.M.J., vol. 2, pp. 529, 530 (1901).

4297B.——. *Assoc.with* Silver, in quartz. *Loc.* Targinnie Reefs, Targinnie Goldfield (*ante*). *Ref.* (and *Assays*) Q.G.M.J., vol. 2, pp. 529, 530 (1901).

4298. ——. In quartz. Allenstown, Alliance, Central Queensland, Golden Gate, Mt. Morrissey, Normanby, Recovery, and Starlight Mines, **Ulam Goldfield,** 3 miles S. of Toonda Rail. Stn. (N. Coast line), 44 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 99, pp. 7-12 (1894).

4299. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Central Queensland 1 N.E., Last Chance, Mystery, and Nil Desperandum Mines, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, pp. 5-9 (1894).

4300. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Capricornian Claim, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 6 (1894).

4301. ——. *Assoc.with* Ironstone, in felsite dyke. *Loc.* Jack Mine, Ulam Goldfield (*ante*). *Assays:* (1) Gold = 1 oz. 2 dwt. 20 gr. (2) 1 dwt. 13 gr. per ton. *Ref.* G.S.Q. Pub. 99, p. 7 (1894).

4302. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Just-in-Time Claim, Ulam Goldfield (*ante*). *Assay:* Gold = 1 oz. 9 dwt. 9 gr. per ton. *Ref.* G.S.Q. Pub. 99, p. 11 (1894).

4303. ——. *Assoc.with* Iron Pyrites, Galena, and Copper carbonate, in quartz. *Loc.* Lamona Claim, Busby's Gully, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 9 (1894).

4304. ——. *Assoc.with* Iron Pyrites and Limonite, in quartz. *Loc.* New Silksworth Claim, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 11 (1894).

4305. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Queenslander P.C., Queensland Cr., Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p 4 (1894).

4306. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc* Seaview Mine, Claim, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 11 (1894).

4307. ——. *Assoc.with* Iron Pyrites and Ironstone, in quartz. *Loc.* St. Joseph United Mine, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 10 (1894).

4308. ——. *Assoc.with* Iron Pyrites and Ironstone, in quartz. *Loc.* True Blue Reef, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 3 (1894).

4309. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Victory Claim, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 10 (1894).

4310. ——. *Assoc.with* Copper, Bull Cr., Par. of Ulogie, 36 miles S.E. of Rockhampton. *Co.* Deas Thompson; *Dist.* Port Curtis.

4311. ——. In quartz reef. Mt. Archer, 4 miles N.N.W. of Yarwun Rail. Stn. (North Coast line). *Co.* Deas Thompson (*ante*). *Ref.* G.S.M.

4312. ——. *Assoc.with* Limonite and Green Chrome silicate, in quartz. *Loc.* Federation Amalgamated Mine, **Oaks View**, 4 miles N. of Oaks Stn., 45 miles (by road) N.N.W. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 205, p. 18 (1906).

4313. ——. *Assoc.with* Magnesite, Chalcedony, and Serpentine, in gossan. *Loc.* Oaks View Consolidated Mines, Oaks View (*ante*). *Ref.* G.S.Q. Pub. 205, pp. 16, 17 (1906).

4314. ——. *Assoc.with* Serpentine and Quartz, in gossan. *Loc.* Oaks View Gold Mine, Oaks View (*ante*). *Ref.* G.S.Q. Pub. 205, pp. 7-16 (1906).

4315. ——. In quartz. Young Britannia Mine, N. of Lake Learmonth, **Canoona Goldfield**, 35 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Ref.* A.R.D.M., p. 93 (1897).

4315A. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Halliday's and King's No. 8 and May's Reefs, in Britannia Mine, Canoona Goldfield (*ante*). *Ref.* O.R. (1910).

4315B. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* King's Reefs (1 and 2), in Young Britannia Mine (*ante*). *Ref.* A.R., p. 269 (1910).

4315C. ——. *Assoc.with* Silver, Galena, Zinc Blende, and Copper Pyrites, in quartz reef in diorite country. *Loc.* Britannia Mine (*ante*). *Assay:* 6 oz. gold and 4 oz. silver per ton. *Ref.* B.D.

4316. ——. In quartz reef. **Princhester**, 44 miles N.W. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Ref.* G.S.M.

4317. ——. *Assoc.with* Silver and Copper Pyrites. *Loc.* About ¼-mile from Baree Rail. Stn., 1 mile N. of Mt. Morgan Rail. Stn., 23 miles (by rail) S.S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Assay: See* No. 2296. *Ref.* A.R., p. 47 (1906).

4318. ——. In quartz. Broadmount, mouth of Fitzroy R., 24 miles (by rail) E.byS. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

4319. ——. *Assoc.with* Galena, Zinc Blende, and Dolomite, in quartz and serpentine. *Loc.* Annie Gold Mine, **Cawarral Goldfield**, 23 miles (by rail) N.N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 125, p. 28 (1897), and G.S.M.

4320. ——. In chloritic slate. Black Jack Mine, Cawarral Goldfield (*ante*). *Ref.* Q.M.

4321. ——. *Assoc.with* Iron Pyrites, in serpentine. *Loc.* Endeavour Mine, Cawarral Goldfield (*ante*). *Ref.* Q.M.

4322. ——. *Assoc.with* Iron Pyrites and Chlorite, in quartz. *Loc.* Helena Reef, Cawarral Goldfield (*ante*). *Ref.* Q.M.

4323. Gold. *Assoc.with* Silver, Copper Pyrites, and Iron Pyrites, with traces of Zinc Blende, Galena, Azurite, Malachite, Earthy Hematite, and Red Jasper, in massive lode in quartzite, ironstone, and shale. *Loc.* Great Fitzroy Copper Mine, Mt. Chalmers, 4 miles N.byW. of New Zealand Gully Rail. Stn. (Yeppoon line), 19 miles (by rail and road) N.E. of Rockhampton, Cawarral Goldfield. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* (and *Assays*) G.S.Q. Pub. 216 (1907).

4324. ——. In quartz. Lady Margaret Mine, Cawarral Goldfield, 23 miles (by rail) N.N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* A.R.D.M., p. 107 (1908).

4325. ——. In quartz. Mt. Dalzell G.M. Co.'s Mine, Cawarral Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 28 (1897).

4326. ——. *Assoc.with* Iron Pyrites, Calcite, and Tourmaline. *Loc.* Union Gold Mine, Cawarral Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 67 (1887).

4327. ——. In quartz. Kepple Bay View Mine, New Zealand Gully, about 2½ miles N.W. of New Zealand Gully Rail. Stn. (Emu Park line), Cawarral Goldfield. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

4328. ——. *Assoc.with* Cerargyrite (Horn Silver). *Loc.* Last Chance Reef, New Zealand Gully (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 40 (1887).

4329. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* North Star Mine, New Zealand Gully (*ante*). *Assay:* Gold = 8 oz. per ton. *Ref.* G.S.M.

4330. ——. *Assoc.with* Silver, in quartz. *Loc.* Coolcoora, 14 miles (by rail) E.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* A.R., p. 47 (1906).

4331. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Pyrrhotite, in quartz reef. *Loc.* Hector Mine, on Crocodile Cr. Rd., 6 miles S. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 125, p. 27 (1897), and G.S.M.

4332. ——. *Assoc.with* Native Copper and other copper ores, in quartz reef. *Loc.* Alliance Mine, **Morinish Goldfield,** 25 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* Q.M.
